# Synthetic Aperture Sonar and Radar

06-08 September 2023

Italy

Vol.45 Pt.1 2023

Page	Contents
1	<b>Improving platform trajectories and consistent imaging based on DPCA estimates</b> Holger Schmaljohann Bundeswehr Technical Centre for Ships and Naval Weapons, Germany
9	<b>Shadow anti-coherence driven autofocus for synthetic aperture sonar</b> James Prater NSW, USA
19	<b>The effect of label corruption on synthetic aperture sonar object recognition</b> Issac D Gerg Penn State Applied Research Laboratory, USA
31	<b>Deep learning-based SAS image classification with supplementary information of imaging geometry</b> Narada Warakagoda FFI Norwegian Defence Research Establishment, Norway
39	<b>Interoperable image-based change detection</b> Rolf Klemm Atlas Elektronik, Germany
47	<b>Advanced phase-based algorithms in SAR data for maritime surveillance</b> Andrea Radius ICEYA, Finland
54	<b>Drone-borne SAR change detection techniques</b> Ali Bekar University of Birmingham, UK
62	<b>Target recognition in SAR images with low-SWAP processing hardware</b> Richard O Lane QinetiQ, UK
70	<b>Centrmetric resolution interferometric synthetic aperture sonar bathymetry maps using ensembles</b> Shannon Morgan Steele Krackan Robotics, Canada
78	<b>Challenges of automated change detection in repeat-pass SAS imagery</b> Øivind Midtgaard FFI Norwegian Defence Research Establishment, Norway
87	<b>Adding SAS image processing capability to SAR image processing software</b> Anna Crawford Defence Research and Developments Canada
93	<b>Deep transfer learning across targets and sensors with synthetic aperture sonar data</b> David P Williams Pennsylvania State University Applied Research Laboratory, USA
101	<b>Long-range interferometric synthetic aperture sonar</b> Torstein O Sæbbø FFI Norwegian Defence Research Establishment, Norway
109	<b>Separation of layover in synthetic aperture interferometry</b> Stig A V Synnes FFI Norwegian Defence Research Establishment, Norway
117	<b>Laboratory multistatic SAR CCD investigation</b> Alexander Hagelberg Cranfield University, UK

- 125 **A wavelet shrinkage approach to detect candidate point scatterers in synthetic aperture sonar images for resolution estimation**  
Marc Geilhufe FFI Norwegian Defence Research Establishment, Norway
- 133 **Passive Synthetic Aperture Sonar processing with a thin towed array**  
Agni Mantouka Sonar Solutions Architect (SEA), UK
- 141 **Intensive resolution measurements with the SAMDIS Multi-Aspect Synthetic Aperture Sonar**  
Nicolas Burlet Thales DMS, France
- 152 **Large aperture, sparse MIMO pulse-coded sonars: principles, feasibility and imaging**  
Oleksandr Malyuskin Queens University, Belfast
- 160 **Augmentation of down-looking 3D SAS data with a high frequency multibeam sonar**  
Timothy Marston University of Washington, USA
- 167 **Using shadows in circular synthetic aperture sonar imaging for target analysis**  
Yann Le Gall Thales DMS, France
- 177 **Deep learning-based focus improvement metric for synthetic aperture sonar auto-focus algorithms**  
Jeffrey Dale Naval Surface Warfare Centre USA
- 184 **Improving SAS CCD change maps via data-driven re-navigation and sub-aperture coherence masking**  
Abigail Keith Raythorn Technologies, USA
- 193 **Impacts of scene stability and backscatter coherence on automated seabed change detection**  
Emma Shouldice Defence Research and Developments Canada
- 200 **Weekly supervised automatic target Masking for synthetic aperture sonar**  
Matthew Emigh NSWC PCD, USA
- 208 **GPU ray tracing for high-fidelity acoustic simulation**  
David Pate Georgia Technical Research Institute, USA
- 216 **SeaSAR: A high-fidelity simulation of maritime SAR images**  
David Pate Georgia Technical Research Institute, USA
- 229 **Reverse-path multi-static SAR for moving target detection in clutter**  
Daniel Andre Cranfield University, UK
- 236 **Laboratory multistatic sparse 3D SAR investigation**  
Richard Welsh Cranfield University, UK
- 244 **Advanced autonomy for UUV-based synthetic aperture sonar**  
Bryan D Todd NSWC, PC, USA
- 256 **Comparison of model selection techniques for seafloor scattering statistics**  
Derek R Olsen Norwegian Defence Research Establishment, Norway
- 263 **Self-supervised learning for improved SAS target recognition**  
Brandon Sheffield NSWC, USA
- 272 **Future marine applications in synthetic aperture radar: ocean surface currents from space**  
Neil Stapleton Dstl, UK

## Additional Paper

- 292 **Isolation of Resonant Wave Features in Low-Frequency Wideband SAS Data Products from Cylindrical Shells**  
AJ Hunter University of Bath
