Volume 12607

Proceedings of SPIE 0277-786X, V. 12607

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Technology and Measurement for Industrial Applications Conference*, edited by Takeshi Hatsuzawa, Yukitoshi Otani, Rainer Tutsch, Toru Yoshizawa, Proc. of SPIE 12607, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

OPTICAL TECHNOLOGY AND MEASUREMENT FOR INDUSTRIAL APPLICATIONS CONFERENCE

- 12607 02 **Interferometric surface inspection with movable measurement spot: high-speed OCT imaging for thickness and topography in industry** [12607-1]
- 12607 03 **Off-axis, slit based MTF measurements at PTB** [12607-2]
- 12607 04 **Autocollimation employing optical frequency comb** [12607-3]
- 12607 05 **In situ industrial process monitoring using a broadband lidar** [12607-4]
- 12607 06 **AI inference of multiphysics properties using hyperspectral data** [12607-5]
- 12607 07 **Vision-based crop row detection system for UAV-based weed detection in arboriculture** [12607-6]
- 12607 08 **One-step measurement of micro-periodic structures from single diffraction image** [12607-7]
- 12607 09 **Measurement of the diameter of the thinned optical fiber based on the spatial period of standing wave** [12607-8]
- 12607 0A **Design and evaluation of a low-cost delta-robot for UAV-based weed control in horticulture** [12607-9]
- 12607 0B **Reduction of influence caused by mirror tilting in phase measuring deflectometry** [12607-10]
- 12607 0C **Semantic segmentation of urban areas using relabeled heterogeneous unmanned aerial datasets and combined deep learning network** [12607-11]
- 12607 0D **Compensated laser vibrometry using wavefront-reversal via a MEMS SLM integrated with a metasurface retro-array: a proposal** [12607-12]
- 12607 0F **New type of optical machine system for object depth sensing** [12607-14]
- 12607 0G **Autonomous fawn tracking system based on drone images and CNNs** [12607-15]
- 12607 0H **Evaluation of different sampling strategies for pointwise measurement of aspheric surfaces** [12607-16]

- 12607 OI **Phase-shifting interferometry measure stress of HfO₂/SiO₂ anti-reflector multi-layer deposited with ion-assisted deposition** [12607-17]
- 12607 OJ **High-resolution Shack-Hartmann wavefront sensing using LIFT** [12607-18]
- 12607 OK **Parallel optics metrology using a Shack-Hartmann approach** [12607-19]
- 12607 OL **Octuple-pass configuration for sensitivity improved reflectance confocal system** [12607-20]
- 12607 OM **Reflection and transmission ellipsometry measurement under incoherent superposition of light** [12607-21]
- 12607 ON **Double-reflection confocal probe for surface profiling microscopy with improved axial resolution** [12607-22]
- 12607 OO **Nano-application for structural color generation** [12607-23]
- 12607 OP **Prediction uncertainty evaluation of deep learning ghost imaging based on the feature map** [12607-24]
- 12607 OT **Luminous target marker for vision based motion error measurement of machine tools** [12607-28]
