Volume 12664

Proceedings of SPIE 0277-786X, V. 12664

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Modeling and Performance Predictions XIII*, edited by Mark A. Kahan, Proc. of SPIE 12664, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MODELING AND DESIGNS I

- 12664 02 **Integration of wave optics and ray optics simulations for advanced display design** [12664-1]
- 12664 03 **Multicriteria optimization and correction of the electron beam spot with the multivariate Gaussian distribution and the spot sizes by the full width at half maximum as objective functions** [12664-2]
- 12664 04 **Poke: an open-source, ray-based physical optics platform** [12664-5]

MODELING AND DESIGNS II

- 12664 05 **Ab-initio modeling of bend-losses in silicon nitride waveguides from visible to near-infrared** [12664-6]
- 12664 06 **Deterministic geometrical analysis of sequential stray light from ideal baffles and extended sources** [12664-8]

FABRICATION AND TESTING

- 12664 07 **Zernike based wavefront alignment in a deployable optic control test bed** [12664-11]
- 12664 08 **Loss-engineering of a bimodal waveguide interferometer: an optimized silicon nitride platform for chemical and biological sensing** [12664-12]

MATERIALS, THERMO-OPTICS, AND END-TO-END MODELS/HW I

- 12664 09 **Integrated modeling of the James Webb Space Telescope: pre-launch predictions, flight performance, and lessons learned (Keynote Paper)** [12664-13]

MATERIALS, THERMO-OPTICS, AND END-TO-END MODELS/HW II

- 12664 0A **Modeling thermal stability of 1.5-m AMTD ULE® mirror using 'as-built' CTE data** [12664-14]

- 12664 0B **Nonlinear focal shift in an ultraintense light beam focused by a lens in air** [12664-17]
- 12664 0C **Closed loop light ray trajectories in transformation optic devices** [12664-18]

COMMUNICATIONS AND POWER

- 12664 0D **Performance analysis of imaging receivers for 6G laser-based optical wireless communications** [12664-19]
- 12664 0E **Non-imaging receiver design for terabit laser-based optical wireless communication in 6G data center networks** [12664-20]
- 12664 0F **Design of face-to-face optical wireless power transmission system based on robot arm visual tracking** [12664-23]

GRATING AND DIFFRACTIVE OPTICS

- 12664 0G **Time-aware Fourier optics: modeling implications and device performance predictions** [12664-24]

POSTER SESSION

- 12664 0H **Non-sequential ray tracing optical modeling and performance predictions: methodology for evaluating operational performance in imaging and spectral instruments from human eye to large-aperture space telescopes** [12664-27]
- 12664 0I **Characterization of transmission in a multiple core-offset Mach-Zehnder interferometer filter using single-mode fiber** [12664-28]
- 12664 0J **Inverse optical design using quasi-two-dimensional partially coherent imaging for photolithography overlay metrology** [12664-29]
- 12664 0K **Coherent data system and slow data transmission in a single fiber with ITU grid spacing** [12664-30]
- 12664 0L **Effect of astigmatism on the beam quality factor of Hermite-Gauss laser beams** [12664-33]
