SPIE

**Volume 12676**

Proceedings of SPIE 0277-786X, V. 12676

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *UV/Optical/IR Space Telescopes and Instruments: Innovative Technologies and Concepts XI*, edited by Allison A. Barto, Fanny Keller, H. Philip Stahl, Proc. of SPIE 12676, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

---

## HABITABLE WORLDS EXPLORER I: JOINT SESSION WITH CONFERENCES 12676 AND 12677

---

- 12676 03 **UVOIR to far-IR mirror technology development: year 1 status** [12676-20]
- 12676 04 **ULTRAsim: an integrated modeling environment for large, segmented telescopes with ultra-stable wavefronts** [12676-21]

---

## HABITABLE WORLDS EXPLORER II: JOINT SESSION WITH CONFERENCES 12676 AND 12677

---

- 12676 06 **Space interferometer imaging limitations due to GPS uncertainties and parasitic forces in LEO** [12676-23]
- 12676 08 **Assessment of near-angle scatter on exo-Earth coronagraphy** [12676-25]

---

## LARGE MISSIONS AND PROBES: JOINT SESSION WITH CONFERENCES 12676 AND 12677

---

- 12676 09 **DUET: dual use exoplanet telescope** [12676-26]
- 12676 0A **OPA! The Original PolyOculus Array: a status update** [12676-27]
- 12676 0B **Optical and opto-mechanical design of the PRIMA telescope** [12676-28]
- 12676 0C **Optical and opto-mechanical design of spectrometers for PRIMA** [12676-29]

---

## COATING TECHNOLOGIES

---

- 12676 0F **Electron beam-generated plasmas in NF<sub>3</sub> environments for the passivation of UV/O/IR mirrors** [12676-14]
- 12676 0G **Environmental and polarization characterizations of E-beam plasma-based AlF<sub>3</sub>-passivated aluminum mirrors for astronomical telescopes** [12676-15]

12676 OH **UV to IR high-efficiency antireflective surface modification of freeform and cylindrical lenses for space platform optical instrumentation** [12676-17]

12676 OI **Cryolite overcoated aluminum reflectors for far-ultraviolet spectroscopy** [12676-18]

---

#### SOLAR AND SPACE WEATHER MISSIONS

---

12676 ON **Development of multi-layer achromatic metasurface Risley prisms for a scanning coronal and heliospheric imager** [12676-9]

---

#### ROMAN SPACE TELESCOPE

---

12676 OO **The Roman Space Telescope optical system: status, test, and verification** [12676-1]

12676 OP **Roman optical telescope integration status and preparation for test** [12676-2]

12676 OQ **Systems engineering integration and test of the wide field opto-mechanical assembly** [12676-3]

12676 OR **Science filter performance summary for the Roman Space Telescope Wide Field Instrument** [12676-4]

---

#### SMALL-MID MISSION CONCEPTS

---

12676 OS **Opto-mechanical design, alignment, and test of the SPHEREx telescope: a cryogenic all-aluminum freeform system for the astrophysics medium explorer mission** [12676-5]

12676 OT **Europa Imaging System wide angle camera (EIS WAC) optical design, fabrication, and test** [12676-6]

12676 OU **Optical design and analysis of the ROKITS cameras** [12676-7]

12676 OV **The PICTURE-C exoplanetary imaging balloon mission: a refactored thermal model and framework for an end-to-end model for balloon borne coronagraphs** [12676-8]

---

#### POSTER SESSION

---

12676 OW **Optimizing design decision-making for remote sensing instrument specification via tolerance sensitivity analysis of Ritchey–Chrétien telescope** [12676-31]

12676 OX **Design of a visible and infrared common optical system with the same effective focal length** [12676-32]

- 12676 0Y **Development of a dual-camera terrain imager for increasing swath width in space exploration**  
[12676-33]
- 12676 0Z **Investigating the impact of ghost images on the accuracy of modulation transfer function measurement using knife-edge method** [12676-34]
- 12676 10 **Optimizing the alignment of the Korsch telescope with consideration of gravitational effects**  
[12676-35]
- 12676 11 **On-orbit thermal control system design and analysis for space optical telescope ROKITS**  
[12676-36]
- 12676 12 **Linear polarizer design for application in the far-ultraviolet spectral range** [12676-37]
