**Volume 12683**

Proceedings of SPIE 0277-786X, V. 12683

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Terahertz Emitters, Receivers, and Applications XIV*, edited by Manijeh Razeghi, Mona Jarrahi, Proc. of SPIE 12683, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

---

## TERAHERTZ EMITTERS

---

- 12683 02 **Topological materials as promising candidates for tuneable helicity-dependent terahertz emitters (Invited Paper)** [12683-19]
- 12683 03 **How to use terahertz emission spectroscopy for wide bandgap semiconductor evaluation (Invited Paper)** [12683-6]

---

## TERAHERTZ IMAGING AND MANIPULATION

---

- 12683 04 **Active multipixel photoconductive emitter technology for THz beam shaping and steering (Invited Paper)** [12683-24]
- 12683 05 **Terahertz broadband anti-reflection moth-eye structures and its applications (Invited Paper)** [12683-27]

---

## TERAHERTZ SCANNING OF ULTRAFAST PHENOMENA

---

- 12683 06 **Controlling and videotaping single-molecule dynamics with atomically confined terahertz transients (Invited Paper)** [12683-30]

---

## TERAHERTZ IMAGING AND SENSING

---

- 12683 07 **Blackbody source-based terahertz nondestructive testing with augmented reality (Invited Paper)** [12683-3]
- 12683 08 **THz electronics for sensing and communication applications (Invited Paper)** [12683-5]

---

## PHOTOCONDUCTIVE TERAHERTZ EMITTERS AND DETECTORS

---

- 12683 09 **Photonic double-mixing by UTC-PD-integrated HEMT for optical-to-sub-THz/THz carrier frequency down-conversion (Invited Paper)** [12683-34]
- 12683 0A **Group IV terahertz photoconductive emitter (Invited Paper)** [12683-35]

- 12683 0B **Tailoring ultrafast photoconductive response in GeS and GeSe by zero-valent Cu intercalation (Invited Paper)** [12683-37]
- 12683 0C **Photoconductive metasurfaces for near-field terahertz sources and detectors (Invited Paper)** [12683-38]

---

#### TERAHERTZ DEVICES BASED ON GRAPHENE AND VACUUM ELECTRONICS

---

- 12683 0D **Recent advances in the research of graphene-based plasmonic metamaterial for terahertz laser transistors (Invited Paper)** [12683-39]
- 12683 0E **Fast and sensitive THz detection by an asymmetric-dual-grating-gate epitaxial-graphene-channel FET based on plasmonic and photothermoelectric rectification effects (Invited Paper)** [12683-41]
- 12683 0F **Terahertz detectors based on vacuum electronics (Invited Paper)** [12683-42]

---

#### TERAHERTZ SPECTROSCOPY

---

- 12683 0G **Exploring dynamics, disorder, and anharmonicity in THz spectra of crystalline materials (Invited Paper)** [12683-8]
- 12683 0H **Analysis of terahertz spectra of water and NaCl solutions obtained in attenuated total reflectance configuration (Invited Paper)** [12683-9]
- 12683 0I **Platform for next-generation terahertz application studies (Invited Paper)** [12683-10]

---

#### HIGH-INTENSITY TERAHERTZ EMITTERS

---

- 12683 0J **Multi-cycle multi-hundred-kW-peak-power far-infrared parametric source at 53 $\mu$ m (Invited Paper)** [12683-13]
- 12683 0K **THz dual-pulse generation and manipulation with high degrees of freedom (Invited Paper)** [12683-14]
- 12683 0L **Controllable narrowband terahertz generation from air plasma induced by two-color laser pulse train** [12683-16]
- 12683 0M **High-energy multicycle THz pulse generation in artificial PPLN crystal** [12683-17]

**POSTER SESSION**

---

- 12683 0N     **3D printing compatible multimode terahertz negative curvature hollow-core fibers** [12683-43]
- 12683 0O     **Investigation of 3D printing compatible THz chemical sensing platform using negative curvature fibers with elliptical cladding elements** [12683-44]
