SPIE

Volume 12692

Proceedings of SPIE 0277-786X, V. 12692

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Quantum Communications and Quantum Imaging XXI*, edited by Keith S. Deacon, Ronald E. Meyers, Proc. of SPIE 12692, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510665989

ISBN: 9781510665996 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

QUANTUM INFORMATION AND QUANTUM COMPUTING I

- 12692 02 **Continuous-variable quantum computation with optical quantum entanglement and quantum teleportation in time domain (Invited Paper)** [12692-19]
- 12692 03 **Characterizing the noise output by a fiber-based entangled photon source (Invited Paper)** [12692-20]

QUANTUM TECHNOLOGY

- 12692 04 **Contextuality and inequality violations in a three-path interferometer (Invited Paper)** [12692-24]
- 12692 05 **A -0.64dB loss hybrid coupling platform with high stability for SOI single photon source (Invited Paper)** [12692-25]
- 12692 06 **Investigation of squeezed light propagation in thermal fluctuation (Invited Paper)** [12692-26]
- 12692 07 **Time-multiplexed programmable continuous-variable photonic quantum computing (Invited Paper)** [12692-27]
- 12692 08 **Wavefront division quantum interferometry** [12692-28]

QUANTUM IMAGING AND QUANTUM SENSING II

- 12692 09 **Table-top demonstration of interferometric imaging using path-entangled single photons (Invited Paper)** [12692-5]
- 12692 0A **Tomographic imaging of cold atoms and sensing of external fields in three dimensions (Invited Paper)** [12692-8]

QUANTUM COMMUNICATIONS I

- 12692 0B **Portable and integrated entanglement sources for quantum communication (Invited Paper)** [12692-10]

12692 0C **Quantum-enhanced secure-link architecture with quantum stream cipher Y-00 and post-quantum cryptography: basic structure and experiment (Invited Paper)** [12692-11]

QUANTUM COMMUNICATIONS II

12692 0D **Experimental characterization of entanglement characteristics in free-space quantum communication links (Invited Paper)** [12692-12]

POSTER SESSION

12692 0E **Integrated photonics based on nonlinear optical scattering** [12692-36]

DIGITAL POSTER SESSION

12692 0F **Undetected photon interference measurements on a silicon chip** [12692-2]

12692 0G **Minimized transient wavelength and power variations on the DFBLDs for 200Mbit/s DPS phase shift keying** [12692-9]
