

PROCEEDINGS OF SPIE

Unconventional Imaging, Sensing, and Adaptive Optics 2023

Jean J. Dolne
Mark F. Spencer
Santasri R. Bose-Pillai
Editors

21–24 August 2023
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 12693

Proceedings of SPIE 0277-786X, V. 12693

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Unconventional Imaging, Sensing, and Adaptive Optics 2023*, edited by Jean J. Dolne, Mark F. Spencer, Santasri R. Bose-Pillai, Proc. of SPIE 12693, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

UNCONVENTIONAL IMAGING I

- 12693 02 **Towards creation of an asymmetric vision environment** [12693-1]
- 12693 03 **Evaluating sparse aperture imaging performance: simulation and experiment** [12693-2]
- 12693 04 **Multiplexed, multi-wavelength 3D digital holographic imaging methods with range unwrapping** [12693-3]
- 12693 05 **One-sided imaging of non-fluorescing objects through scattering media** [12693-5]
- 12693 06 **Facial classification from multispectral imagery through atmospheric turbulence using machine learning** [12693-6]

UNCONVENTIONAL SENSING I

- 12693 08 **Dynamic DH-MBIR for low-latency wavefront estimation in the presence of atmospheric boiling** [12693-8]
- 12693 09 **Optical sensing in high dimensions** [12693-9]

UNCONVENTIONAL SENSING II

- 12693 0A **Outlandish sensor array designs: what could be achieved with volumetric detector elements** [12693-10]
- 12693 0B **Development of a tilted shearing interferometer wavefront sensor** [12693-11]
- 12693 0C **Branch-point detection using a Shack-Hartmann wavefront sensor** [12693-12]
- 12693 0D **Gas density measurement in high-pressure conditions by spontaneous Rayleigh-Brillouin scattering** [12693-13]

UNCONVENTIONAL ADAPTIVE OPTICS

- 12693 OE **Measuring turbulence using spatially encoded targets** [12693-15]
- 12693 OF **The MAPS adaptive secondary mirror: first light, laboratory work, and achievements** [12693-16]
- 12693 OG **Shack-Hartmann wavefront reconstruction by deep learning neural network for adaptive optics** [12693-17]

ATMOSPHERIC CHARACTERIZATION I: JOINT SESSION WITH CONFERENCES 12691 AND 12693

- 12693 OJ **Sonic anemometry used as a baseline for turbulence experiments** [12693-20]
- 12693 OK **Development of a stereo SCIDAR system in the ASALT lab** [12693-21]
- 12693 OL **Attempting to understand the vertical distribution of turbulence in the surface layer from multi-camera time-lapse imagery** [12693-22]
- 12693 OM **Profiling a low, horizontal path with SMASH** [12693-23]

ATMOSPHERIC CHARACTERIZATION II: JOINT SESSION WITH CONFERENCES 12691 AND 12693

- 12693 ON **Quantification of surface layer turbulence using sensible heat values from energy balance versus aerodynamic methods (Invited Paper)** [12693-24]
- 12693 OO **Sonic anemometry with simulated and measured atmospheric turbulence** [12693-25]
- 12693 OP **A new approach to profiling atmospheric turbulence using a dynamically ranged Raleigh beacon system** [12693-26]
- 12693 OQ **Optical-turbulence characterization of a littoral test environment using a Shack-Hartmann wavefront sensor** [12693-27]

UNCONVENTIONAL IMAGING II

- 12693 OR **Shock-wave tolerant phase reconstructor for the Shack-Hartmann wavefront sensor** [12693-64]
- 12693 OS **Imaging asymmetry in the presence of a bright interferent** [12693-29]
- 12693 OU **Maximizing the non-line-of-sight information content retrievable from passive scattered light fields: a comparison between visible, long wave infrared, and terahertz radiation** [12693-32]

EVENT-BASED SENSING I

- 12693 0V **Event-based camera refractory period characterization and initial clock drift evaluation**
[12693-33]
- 12693 0W **Analysis of event-based sensor system performance with moving object detection tasks**
[12693-34]
- 12693 0X **InSPIRED: single pixel imaging regularized by EBS data** [12693-35]
- 12693 0Y **Optical contrast amplification for enhancing event-based vision** [12693-36]

EVENT-BASED SENSING II

- 12693 10 **Hybrid event and frame-based system for target detection, tracking, and identification**
[12693-38]
- 12693 11 **Off-axis laser scatter detection with an event camera** [12693-39]
- 12693 12 **An event-driven light field, digital coded exposure imager architecture for per-pixel image
regeneration in post processing** [12693-40]
- 12693 13 **Modeling and decoding event-based sensor lightning response** [12693-41]

AERO-OPTICAL EFFECTS

- 12693 14 **Experimental investigation into the effects of shock waves on Shack-Hartmann wavefront
sensor measurements (Invited Paper)** [12693-42]
- 12693 15 **Experimental and computational investigation of laser beam propagation through a free shear
layer** [12693-43]
- 12693 16 **Optical effects of a temperature-mismatched supersonic mixing layer** [12693-44]
- 12693 17 **Studies of local shock effects on Shack-Hartmann and digital holography wavefront sensors**
[12693-45]
- 12693 18 **Robust, regularized wavefront reconstruction of Shack-Hartmann data in discontinuous flow**
[12693-46]

UNCONVENTIONAL IMAGING III

- 12693 1D **Compressed ultrahigh-speed and reconfigurable single-pixel imaging (Invited Paper)**
[12693-52]
- 12693 1F **A patch-based regression convolutional neural network for motion blur estimation** [12693-54]

WAVE OPTICS SIMULATIONS AND EXPERIMENTS

- 12693 1I **Semi-analytic simulation of closed-form sources propagating through turbulence (Invited Paper)** [12693-56]
- 12693 1J **Zernike decomposition of aberrations in strong atmospheric turbulence** [12693-57]
- 12693 1K **Simulating light scattering in atmospheric laser propagation simulations** [12693-58]
- 12693 1L **Measurement of turbulence parameters induced by the reflective atmospheric turbulence simulator** [12693-59]

POSTER SESSION

- 12693 1M **Zernike polynomials vs circular Bessel functions to represent aberrated wavefronts** [12693-60]
