Volume 12728

Proceedings of SPIE 0277-786X, V. 12728

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Remote Sensing of the Ocean, Sea Ice, Coastal Waters, and Large Water Regions 2023*, edited by Charles R. Bostater Jr., Xavier Neyt, Proc. of SPIE 12728, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Conference Committee</i>
vii	<i>Preface</i>

SENTINEL-RELATED SATELLITE SCIENCE

12728 02	Validation of Sentinel-2/MSI water reflectance and water quality products in the turbid waters of Río de la Plata estuary using fixed automated hyperspectral in situ observations (Invited Paper) [12728-1]
12728 03	Improving operational ocean color coverage using a merged atmospheric correction approach [12728-2]
12728 04	Turbid water sun glint removal for high resolution sensors without SWIR [12728-4]

UPPER WATER-COLUMN SENSING

12728 05	Development of a flash lidar system for remote detection of oil in water (Invited Paper) [12728-5]
12728 06	Preliminary exploration of underwater applications of hyperspectral lidar [12728-6]
12728 07	CO₂ Raman lidar design for marine drone [12728-7]
12728 08	Tracking shifting estuaries with remote sensing techniques to aid lifeboat rescue services [12728-9]

WATER SYSTEMS ANALYSIS SENSING

12728 09	Coastal water feature extraction using airborne hyperspectral imagery in shallow estuarine water [12728-23]
12728 0A	Second derivative water reflectance spectra for phytoplankton species detection: origin, impact, and removal of spectral wiggles [12728-11]
12728 0B	Architecture of a sensor network for marine environments to monitor water quality [12728-12]
12728 0C	Radiative transfer model for quality control of above-water hyperspectral downwelling irradiance measurements [12728-13]

- 12728 OD **Prelaunch simulation calculation for the sun glint area of the light-weighted multispectral camera for the marine science mission and calibration mode** [12728-14]
- 12728 OF **Space coast Florida turbid shallow water Monte-Carlo modeling to support satellite algorithm development for WorldView-3 imagery** [12728-16]

POSTER SESSION

- 12728 OL **Utilization of blended chlorophyll-a based on geostationary and near-polar orbiting ocean color satellite data: a case study of red tide occurred in the East Sea in 2013** [12728-20]
- 12728 OM **Monitoring coastal erosion in Cyprus: an analysis utilizing Sentinel-1 SAR data** [12728-21]
- 12728 ON **Maritime surveillance in Cyprus using Sentinel-1 SAR** [12728-22]
- 12728 OP **Polar digital space in Antarctica** [12728-25]
- 12728 OT **Two decades water quality monitoring using time-series of multispectral satellite images over the Wadden Sea supported by radiative transfer modelling** [12728-29]
- 12728 OU **Sea surface plastic waste monitoring using thermal and multispectral aerial drone sensors data processing** [12728-30]
- 12728 OV **Port aquatories, coastal zone, and sea bottom plastic waste monitoring using underwater drones data processing** [12728-31]
