**Volume 12732**

Proceedings of SPIE 0277-786X, V. 12732

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Microwave Remote Sensing: Data Processing and Applications II*, edited by Fabio Bovenga, Claudia Notarnicola, Nazzareno Pierdicca, Emanuele Santi, Proc. of SPIE 12732, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## ENVIRONMENTAL APPLICATIONS

---

12732 02 **Remote sensing scene classification with masked image modeling** [12732-4]

---

## SAR INTERFEROMETRY

---

12732 03 **Investigating radar cross sections of passive radar reflectors for C-band and X-band SAR satellite missions** [12732-5]

12732 04 **Exploiting artificial reflectors for SAR interferometry applications** [12732-6]

---

## SAR AND RADIOMETRY APPLICATIONS

---

12732 05 **Applications and level-2 products with the dual-baseline and linear-dual polarimetric MIRANDA35 airborne SAR system** [12732-10]

12732 06 **An improved RFI source detection method based on array factor property for synthetic aperture interferometric radiometer** [12732-12]

12732 07 **An interpolation-assisted matrix-completion-based method for RFI source localization in microwave interferometric radiometry** [12732-13]

---

## POSTER SESSION

---

12732 08 **The potential of SAR data for detecting deforestation in mountainous and sparse forested areas: the case of Northern Portugal** [12732-14]

12732 09 **Surface deformation monitoring using KOMPSAT-5 images and time-series InSAR technique: a case study of volcanic eruption of Kilauea, Hawaii** [12732-15]

12732 0A **Development of proto-type KOMPSAT-5 SAR image analysis tool for automatic change detection and cueing** [12732-16]
