**Volume 12738**

Proceedings of SPIE 0277-786X, V. 12738

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Technologies for Optical Countermeasures XIX*, edited by Robert J. Grasso, Marc Eichhorn, Gareth D. Lewis, Proc. of SPIE 12738, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## KEYNOTE

---

12738 03 **The disruptive impact of dynamic laser dazzling on template matching algorithms applied to thermal infrared imagery (Invited Paper)** [12738-1]

---

## LASER EFFECTS

---

12738 05 **Laser dazzling: an overview (Invited Paper)** [12738-3]

12738 06 **Laser dazzling in the visible region: some issues (Invited Paper)** [12738-4]

12738 07 **Modelling the heating of GFRP by high-energy laser radiation considering the pyrolysis of binder material** [12738-5]

12738 09 **Investigations on the laser radar cross section of optical components** [12738-7]

---

## BEAM STEERING, POINTING, AND CONTROL

---

12738 0A **Spatial channel multiplexing emulation with a 21-channel multiplane plane light converter (Invited Paper)** [12738-8]

---

## LASER SOURCES AND POWER SCALING

---

12738 0D **Investigation of the temperature dependence of core-pumped 2  $\mu\text{m}$  thulium-doped fiber lasers** [12738-11]

12738 0E **Power scaling of segmented and homogeneously doped  $\text{Ho}^{3+}$ : YAG laser resonators (Best Student Paper Award)** [12738-12]

---

## LASER AGAINST PERSONNEL

---

12738 0F **An approach for laser safety calculations for electro-optical imaging systems** [12738-13]

- 12738 0G **Investigating the impact of laser dazzling on shooting performance in a simulator environment**  
[12738-14]
- 12738 0H **Three-wavelength laser dazzler soft-countermeasure** [12738-15]
- 12738 0I **0D, 1D, and 2D boron nitride nanomaterials for countermeasures in the visible spectral range**  
[12738-16]
