

# PROCEEDINGS OF SPIE

## **Semiconductor Lasers and Applications XIII**

**Wei Li**  
**Werner H. Hofmann**  
**Ting Wang**  
*Editors*

**14–15 October 2023**  
**Beijing, China**

*Sponsored by*  
SPIE  
COS—Chinese Optical Society

*Cooperating Organizations*

Tsinghua University (China) • Peking University (China) • University of Science and Technology of China (China) • Zhejiang University (China) • Tianjin University (China) • Beijing Institute of Technology (China) • Beijing University of Posts and Telecommunications (China) • Nankai University (China) • Changchun University of Science and Technology (China) • University of Shanghai for Science and Technology (China) • Capital Normal University (China) • Huazhong University of Science and Technology (China) • Beijing Jiaotong University (China) • China Jiliang University (China) • Shanghai Institute of Optics and Fine Mechanics, CAS (China) • Changchun Institute of Optics, Fine Mechanics and Physics, CAS (China) • Institute of Semiconductors, CAS (China) • Institute of Optics and Electronics, CAS (China) • Institute of Physics, CAS (China) • Shanghai Institute of Technical Physics, CAS (China) • China Instrument and Control Society (China) • Optical Society of Japan (Japan) • Optical Society of Korea (Republic of Korea) • Australian and New Zealand Optical Society • Optics and Photonics Society of Singapore (Singapore) • European Optical Society

*Supporting Organizations*

China Association for Science and Technology (CAST) (China)  
Department of Information of National Nature Science Foundation, China (NSFC) (China)

*Published by*  
SPIE

**Volume 12761**

Proceedings of SPIE 0277-786X, V. 12761

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Semiconductor Lasers and Applications XIII*, edited by Wei Li, Werner H. Hofmann, Ting Wang, Proc. of SPIE 12761, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510667716

ISBN: 9781510667723 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Symposium Committee*  
xi *Conference Committee*

---

## **SESSION 1      APPLICATIONS OF LASER DIODES I**

---

12761 04      **Back facet coupled self-injection locking of laser to whispering-gallery-mode microresonator**  
[12761-3]

---

## **SESSION 2      SUBSYSTEMS USING LASER DIODES I**

---

12761 09      **Improving ranging performance of FMCW radar through enhancing the repeatability of transmitting signal** [12761-9]

---

## **SESSION 3      APPLICATIONS OF LASER DIODES II**

---

12761 0A      **Time-frequency transform based on frequency-to-time mapping and filtering (Invited Paper)**  
[12761-11]

12761 0C      **Wavelength tunable broadband optical frequency comb generation based on a gain-switched weak-resonant-cavity Fabry-Perot laser diode subject to external optical injection**  
[12761-13]

---

## **SESSION 4      SUBSYSTEMS USING LASER DIODES II**

---

12761 0F      **Photonic-assisted multi-format microwave signal generation based on thin-film lithium niobite (Invited Paper)** [12761-18]

12761 0G      **Measurement of materials refractive indexes based on laser self-mixing interferometry and convolutional neural network** [12761-19]

12761 0H      **De-noising of laser self-mixing interference signal based on U-net network** [12761-20]

---

## **SESSION 5      SEMICONDUCTOR LASERS I**

---

12761 0K      **Broadband microwave signal generation and processing based on optical domain controlling (Invited Paper)** [12761-22]

12761 OL **64-channel InP-based laser array with lateral a-Si reconstruction equivalent chirp gratings**  
[12761-23]

---

**SESSION 6 SEMICONDUCTOR LASERS II**

---

12761 ON **High Power conduction cooled annular diode laser stack packaged by gold-fin hard solder**  
[12761-25]

12761 OQ **Chaotic regimes in optically pumped microresonators** [12761-28]

12761 OR **Numerical investigation into the generation of platicons in microresonators driven by a gain-switched semiconductor laser** [12761-29]

---

**POSTER SESSION**

---

12761 OS **A scheme for broadband multi-channel chaotic signals generation** [12761-15]

12761 OT **High-performance chaotic secure communication based on VCSELs systems with phase modulation and dispersion compensation** [12761-16]

12761 OW **DFB semiconductor laser frequency offset locking based on heterodyne optical phase-locked loop** [12761-32]

12761 OX **Design and optimization of distributed feedback lasers with low relative intensity noise**  
[12761-33]

12761 10 **Experimental study of optical frequency comb generation in gain-switching vertical-cavity surface-emitting laser driven by various modulation signals under optical injection** [12761-37]

12761 11 **High precision estimation of optical feedback factor and linewidth enhancement using non-dominated sequential genetic algorithm II (NSGA-II)** [12761-38]

12761 12 **Hyper-polarisation of xenon nuclei by spin-exchange optical pumping with broadband diode laser in an optically opaque medium** [12761-39]

12761 13 **Development of laser display red laser device based on single crystal SiC heat sink package**  
[12761-40]

12761 14 **Research on CO<sub>2</sub> concentration detection technology based on tunable diode laser absorption spectroscopy** [12761-41]

12761 15 **Demonstration of all-optical switching system based on ultrafast tunable lasers based on DFB laser arrays** [12761-42]

- 12761 16 **Dynamic adaptive underwater laser communication acquisition pointing and tracking system**  
[12761-43]
- 12761 17 **Linearization for microwave photonic SEFDM transmission systems based on an iterative algorithm** [12761-44]
