

PROCEEDINGS OF SPIE

***Third International Conference on
Green Communication, Network,
and Internet of Things (CNIoT 2023)***

Hongzhi Wang
Shiling Zhang
Editors

28–30 July 2023
Dali, China

Organized by
Universiti Teknikal Malaysia Melaka (Malaysia)
Zhejiang University of Technology (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

SPIE

Volume 12814

Proceedings of SPIE 0277-786X, V. 12814

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Third International Conference on Green Communication, Network, and Internet of Things (CNIoT 2023)*, edited by Hongzhi Wang, Shiling Zhang, Proc. of SPIE 12814, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

WIRELESS SENSOR NETWORK AND COMMUNICATION DESIGN

- 12814 02 **Protocol consistency vulnerability detection of UAV wireless communication network in power transmission and transformation project based on improved genetic algorithm** [12814-10]
- 12814 03 **Design and implementation of radar electromagnetic environment simulation application system** [12814-11]
- 12814 04 **A centrality-based selection method for SDN measurement nodes in large-scale networks** [12814-12]
- 12814 05 **Research and design of EtherCAT master station for distributed energy systems in industrial parks** [12814-19]
- 12814 06 **Optimized carrier tracking loop design for high dynamic and low CNR conditions** [12814-2]
- 12814 07 **Detection of high spectral efficiency 16/32QAM-OFDMA downlink signals using self-mixing method and its application in PON** [12814-28]
- 12814 08 **Design of XSRP-based automatic identification system for analog modulated signals** [12814-29]
- 12814 09 **Implementation of campus supervision system based on Yolov5 and SlowFast optimization model** [12814-38]
- 12814 0A **Research on decoding technology for surface-well fluid pulse communication in oil and gas wells** [12814-40]
- 12814 0B **Fault root cause location based on machine learning in 5G core network** [12814-42]
- 12814 0C **Communication security between SDN controllers and switches based on IPsec** [12814-43]
- 12814 0D **A communication resource optimization method for multi-Qos requirements in sharing electricity** [12814-44]
- 12814 0E **Outage analysis for wireless-powered relaying radio frequency-underwater wireless optical communication systems** [12814-45]
- 12814 0F **Design and realization of line interrupt monitor module in the local area network** [12814-48]
- 12814 0G **Research and implementation of link aggregation technology based on multi-network router** [12814-5]

- 12814 OH **Hybrid forwarding strategy pressure-based routing for underwater wireless sensor network** [12814-50]
- 12814 OI **Efficient routing algorithms for maximizing network lifetime in chain-type wireless sensor networks using multiple sinks** [12814-55]
- 12814 OJ **Research on server energy consumption optimization technologies** [12814-60]
- 12814 OK **Modular design and analysis of real-time two-way communication of Internet of Things gateway** [12814-63]
- 12814 OL **Design and implementation of control software for reconnaissance communication jamming equipment** [12814-65]
- 12814 OM **Resource allocation method for multi-agent 5G communication terminals in power grids considering randomness** [12814-67]
- 12814 ON **UWB, TOF and PSO based 3D positioning optimization techniques** [12814-71]
- 12814 OO **Research on causal network modeling methods for command information systems** [12814-73]
- 12814 OP **An investigation on the convergence of satellite internet and 5G mobile communication** [12814-80]
- 12814 OQ **DDoS attack detection technology based on CNN and transformer** [12814-82]
- 12814 OR **Research on transmission line communication relaying based on deep learning route optimization algorithm** [12814-105]
- 12814 OS **Design and implementation of a Python-based front-end system for websites** [12814-86]
- 12814 OT **Fault diagnosis method for intelligent substation secondary system communication network based on improved TCN** [12814-90]
- 12814 OU **Remote closed-loop simulation method for stability control system based on 5G network** [12814-99]

GREEN INTERNET OF THINGS AND BIG DATA PROCESSING

- 12814 OV **Iterative pseudo-labeling methods for improving speech recognition** [12814-100]
- 12814 OW **Discussion on vehicle-road collaborative data distribution technology based on 5G technology** [12814-14]
- 12814 OX **A trusted key management scheme based on vehicle-to-everything** [12814-16]
- 12814 OY **Complex event processing technology for fresh food based on edge nodes** [12814-21]

- 12814 0Z **Task scheduling optimization considering SLA for big data analytics-as-a-service in cloud computing services** [12814-26]
- 12814 10 **Research on lightweight key management scheme for wind farm SCADA systems based on CL-PKC and CRT** [12814-27]
- 12814 11 **Face attribute editing based on self-attention mechanism and generative adversarial network** [12814-3]
- 12814 12 **Data security dynamic access control framework based on zero-trust** [12814-30]
- 12814 13 **The performance analysis of eDRX of RedCap in IoT** [12814-31]
- 12814 14 **Hacker community detection in online social network: a case study** [12814-35]
- 12814 15 **Application of cloud computing in the construction of power network security immune system** [12814-36]
- 12814 16 **Classification of IoT intrusion detection data based on WGAN-gp and E-GraphSAGE** [12814-39]
- 12814 17 **Research and design of teaching method on blind signature and certificateless signature in network security and cryptography** [12814-4]
- 12814 18 **The optimization of integer data formatted output based on a high-performance parsing software** [12814-47]
- 12814 19 **Application of Internet of Things technology in digital design and manufacture of mechanical products** [12814-52]
- 12814 1A **Pinning control of complex networks based on the entropy of betweenness centrality and node strength** [12814-54]
- 12814 1B **SSCDS: a secure supply chain data sharing scheme based on blockchain and IPFS** [12814-56]
- 12814 1C **Channel state information-based fall detection using IoT devices** [12814-58]
- 12814 1D **CP-ABE access control scheme based on blockchain and supporting data permissions management** [12814-62]
- 12814 1E **Research on XSS adversarial attack model based on reinforcement learning** [12814-68]
- 12814 1F **DC carrier heterogeneous overlapping clustering network and routing optimization algorithm for zero-carbon buildings** [12814-69]
- 12814 1G **Research on wind farm intrusion detection algorithm based on network time protocol message periodic feature** [12814-7]
- 12814 1H **Power marketing data cloud backup and consistent storage technology based on blockchain technology** [12814-76]

- 12814 1I **Intelligent monitoring and control of IoT technology in greenhouse farming** [12814-106]
- 12814 1J **Design of covert network active defense system based on attack behavior detection** [12814-79]
- 12814 1K **Research on Internet of Things information security based on blockchain** [12814-81]
- 12814 1L **Construction of network security situation threat awareness model based on cloud computing** [12814-83]
- 12814 1M **Research on the design of scientific research management platform based on big data analysis** [12814-9]
- 12814 1N **Complex network pinning control based on adjacency degree and resistance distance algorithm** [12814-91]
- 12814 1O **IoT-based data collection system for central air conditioning** [12814-93]
- 12814 1P **BEV-S: a simple and robust look-around perception network** [12814-98]

ARTIFICIAL INTELLIGENCE AND MECHANICAL ADAPTATION RESEARCH

- 12814 1Q **Research on bus transit route network design problem considering actual road network and depot scale** [12814-1]
- 12814 1R **A lightweight adaptive authentication protocol for power heterogeneous terminals** [12814-13]
- 12814 1S **Blockchain-based label coverage storage query scheme** [12814-15]
- 12814 1T **Internet of Things access mechanism of university education information center based on distributed information system** [12814-18]
- 12814 1U **Snort3-based wind farm behavioral characteristic inspector design** [12814-20]
- 12814 1V **Simulation of urban intelligent transportation network based on automata** [12814-22]
- 12814 1W **Anomaly detection method of substation equipment based on CenterNet** [12814-24]
- 12814 1X **Research and verification of lightweight 5GC on the public cloud** [12814-25]
- 12814 1Y **Design and implementation of scenic area information management system based on WebGIS** [12814-32]
- 12814 1Z **Design of analysis platform for dynamic circuit based on MATLAB** [12814-33]

- 12814 20 **Rail transit passenger volume forecasting method based on support vector machine** [12814-34]
- 12814 21 **The research on reconfigurable intelligent surface progress, challenges, and applications**
[12814-37]
- 12814 22 **Transformer fault diagnosis based on improved deep belief networks** [12814-49]
- 12814 23 **A deep learning-based method for HTTP payload classification in attack detection** [12814-51]
- 12814 24 **Exploration and practice of Internet of Things technology in old oilfield development** [12814-53]
- 12814 25 **Research and testing on enterprise NVMe SSD reliability technology** [12814-57]
- 12814 26 **IoT-based cabin inspection technology for ships** [12814-59]
- 12814 27 **Research on predicting trusted business relationships in autonomous system based on neural networks** [12814-6]
- 12814 28 **A universal architecture for software-defined Internet of Vessels** [12814-61]
- 12814 29 **Research on RDMA network congestion control technology** [12814-64]
- 12814 2A **Ultraviolet virus inactivation system based on semiconductor devices** [12814-66]
- 12814 2B **Load balancing routing improvement research based on contiki** [12814-72]
- 12814 2C **Research on UAV path planning based on information fusion** [12814-8]
- 12814 2D **Asynchronous and composable distributed co-simulation engine design for cloud-based industrial CAE software** [12814-85]
- 12814 2E **A multimodal resource balancing approach based on cross-attention and bidirectional associative memory networks** [12814-87]
- 12814 2F **Adaptive resource scaling of service mesh in cloud computing** [12814-89]
- 12814 2G **Data lake development status and outlook** [12814-94]
- 12814 2H **Design of international railway logistics management system based on MDA and smart contract** [12814-95]
- 12814 2I **Passive FSR development for cars detection crossing a railroad** [12814-101]
