2023 IEEE 23rd International Conference on Software Quality, Reliability, and Security (QRS) **QRS 2023**

Table of Contents

Message from the Chairs	xv
Organizing Committee	xvii
Program Committee	xviii
Steering Committee	xxii
Workshops and Special Tracks Chairs	xxiii
Keynote Speeches	xxv

Machine Learning for Anomaly Detection

Online Data Drift Detection for Anomaly Detection Services based on Deep Learning towards Multivariate Time Series	1
<i>Gou Tan (School of Systems Science and Engineering, Sun Yat-sen University, Guangzhou, China), Pengfei Chen (School of Computer Science and Engineering, Sun Yat-sen University, Guangzhou, China), and Min Li (School of Systems Science and Engineering, Sun Yat-sen University, Guangzhou, China)</i>	
Log-based Anomaly Detection of Enterprise Software: An Empirical Study	12
<i>Nadun Wijesinghe (University of Calgary, Canada) and Hadi Hemmati (York University, Canada)</i>	
Anomaly Detectors for Self-Aware Edge and IoT Devices	24
<i>Tommaso Zoppi (University of Trento), Giovanni Merlino (SmartMe.io), Andrea Ceccarelli (University of Florence), Antonio Puliafito (University of Messina), and Andrea Bondavalli (University of Florence)</i>	
LGLog: Semi-supervised Graph Representation Learning for Anomaly Detection based on System Logs	36
<i>Jialong Liu (Southwest University, China), Yanni Tang (University of Auckland), Jiamou Liu (University of Auckland), Kaiqi Zhao (University of Auckland), and Wu Chen (Southwest University)</i>	
LogContrast: A Weakly Supervised Anomaly Detection Method Leveraging Contrastive Learning ..	48
<i>Ting Zhang (Peking University, China), Xin Huang (Beijing Institute of Technology, China), Wen Zhao (Peking University, Beijing, China), Guozhao Mo (China Agricultural University, China), and Shaohuang Bian (China Agricultural University, China)</i>	

Software Defect Prediction, Analysis, and Localization

A Framework based on Deep Neural Network for Ranking-oriented Software Defect Prediction	60
<i>Jiapeng Dai (Shenzhen Technology University, China), Xiaoxing Yang (Shenzhen Technology University, China), Bingding Huang (Shenzhen Technology University, China), and Xiaofen Lu (Southern University of Science and Technology, China)</i>	
FINDGATE: Fine-grained Defect Prediction Based on a Heterogeneous Discrete Code	
Graph-guided Attention Transformer	72
<i>Jiayi Xu (China Electronic Product Reliability and Environmental Testing Research Institute), Ping Chen (China Electronic Product Reliability and Environmental Testing Research Institute), Banghu Yin (College of System Engineering, National University of Defense Technology), Zhichang Huang (China Electronic Product Reliability and Environmental Testing Research Institute), and Qiaochun Qiu (China Electronic Product Reliability and Environmental Testing Research Institute)</i>	
SyntaxLineDP: A Line-level Software Defect Prediction Model based on Extended Syntax Information	83
<i>Jianzhong Zhu (School of Computer Science and Engineering, Sun Yat-sen University, China), Yuan Huang (School of Software Engineering, Sun Yat-sen University, China), Xiangping Chen (School of Journalism and Communication, Sun Yat-sen University, China), Ruomei Wang (School of Computer Science and Engineering, Sun Yat-sen University, China), and Zibin Zheng (School of Software Engineering, Sun Yat-sen University, China)</i>	
JITBoost: Boosting Just-In-Time Defect Prediction Using Boolean Combination of Classifiers.....	95
<i>Mohammed A. Shehab (Concordia University), Abdelwahab Hamou-Lhadj (Concordia University), and Venkata Sai Gunda (IIT Kharagpur)</i>	
A Study on the Impact of Pre-trained Model on Just-In-Time Defect Prediction	105
<i>Yuxiang Guo (Beihang University), Xiaopeng Gao (Beihang University), Zhenyu Zhang (State Key Laboratory of Computer Science Institute of Software, Chinese Academy of Sciences), W.K. Chan (City University of Hong Kong), and Bo Jiang (Beihang University)</i>	
Toward Understanding Bugs in Swift Programming Language	117
<i>Qianyu Wu (Nanjing University of Posts and Telecommunications), Sijie Yu (Nanjing University of Posts and Telecommunications), Ziyuan Wang (Nanjing University of Posts and Telecommunications), Nannan Wang (Nanjing University of Posts and Telecommunications), and Yaping Feng (Nanjing University of Posts and Telecommunications)</i>	
Enhancing Fault Localization by Incorporating Statement Frequency and Test Case Contribution	128
<i>Arpita Dutta (National University of Singapore)</i>	
Understanding Bugs in Rust Compilers	138
<i>Xinmeng Xia (State Key Laboratory for Novel Software Technology, Nanjing University), Yang Feng (State Key Laboratory for Novel Software Technology, Nanjing University), and Qingkai Shi (State Key Laboratory for Novel Software Technology, Nanjing University)</i>	

Smart Contracts and Blockchain

WASAIUP: A Demand-driven Concolic Fuzzer for EOSIO Smart Contracts	150
<i>Meng Wang (Hebei University, China), Ziheng Wang (Hebei University, China), Bin Yu (Xidian University, China), and Kai Zhang (Hebei University, China)</i>	
Blockchain Network Platform for IoT Data Integrity and Scalability	162
<i>Chung Yup Kim (Sungkyunkwan University, South Korea), Bryan Ng (Victoria University of Wellington, New Zealand), Jyoti Sahni (Victoria University of Wellington, New Zealand), Normalia Samian (Universiti Putra Malaysia, Malaysia), and Winston Seah (Victoria University of Wellington, New Zealand)</i>	
Performance Optimization for Information Sharing Process of BlockIoV Based on Multi-Objective Particle Swarm	172
<i>Xin Gu (Nanjing Tech University, China), Xingya Wang (Nanjing Tech University, China; State Key Laboratory for Novel Software Technology of Nanjing University, China; Army Engineering University of PLA, China), Yu Ma (Nanjing Tech University, China), Zhenyu Chen (State Key Laboratory for Novel Software Technology of Nanjing University, China), and Song Huang (Army Engineering University of PLA, China)</i>	

Natural Language Processing and Large Language Models

Integrating Extractive and Abstractive Models for Code Comment Generation	184
<i>Weisong Sun (State Key Laboratory for Novel Software Technology, Nanjing University), Yuling Hu (State Key Laboratory for Novel Software Technology, Nanjing University), Yingfei Xu (State Key Laboratory for Novel Software Technology, Nanjing University), Yuchen Chen (State Key Laboratory for Novel Software Technology, Nanjing University), and Chunrong Fang (State Key Laboratory for Novel Software Technology, Nanjing University)</i>	
On ChatGPT: Perspectives from Software Engineering Students	196
<i>Khadija Hanifi (Ericsson Research Turkey, Turkey and Sabanci University, Turkey), Orcun Cetin (Sabanci University, Turkey), and Cemal Yilmaz (Sabanci University, Turkey)</i>	
LLM for Test Script Generation and Migration: Challenges, Capabilities, and Opportunities	206
<i>Shengcheng Yu (State Key Laboratory for Novel Software Technology, Nanjing University, China; Shenzhen Research Institute of Nanjing University, China), Chunrong Fang (State Key Laboratory for Novel Software Technology, Nanjing University, China; Shenzhen Research Institute of Nanjing University, China), Yuchen Ling (State Key Laboratory for Novel Software Technology, Nanjing University, China; Shenzhen Research Institute of Nanjing University, China), Chentian Wu (State Key Laboratory for Novel Software Technology, Nanjing University, China; Shenzhen Research Institute of Nanjing University, China), and Zhenyu Chen (State Key Laboratory for Novel Software Technology, Nanjing University, China; Shenzhen Research Institute of Nanjing University, China)</i>	

Enhancing Code Completion with Implicit Feedback	218
<i>Haonan Jin (Nanjing University of Aeronautics and Astronautics), Yu Zhou (Nanjing University of Aeronautics and Astronautics), and Yasir Hussain (Nanjing University of Aeronautics and Astronautics)</i>	
Git Merge Conflict Resolution Leveraging Strategy Classification and LLM	228
<i>Chaochao Shen (Nanjing University of Aeronautics and Astronautics), Wenhua Yang (Nanjing University of Aeronautics and Astronautics), Minxue Pan (Nanjing University), and Yu Zhou (Nanjing University of Aeronautics and Astronautics)</i>	
The Causal Reasoning Ability of Open Large Language Model: A Comprehensive and Exemplary Functional Testing	240
<i>Shunhang Li (Information Engineering University, China), Gang Zhou (State Key Laboratory of Mathematical Engineering and Advanced Computing, China), Zhibo Li (State Key Laboratory of Mathematical Engineering and Advanced Computing, China), Jicang Lu (Information Engineering University, China), and Ningbo Huang (Information Engineering University, China)</i>	
Quality Evaluation of Summarization Models for Patent Documents	250
<i>Junhua Ding (Department of Information Science, University of North Texas), Haihua Chen (Department of Information Science, University of North Texas), Sai Kolapudi (Department of Information Science, University of North Texas), Lavanya Pobbathi (Department of Information Science, University of North Texas), and Huyen Nguyen (Department of Information Science, University of North Texas)</i>	

Software Testing

Using Data Abstraction for Clustering in the Context of Test Case Generation	260
<i>Nour Chetouane (Graz University of Technology) and Franz Wotawa (Graz University of Technology)</i>	
Test Case Generation for Autonomous Driving Based on Improved Genetic Algorithm	272
<i>Lele Sun (Army Engineering University of PLA), Song Huang (Army Engineering University of PLA), Changyou Zheng (Army Engineering University of PLA), Tongtong Bai (Army Engineering University of PLA), and Zhe Hu (Army Engineering University of PLA)</i>	
Investigating Execution Trace Embedding for Test Case Prioritization	279
<i>Emad Jabbar (University of Calgary, Canada), Hadi Hemmati (York University, Canada), and Robert Feldt (Chalmers University of Technology, Sweden)</i>	
Efficient Fuzz Testing of Web Services	291
<i>Matúš Ferech (Czech Technical University in Prague, Czech Republic) and Pavel Tvrđík (Czech Technical University in Prague, Czech Republic)</i>	
StructureTester: Automatic Machine Translation Testing Based on Variation Feature Vector	301
<i>Wei Luo (Macao University of Science and Technology), Yemao Luo (Macao University of Science and Technology), Yao Li (Macao University of Science and Technology), and Tao Zhang (Macao University of Science and Technology)</i>	

BDGSE: A Symbolic Execution Technique for High MC/DC	313
<i>Huangli Cai (Nanjing University of Aeronautics and Astronautics), Zhiyi Zhang (Nanjing University of Aeronautics and Astronautics), Yifan Jian (Nuclear Power Institute of China), Dan Li (Nanjing University of Aeronautics and Astronautics), and Zhiqiu Huang (Nanjing University of Aeronautics and Astronautics)</i>	
DyFuzz: Skeleton-based Fuzzing for Python Libraries	325
<i>Xinmeng Xia (State Key Laboratory for Novel Software Technology, Nanjing University) and Yang Feng (State Key Laboratory for Novel Software Technology, Nanjing University)</i>	
An Industrial Study on the Challenges and Effects of Diversity-Based Testing in Continuous Integration	337
<i>Azeem Ahmad (Ericsson AB, Linköping University, Sweden), Francisco Gomes De Oliveira Neto (University of Gothenburg, Sweden), Eduard Paul Enoiu (Mälardalen University, Sweden), Kristian Sandahl (Linköping University, Sweden), and Ola Liefler (Linköping University, Sweden)</i>	
Mobile Test Script Generation from Natural Language Descriptions	348
<i>Chun Li (Nanjing University), Yifan Xiong (Nanjing University), Zhong Li (Nanjing University), Wenhua Yang (Nanjing University of Aeronautics and Astronautics), and Minxue Pan (Nanjing University)</i>	
Scope-based Compiler Differential Testing	360
<i>Rong Qu (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, University of Chinese Academy of Sciences, China), Jiangang Huang (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, Hangzhou Institute for Advanced Study, University of Chinese Academy of Sciences, China), Long Zhang (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, China), Tianlu Qiao (School of Computer Science, Beijing University of Posts and Telecommunications, China), and Jian Zhang (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, University of Chinese Academy of Sciences, China)</i>	
Aster: Encoding Data Augmentation Relations into Seed Test Suites for Robustness Assessment and Fuzzing of Data-Augmented Deep Learning Models	370
<i>Haipeng Wang (City University of Hong Kong), Zhengyuan Wei (City University of Hong Kong), Qilin Zhou (City University of Hong Kong), Bo Jiang (State Key Laboratory of Software Development Environment, School of Computer Science and Engineering, Beihang University), and W.K. Chan (City University of Hong Kong)</i>	
A Case Study on the “Jungle” Search for Industry-Relevant Regression Testing	382
<i>Maria Laura Brzezinski Meyer (Renault Software Factory and LAAS-CNRS, France), H�el�ene Waeselynck (LAAS-CNRS, France), and Fernand Cuesta (Renault Software Factory, France)</i>	

Leveraging Conditional Statement to Generate Acceptance Tests automatically via Traceable Sequence Generation	394
<i>Guoliang Zhao (National Engineering Research Center for Software Engineering, Peking University), Gexiang Fang (National Engineering Research Center for Software Engineering, Peking University), Dongdong Du (China Academy of Industrial Internet), Qing Gao (National Engineering Research Center for Software Engineering, Peking University), and Minghui Zhang (Handan Institute of Innovation, Peking University, Handan, Beijing, China)</i>	

Mobile App and Software Aging Analysis

AndrAS: Automated Attack Surface Extraction for Android Applications	406
<i>Anh-Duy Tran (KU Leuven, Belgium), Koen Yskout (KU Leuven, Belgium), and Wouter Joosen (KU Leuven, Belgium)</i>	
Towards the Adoption and Adaptation of the AndroidX Library: An Empirical Study	418
<i>Jiacheng Li (Southern University of Science and Technology), Kerui Huang (Southern University of Science and Technology), Sinan Wang (Southern University of Science and Technology), and Yepang Liu (Southern University of Science and Technology)</i>	
An Empirical Study to Identify Software Aging Indicators for Android OS	428
<i>Yulei Chen (School of Automation Science and Electrical Engineering, Beihang University), Yuge Nie (School of Automation Science and Electrical Engineering, Beihang University), Beibei Yin (School of Automation Science and Electrical Engineering, Beihang University), Zheng Zheng (School of Automation Science and Electrical Engineering, Beihang University), and Huayao Wu (State Key Laboratory for Novel Software Technology, Nanjing University)</i>	
Human-Machine Collaborative Testing for Android Applications	440
<i>Yuying Li (The State Key Laboratory for Novel Software Technology, Nanjing University, China), Yang Feng (The State Key Laboratory for Novel Software Technology, Nanjing University, China), Rui Hao (The State Key Laboratory for Novel Software Technology, Nanjing University, China), and Zhenyu Chen (The State Key Laboratory for Novel Software Technology, Nanjing University, China)</i>	

Programming Code Analysis

Enhancing Code Prediction Transformer with AST Structural Matrix	452
<i>Yongyue Yang (Hainan University, China), Liting Huang (Hainan University, China), Chunyang Ye (Hainan University, China), Fenghang Li (Hainan University, China), and Hui Zhou (Hainan University, China)</i>	
Abstract Syntax Tree for Method Name Prediction: How Far Are We?	464
<i>Hanwei Qian (Nanjing University, China)</i>	

Commit Classification via Diff-Code GCN based on System Dependency Graph	476
<i>Zaixing Zhang (Southeast University, China), Liang Liu (Suzhou Aerospace Information Research Institute, China), Jianming Chang (Southeast University, China), Lulu Wang (Southeast University, China), and Li Liao (Southeast University, China)</i>	
Software Code Quality Measurement: Implications from Metric Distributions	488
<i>Si Yuan Jin (Hong Kong University of Science and Technology, Hong Kong), Ziyuan Li (HSBC Laboratory, China), Bichao Chen (HSBC Laboratory, China), Bing Zhu (HSBC Laboratory, China), and Yong Xia (HSBC Laboratory, China)</i>	
Research, Implementation and Analysis of Source Code Metrics in Rust-Code-Analysis	497
<i>Luca Arditò (Politecnico di Torino, Italy), Marco Ballarò (Politecnico di Torino, Italy), and Michele Valsesia (Politecnico di Torino, Italy)</i>	

Security, Vulnerability, and Threat Mitigation

Cancelable Iris Biometrics based on Transformation Network	507
<i>Dongdong Zhao (Wuhan University of Technology), Hucheng Liao (Wuhan University of Technology), Songsong Liao (Wuhan University of Technology), Huanhuan Li (China University of Geosciences), and Jianwen Xiang (Wuhan University of Technology)</i>	
RUSPATCH: Towards Timely and Effectively Patching Rust Applications	517
<i>Yufei Wu (University of Science and Technology of China) and Baojian Hua (University of Science and Technology of China)</i>	
Wireless Threats Against V2X Communication	529
<i>Axel Boström (Graz University of Technology) and Franz Wotawa (Graz University of Technology)</i>	
CGSA-RNN: Abnormal Network Traffic Detection Model Based on CycleGAN and Self-Attention Mechanism	541
<i>Saihua Cai (Jiangsu University), Wenjun Zhao (Jiangsu University), Han Tang (Jiangsu University), Jinfu Chen (Jiangsu University), and Wuhao Guo (Asiainfo Security Technology Co.)</i>	
Automatic Generation of Component Fault Trees from AADL Models for Design Failure Modes and Effects Analysis	550
<i>Xiongpeng Hu (Shanghai Key Laboratory of Trustworthy Computing, East China Normal University, Shanghai, China), Jing Liu (Shanghai Key Laboratory of Trustworthy Computing, East China Normal University, Shanghai, China), Hui Dou (Huawei Technology, Shanghai, China), Hongtao Chen (Huawei Technology, Shanghai, China), and Yuhong Zhang (Huawei Technology, Shanghai, China)</i>	
intCV: Automatically Inferring Correlated Variables in Interrupt-Driven Program	562
<i>Chao Li (Beijing Institute of Control Engineering, China), Zhixuan Wang (Xidian University, China), Rui Chen (Beijing Institute of Control Engineering, China), and Mengfei Yang (China Academy of Space Technology, China)</i>	

AI for Software Development, Testing, and Verification

Towards an Effective and Interpretable Refinement Approach for DNN Verification	569
<i>Jiaying Li (Microsoft, China), Guangdong Bai (The University of Queensland, Australia), Long H. Pham (Singapore Management University, Singapore), and Jun Sun (Singapore Management University, Singapore)</i>	
BTM: Black Testing for DNN based on Meta Learning	581
<i>Zhuangyu Zhang (Nanjing University of Aeronautics and Astronautics), Zhiyi Zhang (Nanjing University of Aeronautics and Astronautics), Ziyuan Wang (Nanjing University of Posts and Telecommunications), Fang Chen (Nanjing University of Aeronautics and Astronautics), and Zhiqiu Huang (Nanjing University of Aeronautics and Astronautics)</i>	
Mucha: Multi-channel based Code Change Representation Learning for Commit Message Generation	593
<i>Chuangwei Wang (Soochow University, China), Yifan Wu (Soochow University, China), and Xiaofang Zhang (Soochow University, China)</i>	
DeepIA: An Interpretability Analysis based Test Data Generation Method for DNN	604
<i>Qifan He (School of Computer Science, Beijing Information Science and Technology University, Beijing, China), Ruilin Xie (School of Computer Science, Beijing Information Science and Technology University, Beijing, China), Li Li (School of Computer Science, Beijing Information Science and Technology University, Beijing, China), and Zhanqi Cui (School of Computer Science, Beijing Information Science and Technology University, Beijing, China)</i>	
DeepDiffer: Find Deep Learning Compiler Bugs via Priority-guided Differential Fuzzing	616
<i>Kuilang Lin (Shandong University, China), Xiangpu Song (Shandong University, China), Yingpei Zeng (Hangzhou Dianzi University, China), and Shanqing Guo (Shandong University, China)</i>	
MicroKGCL: A Knowledge Graph for Root Cause Localization of Feedback Issues in Microservices	628
<i>Xin-Wei Yao (Zhejiang University of Technology, China), Qi-Chao Lu (Zhejiang University of Technology, China), Qiang Li (Zhejiang University of Technology, China), Lin-Lang Liu (Ant Group, China), and Zhi-Chao Zhu (Ant Group, China)</i>	
An Approach to Build and Verify Stable Neural Network Controllers for Cyber Physical Systems with Non-Linear Dynamics	638
<i>Xudong He (Florida International University)</i>	
SPIRT: A Fault-Tolerant and Reliable Peer-to-Peer Serverless ML Training Architecture	650
<i>Amine Barrak (University of Quebec at Chicoutimi, UQAC, Saguenay, Canada), Mayssa Jaziri (University of Quebec at Chicoutimi, UQAC, Saguenay, Canada), Ranim Trabelsi (University of Quebec at Chicoutimi, UQAC, Saguenay, Canada), Fehmi Jaafar (University of Quebec at Chicoutimi, UQAC, Saguenay, Canada), and Fabio Petrillo (École de Technologie Supérieure, ÉTS, Montreal, Canada)</i>	

VMCanary: Effective Memory Protection for WebAssembly via Virtual Machine-assisted Approach	662
<i>Ziyao Zhang (University of Science and Technology of China), Wenlong Zheng (University of Science and Technology of China), Baojian Hua (University of Science and Technology of China), Qiliang Fan (University of Science and Technology of China), and Zhizhong Pan (University of Science and Technology of China)</i>	
IMCSCL: Image-Based Malware Classification using Self-Supervised and Contrastive Learning	672
<i>Yetao Jia (National Key Laboratory of Science and Technology on Information System Security, China), Yangyang Meng (National Key Laboratory of Science and Technology on Information System Security, China), and Honglin Zhuang (National Key Laboratory of Science and Technology on Information System Security, China)</i>	
MAD: One-Shot Machine Activity Detector for Physics-Based Cyber Security	684
<i>Arthur Grisel-Davy (University of Waterloo, Canada) and Sebastian Fischmeister (University of Waterloo, Canada)</i>	

Software Quality Assessment and Performance Analysis

Improving Software Modularization Quality Through the Use of Multi-Pattern Modularity Clustering Algorithm	696
<i>Tsung-Han Yang (National Tsing Hua University) and Chin-Yu Huang (National Tsing Hua University)</i>	
Just-In-Time Method Name Updating With Heuristics and Neural Model	707
<i>Zhenting Guo (School of Big Data and Software Engineering of Chongqing University), Meng Yan (School of Big Data and Software Engineering of Chongqing University), Hongyan Li (School of Big Data and Software Engineering of Chongqing University), Zhezhe Chen (School of Big Data and Software Engineering of Chongqing University), and Weifeng Sun (School of Big Data and Software Engineering of Chongqing University)</i>	
On Error Representativeness of Function Call Interfaces for C/C++ Program	719
<i>Wei Zhang (Tongji University, China), Hao Xu (Tongji University), Zhangjun Lu (Tongji University), and Jianhui Jiang (Tongji University, China)</i>	
Adaptive Tracing and Fault Injection based Fault Diagnosis for Open Source Server Software.....	729
<i>Wei Zhang (Tongji University, China), Yuxi Hu (Alibaba Inc., China), Bolong Tan (Alibaba Inc., China), Xiaohai Shi (Alibaba Inc., China), and Jianhui Jiang (Tongji University, China)</i>	
Knowledge Graph Completing with Dual Confrontation Learning Model Based on Variational Information Bottleneck Method	741
<i>Song Han (Yunnan University, China), Zhengyi Guan (Yunnan University, China), Sihui Li (Yunnan University, China), Jin Wang (Yunnan University, China), and Xiaobing Zhou (Yunnan University, China)</i>	
Evaluating the Availability of Service Function Chain under Different Elasticity Strategies Based on Colored Petri Net	751
<i>Hui Dong (Inner Mongolia University, China), Zhenyu Liu (Inner Mongolia University, China), Hua Li (Inner Mongolia University, China), and Xianrong Wang (Inner Mongolia University, China)</i>	

Modeling of GPGPU architectures for performance analysis of CUDA programs	761
<i>Francesco Terrosi (University of Florence, Italy), Francesco Mariotti (University of Florence, Italy), Paolo Lollini (University of Florence, Italy), and Andrea Bondavalli (University of Florence, Italy)</i>	
SRRA: A Novel Skewness-Based Algorithm for Cloudlet Scheduling	772
<i>Sanjaya Kumar Panda (NIT Warangal, Telangana, India) and Shidhanta Sen (NIT Warangal, Telangana, India)</i>	
Author Index	783
