DCS 2023 Main

Session 1: Cyberspace Security

Fusing Security Alerts Improves Cyber-Security: An Alert Normalization Framework for Heterogeneous Devices	1
<i>Songxuan Wei (University of Electronic Science and Technology of China, China; Peng Cheng Laboratory, China), Yushun Xie (University of Electronic Science and Technology of China, China; Peng Cheng Laboratory, China), Angxiao Zhao (University of Electronic Science and Technology of China, China; Peng Cheng Laboratory, China), Xiao Jing (Peng Cheng Laboratory, China), Cui Luo (Peng Cheng Laboratory, China), and Zhaoquan Gu (Harbin Institute of Technology (Shenzhen), China; Peng Cheng Laboratory, China)</i>	
DACTI: a Generation-Based Data Augmentation Method for Cyber Threat Intelligence	8
<i>Jingbing Chen (Beijing University of Posts and Telecommunications, China), Yali Gao (Beijing University of Posts and Telecommunications, China), and Xiaoyong Li (Beijing University of Posts and Telecommunications, China)</i>	
Building a High-performance Data Channel for the Federal Cyber Range	16
<i>Zengxie Ma (Peng Cheng Laboratory, China), Ning Hu (Peng Cheng Laboratory, China), Bo Qu (HKCT Institute for Higher Education, Hong Kong), Yao Xin (Guangzhou University, China), Shengan Song (Peng Cheng Laboratory, China), and Xinyi Qiu (Peng Cheng Laboratory, China)</i>	

SCOBERT: A Pre-Trained BERT for Smart Contract Vulnerability Detection	24
<i>Guojin Sun (University of Electronic Science and Technology of China, Shenzhen (UESTC), China), Chi Jiang (University of Electronic Science and Technology of China, Chengdu, China), Jinqing Shen (University of Electronic Science and Technology of China, Shenzhen (UESTC), China), and Yin Zhang (University of Electronic Science and Technology of China, Chengdu, China)</i>	
Logic-Based Trust Model for Industrial Cyber Intelligence with Enhanced Trustworthiness	31
<i>Yuhang Wang (University of South-Eastern Norway, Norway) and Salman Nazir (University of South-Eastern Norway, Norway)</i>	

Session 2: Knowledge Representation and Discovery

Knowledge Graph Embedding via Adaptive Negative Subsampling	38
<i>Dong Zhu (Guangzhou University, China), Haonan Tan (Guangzhou University, China), Le Wang (Guangzhou University; Harbin Institute of Technology (Shenzhen), China), Yujie Feng (Guangzhou University, China), Yao Lin (Guangzhou University, China), and Zhaoquan Gu (Harbin Institute of Technology (Shenzhen); Peng Cheng Laboratory, China)</i>	
A Simplified Variant for Graph Convolutional Network Based Knowledge Graph Completion Model	44
<i>Yashen Wang (China Academy of Electronics and Information Technology; Artificial Intelligence Institute of CETC, China), Qiang Li (Chinese Academy of Sciences, China), Yi Zhang (CETC Academy of Electronics and Information Technology Group Co., Ltd., China), Xuecheng Zhang (Northeastern University, U.S.A), Zhuoya Ju (Scientific and Technological Innovation Center of ARI, China), and Jian Sun (Qi An Xin Technology Group Inc., China)</i>	
Multimodal Features Enhanced Named Entity Recognition Based on Self-Attention Mechanism	52
<i>Changqing Li (Shanghai Jiao Tong University, China), Ye Qian (Shanghai Jiao Tong University, China), and Li Pan (Shanghai Jiao Tong University; Shanghai Key Laboratory of Integrated Administration Technologies for Information Security, China)</i>	
Research on the Prospect of Knowledge Graph Completion Based on the Federated Setting	60
<i>Angxiao Zhao (University of Electronic Science and Technology of China; Peng Cheng Laboratory, China), Yunhui Liu (Peng Cheng Laboratory; Guangzhou University, China), Songxuan Wei (University of Electronic Science and Technology of China; Peng Cheng Laboratory, China), Yu Long (University of Electronic Science and Technology of China; Peng Cheng Laboratory, China), Wenying Feng (Peng Cheng Laboratory, China), and Zhaoquan Gu (Harbin Institute of Technology; Peng Cheng Laboratory, China)</i>	
Multi-Modal Knowledge Representation: A Survey	68
<i>WeiQi Hu (Harbin Institute of Technology, China), Ye Wang (Harbin Institute of Technology, China), and Yan Jia (Harbin Institute of Technology, China)</i>	

Session 3: Intelligent System

Analyzing Security Attacks Against Platoon of Intelligent and Connected Vehicles	76
<i>Liqun Sun (Peng Cheng Laboratory, China), Yulu Qi (National University of Defense Technology, China), Shuqiang Yang (Peng Cheng Laboratory, China), Weihong Han (Peng Cheng Laboratory, China), and Xiaoxia Li (Peng Cheng Laboratory, China)</i>	
Particle Filter Localization Algorithm Based on LOS Possibility for Smart Vehicle Digital Key	82
<i>Zihan Zhou (University of Electronic Science and Technology of China, China), Weiyi Hu (University of Electronic Science and Technology of China, China), Yiran Tian (Guangdong Weichen Information Technology Co., Ltd, China), Lei Luo (Department of New Networks Peng Cheng Laborator, China), Yun Li (Guangdong Weichen Information Technology Co., Ltd, China), and Lirong Chen (University of Electronic Science and Technology of China, China)</i>	
Towards Scale-Aware Self-Supervised Multi-Frame Depth Estimation with IMU Motion Dynamics	90
<i>Yipeng Lu (Guangzhou University, China), Denghui Zhang (Guangzhou University, China), Zhaoquan Gu (Harbin Institute of Technology (Shenzhen), China), and Jing Qiu (Guangzhou University, China)</i>	
Blockchain Storage Method Based on Erasure Code	98
<i>Fanyao Meng (Beijing University of Posts and Telecommunications, China), Jin Li (Beijing University of Posts and Telecommunications, China), Jiaqi Gao (Beijing University of Posts and Telecommunications, China), Junjie Liu (Beijing University of Posts and Telecommunications, China), Junpeng Ru (Beijing University of Posts and Telecommunications, China), and Yueming Lu (Beijing University of Posts and Telecommunications, China)</i>	
Based on Linkable Ring Signature Map Review Scheme for Zero-Trust Autonomous Vehicles	106
<i>Min Zhang (Naval University of Engineering, China), Qing Ye (Naval University of Engineering, China), and Kaihuan Deng (North China Electric Power University, China)</i>	

Session 4: Data Security and Privacy

The Intelligent Information Search System IISI and Its Key Technologies for Internet Big Data	114
<i>Zhengjun Huang (Beihang University, China), Kaihan Lin (Peng Cheng Laboratory, China), and Yangyan Mei (Peng Cheng Laboratory, China)</i>	
CoReg: Membership Privacy Protection via Collaborative Regularization	120
<i>Yuncong Yang (Shanghai University of Finance and Economics, China), Minghao Lai (Shanghai University of Finance and Economics, China), and Xiao Han (Shanghai University of Finance and Economics, China)</i>	
A Blockchain-Based Secure Data Sharing Approach with Proxy re-Encryption	128
<i>Jiahao Liu (Guangzhou University, China), Chao Li (Guangzhou University, China), Ruoyu Wang (Guangzhou University, China), Junjian Li (Guangzhou University, China), and Wuhao Xia (Guangzhou University, China)</i>	

Quantitative Dynamic Scalability Model and Analysis of Blockchain Database System	135
<i>Jiacheng Wei (University of Science and Technology Beijing, China), Qingmei Wang (University of Science and Technology Beijing, China), and Zheng Wang (Shanghai Jiao Tong University; Shanghai Key Laboratory of Integrated Administration Technologies for Information Security, China)</i>	
Data Governance: Status, Technologies, Applications and Development Trends	143
<i>Haiyang Zhu (Zhejiang University, Wuchan Zhongda Digital Technology Co., Ltd., China), Xiaofeng Chen (Zhejiang University, Hangzhou Qulian Technology Co., Ltd., China), Suyan Li (Zhejiang Institute of Mechanical & Electrical Engineering, China), Yejin Wang (Wuchan Zhongda Digital Technology Co., Ltd., China), Xinwei Fang (Zhejiang University, China), and Minfeng Zhu (Zhejiang University, China)</i>	

Session 5: Deep Learning Algorithms and Applications I

Universal Adversarial Perturbation From Dominant Feature For Speaker Recognition	151
<i>Xiaochen Liu (Peng Cheng Laboratory, China), Hao Tan (Peng Cheng Laboratory; Harbin Institute of Technology, China), Junjian Zhang (Peng Cheng Laboratory; Guangzhou University, China), Aiping Li (National University of Defense Technology, China), and Zhaoquan Gu (Peng Cheng Laboratory; Harbin Institute of Technology (Shenzhen), China)</i>	
Multi-Task Learning for Game Review Classification with Emotion and Sarcasm Detection	159
<i>Xinchen Xia (Anhui University, China), Yue Huang (Wannan Medical College, China), and Yiwen Zhang (Anhui University, China)</i>	
Anti-Breast Cancer Active Compound Screening Method Based on Simulated Annealing Algorithm and BP Neural Network	166
<i>Haonan Tan (Guangzhou University, China), Yunhui Liu (Guangzhou University, China), Le Wang (Guangzhou University; Peng Cheng Laboratory, China), Jie Jiang (Guangzhou University, China), Jianyu Deng (Guangzhou University, China), and Dong Zhu (Guangzhou University, China)</i>	
Syntactic Enhanced Euphemisms Identification Based on Graph Convolution Networks and Dependency Parsing	172
<i>Xinru Huang (Beijing University of Posts and Telecommunications, China), Jiapeng Zhao (Beijing University of Posts and Telecommunications, China), Jinqiao Shi (Beijing University of Posts and Telecommunications, China), Yanwei Sun (Beijing University of Posts and Telecommunications, China), Xuebin Wang (Chinese Academy of Sciences, China), and Liyan Shen (Beijing University of Posts and Telecommunications, China)</i>	
Hierarchical Abstract Syntax Tree Representation Learning Based on Graph Coarsening for Program Classification	181
<i>Yizu Yang (Beijing University of Posts and Telecommunications, China), Yuzhang Lee (Beijing University of Posts and Telecommunications, China), Zeyu He (Beijing Information Science and Technology University, China), and Chunlu Wang (Beijing University of Posts and Telecommunications, China)</i>	

Session 6: Network Attack and Defense

OBiLSTM-Based Intrusion Detection Method for Industrial Internet of Things	189
<i>Shuai Xu (GuiLin University of Electronic Technology, China), Xinyong Peng (Joint Innovation Laboratory of Digital Guangxi Smart Infrastructures, China), Dandan Huang (China Mobile Group Guangxi Co Ltd Nanning Branch, China), Changsong Yang (GuiLin University of Electronic Technology; Guangdong Provincial Key Laboratory of Novel Security Intelligence Technologies, China), Yong Ding (GuiLin University of Electronic Technology; HKCT Institute for Higher Education, China), and Hai Liang (GuiLin University of Electronic Technology, China)</i>	
Bi-ETC: A Bidirectional Encrypted Traffic Classification Model Based on BERT and BiLSTM	197
<i>Xiting Ma (GuangZhou University, China), Tao Liu (GuangZhou University, China), Ning Hu (Peng Cheng Laboratory, China), and Xin Liu (Changsha University, China)</i>	
AIBERT: A Language-Agnostic Graph Neural Network Model for Vulnerability Detection	205
<i>Nurali Sarbakysh (Shanghai Jiao Tong University; Shanghai Key Laboratory of Integrated Administration Technologies for Information Security) and Zheng Wang (Shanghai Jiao Tong University; Shanghai Key Laboratory of Integrated Administration Technologies for Information Security)</i>	
An AdamW-Based Deep Neural Network Using Feature Selection and Data Oversampling for Intrusion Detection	213
<i>Zhuoer Lu (Key Laboratory of Trustworthy Distributed Computing and Service (BUPT), Ministry of Education, China), Xiaoyong Li (Key Laboratory of Trustworthy Distributed Computing and Service (BUPT), Ministry of Education), and Pengfei Qiu (Key Laboratory of Trustworthy Distributed Computing and Service (BUPT), Ministry of Education, China)</i>	
CAKG: A Framework For Cybersecurity Threat Detection Of Automotive Via Knowledge Graph ..	221
<i>Peng Yang (University of Electronic Science and Technology of China, China), Wang Lijie (University of Electronic Science and Technology of China, China), Li Yun (Guangdong Weichen Information Technology Co., Ltd, China), Song Xuedong (Guangdong Weichen Information Technology Co., Ltd, China), Wang Yaxin (University of Electronic Science and Technology of China, China), and Guo Biheng (University of Electronic Science and Technology of China, China)</i>	

Session 7: Situation Awareness

Software Vulnerability Detection with GPT and In-Context Learning	229
<i>Zhihong Liu (Harbin Institute of Technology, China), Qing Liao (Harbin Institute of Technology, China; Peng Cheng Laboratory, China), Wenchao Gu (The Chinese University of Hong Kong, China), and Cuiyun Gao (Harbin Institute of Technology, China; Peng Cheng Laboratory, China)</i>	

GAN-IVDS: An Intrusion Detection System for Intelligent Connected Vehicles Based on Generative Adversarial Networks	237
<i>Xiansen Chen (University of Electronic Science and Technology of China, China), Kun Xiao (University of Electronic Science and Technology of China, China), Lei Luo (University of Electronic Science and Technology of China, China), Yun Li (Guangdong Weichen Information Technology Co., Ltd, China), and Lirong Chen (University of Electronic Science and Technology of China, China)</i>	
Network Security Evaluation for Space-Ground Integrated Networks Based on Network Simulation	245
<i>Haibo Ye (Jiangnan University, China), Lei Zhao (The 6th Research Institute of China Electronics Corporation, China), Leiting Tao (Jiangnan University, China), and Xiaofeng Wang (Jiangnan University, China; Peng Cheng Laboratory, China)</i>	
OIDMD: A Novel Open-Set Intrusion Detection Method Based on Mahalanobis Distance	253
<i>Yunhui Liu (Guangzhou University; Peng Cheng Laboratory, China), Angxiao Zhao (Peng Cheng Laboratory; University of Electronic Science and Technology, China), Lei Du (Peng Cheng Laboratory; Harbin Institute of Technology (Shenzhen), China), Chenhui Zhang (Guangzhou University, China), Hao Yan (Peng Cheng Laboratory; Harbin Institute of Technology (Shenzhen), China), and Zhaoquan Gu (Peng Cheng Laboratory; Harbin Institute of Technology (Shenzhen), China)</i>	
A Practical Non-Intrusive Cyber Security Vulnerability Assessment Method for Cyber-Insurance	261
<i>Jun-Zheng Yang (Beijing University of Posts and Telecommunications, China), Lu-Lu Liang (Beijing Yuanbao Technology Co., LTD, China), and Jia-Yin Qi (Guangzhou University, China)</i>	

Session 8: Machine Learning

An Interpretable Data-Driven Approach for Employee Ability Assessment	270
<i>Youming Zhang (State Grid Anhui Electric Power Corporation, Ltd., China), Zhizheng Li (State Grid Anhui Electric Power Corporation, Ltd., China), Lei Wang (State Grid Anhui Electric Power Corporation, Ltd., China), Yan Lv (State Grid Anhui Electric Power Corporation, Ltd., China), Yan Xiong (State Grid Anhui Electric Power Corporation, Ltd., China), and Liu Yang (Hefei University of Technology, China)</i>	
A Novel Concept-Driven Negative Sampling Mechanism for Enhancing Semanticity and Interpretability of Knowledge Graph Completion Task	277
<i>Liu Yuan (China Academy of Electronics and Information Technology, China), Yashen Wang (China Academy of Electronics and Information Technology, Artificial Intelligence Institute of CETC, China), Tianzhu Chen (Artificial Intelligence Institute of CETC, China), Xuecheng Zhang (Northeastern University, U.S.A), Chenyu Liu (China Academy of Electronics and Information Technology, China), and Yi Zhang (CETC Academy of Electronics and Information Technology Group Co., Ltd., China)</i>	

Collaborative Learning for Cross-Organizational Data Sharing Using Hyperledger Fabric	285
<i>Yaling Zheng (National University of Defense Technology, China), Ziwen Cheng (National University of Defense Technology, China), Yi Liu (National University of Defense Technology, China), Bowen Wang (National University of Defense Technology, China), and Cheng Zhu (National University of Defense Technology, China)</i>	
Improved Grey Wolf Optimization Algorithm Based on Arctangent Inertia Weight	293
<i>Junfang Shi (National University of Defense Technology, China), Yong Yang (National University of Defense Technology, China), and Mingyao Chen (National University of Defense Technology, China)</i>	
Self-Disclosure Causality Detection: Discover What Cause the Self-Disclosure	298
<i>Haojie Chen (Beijing University of Posts and Telecommunications, China), Jiapeng Zhao (Beijing University of Posts and Telecommunications, China), Jinqiao Shi (Beijing University of Posts and Telecommunications, China), Xuebin Wang (Chinese Academy of Sciences, China), Liyan Shen (Beijing University of Posts and Telecommunications, China), and Yanwei Sun (Beijing University of Posts and Telecommunications, China)</i>	

Session 9: Deep Learning Algorithms and Applications II

Weak Feature Defect Generation with GAN for Faster RCNN Based PCB Defect Detection	306
<i>Chao Li (Guangzhou University, China), Wuhao Xia (Guangzhou University, China), and Zhengliang Jiang (Jinan University, China)</i>	
An Image Emotion Classification Method Based on Supervised Contrastive Learning	313
<i>Qing Zhang (Hefei University of Technology, China), Jianshan Sun (Hefei University of Technology, China), Kun Yuan (Hefei University of Technology, China), and Yuanchun Jiang (Hefei University of Technology, China)</i>	
Cluster Analysis of Target Events Based on Multidimensional Network Traffic Characteristics	321
<i>Zhaoxuan Lv (Beijing University of Posts and Telecommunications, China), Jiahao Qi (Beijing University of Posts and Telecommunications, China), Jiachen Zhang (Beijing University of Posts and Telecommunications, China), Junmei Ding (Beijing University of Posts and Telecommunications, China), and Yueming Lu (Beijing University of Posts and Telecommunications, China)</i>	
Leveraging Concept-Driven Pre-Training Model for Shot-Text Conceptualization Task	329
<i>Xiaoling Zhu (CETC Academy of Electronics and Information Technology Group Co., Ltd., China), Yashen Wang (China Academy of Electronics and Information Technology, Artificial Intelligence Institute of CETC, China), Yi Zhang (CETC Academy of Electronics and Information Technology Group Co., Ltd., China), and Xuecheng Zhang (Northeastern University, U.S.A)</i>	

DSC 2023 Workshops

Multi-Dimensional Data Association and Intelligent Analysis (MDATA 2023)

FedValidate: A Robust Federated Learning Framework Based on Client-Side Validation	337
<i>Wenting Zhu (Beijing University of Posts and Telecommunications, China), Zhe Liu (National Computer Network Emergency Response Technical Team/Coordination Center, China), Zongyi Chen (Beijing University of Posts and Telecommunications, China), Chuan Shi (Beijing University of Posts and Telecommunications, China), Xi Zhang (Beijing University of Posts and Telecommunications, China), and Sanchuan Guo (Beijing University of Posts and Telecommunications, China)</i>	
Research and Implementation of Bluetooth AOA Indoor Positioning System	345
<i>Kun Xiao (University of Electronic Science and Technology, China), Fuzhong Hao (State Grid Henan Electric Power Company, China), Weijian Zhang (State Grid Henan Electric Power Company, China), Nuannuan Li (State Grid Henan Electric Power Research Institute, China), Haiyan Zhi (State Grid Henan Electric Power Research Institute, China), and Yintao Wang (University of Electronic Science and Technology, China)</i>	
Analysis and Reflection on the Situation of Industrial Information Security Ransomware Attacks	354
<i>Dong Liu (China Industrial Control System Cyber Emergency Response Team, China), Yang Liu (China Industrial Control System Cyber Emergency Response Team, China), Zhicheng Liu (China Industrial Control System Cyber Emergency Response Team, China), Xiaofei Zhang (China Industrial Control System Cyber Emergency Response Team, China), and Xueying Zhang (China Industrial Control System Cyber Emergency Response Team, China)</i>	
A HMM-Based ICS Adaptive Deception Defense Framework	359
<i>Jiawei Luo (Guangzhou University, China), Tao Liu (Guangzhou University, China), Menggen Liang (Guangzhou University, China), and Ning Hu (Peng Cheng Laboratory, China)</i>	
Enhancing IoT Flow Anomaly Detection with Differential Optimal Feature Subspace	367
<i>Weidong Shi (Beijing University of Posts and Telecommunications, China), Mingrui Fan (Beijing University of Posts and Telecommunications, China), Jiaqi Gao (Beijing University of Posts and Telecommunications, China), Jiahao Qi (Beijing University of Posts and Telecommunications, China), Daoqi Han (Beijing University of Posts and Telecommunications, China), and Yueming Lu (Beijing University of Posts and Telecommunications, China)</i>	
Efficient lightweight intrusion detection method for IoT OS: A study on the application of multiteacher distillation	375
<i>Pengyu Zhang (University of Electronic Science and Technology of China, China), Kun Xiao (University of Electronic Science and Technology of China, China), Lei Luo (University of Electronic Science and Technology of China, China), Yun Li (Guangdong Weichen Information Technology Co., Ltd, China), and Lirong Chen (University of Electronic Science and Technology of China, China)</i>	

Research Ideas on Network Security Experiment and Appraisal of Avionics System	383
<i>Zhuoran Chen (Chinese Flight Test Establishment, China), Hongyu Zhu (Chinese Flight Test Establishment, China), Chen Yi (Institute of Cyberspace Technology HKCT Institute for Higher Education, China), and Zhen Liu (Guilin University Of Electronic Technology, China)</i>	
Research on Fault Diagnosis Model of Shearer Cutting Motor Based on Fuzzy Neural Network and Expert System	391
<i>Wei Han (Yuncheng Vocational and Technical University; Shanxi Hongyuan Group Co., Ltd, China), Yiliang Xia (Beijing University of Posts and Telecommunications, China), Haoyu Xue (Beijing University of Posts and Telecommunications, China), Mengxuan Sun (Beijing University of Posts and Telecommunications, China), Jinliang Chen (Beijing University of Posts and Telecommunications, China), Gong Cao (Yuncheng Vocational and Technical University; Shanxi Hongyuan Group Co., Ltd), and Gang Lin (Yuncheng Vocational and Technical University; Shanxi Hongyuan Group Co., Ltd, China)</i>	

Big Data and Business Analytics (BDBA 2023)

Exploring the Factors and Influence Mechanisms of User Loyalty for Generative AI	397
<i>Ang Zeng (Renmin University of China, China), Xusen Cheng (Renmin University of China, China), and Yajie Wang (Renmin University of China, China)</i>	
Research on Recommendation Algorithms Based on Asymmetric Attention Mechanism Models	401
<i>Xiulei Wang (Hangzhou Normal University, China), Sisi Chen (Hangzhou Normal University, China), Jianzhang Zhang (Hangzhou Normal University, China), Xiuxiu Zhan (Hangzhou Normal University, China), and Chuang Liu (Hangzhou Normal University, China)</i>	
An Unsupervised Graph Embedding Method Based on Dynamic Graph Attention Networks and Infomax for Link Prediction	409
<i>Jingzhu Lu (Beijing University of Posts and Telecommunications, China), Feifan Song (Changchun Finance College, China), Jingchen Wu (Beijing University of Posts and Telecommunication, China), and Xu Wu (Beijing University of Posts and Telecommunication, China)</i>	
Assessing the Risk of Heavy Metal Mixture Exposure and its Association with Cancer Mortality	416
<i>Yanan Du (Anhui Medical University, China), Can Yang (Anhui Medical University, China), Qi Li (Anhui Medical University, China), and Liping Zhi (Anhui Medical University, China)</i>	
A Data Sharing and Access Control Model Based on Blockchain	422
<i>Lin Xu (Anhui Sanlian University, China)</i>	
A Review of User Identity Linkage Across Social Networks	429
<i>Danna Lu (Guangzhou University, China), Qing Li (Shandong Jianzhu University, China), Zikang Liu (Southeast University, China), Shumei Li (Jilin Normal University, China), Xiaobo Wu (Guangzhou University, China), and Shudong Li (Guangzhou University, China)</i>	

Violence Detection In Videos via Motion-Guided Global and Local Views	437
<i>Ning Su (Beijing University of Posts and Telecommunications, China), Lijuan Sun (Beijing University of Posts and Telecommunications, China), Yutong Gao (Beijing Jiaotong University, China), Jingchen Wu (Beijing University of Posts and Telecommunications, China), and Xu Wu (Beijing University of Posts and Telecommunications, China)</i>	

Vulnerability Analysis and Adversarial Learning (VAAL 2023)

Threat-Aware Data Transmission in Software-Defined Networks	443
<i>Zhongbai Jiang (China Information Technology Security Evaluation Center, China), Yanwei Sun (Beijing University of Posts and Telecommunications, China), Beibei Li (Sichuan University, China), Bowen Sun (Beijing University of Posts and Telecommunications, China), Shenduo Xiong (China Information Technology Security Evaluation Center, China), Yehao Li (China Information Technology Security Evaluation Center, China), and Wenyue Du (China Information Technology Security Evaluation Center, China)</i>	
The Report of Standardization for Blockchain-Based Digital Right Management System	450
<i>Tianjian Zhao (Beijing University of Posts and Telecommunications), Zhikai Lu (Beijing University of Posts and Telecommunications), Wenxuan Wu (Beijing University of Posts and Telecommunications), Fang Xiong (Beijing University of Posts and Telecommunications), Ruitian Yang (Beijing University of Posts and Telecommunications), Huaxu Zhou (Beijing University of Posts and Telecommunications), Boyang Zhang (Beijing University of Posts and Telecommunications), Yifan Hu (Beijing University of Posts and Telecommunications), and Yue Jiang (Beijing University of Posts and Telecommunications)</i>	
Machine Learning Security Analysis Framework Based on Threat Matrix	456
<i>Hu Li (National Key Laboratory of Science and Technology on Information System Security, China), Qiongmin Ma (National Key Laboratory for Complex Systems Simulation, China), Ming Zhang (National Key Laboratory of Science and Technology on Information System Security, China), and Xiaohui Kuang (National Key Laboratory of Science and Technology on Information System Security, China)</i>	
Survey on Fuzzing Techniques in Deep Learning Libraries	461
<i>Jiahe Ji (NKLSTISS, Institute of Systems Engineering, Academy of Military Sciences, China), Wei Kong (NKLSTISS, Institute of Systems Engineering, Academy of Military Sciences, China), Jianwen Tian (NKLSTISS, Institute of Systems Engineering, Academy of Military Sciences, China), Taotao Gu (NKLSTISS, Institute of Systems Engineering, Academy of Military Sciences, China), Yuanping Nie (NKLSTISS, Institute of Systems Engineering, Academy of Military Sciences, China), and Xiaohui Kuang (NKLSTISS, Institute of Systems Engineering, Academy of Military Sciences, China)</i>	

Adversarial Example Detection for Deep Neural Networks: A Review	468
<i>Chongyang Zhao (National Key Laboratory of Science and Technology on Information System Security, China), Hu Li (National Key Laboratory of Science and Technology on Information System Security, China), Dongxia Wang (National Key Laboratory of Science and Technology on Information System Security, China), and Ruiqi Liu (National Key Laboratory of Science and Technology on Information System Security, China)</i>	
A Blackbox Fuzzing Based on Automated State Machine Extraction	476
<i>Zhaowei Zhang (National Key Laboratory of Science and Technology on Information System Security, China), Wenjing Yu (Fudan University, China), Zibin Wang (National Key Laboratory of Science and Technology on Information System Security, China), and Youlin Xiang (Fudan University, China)</i>	
MDATA Model Based Cyber Security Knowledge Representation and Application	483
<i>Yu Long (University of Electronic Science and Technology of China; Peng Cheng Laboratory, China), Xiayu Xiang (Peng Cheng Laboratory, China), Xiao Jing (Peng Cheng Laboratory, China), Angxiao Zhao (University of Electronic Science and Technology of China, China), Lei Du (Peng Cheng Laboratory; Harbin Institute of Technology, China), and Zhaoquan Gu (Peng Cheng Laboratory; Harbin Institute of Technology, China)</i>	
Automatically Identifying Sentences with Attack Behavior from Cyber Threat Intelligence Reports	491
<i>Junjun Chen (Guangzhou University, China), Chengliang Gao (Guangzhou University, China), Fei Tang (Guangzhou University, China), Jiayu Xing (Guangzhou University, China), Qianlong Xiao (Guangzhou University, China), Dongyang Zheng (Guangzhou University, China), and Jing Qiu (Guangzhou University; Peng Cheng Laboratory, China)</i>	

Network Security Analysis for Cyberspace (NSAC 2023)

FixGPT: A Novel Three-Tier Deep Learning Model for Automated Program Repair	499
<i>Wenhao Ye (State Grid Hunan Electric Power Company Limited, China), Jun Xia (State Grid Hunan Electric Power Company Limited, China), Shuo Feng (North China Electric Power University, China), Xiangyu Zhong (Hunan SGIT Technology Co., Ltd., China), Shuai Yuan (Brock University, Canada), and Zhitao Guan (North China Electric Power University, China)</i>	
Towards Accurate and Efficient Super Spreader Detection with Sketching	506
<i>Shouyou Song (Ministry of Education, BUPT; Chinese Academy of Cyberspace Studies, China), Pu Wang (Chinese Academy of Cyberspace Studies, China), Yangchun Li (Chinese Academy of Cyberspace Studies; National Pilot Software Engineering School, BUPT, China), Nanyang Wang (Chuzhou University, China), and Wei Jiang (Chinese Academy of Cyberspace Studies, China)</i>	

A Intrusion Detection Method of Industrial Internet of Things based on one-dimensional cropping multi-model	512
<i>Lei Wang (State Grid Liaoning Electric Power Co., Ltd., China), Tong Li (State Grid Liaoning Electric Power Research Institute, China), Chao Yang (State Grid Liaoning Electric Power Co., Ltd., China), Yang Liu (State Grid Liaoning Electric Power Research Institute, China), Jian Chen (State Grid Liaoning Electric Power Research Institute, China), and Zhongjie Wang (Beijing DigApis Technology Co., Ltd., China)</i>	
Analysis and Research of Neural Network Adversarial Samples for Power Grid Security	520
<i>Bokai Li (China Huadian Engineering Co., Ltd., China), Shenglong Wu (China Huadian Engineering Co., Ltd., China), Yuke Yang (China Huadian Engineering Co., Ltd., China), and Geyao Zhang (Hong Kong University of Science and Technology, China)</i>	
Application of Real-Time Big Data Technology in Complex Power Engineering Management	526
<i>Shenglong Wu (China Huadian Engineering Co., Ltd., China), Boyang Cui (China Huadian Engineering Co., Ltd., China), and Yaqi Zhang (China Huadian Engineering Co., Ltd., China)</i>	
Trust Usage Control Approach for Media Player Based on Intel SGX	533
<i>Ruoyu Wang (Guangzhou University, China), Junjian Li (GuangZhou University, China), Chao Li (GuangZhou University, China), Naqin Zhou (GuangZhou University, China), and Jiahao Liu (GuangZhou University, China)</i>	
Toward the Secure Transmission of Large-Scale Images in Autonomous Driving	540
<i>Lijing Ren (Guangdong Mechanical & Electrical Polytechnic, China), Denghui Zhang (Guangzhou University, China), Qingduo Zeng (Guangdong University of Technology, China), and Zhaoquan Gu (Harbin Institute of Technology (Shenzhen), China)</i>	

Situation Awareness Analysis for Cyberspace Security (SAACS 2023)

An Evaluation Method of Vehicle-Road-Cloud Collaborative System Security Situation Based on (CD)2-A Elastic Computing Framework	546
<i>Shizhun Jia (Peng Cheng Laboratory, China), Tian Zhang (Peng Cheng Laboratory, China), Wenhui Lin (Peng Cheng Laboratory, China), Mi Zhou (Peng Cheng Laboratory, China), and Xiaoxia Li (Peng Cheng Laboratory, China)</i>	
Identifying Mobile Application over Shadowsocks with Single-Direction Traffic	551
<i>Simiao Cui (Beijing University of Posts and Telecommunications, China), Dinghua Wang (National Computer Network Emergency Response Technical Team/Coordination Center, China), Xi Zhang (Beijing University of Posts and Telecommunications, China), Ming Zhang (Fujian Branch of National Computer Network Emergency Response Technical Team/Coordination Center, China), and Sanchuan Guo (Beijing University of Posts and Telecommunications, China)</i>	

Empirical Study of the IPv4 and IPv6 Networks at the Autonomous System Level	559
<i>Jiaqi Nie (Zhejiang University of Technology, China), Jiangtao Hao (Zhejiang University of Technology, China), Songtao Peng (Zhejiang University of Technology, China), Xincheng Shu (Zhejiang University of Technology, China), Zhongyuan Ruan (Zhejiang University of Technology, China), and Qi Xuan (Zhejiang University of Technology, China)</i>	
Cross-System Data Integration Based on Rule-Based NLP and Node2Vec	566
<i>Jiakai Xiao (State Grid Anhui Electric Power Company), Wei Du (Hefei University of Technology), Zhengxiang Xu (Hefei University of Technology), and Yang Qian (Hefei University of Technology)</i>	

Graph Representation Learning and its Applications (GRLA 2023)

Graph Pattern Matching based Intelligent Operation and Maintenance Method for Cloud Resource Operation	571
<i>Lin Qiao (State Grid Liaoning Electronic Power Company, China), Ruiting Qu (State Grid Liaoning Electronic Power Company, China), Qing Song (State Grid Liaoning Electronic Power Company, China), Xuming Lyu (State Grid Liaoning Electronic Power Company, China), Lixia Wang (State Grid Liaoning Electronic Power Company, China), and Jun Qi (State Grid Liaoning Electronic Power Company, China)</i>	
Service Resources Mining Based on Association Rules	579
<i>Ruiting Qu (Information and communication branch of State Grid Liaoning Electric Power Company, China), Lin Qiao (Information and communication branch of State Grid Liaoning Electric Power Company, China), Qing Song (Information and communication branch of State Grid Liaoning Electric Power Company, China), Yuanqi Yu (Information and communication branch of State Grid Liaoning Electric Power Company, China), Zhenjiang Lei (Information and communication branch of State Grid Liaoning Electric Power Company, China), Ran Ran (Information and communication branch of State Grid Liaoning Electric Power Company, China), Haomiao Wang (Information and communication branch of State Grid Liaoning Electric Power Company, China), and Tianbo Wang (Information and communication branch of State Grid Liaoning Electric Power Company, China)</i>	
Cybersecurity Knowledge Graph Enables Targeted Data Collection for Cybersecurity Analysis	583
