2023 International Conference on Power, Electrical Engineering, Electronics and Control (PEEC)

PEEC 2023

Table of Contents

Message from the General Chair ..... **xxix**

2023 International Conference on Power, Electrical Engineering, Electronics and Control

Research on Performance and Optimization of Electric Vehicle Fuel Cell System Based on State Feedback 1
Guizhi Sun (Yantai Vacational College, China), Zhenquan Song (Yantai Star Auto Service Co, Ltd, China), Junhong Xi (Yantai Vacational College, China), and Liang Zhu (Yantai Vacational College, China)

Research on the Application of the Combination of Artificial Intelligence and Electrical Automation 6
Jiankun Liu (Tianjin University of Technology, China)

Research on Intelligent Algorithm of Public Network Attack Data Mining Based on Deep Neural Network 11
Bihua Zhuo (Officers College of PAP Department of Information and Communication, China), Zhenyu Song (Officers College of PAP Department of Information and Communication, China), and Qiutong Lin (Officers College of PAP Department of Information and Communication, China)

Predictive Modeling of Power Equipment Operation and Maintenance Based on Event Knowledge Graph 16
Jun Pan (State Grid Zhejiang Electric Power Co., Ltd. Jinhua Power Supply Company, China), Xiang Gao (State Grid Zhejiang Electric Power Co., Ltd. Jinhua Power Supply Company, China), Qian Chen (State Grid Zhejiang Electric Power Co., Ltd. Jinhua Power Supply Company, China), and Yunlong Wang (State Grid Zhejiang Electric Power Co., Ltd. Jinhua Power Supply Company, China)

Optimization Design of English Translation Error Recognition Algorithm Based on Particle Swarm Optimization Neural Network 22
Fei Gao (Wenhua College, China)

Stability Analysis of a Class of Fractional-Order Controllers 27
Shuxian Deng (Zhengzhou Shengda University, China) and Lina Zhang (Zhengzhou Zhongyuan Xuesen Experimental School, China)

Construction of Doubt Prediction Model of Audit Big Data Based on Fuzzy Clustering Algorithm 33
Rong Xu (Sichuan University Jinjiang College, China)

Research on Imbalanced Data Classification and Computing Methods Using Support Vector Machine 38
Yiyao Wang (Shandong Experimental High School, China), Zirui Zhang (Shandong Experimental High School, China), Yuxi Liu (Shandong Experimental High School, China), and Yucheng Wu (Charles Wright Academy, United States)

Design and Optimization of Digital Substation Integrated Automation System Based on Improved Genetic Algorithm 41
Ran Guo (Taiyuan University of Technology, China)

Research on the Application of Geographic Information Data of Three-Dimensional Digital Aerial Surveying Image Technology in Power System 47
Ran Liu (State Grid Liaoning Electric Power Company Limited Economic Research Institute, China), Yan Liu (State Grid Liaoning Electric Power Company Limited Economic Research Institute, China), Zhuohang Wu (State Grid Liaoning Electric Power Company Limited Economic Research Institute, China), Dongxue Li (State Grid Liaoning Electric Power Company Limited Economic Research Institute, China), Qiang Ma (State Grid Liaoning Electric Power Company Limited Economic Research Institute, China), Youhui Chen (State Grid Liaoning Electric Power Company Limited Economic Research Institute, China), Guolong Chen (State Grid Liaoning Electric Power Company Limited Economic Research Institute, China), Ming Lu (State Grid Liaoning Electric Power Company Limited Economic Research Institute, China), and Ji Zhang (State Grid Liaoning Electric Power Company Limited Economic Research Institute, China)

Research on Intelligent Meter System Based on GPS Automatic Positioning 51
Xvbo Huang (Tongren Power Supply Company, China), Jiahao Wang (Tongren Power Supply Company, China), Yichao He (Tongren Power Supply Company, China), Shi Cheng (Tongren Power Supply Company, China), Yanna Wang (Tongren Power Supply Company, China), and Jingbo Yao (Tongren Power Supply Company, China)

Research on the Construction of Smart Transportation System Based on the Double-Difference Digital Twin Technology Test Model 56
Songchun Wang (Zhuhai College, Beijing Institute of Technology, China), Guoxing Shi (Birch Central School, China), and Ting Qin (Zhuhai Technician College, China)

Realization of Electric Control System in Thermal Power Plant Based on Fuzzy Control Algorithm 61
Yuejuan Huang (Harbin Huade University, China), Linlin Wang (Harbin Huade University, China), Fanju Zeng (Harbin Huade University, China), Ying Wei (Harbin Huade University, China), and Siyu Lu (Harbin Huade University, China)

Research on Photothermal Integration Technology of Tropical Photovoltaics 66
Yongzhuo Cheng (Datang Hainan Energy Development Co., Ltd., China), Lingpei Gongye (Datang Sanya Future Energy Research Institute Co., Ltd., China), Yanpeng Liu (New Energy Branch of Datang Hainan Energy Development Co., Ltd., China), Hongfen Tang (China Datang Corporation Science and Technology General Research Institute Ltd., China), Hongtao Li (China Electric Power Research Institute, China), and Yuan Li (China Electric Power Research Institute, China)

Construction of Direct Current Power Metering and Power Quality Detection System Based on Improved Particle Swarm Optimization Algorithm 70
Xurong Jin (State Grid Ningxia Marketing Service Center (State Grid Ningxia Metrology Center), China), Lihua Zhang (State Grid Ningxia Marketing Service Center (State Grid Ningxia Metrology Center), China), Xu Chen (State Grid Ningxia Marketing Service Center (State Grid Ningxia Metrology Center), China), Xinrui Zhang (State Grid Ningxia Marketing Service Center (State Grid Ningxia Metrology Center), China), Chao Zhang (State Grid Ningxia Marketing Service Center (State Grid Ningxia Metrology Center), China), and Yinzhe Xu (State Grid Ningxia Marketing Service Center (State Grid Ningxia Metrology Center), China)

Quantitative Analysis and Prediction of Power Grid Equipment Production Cost Based on Stepwise Pegression Analysis 77
Fang Shao (State Grid Hubei Extra High Voltage Company, China), Zhiwei Li (State Grid Hubei Electric Power Co. LTD, China), Zhuojun Xiang (Hubei University of Economics (Students), China), Xianfeng Shi (Hubei State Grid Central China Technology Development Co., LTD, China), Hongliang Han (Hubei State Grid Central China Technology Development Co., LTD, China), and Sen Yang (Wuhan Huaxia Institute of Technology, China)

Research on Power Security Management and Control System Based on Big Data Algorithm and Internet of Things Technology 81
Dan Li (State Grid Danyang Contyelectric Power Supply Company, China), Xushuang Ding (State Grid Danyang Contyelectric Power Supply Company, China), Yang Chen (State Grid Danyang Contyelectric Power Supply Company, China), Xubin Wang (State Grid Danyang Contyelectric Power Supply Company, China), and Hanqing Wu (State Grid Zhenjiang Power Supply Company, China)

Application of Artificial Intelligence Technology in Power Equipment Condition Prediction and Maintenance 86
Xu Wang (Tianjin University of Technology, China) and Zhe Duan (Tianjin Eco City State Owned Assets Management Co, China)

Simulation of Dynamic Capacity Increasing Dispatching Model of Transmission Section Based on Fuzzy Neural Network 91
Rongtao Liao (Information & Communication Branch of State Grid Hubei Electric Power Company, China), Shengwei Wang (Information & Communication Branch of State Grid Hubei Electric Power Company, China), Yixi Wang (Information & Communication Branch of State Grid Hubei Electric Power Company, China), Lei Li (Information & Communication Branch of State Grid Hubei Electric Power Company, China), and Yuxuan Ye (Information & Communication Branch of State Grid Hubei Electric Power Company, China)

Research on Application of Computer Artificial Intelligence Technology in Electric Power Marketing Management System 97
Shengteng Yan (State Grid Fujian Power Co., Ltd., China) and Shi'an Zhan (State Grid Fujian Power Co., Ltd., China)

Design of Control Algorithm for I-ion Battery Pile Based on Particle Swarm Optimization Algorithm 102
Li Liu (Xinjiang Institute of Engineering, China), Yongsheng Jiang (Xinjiang Institute of Engineering, China), Tuerdi Wumaier (Xinjiang Institute of Engineering, China), and Yahui Wang (Xinjiang Institute of Engineering, China)

Power System Optimal Dispatch and Transaction Model Considering Renewable Energy Output and Electricity Price Volatility 108
Li Bo (Electric Power Dispatching and Control Center of Guangdong Power Grid Co., Ltd, China), Lu Jiangang (Electric Power Dispatching and Control Center of Guangdong Power Grid Co., Ltd, China), Zheng Wenjie (Electric Power Dispatching and Control Center of Guangdong Power Grid Co., Ltd, China), Zhao Ruifeng (Electric Power Dispatching and Control Center of Guangdong Power Grid Co., Ltd, China), Pan Kaiyan (Dongfang Electronics Cooperation, China), and Gao Haixiang (Electric Power Dispatching and Control Center of Guangdong Power Grid Co., Ltd, China)

Design of Current Limiting Optimization Control System for High Voltage Direct Current Circuit Breaker Based on Particle Swarm Optimization 113
Zhaowei Peng (Electric Power Research Institute of State Grid Jibei Electric power Company Limited, China), Peng Song (Electric Power Research Institute of State Grid Jibei Electric power Company Limited, China), Dangguo Xu (Electric Power Research Institute of State Grid Jibei Electric power Company Limited, China), and Shiyang Huang (Electric Power Research Institute of State Grid Jibei Electric power Company Limited, China)

Power Load Forecasting Based on BP Neural Network Optimized by New Improved Genetic Algorithm 118
Xinyue Xu (Tianjin University of Technology, China)

Analysis of Power Communication Network And Power Information Security Based on Data Mining Algorithm Under Edge Collaboration Architecture 123
Qiang Rao (State Grid Hubei Electric Power Company, China), Jie Huang (State Grid Hubei Electric Power Company, China), Ke Zhang (State Grid Hubei Electric Power Company, China), and Jing Jin (State Grid Hubei Electric Power Company, China)

Analysis on Halo Characteristics and Thermal Effect of AC Transmission Line 128
Chen Wei (State Grid Hunan Electric Power Corporation Research Institute, State Grid Laboratory of Electric Equipment Noise and Vibration Research, China), Liu Yiyi (State Grid Hunan Electric Power Corporation Research Institute, State Grid Laboratory of Electric Equipment Noise and Vibration Research, China), Huang Tao (State Grid Hunan Electric Power Corporation Research Institute, State Grid Laboratory of Electric Equipment Noise and Vibration Research, China), Che Yao (State Grid Hunan Electric Power Corporation Research Institute, State Grid Laboratory of Electric Equipment Noise and Vibration Research, China), and Cao Hao (State Grid Hunan Electric Power Corporation Research Institute, State Grid Laboratory of Electric Equipment Noise and Vibration Research, China)

Design and Implementation of Power System Grounding Grid Fault System Based on Fuzzy Control Algorithm 132
Jianbiao Shou (State Grid Xinyuan Fuchunjiang Hydropower Plant, China), Ping Fang (State Grid Xinyuan Fuchunjiang Hydropower Plant, China), Min Xu (State Grid Xinyuan Fuchunjiang Hydropower Plant, China), Jianchen Chen (State Grid Xinyuan Fuchunjiang Hydropower Plant, China), and Shan Zhu (State Grid Xinyuan Fuchunjiang Hydropower Plant, China)

Design of Intelligent Management Platform for Electric Valve by Calculation Information 137
Zhenguo Zhang (Suzhou Nuclear Power Research Institute Co., Ltd, China), Huixing Feng (Suzhou Nuclear Power Research Institute Co., Ltd, China), Bo Liu (Suzhou Nuclear Power Research Institute Co., Ltd, China), and Weihua Zhao (Suzhou Nuclear Power Research Institute Co., Ltd, China)

Construction of Strong Electricity Construction Quality Control System for Building Electrical Installation Based on Fuzzy Clustering Algorithm 141
Linlin Wang (Harbin Huade University, China) and Yuejuan Huang (Harbin Huade University, China)

Research on New Power System Carbon Footprint Dispatching System Based on Computer Big Data 146
Li Yan (Nari Group Co., LTD., China), Hu Heng (Nari Group Co., LTD., China), Sun Zhen (Nari Group Co., LTD., China), Chen Keyu (Nari Group Co., LTD., China), and Liu Wenpan (Nari Group Co., LTD., China)

Research on Transmission and Distribution Cooperative Control Technology Based on ant Colony Algorithm and Energy Demand Side Response Model 152
Rong Wang (Guizhou Power Grid Co. LTD Xingyi Power Supply Bureau, China), Yang Li (Guizhou Power Grid Co. LTD Xingyi Power Supply Bureau, China), Yu Zhang (Power Grid Planning Research Center of Guizhou Power Grid Co., LTD, China), and Genjun Chen (Nanjing Nanrui Jibao Electric Co., LTD, China)

Carbon Emission Prediction of Power Industry Based on Particle Swarm Optimization Long and Short Term Memory Neural Network 158
Limei Wu (Tianjin Puxun Power Information Technology Co., China), Honghong Hu (Tianjin Puxun Power Information Technology Co., China), and Lijun Wang (Tianjin Puxun Power Information Technology Co., China)

Research on Instantaneous Parameter Extraction of Partial Discharge Signal Based on Grey Clustering Algorithm 165
Wenyan Wang (Soochow University, China)

Optimization of Power Supply Inventory Management Based on Internet of Things Technology ... 170
Sun Haosong (State Grid Fujian Information & Telecommunication Company, China), Su Renjie (State Grid Fujian Information & Telecommunication Company, China), Gao Dongying (State Grid Fujian Information & Telecommunication Company, China), Zhang Hang (State Grid Fujian Information & Telecommunication Company, China), and Guo Lijing (State Grid Info-Telecom Great Power Science and Technology Co. Ltd., China)

Construction of Information Interaction Platform for Power Communication Automation Based on Grey Clustering Algorithm Under Cloud Edge Collaboration Architecture 174
Yixi Wang (Information & Communication Branch of State Grid Hubei Electric Power Company, China), Fen Liu (Information & Communication Branch of State Grid Hubei Electric Power Company, China), Feng Guo (Information & Communication Branch of State Grid Hubei Electric Power Company, China), Hao Feng (Information & Communication Branch of State Grid Hubei Electric Power Company, China), and Jian Zhang (Information & Communication Branch of State Grid Hubei Electric Power Company, China)

Dynamic Reactive Power Optimization of UHV New Energy Power Network Based on QGA 179
Yunjia Bai (Tianjin University of Technology, China)

Application of Cloud Collaborative Computing Model in the Design of Electric Power Communication Information Security Management System 185
Yuxuan Ye (Information & Communication Branch of State Grid Hubei Electric Power Company, China), Lei Li (Information & Communication Branch of State Grid Hubei Electric Power Company, China), Huanjun Hu (Information & Communication Branch of State Grid Hubei Electric Power Company, China), Shengwei Wang (Information & Communication Branch of State Grid Hubei Electric Power Company, China), and Hao Ning (Information & Communication Branch of State Grid Hubei Electric Power Company, China)

Construction of Supply Chain Financial Information Flatform Based on "Blockchain + Internet of Things" 190
Junyao Li (Tianjin University of Technology, China)

Simulation of Verification Model of DC Charging Pile for Electric Vehicle Based on Grey Clustering Algorithm 194
Lihua Zhang (State Grid Ningxia Marketing Service Center (State Grid Ningxia Metrology Center), China), Xurong Jin (State Grid Ningxia Marketing Service Center (State Grid Ningxia Metrology Center), China), Xinrui Zhang (State Grid Ningxia Marketing Service Center (State Grid Ningxia Metrology Center), China), Xu Chen (State Grid Ningxia Marketing Service Center (State Grid Ningxia Metrology Center), China), Chao Zhang (State Grid Ningxia Marketing Service Center (State Grid Ningxia Metrology Center), China), and Long Ou (State Grid Ningxia Marketing Service Center (State Grid Ningxia Metrology Center), China)

Evaluation Model of Power Industry User Satisfaction Based on Improved Ant Colony Algorithm 200
Hanming Xu (Tianjin University of Technology, China)

Design of Automatic Identification System of Electrical Measuring Instrument Based on Artificial Intelligence Technology 205
Xiaocen Zhang (Foshan Power Supply Bureau of Guangdong Power Grid Co., Ltd., China), Qingsha Huang (Foshan Power Supply Bureau of Guangdong Power Grid Co., Ltd., China), Jiamin Hu (Foshan Power Supply Bureau of Guangdong Power Grid Co., Ltd., China), and Xianhui Xue (Foshan Power Supply Bureau of Guangdong Power Grid Co., Ltd., China)

Research on Intelligent Evaluation Model of Maintenance Efficiency of Power Internet System Using Data Collection and Processing 210
Yintie Zhang (State Grid Electric Power Research Institute Co., LTD, China), Yeteng An (State Grid Customer Service Center, China), Zhimin Li (State Grid Customer Service Center, China), Guangming Fan (State Grid Electric Power Research Institute Co., LTD, China), Yu Wu (State Grid Electric Power Research Institute Co., LTD, China), and Linhui Mao (State Grid Electric Power Research Institute Co., LTD, China)

Adjustment Design of Relay Protection System Reliability Algorithm Based on Fuzzy Clustering 215
Xiaokang Zhou (Guizhou Power Grid Co., Ltd., China), Yi Zhou (Guizhou Power Grid Co., Ltd., China), Xi Fang (Guizhou Power Grid Co., Ltd., China), Lei Huang (Guizhou Power Grid Co., Ltd., China), Yang Qin (Guizhou Power Grid Co., Ltd., China), and Chaozhu Hu (Guizhou Power Grid Co., Ltd., China)

Charging Station System Based on IoT Platform 220
Li Wenjing (State Grid Information & Telecommunication Group Co., Ltd., China), Li Qiang (State Grid Information & Telecommunication Group Co., Ltd., China), Liu Zhu (State Grid Information & Telecommunication Group Co., Ltd., China), Deng Huixian (State Grid Info-Telecom Great Power Science and Technology Co., Ltd., China), and Guo Mengxi (State Grid Info-Telecom Great Power Science and Technology Co., Ltd., China)

Construction of Communication Information Encryption Transmission System Based on Bayesian Algorithm 227
Hao Chen (Jiaxing Hengchuang Power Design and Research Institute, China), Yuan Ji (Jiaxing Hengchuang Power Design and Research Institute, China), Jiawei Wang (Jiaxing Hengchuang Power Design and Research Institute, China), and Jie Chen (State Grid Jiaxing Electric Power Supply Company, China)

Research on Reliability and Fault Soft Self-Healing of Distribution Network 232
Yang Cai (Liaoning Technical University, China), San Zhang (Southwest Petroleum University, China), Zhidong Wang (China Southern Power Grid Company Limited, China), and Qiuyue Li (Shandong University, China)

Simulation of Microgrid Data Exchange Model Based on Support Vector Machine Algorithm 239
Meiwei Hao (State Grid Tianjin Electric Power Company Information Communication Company, China), Yongdi Bao (State Grid Tianjin Electric Power Company Information Communication Company, China), and Kai Wang (State Grid Tianjin Electric Power Company Information Communication Company, China)

Simulation Modeling of Whole-Process Material Management of Distribution Network Energy Engineering Based on Markov Algorithm 244
Yan Huifeng (State Grid Hunan Electric Power Co., Ltd., China), Xiang Ying (State Grid Hunan Electric Power Co., Ltd., China), Yu Xuyang (State Grid Hunan Electric Power Co., Ltd., China), Wu Peilin (State Grid Hunan Electric Power Co., Ltd., Economic and Technological Research Institute, China), Liu Cong (State Grid Hunan Electric Power Co., Ltd., Economic and Technological Research Institute, China), Liu Yuyou (State Grid Hunan Electric Power Co., Ltd., Economic and Technological Research Institute, China), and Liu Pengfei (Tiandi Dianyan (Beijing) Technology Co., Ltd., China)

Construction of Power Equipment Running Status Monitoring System Based on Infrared Temperature Measurement Technology and Big Data Algorithm 250
Ziqiang Guo (State Grid Lanzhou Power Supply Company, China), Jie Guo (State Grid Lanzhou Power Supply Company, China), Chengjia Bao (State Grid Gansu Electric Power Company, China), Tianyi Zhang (State Grid Lanzhou Power Supply Company, China), and Meng Li (State Grid Lanzhou Power Supply Company, China)

Analysis and Research on the Key Issues of Electricity Market Structure and Transmission Congestion Based on Financial Transmission Rights 255
Ni Hui (Beijing Qu Creative Technology Co Ltd, China), Chen Xieming (Beijing Qu Creative Technology Co Ltd, China), and Peng Yi (Beijing Qu Creative Technology Co Ltd, China)

Construction of Multi-Objective and Multi-Regional Power Grid Planning System Based on Improved Particle Swarm Optimization 261
Hua Gao (Power Grid Planning Research Center of Guizhou Power Grid Co., Ltd, China)

Application of Digital Monitoring System Based on Internet of Things in Intelligent Control and Management of Methanol Reforming Hydrogen Fuel Cell 266
Jianyue Shen (Shanghai Palcan New Energy Technology Co., Ltd, China), Xuanjun Chen (Ningbo Electric Power Design Institute Co., Ltd, China), Jiangjing Wang (State Grid (Ningbo) Integrated Energy Service Co., Ltd, China), Chaohong Lin (Ningbo Electric Power Design Institute Co., Ltd, China), and Liqiong Jiang (Shanghai Palcan New Energy Technology Co., Ltd, China)

A Massive Resource Power System Operation Supporting System Adapting to Dual Carbon Goals 271
Li Bo (Electric Power Dispatching and Control Center of Guangdong Power Grid Co., Ltd, China), Lu Jiangang (Electric Power Dispatching and Control Center of Guangdong Power Grid Co., Ltd, China), Huang Jinhua (Electric Power Research Institute of Guangdong Power Grid Co., Ltd, China), Zhao Ruifeng (Electric Power Dispatching and Control Center of Guangdong Power Grid Co., Ltd, China), Pan Kaiyan (Dongfang Electronics Cooperation, China), and Zheng Wenjie (Electric Power Dispatching and Control Center of Guangdong Power Grid Co., Ltd, China)

Construction of Power Grid Investment Optimization Model Based on Improved Particle Swarm Optimization Algorithm 277
Zhipeng Zhang (Hangzhou Power Supply Co., Ltd., China), Xuan Yang (Hangzhou Power Supply Co., Ltd., China), Genfu Ye (Hangzhou Power Supply Co., Ltd., China), Jiabin Huang (Hangzhou Power Supply Co., Ltd., China), and Binglei Luo (Hangzhou Power Supply Co., Ltd., China)

Research on Coordination and Interaction Optimization of Power Grid and Demand Side Electric Energy Considering the Differentiation Mechanism 282
Zhang Haijing (State Grid Shandong Electric Power Company Marketing Service Center, China), Ju Wenjie (State Grid Shandong Electric Power Company Marketing Department, China), Sun Xiaobin (State Grid Shandong Electric Power Company Marketing Service Center, China), Guo Ke (State Grid Shandong Electric Power Company Marketing Service Center, China), and Li Hanqi (State Grid Shandong Electric Power Company Marketing Service Center, China)

Distributed Energy Storage Coordination Scheduling Algorithm Based on Big Data 286
Guanghua Lu (State Grid Information & Telecommunication Co., Ltd., China), Zenghai Wang (State Grid Information & Telecommunication Co., Ltd., China), Yingxue Sun (State Grid Information & Telecommunication Co., Ltd., China), Lijun Ma (State Grid Information & Telecommunication Co., Ltd., China), and Jie Yang (State Grid Information & Telecommunication Co., Ltd., China)

Multiple Optimization Methods of Automatic Application in Last-Mile Delivery System 291
Ruili Yao (New York University, USA)

Research on Optimization of Anomaly Detection System of Electric Power Marketing Data Based on Ant Colony Algorithm 295
Duohong Xu (State Grid Gansu Electric Power Company, China), Li Cheng (State Grid Gansu Electric Power Company, China), Jingzhong Liu (State Grid Gansu Electric Power Company, China), Hu Li (State Grid Gansu Electric Power Company, China), and Zhiguo Wang (State Grid Gansu Electric Power Company, China)

Analysis and Prospect of Existing UAV Path Planning Algorithms 301
Hongtao Zhang (Tianhua College of Shanghai Normal University, China)

Design of Transmission Line Maintenance Tool Based on Artificial Neural Network Algorithm 305
Yalin Zhang (State Grid Lanzhou Power Supply Company, China), Yi Mu (State Grid Lanzhou Power Supply Company, China), Jun Zhao (State Grid Gansu Electric Power Company, China), Ziqiang Guo (State Grid Lanzhou Power Supply Company, China), Hui Wang (State Grid Lanzhou Power Supply Company, China), and Yapen Wu (State Grid Lanzhou Power Supply Company, China)

Research on the Application of the Method Based on WOA-ELM and Circular Decision 310
Heng Xiao (Guangdong University of Foreign Studies, China), Chenjie Lu (Guangdong University of Foreign Studies, China), Junyao Tong (Guangdong University of Foreign Studies, China), and Xuezhong Chen (Guangdong University of Foreign Studies, China)

Simulation Research on Camouflaged Intrusion Detection Model Based on Improved RF Algorithm 314
Bo Liu (State Grid Henan Electric Power Company, China), Fangfang Dang (State Grid Henan Electric Power Company Information and Communication Branch (Data Center), China), Ying Yang (State Grid Henan Electric Power Company Information and Communication Branch (Data Center), China), Dingding Li (State Grid Henan Electric Power Company Information and Communication Branch (Data Center), China), and Yifan Song (State Grid Henan Electric Power Company Information and Communication Branch (Data Center), China)

Research on Learning Motivation Based on Matrix Operation 319
Guifu Li (Chongqing Normal University, China) and Yong Chen (Chongqing Normal University, China)

Research on Automatic Start-up and Debugging Method of Electrical Engineering Equipment Based on Apriori Algorithm 324
Chunbo Liu (Hainan Digital Grid Research Institute, China Southern Power Grid, China) and Taifeng Chen (Hainan Digital Grid Research Institute, China Southern Power Grid, China)

Power System Operation Optimization Process and Network System Design Based on Power Big Data 329
Zhou Xin (CSG Power Dispatching and Control Center, China), Yuan Quan (CSG Power Dispatching and Control Center, China), Li Bao (CSG Power Dispatching and Control Center, China), and Wang Wei (CSG Power Dispatching and Control Center, China)

Research on Variable Voltage-Constant Voltage Phased Pulse Charging Method for Lithium Batteries Based on Fuzzy Algorithm 334
Qixun Tian (Chongqing Jiaotong University, China), Bohan Zhan (Chongqing Jiaotong University, China), Dongzhuo Wang (Chongqing Jiaotong University, China), Teng Li (Chongqing Jiaotong University, China), Yizhe You (Chongqing Jiaotong University, China), and Shengli Wu (Chongqing Jiaotong University, China)

Research on Planning of Ordering and Transportation Based on Multi-Model Prediction and Heuristic Algorithm 339
Mingyu Niu (Xijing University, China) and Weipeng Huang (Heilongjiang Bayi Agricultural University, China)

Research on Optimal Layout of Sensors in Civil Engineering Structure Based on Association Rule Mining Algorithm 343
Yuan Lu (East University of Heilongjiang, China)

Research on Intelligent Safety Auxiliary Monitoring Method for Electric Deep Foundation Pit Operation 347
Haohua Yu (Ningbo Hengchen Power Construction Co., Ltd, China), Jiafeng Xia (State Grid Zhejiang Electric Power Co., Ltd. Ningbo Fenghua District Power Supply Company, China), Liming Qin (Ningbo Hengchen Power Construction Co., Ltd, China), Yong Ye (Ningbo Hengchen Power Construction Co., Ltd; State Grid Zhejiang Electric Power Co., Ltd. Ningbo Fenghua District Power Supply Company, China), Yuanlin Li (State Grid Zhejiang Electric Power Co., Ltd. Ningbo Fenghua District Power Supply Company, China), and Ping Dong (State Grid Zhejiang Electric Power Co., Ltd. Ningbo Fenghua District Power Supply Company, China)

Research on 3D Integrated Circuit Layout Planning Model Based on Genetic Algorithm 354
Cheng Cai (Zhenjiang Power Supply Branch of State Grid Jiangsu Electric Power Co., Ltd., China) and Mengting Mao (Danyang Power Supply Branch of State Grid Jiangsu Electric Power Co., Ltd., China)

Time Series Forecasting Based on ARIMA and LSTM Models 359
Zhengzhe Cheng (Northeast Forestry University, China), Hanyi Xu (Northeast Forestry University, China), Yuetong Wang (Northeast Forestry University, China), and Hao Zhou (Sun Yat-sen University, China)

Design of English Translation Model for Intelligent Recognition Based on Support Vector Machine Algorithm 365
Li Ting (Yantai Nanshan University, China)

Research on Condition Monitoring Technology of Modular Reactive Power Compensation Control System 369
Qiang Gao (Electric Power Research Institute of State Grid Liaoning Electric Power Supply Co., Ltd., China), Feng Yuan (Electric Power Research Institute of State Grid Liaoning Electric Power Supply Co., Ltd., China), Jicheng Dai (Electric Power Research Institute of State Grid Liaoning Electric Power Supply Co., Ltd., China), Dongxu Zhao (State Grid Liaoning Electric Power Supply Co., Ltd., China), Zailin Li (Electric Power Research Institute of State Grid Liaoning Electric Power Supply Co., Ltd., China), Fenghou Pan (Electric Power Research Institute of State Grid Liaoning Electric Power Supply Co., Ltd., China), and Jiayu Pan (Electric Power Research Institute of State Grid Liaoning Electric Power Supply Co., Ltd., China)

Research on Three-Dimensional System of Career Planning Based on BP Neural Network 375
Linbo Wei (Wuhan Business University, China) and Linzheng Ren (XiJing University, China)

Optimal Simulation Design of Mobile Communication Attenuation Model Based on Ant Colony Algorithm 379
Xiaoliang Xu (Weifang Engineering Vocational College, China), Hailin Liu (Weifang Engineering Vocational College, China), and Weiyan Feng (Weifang Engineering Vocational College, China)

Research on Algorithm of Land Engineering Survey Technology Based on Computer Big Data Mining 385
Fengmei Cao (Taishan Natural Resources Bureau Land Reserve Development and Consolidation Center, China)

Design of Urban Traffic Control Algorithm Based on Traffic Big Data 391
Boyuan Zheng (Chang'an University, China) and Yunheng Zhang (Chang'an University, China)

Research on Personalized Recommendation Algorithm of Wenchuang Based on Association Rules Mining 397
Liping Qiu (City College of Dongguan University of Technology, China)

Simulation of Network Security Situation Assessment Model Based on Machine Learning Algorithm 402
Hongyan Fu (Liaoning Agricultural Technical College, China), Meiling Liu (Liaoning Agricultural Technical College, China), and Yue Zou (Liaoning Agricultural Technical College, China)

Research on Transparent Access Technology of Data Resources Based on Blockchain 408
Zhou Xiongqing (Jiangsu College of Tourism, China)

Research on a High-Precision Indoor Positioning Algorithm Based on UWB 413
Suyan Su (State Grid Fujian Xiamen Electric Power Supply Company, China), Jun Chen (Fuzhou University, China), Duanyun Chen (State Grid FuJian Electric Power CO. LTD, China), Shu Lin (State Grid Fujian Xiamen Electric Power Supply Company, China), and Jiayi Han (Fuzhou University Jinjiang Campus, China)

Research on Visual Detection of Fluorescent Carbon Quantum Dot Sensor Based on Hydrothermal Synthesis 419
Lei Wang (Fujian Normal University, China)

Design of Nondestructive Detection System for Magnetostrictive Guided Waves of Power Towers Based on Grey Clustering Algorithm 424
Machao Jiang (State Grid Henan Electric Power Company Hebi Power Supply Company, China), Xiaoyang Miao (State Grid Henan Electric Power Company Hebi Power Supply Company, China), Xiaolong Xing (State Grid Henan Electric Power Company Hebi Power Supply Company, China), Chenming Zhang (State Grid Henan Electric Power Company Hebi Power Supply Company, China), and Jing Chen (State Grid Henan Electric Power Company Hebi Power Supply Company, China)

Intelligent Sports Data Measurement Based on Multi Data Fusion 430
Yanli Cai (Wuhan Qingchuan University, China)

Design of Automatic Control System for Garden Irrigation Based on Artificial Intelligence Algorithm 435
Yang Gao (Liaoning Communication College, China)

Construction of Enterprise Intelligent Financial Decision Support System Based on Data Mining Technology 441
Liuwei Chen (Hubei Three Gorges Polytechnic, China)

Design of a Contrast Enhancement Algorithm for Visual Communication Images Based on PSO 445
Xingwei Qu (Shaanxi Fashion Engineering University, China), Yang Yu (Shaanxi Fashion Engineering University, China), Shaobin Bian (Shaanxi Fashion Engineering University, China), and Chaoying Xiao (Shaanxi Fashion Engineering University, China)

Research on Intelligent Semantic Checking Algorithm of Article Editing Based on Artificial Intelligence 450
Jian Gao (Harbin Normal University, China)

Design of Detection and Assessment System for Electric Vehicle Charging Station Based on Genetic Algorithm 455
Weixin Liu (State Grid Xinjiang Company Limited Electric Power Research Institute, China), Xiaowen Wang (Xinjiang Uygur Autonomous Research Institute Of Measurement and Testing, China), Xiaolei Zhang (State Grid Xinjiang Company Limited Electric Power Research Institute, China), Yang Ding (State Grid Xinjiang Company Limited Electric Power Research Institute, China), and Qingtian Li (State Grid Aletai Electric Power Supply Company, China)

Optimization of Software Engineering Supervision Based on Machine Learning Algorithm 460
Kang Tianchi (Qingdao City University, China)

Design of Human Posture Recognition System Integrating Computer Vision and Deep Learning Algorithm 465
Jinquan Chu (Qufu Normal University, China), Haoyi Wang (Qufu Normal University, China), Anxing Dong (Qufu Normal University, China), and Yuming Chen (Qufu Normal University, China)

Research on User Profile and Personalized Recommendation Based on Collaborative Filtering Algorithm 470
Liu Liyuan (Dongguan Power Supply Bureau of Guangdong Power Grid Corporation, China), Liu Piao (Dongguan Power Supply Bureau of Guangdong Power Grid Corporation, China), Yv Ling (Dongguan Power Supply Bureau of Guangdong Power Grid Corporation, China), and Leng Yingxiong (Dongguan Power Supply Bureau of Guangdong Power Grid Corporation, China)

Design and Application of the Full Life Cycle of Electronic Transfer of GIS Platform Operation and Distribution Integrated Distribution Network 475
Wei Guo (Hainan Power Grid Co., Ltd., China), Qing Yan (Hainan Power Grid Co., Ltd., China), Dazhi Zhu (Hainan Power Grid Co., Ltd., China), Guoshi Wang (Hainan Power Grid Co., Ltd., China), and Ying Liu (Hainan Power Grid Co., Ltd., China)

Research on Personalized Recommendation System of New Media Short Video Based on Local Random Walk 481
Xuelin Liu (Hankou University, China)

Research on Map Matching Algorithm of Vehicle Navigation System Based on Remote Sensing Image Processing 486
Qiwen Huang (Yangtze University, China)

Research on Digital Sports Training System Based on Information Fusion Technology 492
Shu Qiao (Wuhan Qingchuan University, China)

Design of Wind Power Grid Connected Energy Storage Cluster Control Algorithm Based on Virtual Simulation 496
Qingsheng Li (Power Grid Planning Research Center of Guizhou Power Grid, China), Yu Zhang (Power Grid Planning Research Center of Guizhou Power Grid, China), Zhen Li (Power Grid Planning Research Center of Guizhou Power Grid, China), Xifeng Zhu (Shanghai Puyuan Technology Co., Ltd., China), and Ruyi Wan (Shanghai Puyuan Technology Co., Ltd., China)

Research on the Drop Point Distribution of Conductive Fiber Bundles Based on Microfluidics..... 501
Kai Cui (China Building Materials Academy, China), Ming Xu (China Building Materials Academy, China), and Fan Zhang (China Building Materials Academy, China)

Design of Security Encryption Algorithm for Distribution Terminal Based on Artificial Neural Network 506
Xiang Li (Information & Communication Branch of Hubei EPC, China), Yue Guo (Information & Communication Branch of Hubei EPC, China), Xian Luo (Information & Communication Branch of Hubei EPC, China), Shengwei Wang (Information & Communication Branch of Hubei EPC, China), Wangsong Ke (Information & Communication Branch of Hubei EPC, China), and Jinyu Yu (Information & Communication Branch of Hubei EPC, China)

Application Analysis of Intelligent Construction Management Based on Ant Colony Algorithm 511
Lu Han (Zhixing College of Hubei University, China)

Design of Equipment Automation Control and Remote Supervision System Based on Artificial Intelligence Algorithm 515
Xiaoge Li (Zibo Technician College, China)

Construction of Mobile Intelligent Service System for Urban Gymnasium Based on Simulated Annealing Algorithm 521
Liu Hu (Wuhan Business University, China)

Simulation of Hierarchical Fault Diagnosis Model for Aircraft Electromechanical Systems Based on Machine Learning Algorithms 525
Ji Song (Sanya Aviation and Tourism College, China)

Precise Positioning and Personalized Recommendation Algorithm of Smart Library Based on User Portrait 531
Jia Xinlin (Tianfu College of SWUFE, China) and Li Wenting (Tianfu College of SWUFE, China)

Design of Intelligent Fault Detection and Location Algorithm for Power System Based on Wavelet Analysis 536
Liu Yang (Guoneng Shuo-huang Railway Development Co., Ltd., China), Li Defang (Guoneng Shuo-huang Railway Development Co., Ltd., China), and Li Congbao (Guoneng Shuo-huang Railway Development Co., Ltd., China)

Topic Search Algorithm of Network Multimedia Educational Resources Based on Artificial Intelligence 542
Zhongpeng Lu (Engineering University of the People's Armed Police, China)

Research on Traveling Wave Fault Location of Transmission Lines Based on Particle Swarm Optimization Algorithm 546
Zhai Yantao (Guoneng Shuo-huang Railway Development Co., Ltd., China), Liu Jiyong (Guoneng Shuo-huang Railway Development Co., Ltd., China), and Wang Yonggang (Guoneng Shuo-huang Railway Development Co., Ltd., China)

Digital Analysis of Automotive Equipment Based on Machine Learning 551
Fei Meng (China Automotive Technology and Research Center Co. Ltd, China), Huanhuan Ren (China Automotive Technology and Research Center Co. Ltd, China), and Kai Xiao (China Automotive Technology and Research Center Co. Ltd, China)

Design of Partial Discharge Monitoring Algorithm for Transmission Cable Based on Optical Fiber Sensing Technology 555
Zhu Qifei (Guoneng Shuo-huang Railway Development Co., Ltd., China) and Ma Bin (Guoneng Shuo-huang Railway Development Co., Ltd., China)

Research on Perceptual Quantitative Static Evaluation Model of Intelligent Cockpit 560
Ren Huanhuan (China Automotive Technology and Research Center, China), Li Ya'nan (China Automotive Technology and Research Center, China), and Zhang Bo (China Automotive Technology and Research Center, China)

Design of Steam Thermal Deicing Control System for Wind Turbine Blades Based on BP Neural Network Algorithm 565
Xuefeng Lin (China Huaneng Group Clean Energy Technology Research Institute Co., Ltd, China), Ruxin Zheng (China Huaneng Group Clean Energy Technology Research Institute Co., Ltd, China), Liwei Xu (Tianjin CRRC Wind Energy Technology Co., Ltd, China), Chuanxi Wang (China Huaneng Group Clean Energy Technology Research Institute Co., Ltd, China), Tong Wu (China Huaneng Group Clean Energy Technology Research Institute Co., Ltd, China), Wenkang Yang (Hunan Tianfeng Technology Co., Ltd., China), Zhiyong Liao (Hunan Tianfeng Technology Co., Ltd., China), and Peng Kang (Hunan Tianfeng Technology Co., Ltd., China)

Research on the Construction of Conductive Fiber Network Based on Information Fiber and Its External Field Response Performance 571
Ming Xu (China Building Materials Academy, China), Fei Jia (China Building Materials Academy, China), and Hongquan Bao (China Building Materials Academy, China)

Research on Design and Application of Data Transmission Monitoring System in Thermal Power Plant 576
Runsheng Ma (State Grid Qinghai Electric Power Company Electric Power Science Research Institute, China), Kerong Wang (State Grid Qinghai Electric Power Company Electric Power Science Research Institute, China), Caixiong Fan (State Grid Qinghai Electric Power Company Electric Power Science Research Institute, China), Fuzhi Qi (State Grid Qinghai Electric Power Company Electric Power Science Research Institute, China), and Jiawei Xu (State Grid Qinghai Electric Power Company Electric Power Science Research Institute, China)

Parallel Calculation and Simulation of Urban Rail Transport Train Operation Based on GA 582
Meiqing Zhang (Wuhan Railway Vocational College of Technology, China)

Design of Nonlinear Enhancement Algorithm for Satellite Communication Signals Based on Deep Learning 587
Ying Meng (Beijing Institute of Technology, China) and Lianbo Zhang (Beijing Institute of Technology, China)

Optimization Design of E-Commerce Logistics Terminal Distribution System Based on Simulated Annealing Algorithm 593
Zhen Li (Wuhan Business and Trade Vocational College, China)

Simulation of Signal Source Energy Attenuation Model Based on Genetic Algorithm 597
Shu Tang (Xi'an Technological University, China), Jingru Tan (Xi'an Technological University, China), and Panpan Zhang (Xi'an Technological University, China)

Design of Intelligent Evaluation System for Lyrics and Songs Matching Based on Intelligent Optimization Algorithm 603
Xiaobing Zhang (Anhui Huainan Normal University, China)

Communication Combination Technology and Routing Protocol Algorithm Design Based on Artificial Neural Networks 608
Kun Wang (Wuhan University, China)

Design of Fluid-Structure Coupling Difference Iterative Algorithm for Simply Supported Beam Pipeline Based on Machine Learning Algorithm 614
Jianbing Zhu (Yunnan Technology and Business University, China), Jinlan He (Yunnan Technology and Business University, China), Zhifang Tian (Yunnan Technology and Business University, China), and Taoyan Chen (Yunnan Technology and Business University, China)

Simulation of Coordinated Optimization Model of Power Grid Energy Storage Based on Improved Genetic Algorithm 622
Zhanjun Wang (Shaoguan Power Supply Bureau of Guangdong Power Grid Co., China) and Yang Xu (Shaoguan Power Supply Bureau of Guangdong Power Grid Co., China)

Improved 3D Point Clouds Data Registration Based on Second-Order Oscillation Artificial Bee Colony Algorithm 627
Wei Ma (Nanjing Institute of Tourism and Hospitality, China)

Identification of Mine Rock Stratum Movement Model Based on Improved Genetic Algorithm 636
Xinglong Feng (Yunnan Diqing Nonferrous Metals Co., Ltd, China), Bian Li (Changsha Dimai Digital Technology Co., Ltd, China), Zengrong Li (Yunnan Diqing Nonferrous Metals Co., Ltd, China), Shuang Zhang (Changsha Dimai Digital Technology Co., Ltd, China), and Heng Huang (Yunnan Diqing Nonferrous Metals Co., Ltd, China)

Optimization Design of Apriori Algorithm Based on Big Data Analysis and Cloud Computing 642
Yu Chen (Weifang Engineering Vocational College, China), Zihan Wang (Weifang Engineering Vocational College, China), and Shuai Zhang (Weifang Engineering Vocational College, China)

Prediction and Simulation Design of Cutting Force of Machine Tool Based on Fuzzy Clustering Algorithm 647
Weiming Qin (Shenyang Aerospace University, China)

Security Situation Assessment Model of Big Data Network Based on K-Means Clustering Algorithm 652
Xieyun Zhang (Hainan Modern Management Institute, China) and Simeng Huang (Nanjing University of Posts and Telecommunications Bell honors school, China)

Design of Adaptive Coordinated Control Algorithm for Inertia and Damping of Virtual Synchronous Generator Based on Fuzzy Clustering in Microgrid 658
Jianfeng Wang (SEGi University, Malaysia; Hebei Vocational University of Technology and Engineering, China), Nurulazlina Ramli (SEGi University, Malaysia), and Noor Hafizah Abdul Aziz (Universiti Teknologi MARA (UiTM), Malaysia)

Research on Fault Feature Extraction of Gearbox Bearing Based on Improved Genetic Algorithm 664
Weiming Qin (Shenyang Aerospace University, China)

Detection and Fine Positioning of Basketball Technical Characteristic Target Based on Deep Learning Algorithm 669
Qihong Chen (Guangdong Nanhua Vocational College of Industry and Commerce, China)

Construction of an Intelligent Library Book Management System Based on Artificial Intelligence Algorithms 674
Zhuo Li (Harbin University, China)

Design and Research of Workshop AGV System Scheduling System Based on Intelligent Fuzzy Control Algorithm 679
Fangyang Zhang (City College of Huizhou, China), Jinhang Liu (City College of Huizhou, China), Renjun Wu (City College of Huizhou, China), and Bolin Hou (City College of Huizhou, China)

Design of Massive Data Management System Based on DBN Algorithm 684
Yijiang Liu (Nanjing University of Finance & Economics, China; Massey University, New Zealand)

Design of Automated Warehouse System Based on PID Algorithm 689
Yuan Lin (Zhejiang Huafon Thermoplastic Polyurethane Co., LTD, China), Ximin Lu (Zhejiang Huafon Thermoplastic Polyurethane Co., LTD, China), and Lingke Kong (Zhejiang Huafon Thermoplastic Polyurethane Co., LTD, China)

Simulation of Predictive Control Model of Machining Error Based on Improved Particle Swarm Optimization Algorithm 694
Lifeng Sun (Harbin Huade University, China)

Research on Control and Optimization of Robot's Bottom Action Based on PID Algorithm 699
Rongchang Liu (Nanjing Jiyang Intelligent Information Technology Research Institute Co., Ltd., China)

Simulation Analysis of Seismic Model of Building Structures Based on Hybrid Intelligent Algorithm 704
Peng Zhang (Heilongjiang University of Technology, China)

Design of Robot Interactive Emotion Model Based on Artificial Intelligence Technology 709
Rongchang Liu (Nanjing Jiyang Intelligent Information Technology Research Institute Co., Ltd., China)

Simulation of Big Data Order-Preserving Matching and Retrieval Model Based on Deep Learning 715
Ziqi Zhu (Zhejiang University School of Management, China) and Yingying Fang (Zhejiang University College of Computer Science and Technology, China)

Research on Anomaly Detection Algorithm of Chemical Storage Tanks Based on FCM-LSTM 720
Ximin Lu (Zhejiang Huafon Thermoplastic Polyurethane Co., LTD., China), Yuan Lin (Zhejiang Huafon Thermoplastic Polyurethane Co., LTD., China), and Lei Wang (Zhejiang Huafon Thermoplastic Polyurethane Co., LTD., China)

Simulation of Public Opinion Early Warning Model of Mobile Social Network Based on Big Data Algorithm 727
Lin Gui (Chongqing College of Architecture and Technology, China) and Ling Li (Chongqing College of Architecture and Technology, China)

Design and Implementation of Smart Stadium System Based on Internet Technology 732
Xionghao Zhu (Wuhan University of Technology, China) and Fan Kou (Wuhan University of Technology, China)

Simulation of Compound Forecasting Models of Network Safe Situation Based on Grey Clustering Algorithm 738
Dingding Li (State Grid Henan Information & Telecommunication Company (Data Center), China), Fangfang Dang (State Grid Henan Information & Telecommunication Company (Data Center), China), Ying Yang (State Grid Henan Information & Telecommunication Company (Data Center), China), Shuai Li (State Grid Henan Information & Telecommunication Company (Data Center), China), and Zheng Wang (State Grid Nanyang Electric Power Supply Company, China)

Simulation Design of Intelligent Manufacturing System Architecture Based on Improved Genetic Algorithm 743
Renjun Wu (City College of Huizhou, China), Bolin Hou (City College of Huizhou, China), Jinhang Liu (City College of Huizhou, China), and Fangyang Zhang (City College of Huizhou, China)

Construction of Network Security Situation Assessment Model Based on Improved Ant Colony Algorithm 749
Lei Wang (State Grid Shangqiu Electric Power Supply Company, China), Lijing Yan (State Grid Henan Information & Telecommunication Company (Data Center), China), Ying Yang (State Grid Henan Information & Telecommunication Company (Data Center), China), Han Liu (State Grid Henan Information & Telecommunication Company (Data Center), China), and Yifan Song (State Grid Henan Information & Telecommunication Company (Data Center), China)

Research on Chemical Weak Signal Detection Based on Stochastic Resonance Algorithm 754
Youquan Wang (Guangxi Vocational College of Safety Engineering, China) and Hongyun Huang (Guangxi Vocational College of Safety Engineering, China)

Internet of Things Routing Algorithm Based on Fuzzy K-Means Clustering of Big Data 760
Xian Luo (Information & Communication Branch of Hubei Epc, China), Liang Dong (Information & Communication Branch of Hubei Epc, China), Xiang Li (Information & Communication Branch of Hubei Epc, China), Wangsong Ke (Information & Communication Branch of Hubei Epc, China), and Fei Long (Information & Communication Branch of Hubei Epc, China)

A Method for Weak Edge Extraction of Complex Medical Images Based on Visual Sensors 765
Haoran Chen (The University of Hong Kong, China), Yuhua Dong (Qingdao municipal hospital (GROUP), China), Chengyi Song (Ulster University, England), and Yifei Lv (Tianjin Polytechnic University, China)

Application of Adaptive Neighborhood Denoising Algorithm in Image Enhancement 771
Lei Lei (Electric Power Research Institute of State Grid Shaanxi Electric Power Co., Ltd; State Grid (Xi'an) Environmental Protection Technology Center Co., Ltd, China), Liang Wang (Electric Power Research Institute of State Grid Shaanxi Electric Power Co., Ltd; State Grid (Xi'an) Environmental Protection Technology Center Co., Ltd, China), Qiannan Xue (Xi'An Electric Power Supply Company of State Grid Shaanxi Electric Power Co., Ltd, China), Huanlang Wang (State Grid Shaanxi Electric Power Co., Ltd, China), Yiqing Shi (State Grid Shaanxi Electric Power Co., Ltd, China), and Xiaohui Dai (State Grid Shaanxi Electric Power Co., Ltd, China)

Optimal Design of Intelligent Manufacturing Execution System Based on Artificial Intelligence and Decision Tree Algorithm 776
Rong Chen (Zibo Technician College, China)

Construction of Distribution Network Fault Detection Model Based on Artificial Intelligence Algorithm 781
Shaomin Chen (Guangdong Qingyuan Power Supply Bureau of China Southern Power Grid, China), Yu Tian (Guangdong Qingyuan Power Supply Bureau of China Southern Power Grid, China), Zhenggan Dai (Guangdong Qingyuan Power Supply Bureau of China Southern Power Grid, China), Jianmin Lin (Guangdong Qingyuan Power Supply Bureau of China Southern Power Grid, China), Rumei Huang (Guangdong Qingyuan Power Supply Bureau of China Southern Power Grid, China), and Haoyu Wang (Guangdong Qingyuan Power Supply Bureau of China Southern Power Grid, China)

Construction of Intelligent Power Grid Load Management System Based on Artificial Neural Network Algorithm 788
Jie He (State Grid Jiangsu Electric Power Co., Ltd., China), Chonglei Zhong (State Grid Jiangsu Electric Power Co., Ltd., China), Feng Mao (State Grid Jiangsu Electric Power Co., Ltd., China), Chengwei Zhang (State Grid Donghai County Power Supply Company, China), and Weihe Xu (State Grid Jiangsu Electric Power Co., Ltd., China)

Optimal Design of Smart Grid Information Scheduling Algorithm Based on Deep Learning 794
Taifeng Chen (Hainan Digital Grid Research Institute, China Southern Power Grid. Haikou, China)

Optimization Simulation of Network Retrieval Model Based on Big Data Algorithm 799
Jiaheng Ji (Northwest University, China)

Simulation of Vehicle Scheduling Model for Internet of Things Distribution Based on Particle Swarm Optimization 805
Yue Guo (Information & Communication Branch of Hubei epc, China), Shengwei Wang (Information & Communication Branch of Hubei epc, China), Weijing Yao (Information & Communication Branch of Hubei epc, China), Ronghao Yang (Information & Communication Branch of Hubei epc, China), and Xian Luo (Information & Communication Branch of Hubei epc, China)

Research on Automatic Semantic Classification of Shan Shui Images Based on Enhanced Image Processing Algorithm 810
Lu Li (Xi'an Academy of Fine Arts, China)

Research on Data Acquisition and Reconstruction Algorithm of Sensor Layer in Internet of Things Based on BP Neural Network 816
Rongtao Liao (Information & Communication Branch of Hubei epc, China), Xian Luo (Information & Communication Branch of Hubei epc, China), Weijing Yao (Information & Communication Branch of Hubei epc, China), Ronghao Yang (Information & Communication Branch of Hubei epc, China), and Jundong Huang (Information & Communication Branch of Hubei epc, China)

Research on Robot Inspection Path Planning in Substation Based on Artificial Neural Network Algorithm 821
Xiaodong Li (State Grid Nanjing Power Supply Company, China), Kun Chen (State Grid Nanjing Power Supply Company, China), Xizheng Zhao (State Grid Nanjing Power Supply Company, China), Yuchao Zhu (State Grid Nanjing Power Supply Company, China), and Zhuoran Yang (State Grid Nanjing Power Supply Company, China)

Simulation Optimization of Narrow-Band Internet of Things Coverage Category Updating Based on Ant Colony Optimization Algorithm 826
Fen Liu (Information & Communication Branch of Hubei epc, China), Dai Zhang (Information & Communication Branch of Hubei epc, China), Ronghao Yang (Information & Communication Branch of Hubei epc, China), Jundong Huang (Information & Communication Branch of Hubei epc, China), and Xian Luo (Information & Communication Branch of Hubei epc, China)

Application Research of Temperature Tracing Leakage Detection Based on Particle Swarm Optimization Algorithm 833
Yiran Liu (Hohai University, China), Yuheng Liu (Hohai University, China), Mingjun Ye (Hohai University, China), Wang Li (Hohai University, China), and Peiyang Chen (Hohai University, China)

Design of MPPT Control Algorithm for PV Powern System Based on Grey Clustering 839
Xinqi Ren (Wuxi Dipont School of Art and Science, China) and Xilai Xu (Wuxi Dipont School of Art and Science, China)

Design of Coordinated Control Algorithm for Excitation and Valve of New Energy Generator Set Based on Artificial Neural Network 843
Zhigang Chen (State Nuclear Electric Power Planning Design & Research Institute Co., Ltd, China)

Simulation of Large-Scale 5G Communication Optimization Model Based on Fuzzy Neural Network Optimization Algorithm 849
Xiangling Zhou (Information & Communication Branch of Hubei epc, China), Su Lv (Information & Communication Branch of Hubei epc, China), Xian Luo (Information & Communication Branch of Hubei epc, China), Xiang Li (Information & Communication Branch of Hubei epc, China), and Chao Huang (Information & Communication Branch of Hubei epc, China)

A Mathematical Model of Sound Pressure Attenuation for Optimizing Distribution of Orchestra Instruments 854
Yueqian Hong (Xiamen Foreign Language School, China) and Zongwen Fan (Huaqiao University, China)

Development of Neutral Line Live Detection Device for 400v low-Voltage Distribution Network Based on 4G Mobile Communication Network Transmission 861
Yu Zou (Guangxi Power Grid Corporation, China), Deyin Wang (Guangxi Power Grid Corporation, China), Huaqin Liang (Guangxi Power Grid Corporation, China), and Henglong Chen (Guangxi Power Grid Corporation, China)

Distributed Transaction Performance and Consistency Enhancements Based on Percolator 866
Xin Shi (University of Electronic Science and Technology of China, China), Xiaowen Nie (University of Electronic Science and Technology of China, China), and Qinzhen Cao (University of Electronic Science and Technology of China, China)

Simulation of Power System Transient Stability Based on Improved PSO Algorithm 874
Jiakang Gu (State Grid shanghai Integrated Energy Services Co. Ltd, China), Zhizi Hou (State Grid Shanghai Economic Research Institute, China), and Rong Tian (State Grid Shanghai Economic Research Institute, China)

Time Series Database Optimization Based on InfluxDB 879
Xiaoxiang Zhu (University of Electronic Science and Technology of China, China), Xiaowen Nie (University of Electronic Science and Technology of China, China), and Jibo Liu (University of Electronic Science and Technology of China, China)

Design and Optimization of Distribution Network Short Circuit Fault Location Algorithm Based on DTU and FPI 886
Lei Huang (Tongren Power Supply Bureau of Guizhou Power Grid Co. LTD, China), Xianwen Zhang (Tongren Power Supply Bureau of Guizhou Power Grid Co. LTD, China), Peng Yan (Tongren Power Supply Bureau of Guizhou Power Grid Co. LTD, China), Lu Han (Tongren Power Supply Bureau of Guizhou Power Grid Co. LTD, China), and Xiaohui Long (Tongren Power Supply Bureau of Guizhou Power Grid Co. LTD, China)

MEMS Array Voiceprint Imaging Algorithm and System Design 891
Can Ba (State Grid Ningbo Power Supply Company, China), Xiancheng Luo (State Grid Ningbo Power Supply Company, China), Wen Xia (State Grid Ningbo Power Supply Company, China), Chengjia Ma (State Grid Ningbo Power Supply Company, China), and Xudong Zhou (Ningbo Transmission & Transformation Construction Ltd., China)

Simulation Research on Reliability Evaluation Model of Electric Power Communication Network Based on Particle Swarm Optimization 896
Rong Tian (State Grid Shanghai Economic Research Institute, China)

Lightweight Network Security Protection Strategy for Power IoT in Micro-Grid 901
Jiaxing Xuan (State Grid Digital Technology Holding Co., Ltd.; State Grid Blockchain Technology (Beijing) Co., Ltd., China), Lili Li (State Grid Digital Technology Holding Co., Ltd.; State Grid Blockchain Technology (Beijing) Co., Ltd., China), Liang Zhang (State Grid Anhui Electric Power Co., Ltd., China), and Yuan Fang (State Grid Anhui Electric Power Co., Ltd., China)

Control System of Multi-Function Grid-Connected Inverter for Distributed Power Grid Based on Intelligent Optimization Algorithm 906
Qingsheng Li (Power Grid Planning Research Center of Guizhou Power Grid, China), Julong Chen (Power Grid Planning Research Center of Guizhou Power Grid, China), Yu Zhang (Power Grid Planning Research Center of Guizhou Power Grid, China), Zhen Li (Power Grid Planning Research Center of Guizhou Power Grid, China), and Zewei Liao (GuiZhou University, China)

Cold Start Recommendation Based on Cross-Domain Sharing Knowledge Transfer Learning 911
Chengzhe Li (Beijing University of Technology, China)

Design of a New Distribution Network Fault Location and Diagnosis Algorithm Based on Multivariate Data Fusion 916
Xinxin Wang (Tongren Power Supply Bureau of Guizhou Power Grid Co. LTD, China), Lei Huang (Tongren Power Supply Bureau of Guizhou Power Grid Co. LTD, China), Jiaxin Mei (Tongren Power Supply Bureau of Guizhou Power Grid Co. LTD, China), Peng Wu (Tongren Power Supply Bureau of Guizhou Power Grid Co. LTD, China), and Wei Wu (Tongren Power Supply Bureau of Guizhou Power Grid Co. LTD, China)

Design and Development of an IoT-Based Ecological Environment Monitoring Network 921
Feixian Sun (Henan Finance University; Henan Polytechnic, China)

Design of Fast Distribution Network Fault Location Algorithm Based on Multi-Information Fusion 925
Ying Liu (Tongren Power Supply Bureau of Guizhou Power Grid Co. LTD, China), Lei Huang (Tongren Power Supply Bureau of Guizhou Power Grid Co. LTD, China), Shuang Ran (Tongren Power Supply Bureau of Guizhou Power Grid Co. LTD, China), Shouchang Wu (Tongren Power Supply Bureau of Guizhou Power Grid Co. LTD, China), and Qun Yu (Tongren Power Supply Bureau of Guizhou Power Grid Co. LTD, China)

Research on Logistics Optimization and Development Strategy of e-Commerce Platform Based on NSGA-II 930
Xi Wang (Henan Technical College of Construction, China), Weiwei Han (Henan University of Economics and Law, China), Tao Jiao (Henan Technical College of Construction, China), and Zhi Zhang (Henan Technical College of Construction, China)

Simulation of Electrical Power System Reserve Capacity Optimization Model Based on Differential Evolution Algorithm 935
Zhizi Hou (State Grid Shanghai Economic Research Institute, China)

Research on Urban Expansion Based on Remote Sensing and Analysis of its Driving Forces-Taking Qingdao as an Example 940
Dachuan Zhang (China University of Petroleum, China) and Ying Zhao (China University of Petroleum, China)

Design of Landscape Interactive System Based on Artificial Intelligence Image Processing Algorithm 948
Wei Dai (Shenyang Jianzhu University, China) and Zihui Yu (Shenyang Jianzhu University, China)

Low-Altitude Airspace Conflict Detection and Avoidance Algorithm Based on Computer Vision and Multi-Sensors 952
Ji Song (Sanya Aviation and Tourism College, China)

Modeling and Optimization Design of Food Frozen Processing Process Based on Genetic Algorithm 957
Cuiping Li (Binzhou Polytechnic, China), Xiuli Zhang (Binzhou Polytechnic, China), Xiaoyan Zhang (Binzhou Polytechnic, China), Baoquan Gu (Binzhou Polytechnic, China), and Yongqing Liu (Binzhou Polytechnic, China)

Research and Implementation of Financial Management System Based on Data Mining Technology..... 961
Lingyun Yang (Henan University of Engineering, China)

Research on Optimization of WSN Network Communication Service Based on Decision Tree Algorithm 965
Xiao Zhang (Zhejiang Ocean University, China)

Research on Simulation and Reconstruction of Digital Sculpture 3D Models Based on Deep Learning Algorithms 971
Yangloucai Zhang (Chengdu Neusoft University, China)

Construction of Intelligent Mining Visualization Centralized Control System Based on Neural Network and Genetic Algorithm 976
Yunqiang Li (China University of Mining and Technology, China)

Design and Implementation of Customer Service Data Warehouse System for Electric Power Marketing Based on Data Mining Technology 981
Liang Yu (State Grid Beijing Electric Power Company Customer Service Center, China), Haiyang Chen (State Grid Beijing Electric Power Company, China), Zheng Wang (State Grid Beijing Electric Power Company, China), Shanshan Su (State Grid Beijing Electric Power Company Customer Service Center, China), and Xiaotong Zhu (State Grid Beijing Electric Power Company Customer Service Center, China)

Digital 3D Design of Power Transmission and Transformation Project Based on Multi-Source Geographic Information Data 987
Xianjin Yang (Hangzhou Electric Power Design Institute Co., Ltd, China), Jiong Ma (Hangzhou Electric Power Design Institute Co., Ltd, China), Di Zhou (Hangzhou Electric Power Design Institute Co., Ltd, China), Yilan Zhao (Hangzhou Electric Power Design Institute Co., Ltd, China), Zheng Wang (Hangzhou Electric Power Design Institute Co., Ltd, China), Jie Wang (Hangzhou Electric Power Design Institute Co., Ltd, China), and Shengjun Pan (Hangzhou Electric Power Design Institute Co., Ltd, China)

Intelligent Dispatching Model of Power System Based on Improved Genetic Algorithm 993
Qi Zheng (State Grid Jiaxing Power Supply Company, China), Ding Chen (State Grid Jiaxing Power Supply Company, China), Fei Zhao (State Grid Jiaxing Power Supply Company, China), and Dongsheng Tang (State Grid Jiaxing Power Supply Company, China)

Design of the Core Data Traceability Method of Power Grid Based on Blockchain Technology 998
Hao Yuan (State Grid Gansu Electric Power Company Information Communications Company, China), Haiping Zhao (State Grid Gansu Electric Power Company Information Communications Company, China), Zhenwei Yang (State Grid Gansu Electric Power Company Information Communications Company, China), and Na Li (State Grid Gansu Electric Power Company Information Communications Company, China)
