Table of Contents

Message from the Chairs	xx
Organizing Committee	xxii
Program Committee	xxiii
Steering Committee	xxvii
Workshop and Special Tracks Chairs	xxviii
Keynote Speeches	xxx

Software Testing

Metamorphic Testing for the Deepfake Detection Model	1
<i>Chenxin Pang (Southwest University of Science and Technology, China), Ya Pan (Southwest University of Science and Technology, China), and Hanli Bai (China Aerodynamics Research and Development Center, China)</i>	
Uncertainty-aware Metamorphic Testing for Robust Object Detection Models	9
<i>Jianhong Wang (Kyushu University, Japan), Yuta Ishimoto (Kyushu University, Japan), Masanari Kondo (Kyushu University, Japan), Yasutaka Kamei (Kyushu University, Japan), and Naoyasu Ubayashi (Kyushu University, Japan)</i>	
Requirements-driven Logic Testing for Deep Neural Networks	18
<i>Yuqi Hang (Nanjing University), Chen Liu (Yangzhou University), Lifa Hu (Yangzhou University), and Xinyi Gao (GRG Metrology&Test)</i>	
Metamorphic Testing for Traffic Sign Detection and Recognition	25
<i>Yuanyuan Long (Southwest University of Science and Technology, China), Yong Fan (Southwest University of Science and Technology, China), and Ya Pan (Southwest University of Science and Technology, China)</i>	
The Comparative Evaluation of Test Prioritization Approaches in an Industrial Study	35
<i>Azeem Ahmad (Ericsson AB, Linköping University, Sweden), Francisco Gomes De Oliveira Neto (University of Gothenburg, Sweden), Eduard Paul Enoiu (Mälardalen University, Sweden), Kristian Sandahl (Linköping University, Sweden), and Ola Leifler (Linköping University, Sweden)</i>	
Optimal Second-order Mutants Reduction Based on MOEA/D	45
<i>Jing Liu (Inner Mongolia University) and Zijian Wang (Inner Mongolia University)</i>	

Test Generation for Mutation Testing by Symbolic Execution	55
<i>Rui Su (Nanjing University of Aeronautics and Astronautics), Zhiyi Zhang (Nanjing University of Aeronautics and Astronautics), Yuqian Zhou (Nanjing University of Aeronautics and Astronautics), and Yongming Yao (Army Engineering of PLA)</i>	
SC-MCC: A Stronger Code Coverage Criterion	62
<i>Sangharatna Godbole (NITMiner Technologies, Department of Computer Science and Engineering, National Institute of Technology Warangal, Warangal, India), Monika Rani Golla (NITMiner Technologies, Department of Computer Science and Engineering, National Institute of Technology Warangal, Warangal, India), and P Radha Krishna (NITMiner Technologies, Department of Computer Science and Engineering, National Institute of Technology Warangal, Warangal, India)</i>	
Exploring the Capability of ChatGPT in Test Generation	72
<i>Gaolei Yi (State Key Laboratory for Novel Software Technology, Nanjing University), Zizhao Chen (University of Texas at Dallas), Zhenyu Chen (State Key Laboratory for Novel Software Technology, Nanjing University), W. Eric Wong (University of Texas at Dallas), and Nicholas Chau (University of Texas at Dallas)</i>	
DeepHC: Efficient Generating Tests with High Coverage for Deep Neural Networks	81
<i>Junyuan Teng (Beijing Institute of Control Engineering, China), Tingting Yu (Beijing Institute of Control Engineering, China; Beijing Sunwise Information Technology Ltd., China), Rui Chen (Beijing Institute of Control Engineering, China; Beijing Sunwise Information Technology Ltd., China), Dongdong Gao (Beijing Institute of Control Engineering, China; Beijing Sunwise Information Technology Ltd., China), and Chunpeng Jia (Beijing Institute of Control Engineering, China; Beijing Sunwise Information Technology Ltd., China)</i>	

Software Defect Prediction, Detection, and Localization

Comparative Study of Ensemble Learning Methods in Just-in-time Software Defect Prediction	83
<i>Wenjing Zhang (Xinjiang Normal University), Yong Li (Xinjiang Normal University), Ming Wen (Xinjiang Electronics Research Institute), and Ruiqi He (Xinjiang Normal University)</i>	
Enhancing Cross-Project Just-In-Time Defect Prediction with Active Deep Learning	93
<i>Yue Wang (Xinjiang Normal University), Yong Li (Xinjiang Normal University), Yuanyuan Ren (Xinjiang Electronics Research Institute), and Junjie Yu (Xinjiang Normal University)</i>	
CHEMFUZZ: Large Language Models-assisted Fuzzing for Quantum Chemistry Software Bug Detection	103
<i>Feng Qiu (University of Science and Technology of China), Pu Ji (The Johns Hopkins University), Baojian Hua (University of Science and Technology of China), and Yang Wang (University of Science and Technology of China)</i>	

METCN: A Multi-task Enhanced TCN Model for Software Fault Detection and Correction Prediction	113
<i>Qiuying Li (Beihang University, China), Yulin Wen (Beihang University, China), Zitong Yan (Beihang University, China), and Fuping Zeng (Beihang University, China)</i>	
Development of a Web System for Detecting Bugs in Probabilistic Programs	122
<i>Vo Dai Trinh (Kyushu Sangyo University, Japan), Yuri Nishimura (Kyushu Sangyo University, Japan), and Haibo Yu (Kyusan Sangyo University, Japan)</i>	
Software Vulnerability Detection via Doc2vec with Path Representations	131
<i>Tong Wan (South China University of Technology, China), Lu Lu (South China University of Technology, China), Hao Xu (South China University of Technology, China), and Quanyi Zou (South China University of Technology, China)</i>	
Software Vulnerability Detection Based on Binary Intermediate Slicing	140
<i>Qi Yang (Xi'an Microelectronics Technology Institute, Xi'an, China), Hui Zhang (Yangzhou University, Yangzhou, China), and Xuanzheng Wang (Northwestern Polytechnical University, Xi'an, China)</i>	
PRCMHFL: A Fault Localization Technique based on Predicate Ranking and CMH Method	148
<i>Sangharatna Godbole (Department of Computer Science and Engineering, National Institute of Technology, Warangal, Telangana, India), Shubhank Kulshreshtha (Department of Computer Science and Engineering, National Institute of Technology, Warangal, Telangana, India), Prayanshu Agarwal (Department of Computer Science and Engineering, National Institute of Technology, Warangal, Telangana, India), and Ranilbala B (Department of Computer Science and Engineering, National Institute of Technology, Warangal, Telangana, India)</i>	

Security, Vulnerability, and Threat Mitigation

Dynamic Access Control with Administrative Obligations: A Case Study	157
<i>Vladislav Dubrovenski (University of Missouri - Kansas City), Md Nazmul Karim (Boise State University), Erzhuo Chen (University of Missouri - Kansas City), and Dianxiang Xu (University of Missouri - Kansas City)</i>	
Familial Graph Classification of Malware based on Structured API Call Sequences	167
<i>Yang Xu (South China University of Technology) and Zhuotai Chen (South China University of Technology)</i>	
Natch: Detecting Attack Surface for Multi-Service Systems with Hybrid Introspection	176
<i>Pavel Dvornyuk (Institute for System Programming, Moscow, Russia), Maria Klimushenkova (Institute for System Programming, Moscow, Russia), Natalia Fursova (Institute for System Programming, Moscow, Russia), Ivan Vasiliev (Institute for System Programming, Moscow, Russia), and Vladislav Stepanov (Institute for System Programming, Moscow, Russia)</i>	
A Security Compliance-by-Design Framework Utilizing Reusable Formal Models	186
<i>Quentin Rouland (Carleton University), Stojanche Gjorcheski (Carleton University), and Jason Jaskolka (Carleton University)</i>	

Independent Few-shot Firmware Integrity Verification with Side-Channel Power Analysis	196
<i>Arthur Grisel-Davy (University of Waterloo, Canada) and Sebastian Fischmeister (University of Waterloo, Canada)</i>	
AI and Security - What changes with generative AI-	208
<i>Ryoichi Sasaki (Tokyo Denki University)</i>	
Privacy Policy Compliance Inspection of Financial Apps	216
<i>Jiyun Shen (State Key Laboratory for Novel Software Technology Nanjing University, Nanjing, China), Yue Wang (State Key Laboratory for Novel Software Technology Nanjing University, Nanjing, China), Qingheng Wu (State Key Laboratory for Novel Software Technology Nanjing University, Nanjing, China), and Yuan Zhao (State Key Laboratory for Novel Software Technology Nanjing University, Nanjing, China)</i>	

AI for Software Development, Testing, and Verification

A Deep Learning-Based Method for Identifying User Story Semantic Conflicts	220
<i>Tianci Wang (Inner Mongolia Normal University, China), Chunwang Li (Intelligence Information Research Center of the 6th Academy, China), Chunhui Wang (Inner Mongolia Normal University, China), Tong Li (Beijing University of Technology, China), and Ye Zhai (Inner Mongolia Normal University, China)</i>	
A Service-Oriented Framework for an Integrated Study of Intelligent Data Collection and Application	230
<i>Po-Chuan Ke (Tunghai University Dept. of Computer Science), Yuan-Hsun Liao (Tunghai University Dept. of Computer Science), Shou-Yu Lee (Tunghai University Dept. of Computer Science), Shih-Yun Huang (Tunghai University Dept. of Computer Science), and William Cheng-Chung Chu (Tunghai University Dept. of Computer Science)</i>	
Input Validation for Neural Networks via Local Robustness Verification	237
<i>Jiangchao Liu (National University of Defense Technology, China), Antoine Mine (orbonne Universite, CNRS, LIP6, France), Hengbiao Yu (National University of Defense Technology, China), and Ji Wang (National University of Defense Technology, China)</i>	
FCA: A Causal Inference Based Method for Analyzing the Failure Causes of Object Detection Algorithms	247
<i>Yuanxin Li (University of Chinese Academy of Sciences, China), Rui Li (Institute of Software Chinese Academy of Sciences, China), Yuxi Ma (Institute of Software Chinese Academy of Sciences, China), Yunzhi Xue (Institute of Software Chinese Academy of Sciences, China), and Lingzhong Meng (Institute of Software Chinese Academy of Sciences, China)</i>	
Modeling Stochastic Deterioration by Chloride Ion Erosion through Sparse Identification of Nonlinear Dynamics	257
<i>Bingchen Dong (Tsinghua University) and Zhenglin Liang (Tsinghua University)</i>	

Smart Contracts and Blockchain

mpXim: A Decentralized Mixing Scheme based on a Multi-Party Discovering Protocol	263
<i>Xuan Wang (Southeast University), Li Liao (Southeast University), and Dongyu Cao (Southeast University)</i>	
An Enhanced Software Architecture to Improve the MQTT Communications Encrypted Model.	273
<i>Tse-Chuan Hsu (Department of Computer Science & Information Management, Soochow University) and Han-Sheng Lu (Department of Computer Science & Information Management, Soochow University)</i>	
A Smart Contract Vulnerability Detection Model Based on Multi-type Features and Pre-training Techniques	280
<i>Miaomiao Feng (Institute of Information Engineering, Chinese Academy of Sciences, Beijing, China), Wei Mi (Institute of Information Engineering, Chinese Academy of Sciences, Beijing, China), Xiaodan Zhang (Institute of Information Engineering, Chinese Academy of Sciences, Beijing, China), Baojian Chen (Institute of Information Engineering, Chinese Academy of Sciences, Beijing, China), and Mingming Huang (Institute of Information Engineering, Chinese Academy of Sciences, Beijing, China)</i>	
Smart Contract Test Case Prioritization based on Frequency and Gas Consumption	290
<i>Sangharatna Godbole (NITMiner Technologies, Department of Computer Science and Engineering National Institute of Technology Warangal, Warangal, India), P Radha Krishna (NITMiner Technologies, Department of Computer Science and Engineering, National Institute of Technology Warangal, Warangal, India), Aditya Joshi (NITMiner Technologies, Department of Computer Science and Engineering National Institute of Technology Warangal, Warangal, India), Ishita Gupta (NITMiner Technologies, Department of Computer Science and Engineering National Institute of Technology Warangal, Warangal, India), and Rahul Khatao (NITMiner Technologies, Department of Computer Science and Engineering National Institute of Technology Warangal, Warangal, India)</i>	
Optimizing Gas Consumption in Ethereum Smart Contracts: Best Practices and Techniques	300
<i>Sourena Khanzadeh (Toronto Metropolitan University, Canada), Noama Samreen (Toronto Metropolitan University, Canada), and Manar Alalfi (Toronto Metropolitan University, Canada)</i>	
A Smart Contract Development Framework for Maritime Transportation Systems	310
<i>Xufeng Zhao (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, China), Qiuyang Wei (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, China), Xue-Yang Zhu (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, China), and Wenhui Zhang (State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, China)</i>	
An Approach for Ensuring the Privacy in Smart Contracts	320
<i>Wenqian Zhao (University of North Texas), Meghana Patibandla (University of North Texas), and Junhua Ding (University of North Texas)</i>	

Natural Language Processing and Large Language Models

Using Problem Frames Approach for Key Information Extraction from Natural Language Requirements	330
<i>Shangzhi Tang (Guangxi Normal University, China), Xuan Chen (Guangxi Normal University, China), Hongbin Xiao (Guangxi Normal University, China), Jiahao Wei (Guangxi Normal University, China), and Zhi Li (Guangxi Normal University, China)</i>	
IoT Phishing Detection Using Hybrid NLP and Machine Learning Models Enhanced with Contextual Embedding	340
<i>Fehmi Jaafar (Quebec University at Chicoutimi), Darine Ameyed (Ecole de Technologie Superieure), Lavin Titare (Indian Institute of Technology), and Md Nematullah (Indian Institute of Technology)</i>	
Legal Events Classification in Online Social Community Posts	350
<i>Yi-Hung Liu (Soochow University, Taiwan), Yin-Neng Feng (Soochow University, Taiwan), and Sheng-Fong Chen (National Pingtung University of Science and Technology, Taiwan)</i>	
Bias Analysis in Language Models using an Association Test and Prompt Engineering	356
<i>Ravi Varma Kumar Bevara (University of North Texas, USA), Ting Xiao (University of North Texas, USA), Farahnaz Hosseini (University of North Texas, USA), and Junhua Ding (University of North Texas, USA)</i>	
ChatGPT vs. Stack Overflow: An Exploratory Comparison of Programming Assistance Tools	364
<i>Jinrun Liu (Southern University of Science and Technology, China), Xinyu Tang (Southern University of Science and Technology, China), Linlin Li (Southern University of Science and Technology, China), Panpan Chen (Southern University of Science and Technology, China), and Yepang Liu (Southern University of Science and Technology, China)</i>	
Evaluation of Hallucination and Robustness for Large Language Models	374
<i>Rui Hu (Shanghai Key Laboratory of Computer Software Testing and Evaluating, Shanghai Development Center of Computer Software Technology, China), Junhao Zhong (Shanghai AI Industry Association, China), Minjie Ding (Shanghai Key Laboratory of Computer Software Testing and Evaluating, Shanghai Development Center of Computer Software Technology, China), Zeyu Ma (Shanghai Key Laboratory of Computer Software Testing and Evaluating, Shanghai Development Center of Computer Software Technology, China), and Mingang Chen (Shanghai Key Laboratory of Computer Software Testing and Evaluating, Shanghai Development Center of Computer Software Technology, China)</i>	

Programming Code Analysis

Boosting Source Code Learning with Text-Oriented Data Augmentation: An Empirical Study	383
<i>Zeming Dong (Kyushu University), Qiang Hu (University of Luxembourg), Yuejun Guo (Luxembourg Institute of Science and Technology), Zhenya Zhang (Kyushu University), and Jianjun Zhao (Kyushu University)</i>	

Hierarchical Semantic Graph Construction and Pooling Approach for Cross-language Code Retrieval	393
<i>Mingyang Geng (National University of Defense Technology), Dezun Dong (National University of Defense Technology), and Pingjing Lu (National University of Defense Technology)</i>	
Input Transformation for Pre-Trained-Model-Based Cross-Language Code Search	403
<i>Mingyang Geng (National University of Defense Technology), Dezun Dong (National University of Defense Technology), and Pingjing Lu (National University of Defense Technology)</i>	

Software Quality Assessment

An Empirical Study of Lightweight JavaScript Engines	413
<i>Meng Wu (University of Science and Technology of China), Weixin Dong (Guangdong OPPO Mobile Telecommunications Corp., Ltd.), Qiang Zhao (Guangdong OPPO Mobile Telecommunications Corp., Ltd.), Zhizhong Pan (University of Science and Technology of China), and Baojian Hua (University of Science and Technology of China)</i>	
Code Quality Evaluation in IT Communities Based on Sentiment Analysis of User Comments	423
<i>Hongwu Qin (Northwest Normal University, China), Peiming Xue (Northwest Normal University, China), Xiuqin Ma (Northwest Normal University, China), and Bin Gao (Northwest Normal University, China)</i>	
SmartPerf: Automated Speed Performance Test from Visual Perspective	430
<i>Letao Li (Baidu, Inc., China), Likai Qiu (Baidu, Inc., China), Shuang Li (Baidu, Inc., China), Jiaqi Wang (Baidu, Inc., China), and Hualiang Zhu (Baidu, Inc., China)</i>	
Performance Prediction for Lock-based Programs	437
<i>Dongwen Zhang (Hebei University of Science and Technology), Tongtong Wang (Hebei University of Science and Technology), and Yang Zhang (Hebei University of Science and Technology)</i>	
Improved Mechanism and Emotional Expression System of A Panda-type Emotional Robot	447
<i>Bin Zhang (Kanagawa University, Japan), Chihiro Suzuki (Kanagawa University, Japan), and Hun-Ok Lim (Kanagawa University, Japan)</i>	
MedTiny: Enhanced Mediator Modeling Language for Scalable Parallel Algorithms	451
<i>Xiangyu Li (Peking University, China), Yihao Zhang (Peking University, China), Xiaokun Luan (Peking University, China), Xiaoyong Xue (Peking University, China), and Meng Sun (Peking University, China)</i>	
Improving the Detection of Concurrent Artifact Anomalies in a Structured Workflow	461
<i>Mahmoud M. Abouzeid (National Yang Ming Chiao Tung University, Taiwan), Pei-Shu Huang (National Yang Ming Chiao Tung University, Taiwan), and Feng-Jian Wang (National Yang Ming Chiao Tung University, Taiwan)</i>	
ECIA: Elaborate Change Impact Analysis Based on Sub-Statement Level Dependency	471
<i>Zheheng Liang (China Southern Power Grid), Jianming Chang (Southeast university), Wuqiang Shen (China Southern Power Grid), Chaosheng Yao (China Southern Power Grid), and Lulu Wang (Southeast university)</i>	

Solar Energy-Based Virtual Machine Placement Algorithm for Geo-Distributed Datacenters	481
<i>Sanjaya Kumar Panda (NIT Warangal, Telangana, India), Sahil Chopra (NIT Warangal, Telangana, India), and Slokashree Padhi (NIT Warangal, Telangana, India)</i>	
Dependency Aware and Delay Guaranteed SFC Placement in Multi-domain Networks	491
<i>Yanming Liu (Ludong University, China), Chuangchuang Zhang (Ludong University, China), Yihao Li (Ludong University, China), Shuning Zhang (Ludong University, China), and Hongyong Yang (Ludong University, China)</i>	
Formal Modeling and Verification of Industrial Robotic Arm - A Case Study	499
<i>Ilmaan Zia (California State University Long Beach), Muhammad Abdul Basit Ur Rahim (California State University Long Beach), Tairan Liu (California State University Long Beach), and Zhangying He (California State University Long Beach)</i>	
Generating Autonomous Driving Safety Violation Scenarios Based on Multi-objective Optimization	509
<i>Chunyan Xia (Army Engineering University of PLA)</i>	

Cyber Forensics, Security, and E-Discovery

Reconsideration of Risk Communication and Risk Assessment Support Methods for Security	516
<i>Ryoichi Sasaki (Tokyo Denki University)</i>	
Detecting Vulnerable OAuth 2.0 Implementations in Android Applications	524
<i>Waris Damkham (Faculty of Information and Communication Technology, Mahidol University, Salaya, Nakhon Pathom, Thailand), Shingo Kunihiro (Graduate School of Information Science and Engineering, Ritsumeikan University, Kusatsu, Shiga, Japan), Songpon Teerakanok (Faculty of Information and Communication Technology, Mahidol University, Salaya, Nakhon Pathom, Thailand), and Tetsutaro Uehara (College of Information Science and Engineering, Ritsumeikan University, Kusatsu, Shiga, Japan)</i>	
Enhancing Account Recovery with Location-based Dynamic Questions	532
<i>Shuji Yamaguchi (Yahoo Japan Corporation), Hidehito Gomi (Yahoo Japan Corporation), and Tetsutaro Uehara (College of Information Science and Engineering, Ritsumeikan University)</i>	
On Collecting Onion Server Fingerprints and Identification of Their Operators	540
<i>Yuuki Kimura (raduate School of Information Science and Engineering, Ritsumeikan University, Japan), Soramichi Akiyama (College of Information Science and Engineering, Ritsumeikan University, Japan), Atsuo Inomata (Research Organization of Science and Technology, Ritsumeikan University, Japan), and Tetsutaro Uehara (College of Information Science and Engineering, Ritsumeikan University, Japan)</i>	
The Study on the Blocking Time Reduction of the IDS/SDN Cooperative Firewall System	549
<i>Perakorn Nimitkul (Mahidol University, Thailand), Akihiro Takai (Tokyo University of Agriculture and Technology, Japan), Nariyoshi Yamai (Tokyo University of Agriculture and Technology, Japan), Rei Nakagawa (Tokyo University of Agriculture and Technology, Japan), and Songpon Teerakanok (Mahidol University, Thailand)</i>	

Explainable Multimodal Fake Posts Detection Using Feature Extraction with Attention Mechanisms	555
<i>Tomoaki Ohkawa (Akita Prefectural University, Japan), Hiroshi Yoshiura (University of Electro-Communications, Japan), and Takayasu Yamaguchi (Akita Prefectural University, Japan)</i>	
DNS Rebinding Attacks Against Browsers on Azure Virtual Machines	564
<i>Ryuga Kaneko (Tokyo Denki University) and Taiichi Saito (Tokyo Denki University)</i>	
An Agent-Based Modeling Approach to Designing and Optimizing Bug Bounty Programs for Cybersecurity in Developing Countries	572
<i>Andrew Bukangwa (Ritsumeikan University, Japan) and Testutaro Uehara (Ritsumeikan University, Japan)</i>	
Savery: A Framework for the Assessment and Comparison of Mobile Development Tools	582
<i>José Donato (University of Coimbra), Naghmeh Ivaki (University of Coimbra), and Nuno Antunes (University of Coimbra)</i>	

Automated and Intelligent Software Testing

Test Case Reuse Method Based on Deep Semantic Matching	593
<i>Siqi Gu (GuangDong Tops Soft-park co., LTD, China), Zhibiao Liu (Nanjing University, China), Qiaoqing Liang (GuangDong Tops Soft-park co., LTD, China), Zhimin Deng (GuangDong Tops Soft-park co., LTD, China), and Xiangyu Xiao (GuangDong Tops Soft-park co., LTD, China)</i>	
Reducing Label Errors for Actionable Warning Identification	600
<i>Haoli Chen (NARI Information & Communication Technology CO., LTD), Xiaocheng Chen (NARI Information & Communication Technology CO., LTD), Xiaolei Sun (NARI Information & Communication Technology CO., LTD), Qirui Zheng (NARI Information & Communication Technology CO., LTD), and Xiuting Ge (NARI Information & Communication Technology CO., LTD)</i>	
Test Case Priority Ranking Method Based on Greedy Algorithm	605
<i>Bo Zhang (Beihang University, Beijing, China), Yu Li (Beihang University, Beijing, China), and Yichen Wang (Beihang University, Beijing, China)</i>	
An Input Space Modeling Method for Software Testing Considering Timing	614
<i>Bo Zhang (Beihang University, Beijing, China), Jiahao Li (Beihang University, Beijing, China), Zeyu Fan (Tianjin University, Tianjin, China), and Yichen Wang (Beihang University, Beijing, China)</i>	
Enhancement of Robustness for Graph Neural Networks in AI Systems	622
<i>Dongyuan Zhang (China Electronics Technology Group Corporation The 20th Research Institute, Xi'an, Shaanxi, China), Chuanjiang Yu (China Electronics Technology Group Corporation The 20th Research Institute, Xi'an, Shaanxi, China), Shijun Xu (China Electronics Technology Group Corporation The 20th Research Institute, Xi'an, Shaanxi, China), and Xinyi Gao (GRG Metrology&Test, Guangzhou, China)</i>	

Safety and Security in Cyber-Physical Systems

Research on Improved Algorithm of UAV Swarm Target Search Strategy Based on Freshness and Target Density	626
<i>Yumin Wang (School of Computer, Northwestern Polytechnical University), Jinhao Xie (School of Computer, Northwestern Polytechnical University), Wenqi Zhang (Northwestern Polytechnical University), Yuan Yao (Northwestern Polytechnical University), and Gang Yang (Northwestern Polytechnical University)</i>	
Modelling and Verification of Cooperative Vehicle Infrastructure System at Intersections Based on Timed Automata	633
<i>Xinhai Chen (China Merchants Testing Vehicle Technology Research Institute Co., Ltd., Chongqing, China), Wei Liu (College of Traffic and Transportation, Chongqing Jiaotong University, Chongqing, China), Chang Rao (College of Traffic and Transportation, Chongqing Jiaotong University, Chongqing, China), Yu Zhang (College of Traffic and Transportation, Chongqing Jiaotong University, Chongqing, China), and Wanling Du (College of Traffic and Transportation, Chongqing Jiaotong University, Chongqing, China)</i>	
Safety Verification Technology of CPS Based on Theorem Proving	643
<i>Mingfu Tuo (Air Force Engineering University, Xi'An, China), Xiaoqiang Zhao (Air Force Engineering University, Xi'An, China), Wenliang Wu (College of Information Engineering, Northwest A&F University, Yanling, Shaanxi, China), and Bo Shen (College of Computer Science, Northwestern Polytechnical University Xi'An, China)</i>	
Modeling and Discovering Data Race with Concurrent Code Property Graphs	646
<i>Yang Cao (Northwestern Polytechnical University, China) and Yunwei Dong (Northwestern Polytechnical University, China)</i>	
Research on FCS Design Technology of Electric Tilting Quadrotor UAV	654
<i>Xiaoming Xie (Aircraft Design and Research Institute, Harbin Aircraft Industry Group Co., LTD., Harbin 1500662, China), Jinfa Xu (National Key Laboratory of Helicopter Rotor Dynamics, Nanjing University of Aeronautics and Astronautics, Nanjing 210016, China), Suiyuan Shen (National Key Laboratory of Helicopter Rotor Dynamics, Nanjing University of Aeronautics and Astronautics, Nanjing 210016, China), Wei Cao (Science and Technology Information and Standardization Department, Harbin Aircraft Industry Group Co., LTD., Harbin 150066, China), and Guigang Zhang (Institute of Automation Chinese Academy of Sciences, Beijing China, 100190)</i>	

Creative Computing

Fitting and Peak Searching of Spectrum for Fourier Transform Infrared Spectrometer	662
<i>Wanjie Ren (Nanjing University of Information Science and Technology, China), Guojun Wang (Nanjing University of Information Science and Technology, China), Qi Liu (Nanjing University of Information Science and Technology, China), Xia Li (Shandong Academy of Pharmaceutical Science, China), and Rui Tuo (Shandong Institute of Non-metallic Materials, China)</i>	

Enhancing Grid-Connected PV System Performance: Loss Analysis and Efficiency Improvement Strategies	668
<i>Oscar Famous Darteh (Nanjing University of Information Science and Technology, China), Guojun Wang (Yancheng Polytechnic College, China), Qi Liu (Nanjing University of Information Science and Technology, China), Xiaodong Liu (Napier University, United Kingdom), and Amevi Acakpovi (Accra Technical University, Ghana)</i>	
A Computational Brain Colour Response Model for Achromatopsia	675
<i>Yinwei Liu (University of Leicester, Leicester, Uk)</i>	
A Creative Computing Approach to Analysis of Speaker Intention Using the DIKCW Model	682
<i>Lin Zou (University of Leicester), Hongji Yang (University of Leicester), and Jintao Lin (Yunnan University)</i>	

Empirical Software Engineering and Art Smart Contract

Intelligent Question Answering System Based on Cognitive Graph: A Case Study of Textile Fabrics	693
<i>Xinyu He (Wuhan Textile University), Mengyao Cui (Wuhan Textile University), Yufan Chen (Wuhan Textile University), Longfei Liu (Wuhan Textile University), and Bangchao Wang (Wuhan Textile University)</i>	
Research on the Construction of a Multimodal Cognitive Graph of Textile and Clothing	703
<i>Peng Ye (Wuhan Textile University, China), Xinyi Lan (Wuhan Textile University, China), Yufan Chen (Wuhan Textile University, China), Zhipeng Wang (Wuhan Textile University, China), and Wei Ye (Wuhan Textile University, China)</i>	
The Hidden Order Framework: From Evidence-Based Prediction in Scenario Spaces to Prompt Learning in Image Production Processes	713
<i>Ziyang Weng (Wuhan University, China), Shuhao Wang (Wuhan University, China), and Jingwei Zhang (Wuhan University, China)</i>	
The Man-Land Coupling Algorithm: A Priori Experiment with Remote Sensing Data to Facilitate the Revitalization of Great Sites Based on Complex Cognition	724
<i>Ziyang Weng (Wuhan University, China), Shuhao Wang (Wuhan University, China), and Jingwei Zhang (Wuhan University, China)</i>	
Outfit Compatibility Model with Multi-modal Semantic Interaction Learning	733
<i>Ruiqi Luo (Wuhan Textile University, China; Hubei Key Laboratory of Transportation of Internet of Things, China), Zhenglong Li (Wuhan Textile University, China), Yinhua Xiang (Wuhan Textile University, China), Zhaojing Wang (Wuhan Textile University, China), and Luyao Ye (Wuhan Textile University, China)</i>	
Research on Active Detection Methods for Video Anomaly Events Based on Concept Semantics	742
<i>Ruiqi Luo (Wuhan Textile University, China; Hubei Key Laboratory of Transportation of Internet of Things, China), Wenjie Zhang (Wuhan Textile University, Wuhan, Hubei, China.), Xiaoxiao Li (Wuhan Textile University, Wuhan, Hubei, China.), Zhaojing Wang (Wuhan Textile University, Wuhan, Hubei, China.), and Luyao Ye (Wuhan Textile University, Wuhan, Hubei, China.)</i>	

A Novel Framework for High-category Coverage Clothing Recommendation System Based on Sentiment Analysis	752
<i>Hongyan Wan (Wuhan Textile University, China), Zan Wang (Wuhan Textile University, China), Zhiquan An (Wuhan Textile University, China), Guotao Jiao (Wuhan Textile University, China), and Xinnan Zhang (Wuhan Textile University, China)</i>	
Cognitive Graph Empowered Textile and Clothing Intelligent Service Platform	759
<i>Zhiyuan Zou (Wuhan Textile University, China), Zhipeng Wang (Wuhan Textile University, China), Longfei Liu (Wuhan Textile University, China), Changxi Feng (Wuhan Textile University, China), and Bangchao Wang (Wuhan Textile University, China)</i>	

Dependability Testing and Evaluation of Safety-Critical Systems

Identifying Influential Nodes in Complex System From Multiscale Complex Network Perspective	769
<i>Xiaodong Gou (Sichuan Institute of Aerospace System Engineering), Peng Zhou (Sichuan Academy of Aerospace Technology), Haitao Yang (Sichuan Institute of Aerospace System Engineering), Zhaomingyue Zheng (Sichuan Institute of Aerospace System Engineering), and Ao Zhang (Sichuan Institute of Aerospace System Engineering)</i>	
Research on Micro Vibration Control of Satellite Flexible Structure Using Piezoelectric Variable Stiffness Actuator	775
<i>Zhaomingyue Zheng (Sichuan Academy of Aerospace Technology, Chengdu, Sichuan, China), Wei Cheng (Beihang University, Beijing, China), Xiaodong Gou (Sichuan Academy of Aerospace Technology, Chengdu, Sichuan, China), and Guangyuan Wang (China Academy of Space Technology, Beijing, China)</i>	
Dynamic Comprehensive Risk Assessment of Coal Mill Based on CNN-LSTM and Analytic Hierarchy Process	782
<i>Xiang Zhu (Beijing Building Materials Research Institute Co. Ltd., China), Wencai Wang (Beijing Building Materials Research Institute Co. Ltd., China), Zhizhi Cang (BBMG Corporation, China), Yaguang Dang (Beijing Building Materials Research Institute Co. Ltd., China), and Donghui Zhao (Beijing Institute of Technology, China)</i>	
Voltage Prediction and Fault Detection by using Model Fusion Strategy for Lithium-ion Batteries	789
<i>Yijing Zhou (Beihang University, Beijing, China), Mengdan Wu (Beihang University, Beijing, China), Qi Yao (Beihang University, Beijing, China), Zhiyu Duan (Beihang University, Beijing, China), and Shunkun Yang (Beihang University, Beijing, China)</i>	
Fault Localization of Software: A literature Review	797
<i>Zeyu Wang (Beihang University) and Fuping Zeng (Beihang University)</i>	

Data Driven Base Decision Making for Software Engineering

Multi-Population Genetic Algorithm Based EFSM Regression Test Data Generation	807
<i>Jiahao Li (Beihang University, China), Bo Zhang (Beihang University, China), Zeyu Fan (Tianjin University, China), and Yichen Wang (Beihang University, China)</i>	
A Blockchain-based Requirement Management Framework for Distributed Software Development Environment	816
<i>Muhammad Azeem (Department of Computer Science, COMSATS University Islamabad, Islamabad, Pakistan), Saif Ur Rehman Khan (Department of Computing, Shifa Tameer-e-Millat University (STMU), Islamabad, Pakistan), Naseem Ibrahim (Department of Computer Science, Penn State Behrend, Pennsylvania, USA), Abdullah Yousafza (Department of Computer Science, University of Central Punjab, Lahore, Pakistan), Wen-Li Wang (Department of Computer Science, Penn State Behrend, Pennsylvania, USA), and Asif Kareem (Advocate Health, Chicago, USA)</i>	
AI Ethics in Healthcare – A Survey	826
<i>Bhavraaj Singh (Department of Computer Science, California State University, Long Beach, California, USA), Muhammad Abdul Basit Ur Rahim (Department of Computer Science, California State University, Long Beach, California, USA), Shahid Hussain (Department of Computer Science, Penn State University, Behrend, Pennsylvania, USA), Muhammad Abid Rizwan (Department of Computer Science, Florida Polytechnic University, Lakeland, Florida, USA), and Jie Zhao (Department of Computer Science and Software Engineering, Penn State University, Behrend, Pennsylvania, USA)</i>	
Using Deep Reinforcement Learning And Formal Verification in Safety Critical Systems: Strategies and Challenges	834
<i>Satyam Sharma (California State University Long Beach), Muhammad Abdul Basit Ur Rahim (California State University Long Beach), Shahid Hussain (Penn State university, Behrend), Muhammad Rizwan Abid (Florida Polytechnic University, Lakeland), and Tairan Liu (California State University Long Beach)</i>	

Fast Abstract

Uncertainty-wise Model Evolution with Genetic Programming	843
<i>Man Zhang (Kristiania University College, Oslo, Norway), Shaikat Ali (Simula Research Laboratory and Oslo Metropolitan University), and Tao Yue (Simula Research Laboratory)</i>	
Assume(), Capture(), Verify(), Establish(): A Vocabulary for Static Program Analysis	845
<i>Hessamaldin Mohammadi (NJIT), Wided Ghardallou (University of Sousse, Tunisia), Elijah Brick (NJIT), and Ali Mili (NJIT)</i>	
Genetic Algorithm Based EFSM Regression Test Sequence Generation	847
<i>Jiahao Li (Beihang University, China), Chengru Yang (Beihang University, China), and Yichen Wang (Beihang University, China)</i>	

OpenMP Program Verification Based on Bounded Model Checking	849
<i>Liang Sun (National University of Defense Technology), Bailin Lu (National University of Defense Technology), Liangze Yin (National University of Defense Technology), Zhe Bu (China Academy of Information and Communications Technology), and Wenjing Jin (China Academy of Information and Communications Technology)</i>	
VPIA-FMEA: A Method for Visual Perception Intelligent Algorithm FMEA	851
<i>Nishan Xie (University of Chinese Academy of Sciences, China), Rui Li (Institute of Software Chinese Academy of Sciences, China), Yuxi Ma (Institute of Software Chinese Academy of Sciences, China), Qian Dong (Institute of Software Chinese Academy of Sciences, China), and Lingzhong Meng (Institute of Software Chinese Academy of Sciences, China)</i>	
Effectiveness Evaluation of UAVs Search in Urban Environments	853
<i>Yue Zhao (Northwestern Polytechnical University), Wenliang Wu (Northwest Agriculture and Forestry University), and Xingshe Zhou (Northwestern Polytechnical University)</i>	
Research on Object Categorization and Grabbing for a Cleaning Robot	859
<i>Bin Zhang (Kanagawa University, Japan), Ayumu Mori (Kanagawa University, Japan), and Hun-Ok Lim (Kanagawa University, Japan)</i>	
Mining Potential Defect Patterns in Unmanned Systems from a Large Amount of Open Source Code	861
<i>Peng Lin (China Electronic Product Reliability and Environmental Testing Research Institute, Guangzhou, Guangdong, China), Ping Chen (China Electronic Product Reliability and Environmental Testing Research Institute, Guangzhou, Guangdong, China), Jingwei Shang (China Electronic Product Reliability and Environmental Testing Research Institute, Guangzhou, Guangdong, China), Qiaochun Qiu (China Electronic Product Reliability and Environmental Testing Research Institute, Guangzhou, Guangdong, China), and Zhichang Huang (China Electronic Product Reliability and Environmental Testing Research Institute, Guangzhou, Guangdong, China)</i>	
An Ontology-based Framework for Medical IoT Forensic Evidence	863
<i>Jigang Liu (Metropolitan State University, USA), Ryoichi Sasaki (Tokyo Denki University, Japan), and Tetsutaro Uehara (Ritsumeikan University, Japan)</i>	
BayesFLo: Bayesian Fault Localization for Software Testing	865
<i>Yi Ji (Duke University, USA), Ryan Lekivetz (SAS Institute Inc., USA), Simon Mak (Duke University, USA), and Joseph Morgan (SAS Institute Inc., USA)</i>	
WASMDYPA: Effectively Detecting WebAssembly Bugs via Dynamic Program Analysis	867
<i>Wenlong Zheng (University of Science and Technology of China), Baojian Hua (University of Science and Technology of China), and Zhuochen Jiang (University of Science and Technology of China)</i>	
CSP based Formal Modeling and Verification of Behavior Trees	869
<i>Peishan Huang (National University of Defense Technology, China), Weijiang Hong (National University of Defense Technology, China), Zhenbang Chen (National University of Defense Technology, China), and Ji Wang (National University of Defense Technology, China)</i>	

RustCheck: Safety Enhancement of Unsafe Rust via Dynamic Program Analysis	871
<i>Lei Xia (University of Science and Technology of China), Yufei Wu (University of Science and Technology of China), and Baojian Hua (University of Science and Technology of China)</i>	
Natural Language Coding (NLC) for Autonomous Stock Trading: A New Dimension in No-Code/Low-Code (NCLC) AI	873
<i>Yulia Kumar (Kean University (Union), USA), Wenxiao Li (Wenzhou-Kean University, China), Kuan Huang (Kean University), Michael Thompson (Kean University), and Brendan Hannon (Kean University)</i>	
Love the Way You Lie: Unmasking the Deceptions of LLMs	875
<i>Yulia Kumar (Kean University, USA), Zachary Gordon (Kean University, USA), Patricia Morreale (Kean University, USA), J. Jenny Li (Kean University, USA), and Brendan Hannon (Kean University, USA)</i>	
Optimizing Media Streaming in Edge-Cloud Systems: Leveraging Geography and User Behavior .	877
<i>Quankun Luo (UESTC), Jiawen Deng (UESTC), and Liang Luo (UESTC)</i>
