CONTENTS

Decarbonising mine operations, from concept to closure

Dynamic influences of optimisation on emissions <i>P J Bangerter and J Pan</i>	2
The importance and abundance of lichens and mosses on the restored landscape in the nickel-copper city of Sudbury, Ontario, Canada <i>P J Beckett, T Miller and S Wainio</i>	5
Climate change risks to mine closure – planning for a range of impacts <i>N Bulovic, N McIntyre and R Trancoso</i>	8
Envisioning the rehabilitation of assets through co-design and gamification <i>S Emeric, E Jones, P Baker, D Clark and S Grant</i>	12
In-pit backfilling as part of integrated life-of-mine waste scheduling, closure planning and AMD risk management – Martabe Mine as a case study <i>S R Pearce, K Grohs and A Satriawan</i>	14
Can biocements stabilise tailings storage facilities? <i>A E Levett, S Dressler and G Simpson</i>	17
Microalgae in mining – environmental and social opportunities <i>A E Levett and J Durbin</i>	21
The critical pool levels for the Yallourn Mine determined using the MGRI approach <i>S Narendranathan, N Patel, J Butler and S Rastogi</i>	25
The critical pool levels for the Hazelwood Mine determined using the MGRI approach <i>S Narendranathan, N Patel, T Mok and J Lowe</i>	29
Synergies between renewable-powered mines and community development programs throughout mine life cycle and post-closure <i>L Rollin, J Joughin and D Kyan</i>	34
Viable and feasible decarbonisation – Tent Mountain coalmine repurposing for the clean energy economy <i>B D Saffron</i>	37
Getting your cut-off grade policy right for better ESG outcomes <i>J D Tolley</i>	42

Developing regional approaches – shifting from operating independently to collaboratively

Maximising regional opportunities for in-pit tailings disposal for Queensland coalmines <i>K Baker and J Purtill</i>	45
Developing a regional data catalogue to support the technical assessment of post-mining land use <i>C M Côte, P Bolz, L Pagliero, M Shaygan, M Edraki and P Erskine</i>	48

Initiating collaborative planning for post-mining land use in Victoria's Latrobe Valley <i>T Foran and J Reeves</i>	52
From 'closing a mine' to 'transitioning a community' – evolving from specific post-mining land-uses to a holistic post-mining vision <i>A Maier, M Goldner and C Gimber</i>	56
The perfect storm – mine closure in the Latrobe Valley Victoria <i>A Scrase and J Brereton</i>	59
Shifting post-mining land use planning from mine site to regional scale <i>S Worden, K Svobodova and C M Côte</i>	62
Effective regulatory frameworks for mine life and beyond	
The Mine Land Rehabilitation Authority – reducing risk for Victoria <i>J Brereton and R Mackay</i>	67
Queensland's open cut coalmine void rehabilitation planning practices – challenges and opportunities <i>M Clay and J Dunlop</i>	70
The role of the regulator in promoting a highly reliable mining industry <i>S Johnston, S Stevens and L Howe</i>	74
Embedding the circular economy into life-of-mine planning	
Economic analyses (EA) and life cycle assessment (LCA) on repurposing of mine waste via geopolymerisation technology <i>S Amari, M Darestani, H M A Ilyas and M Yahyaei</i>	78
Exploring the applicability of responsible research and innovation for mine transitions <i>A Lee Zhi Yi, S Worden, A Littleboy, G Corder and E Sellers</i>	83
Cobalt, copper tailings and the circular economy – a case study from the Capricorn Copper Mine, north-west Queensland minerals province <i>L Nicholls and A Parbhakar-Fox</i>	86
Innovative rehabilitation and closure solutions	
High-resolution erosion modelling using the RUSLE – an application to open cut coalmine operations <i>P Bolz, R Chrystal and C M Côte</i>	90
Polymer-amended tailings dewatering technology for desired closure outcomes <i>B Boshrouyeh, M Edraki, T Baumgartl and A Costine</i>	95
Eight years of ACARP research on rehabilitation of challenging mine sites – practical application in the era PCRPs <i>G Dale, L McCallum, A Costin, B Silverwood and T Roscoe</i>	98
The role of scale in prediction of mine drainage chemistry <i>M Edraki, N McIntyre and K R Jain</i>	101

Traceability of native seed for mine rehabilitation <i>B Fuller, C Clarke, H Thomas and A Grant</i>	105
Contour drains and benches – are they an effective long-term run-off and sediment control method? <i>G R Hancock</i>	108
Diavik Diamond Mine north country rock pile – an example of integrated mine planning for successful progressive reclamation <i>V Knott, S Sinclair, A Yeomans, G MacDonald and G Stephenson</i>	114
Assessing the effectiveness of erosion predictions from a landform evolution model with field observations from a rehabilitated landform <i>J B C Lowry, M J Saynor, G R Hancock and T J Coulthard</i>	116
Alternative mineral processing strategies for copper-gold tailings management <i>R Narayan, M Edraki, A Scheuermann, M Ziemski, C Antonio and S Quintero</i>	121
Quantifying the influence of weathering on erosion and degradation of post mining landforms <i>W D D P Welivitiya and G R Hancock</i>	127
 Integrated sustainability planning	
Risks beyond relinquishment – quantifying post-relinquishment management and maintenance costs <i>M L Cramer, M R Lane and N P Wines</i>	133
Whole of mine planning – Evolution Mount Rawdon case study <i>A Ferrier, A Forbes, G Maddocks and M Landers</i>	136
Design and calibration of a climate resilient Type B (adapted) sediment basin at the Dugald River Mine in the north-west Queensland minerals province <i>G Green, A Harburg and A Dendys</i>	138
Management of riverine disposal of tailings and waste rock for AMD control at the Ok Tedi copper-gold mine <i>R Schumann, W Stewart, S Davidge, B Rathi, E Kepe, J Pile and M Ridd</i>	144
Moving beyond Net Present Value project evaluation to achieve Environmental, Social and Governance goals for mine operations and closure <i>H Simpson and C Gimber</i>	147
Above and beyond NPV – determining the life-of-mine from an economic perspective <i>C Tapia and B Hay</i>	148
Incorporating the true costs and opportunities of rehabilitation and closure in project selection, design and approvals <i>C Tomlin and C Gimber</i>	154
Author Index	156
