# CONTENTS

---

## **Exploration and geology – geostatistics and ore reserve estimation**

- Homogeneity assessment of crushed and pulverised iron ore certified reference materials – implications for laboratory quality control 2  
*J Carter and B J Armstrong*
- Case studies illustrating the role of F-series mine reconciliations in production forecast improvement initiatives 12  
*S J Loach*

## **Exploration and geology – new iron ore deposits, including magnetite**

- New occurrence of banded iron formations in the Minvoul Region, Ntem Complex (Northern Gabon) 24  
*M Iglesias-Martínez*
- An iron ore detective story in Papua New Guinea 28  
*E R Ramanaidou*
- Characterisation of the Iron Bridge magnetite project 32  
*E R Ramanaidou, B Godel and M Verrall*
- Kisoro-Kabale iron ore project in south-western Uganda – unlocking a new high-grade iron ore region for exploration and development 41  
*L White, J Natukunda, E Tata, D C Ilouga, B Vietnieks, N Widmer and J P Tyler*

## **Greener downstream processing – decarbonisation**

- How are Indian mills changing their feedstock in order to address decarbonisation goals? 67  
*D Goel*
- Evaluation of the environmental benefits of using a conveyor belt mining system in an open pit mine 72  
*D E G Oliveira, T F Bravin, G P S Resende and E A S Baeta*
- A cost-effective tool to assess iron ore products and optimise their operations in blast furnaces towards decarbonisation – state-of-the-art CFD models 88  
*X Yu and Y Shen*

## **Greener downstream processing – DRI, HBI and pig iron production**

- Phosphorus distribution behaviour in hematite ore reduced in CO-H<sub>2</sub> gaseous atmosphere 96  
*E K Chiwandika, S M Masuka and S-M Jung*
- Smelting of nickel and vanadium wastes to produce green steel 111  
*N Goodman and D Lalor*

Direct reduced iron (DRI) – value of process monitoring using X-ray diffraction <i>U König and M Pernechele</i>	118
Mechanisms on the impacts of basicity on hydrogen-rich gas-based direct reduction of pellets <i>J Pan, C M Tang, D Q Zhu, Z Q Guo, C C Yang and S W Li</i>	124
Influence of iron ore chemistry and mineralogy on sticking and breakage of pellets inside shaft furnace <i>S Purohit, M I Pownceby and A Guiraud</i>	140
The development of DRI pellets for green steelmaking <i>C R Ure</i>	152

## **Greener downstream processing – green iron and steel production**

The challenges of removing sulfur from magnetite ores to meet direct reduction specifications <i>D Connelly</i>	167
The role of steelmaking desulfurisation and EAF-smelter in hydrogen-based steelmaking route of low-grade iron ores <i>Q Fan</i>	176
Phosphorus association with goethite – effects of Fe(II)-catalysed recrystallisation <i>N Karimian, M I Pownceby and A Friedrich</i>	183
Hydrogen reduction of Australia iron ores <i>L Lu, Y Tang and S Hapugoda</i>	189
Hydrogen reduction of as-received and pre-oxidised NZ titanomagnetite ironsands in a small-scale high-temperature fluidised bed <i>B Maisuria, S Prabowo, D Del Puerto, R J Longbottom, B J Monaghan and C W Bumby</i>	196
Driving the transformation to hydrogen ironmaking – an experimental vertical shaft H <sub>2</sub> -DRI reactor facility in NZ <i>B H Yin, S Mendoza, B Rumsey, Y Iwasaki, M Lynch, M McCurdy and C W Bumby</i>	210

## **Greener downstream processing – sintering and pelletising**

Sintering characteristics of iron ore blends containing iron ore concentrates <i>H Han, L Lu and S Hapugoda</i>	223
Development of an iron ore analysis method applying assimilation reaction to coarse ore <i>Y Hong, Y M Lee and B C Kim</i>	230
Mineralogy and reducibility of sinter analogues in the Fe <sub>3</sub> O <sub>4</sub> -CaO-SiO <sub>2</sub> (FCS) ternary system under hydrogen atmosphere <i>I R Ignacio, G Brooks, M I Pownceby, M A Rhamdhani and W J Rankin</i>	236
Pelletisation of New Zealand titanomagnetite ironsand for hydrogen direct reduction <i>S Mendoza, B H Yin, A Zhang, M Nusheh and C W Bumby</i>	245
QPM hematite by-product as an ironmaking feed material <i>G Reynolds and L Lu</i>	258

Effect of -1 mm particle size fraction on JPU permeability and granulation characterisation 265  
*T Singh, S Mitra, O A Aladejebi, D O'Dea and T Honeyands*

Effect of high oxygen enrichment on sintered ore quality and sintering phenomena 274  
*K Takehara, T Higuchi and T Yamamoto*

## **Health, safety, environment and community – dust mitigation and reduction of water consumption**

Supply chain approach to iron ore dust monitoring and remediation – Pilbara, WA 283  
*P Hapugoda, S Hapugoda, G Zhao, E Ramanaidou, G O'Brien and Y Jin*

Development and implementation of low-cost sensors and LiDAR for managing dust emissions due to mining activity 292  
*D Ilic, A Lavrinec, L Sutton and J Holdsworth*

BHP Port Hedland wind fence – innovations in dust control 307  
*L van Wyk and R Peiffer*

## **Health, safety, environment and community – health and safety practices**

Advancements, innovations and initiatives for optimising the treatment of haul roads 312  
*H Haghighi*

## **Health, safety, environment and community – licence to operate**

A guide to ground disturbance permitting and managing ESG risk 318  
*B Spence, H Arvidson and S Helm*

## **Mining and processing – new equipment**

Latest fifth generation (Mk V) gyratory crushers with focus on safety and maintenance features 327  
*J Garrett and W Malone*

Analysing impact forces and overcoming speed, heat and pressure issues in high capacity belt support applications 339  
*C T Portelli*

Economic recovery of low-grade fine iron ore using the Optima Classifier® 361  
*F F van de Venter, T Kale and J Monama*

## **Mining and processing – ore processing and beneficiation**

Removal of phosphorus and gangue minerals from iron ore by a combined approach of alkaline drying and reverse flotation 370  
*A Batnasan, H Takeuchi, K Haga, K Higuchi and A Shibayama*

Design and operation of large drum scrubbers 380  
*G S Beros and K M Edwards*

The use of Zimbabwean limonite-coal composite pellet as a sustainable feed for pig iron production <i>T Chisahwira, S M Masuka, S Maritsa and E K Chiwandika</i>	391
Iron ore transfer chutes – directions after 30 years of scale modelling <i>P Donecker</i>	403
Developing dephosphorisation technique for iron ore with reduction process <i>O Ishiyama, K Higuchi and K Saito</i>	414
Improved iron ore processing through digitalising conveyed ore flows using representative real time multi-elemental analysis <i>H Kurth</i>	423
Minimising cost of rheology control additives for iron ore slurries/tailings for enhancing processing performance <i>Y K Leong</i>	432
A comparative study of two laboratory crushing techniques for a South African banded iron formation (BIF) <i>N Maistry and A Singh</i>	438
Comparison between ball mill and vertical stirred mill for the fine grinding of a low-grade iron ore <i>J Mesquita, E Kleiderer, L Southavy, R Belissant, Y Basselin, H Turrer, M Badawi and Y Foucaud</i>	452
Effect of hydrodynamic parameters on iron ore reverse flotation <i>M Safari, F S Hoseinian, D Deglon, L Leal Filhoc and T C Souza Pinto</i>	472
Coarse processing of South African banded iron formation (BIF) <i>A Singh, N Maistry and C Carelse</i>	479
An innovative application of LJC Automatic Magnetic Flotation Separator in magnetite processing <i>B Xu, C Wang and L Ding</i>	488
 <b>Mining and processing – tailings processing and storage</b>	
Slime waste to boost agricultural productivity <i>P Dixit, A K Mukherjee, A K Bhatnagar, P Patra and S Saha</i>	496
Reducing waste in the iron ore industry by beneficiating slimes using new flotation regime and two-stage processing routes <i>M Marques, K Silva, I Filippova, A Piçarra, N Lima and L Filippov</i>	504
Filtered tailings – an iron ore experience <i>L Vimercati and R Williams</i>	513
 <b>Ore characterisation and geometallurgy – method development</b>	
Behaviour of iron ore granules – laboratory and commercial sinter plant granulation <i>O A Aladejebi, S Mitra, T Singh, D J Pinson, S J Chew and T Honeyands</i>	524

An approach to the calibration and validation of transfer chute DEM simulations handling cohesive iron ore fines <i>R Elliott, T Walkemeyer and D Chang-Martin</i>	535
Study on the dehydroxylation process of an ultrafine goethitic ore <i>J Mesquita, M Camarda, A Pirson and F Vasconcelo</i>	548
Update of the geometallurgical model of a spirals circuit <i>J Mesquita, E Kleiderer, L Senez, R Belissant, Y Basselin, C Veloso and F Vasconcelos</i>	561
Examining the relationship (if any) between elevated phosphorus and ore textural type in Pilbara iron ores <i>M I Pownceby, M J Peterson, J R Manuel and N Karimian</i>	572

### **Ore characterisation and geometallurgy – new applications**

Effect of calcium oxalate $\text{CaC}_2\text{O}_4 \cdot \text{H}_2\text{O}$ on the Reduction and phosphorus partition of a high-P Brockman ore <i>S Hapugoda, L Lu and H Han</i>	588
---	-----

### **Process optimisation – a greener and cleaner iron ore value chain**

Making a positive change – evolving the modern Integrated Remote Operations Centre (IROC) to optimise and support carbon-neutral value chains <i>J Bassan, G McCullough and J Els</i>	603
Moisture/particle interactions under oscillatory motion – model development <i>D Illic, K Williams, V Gurung and A Lavrinec</i>	623
Geoscience 2033 – a vision for mineral exploration in ten years <i>L Karlson, C Itotoh and K O'Halloran</i>	634
HRC™ HPGR as an energy efficient alternative to horizontal mills in the iron ore processing circuit <i>E Nunes, B Raso, J Almeida, D Jacobson, R Mendes, G Cota, E Santos, T Machado and E Pereira</i>	642
Wet grinding, settling and filtering characteristics of Australian and Brazilian iron ores <i>J Pan, Q Zhou, D Q Zhu and C C Yang</i>	653
Immortality design of the allflux® upstream classifier in the iron ore industry – for a safe workplace and an economic, sustainable and highly efficient separation technology <i>M Steinberg and M Amaranti</i>	668
Red mud to green iron – proposed pathway for iron elution via bioleaching of bauxite residue <i>A Tolley</i>	678
Fundamental sintering characteristics of fine-grained hematite precipitate in a simulated sinter blend <i>N A Ware, G Reynolds and L Lu</i>	685

## **Process optimisation – automation and machine learning**

The critical role of mine planners in the evolution of closure at BHP <i>R Getty, J Heyes and M Sanapala</i>	693
The 250 million ton per annum spatial digital twin <i>M Pomery</i>	698
New insights into the relationships between sinter mineralogy and physical strength using QXRD and optical image analysis <i>N A Ware, J M F Clout, J R Manuel, N A S Webster, E Donskoi and M I Pownceby</i>	703

## **Process optimisation – data science and predictive analytics**

Effect of hydrogen on voidage and permeability of ferrous burden in softening and melting process <i>M M Hoque, S Mitra, N Barrett, D O'Dea and T Honeyands</i>	713
Author index	722
