

55th ANNUAL LASER DAMAGE SYMPOSIUM
Proceedings

SPIE. LASER
DAMAGE

LASER-INDUCED DAMAGE IN OPTICAL MATERIALS 2023

17–20 September 2023
Dublin/Livermore, California, United States

Editors

Christopher Wren Carr, Detlev Ristau, Carmen S. Menoni,
Michael D. Thomas

Sponsored by

SPIE

Cosponsored by

Lawrence Livermore National Lab. (United States)
Optimax Systems, Inc. (United States)
Spica Technologies, Inc. (United States)

Cooperating Organizations

Laboratory for Laser Energetics, Univ. of Rochester (United States)

Founding Organizers

Arthur H. Guenther and Alexander J. Glass

Published by

SPIE

Proceedings of SPIE 0277-786X, V. 12726

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser-Induced Damage in Optical Materials 2023*, edited by Christopher Wren Carr, Detlev Ristau, Carmen S. Menoni, Michael D. Thomas, Proc. of SPIE 12726, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

§ The first five digits correspond to the SPIE volume number.

§ The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

SESSION 1 MINI-SYMPOSIUM I: ICF ENABLING TECHNOLOGIES

- 12726 02 **Fusion enabling laser-induced damage reduction, management, and repair strategies at the National Ignition Facility (Keynote Paper)** [12726-1]
- 12726 03 **THGs for NIF operations (>2 MJ NIF operations)** [12726-5]

SESSION 2 THIN FILMS I

- 12726 04 **Sapphire optics for contamination resistance and extreme power density applications**
[12726-9]
- 12726 05 **Study of high-performance IBS coatings for near-IR laser applications** [12726-10]

SESSION 3 LASER DAMAGE COMPETITION

- 12726 06 **Broadband, 920-nm mirror thin film damage competition (Invited Paper)** [12726-8]

SESSION 4 THIN FILMS II

- 12726 07 **Influence of the multilayer dielectric design on the laser damage resistance of pulse-compression gratings** [12726-15]
- 12726 08 **Laser-induced damage of dielectric-enhanced surface-modified single-point-diamond-turned Al-6061 multiband mirrors** [12726-18]

SESSION 5 SURFACES, MIRRORS, AND CONTAMINATION I

- 12726 09 **Pulse duration dependence of single-shot pulsed laser ablation of gallium based III-V compound semiconductors** [12726-21]

SESSION 6 SURFACES, MIRRORS, AND CONTAMINATION II

- 12726 0A **Optical damage considerations in the design of the matter in extreme condition upgrade (MEC-U) laser systems (Invited Paper)** [12726-24]
- 12726 0B **An overview on laser damage performance of current AR-coated windows at 343 nm and ultrashort pulses** [12726-28]

SESSION 7 FUNDAMENTAL MECHANISMS I

- 12726 0C **Characterization of micron scale periodic fluence variation and its possible impact on laser damage** [12726-31]

SESSION 8 MINI-SYMPOSIUM II: MIXED MATERIALS/NANO-LAMINATES

- 12726 0D **Dielectric quantized nanolaminates for laser optics (Invited Paper)** [12726-33]
- 12726 0E **Bandgap energy of quantizing nanolaminates and its relation to the laser-induced damage threshold in the ultraviolet** [12726-36]

SESSION 9 MEASUREMENT AND MATERIALS

- 12726 0F **Monte Carlo analysis of ISO and raster scan laser damage protocols: part 2** [12726-39]

SESSION 10 THIN FILMS III

- 12726 0G **Laser-induced damage of CaF₂ optics at 193 nm** [12726-43]
- 12726 0H **Influence of laser beam size on the determination of LIDT** [12726-44]
- 12726 0I **Study of the probability of growth of silica exit surface damage on the National Ignition Facility (NIF) final optics** [12726-45]

SESSION 11 FUNDAMENTAL MECHANISMS II

- 12726 0J **Determining the bandgap dependence of nonlinear absorption and laser induced damage threshold through numerical simulation and experiment** [12726-47]
- 12726 0K **All-glass metasurface laser optics for lensing, antireflections, and waveplates (Alexander Glass Best Oral Presentation Award)** [12726-51]

POSTER SESSION: THIN FILMS + SURFACES, MIRRORS, AND CONTAMINATION

- 12726 0L **Measurement of optical coatings absorption at 1570 nm and simulations of photo-induced modifications of spectral function under high power laser exposure [12726-54]**
- 12726 0M **Exploring self-healing liquid metal mirrors for high-power laser applications [12726-61]**

POSTER SESSION: MEASUREMENT AND MATERIALS + FUNDAMENTAL MECHANISMS

- 12726 0N **Combined molecular and metallic particulate laser-induced contamination testing: de-risking activity for the LISA space mission [12726-69]**
- 12726 0O **Temporally and spatially resolved photoluminescence of laser-induced damage sites of fused silica [12726-70]**
- 12726 0P **In-situ scanning tunneling microscopy of ultrafast laser damage on Si (100) surface in ultra-high vacuum [12726-74]**
- 12726 0Q **Shockwave and crack monitoring following nonlinear absorption with picosecond time-resolved microscopic imaging [12726-83]**
