Volume 12764

Proceedings of SPIE 0277-786X, V. 12764

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optoelectronic Devices and Integration XII*, edited by Xuping Zhang, Baojun Li, Changyuan Yu, Xinliang Zhang, Proc. of SPIE 12764, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Symposium Committees</i>
xi	<i>Conference Committee</i>

OPTICAL MICROCAVITY AND APPLICATIONS

12764 04	A wavelength tunable and integrated ultra-narrow linewidth DBR semiconductor lasers [12764-3]
12764 05	High-power and narrow-linewidth semiconductor laser with silicon nitride microring [12764-4]
12764 06	Design of a high phase-shift efficiency wide-tuning silicon nitride filter [12764-5]

OPTICAL WAVEGUIDE DEVICES

12764 0A	A compact and simple silicon nanowire based-polarization converter with ultra-high conversion efficient and broad bandwidth [12764-12]
----------	---

NOVEL OPTICAL MATERIAL BASED DEVICES

12764 0D	Nonvolatile electrically reconfigurable silicon photonics enabled by back-end-of-line integration of phase change materials [12764-15]
12764 0E	Substrate effects on surface activation processes of graphene/metal composite photocathodes [12764-17]

TRANSISTORS AND OPTICAL AMPLIFICATION

12764 0I	An on-chip atomic layer deposited waveguide amplifier with net gain at C-band [12764-21]
12764 0J	Nd-doped anti-resonant fiber design for 900-nm all-fiber amplifier [12764-22]

SIGNAL GENERATION AND MEASUREMENT

12764 0L	Length dependency of modal noise and scrambling effect of fibers under incoherent light [12764-25]
----------	--

- 12764 0M **A photonic approach to generate arbitrary chirp microwave waveforms using a direct modulated laser source** [12764-28]
- 12764 0N **Real-time aimer based on special-shaped microlens and optical fiber bundle (Invited Paper)** [12764-24]
- 12764 0P **Photonic assisted arbitrary microwave signal generation based on opto-electronic oscillator** [12764-27]
- 12764 0Q **Low phase noise optical delay line optoelectronic oscillator uncertainty evaluation** [12764-29]

OPTICAL BEAMFORMING AND STEERING

- 12764 0R **Steerable dispersed beam for wireless optical power transfer (Invited Paper)** [12764-30]
- 12764 0S **On-chip beam steering in gradient-index waveguide arrays** [12764-31]
- 12764 0T **Side lobe suppression analysis of spiral array optical antenna** [12764-32]

OPTICAL MANIPULATION

- 12764 0X **Impact of laser polarization and angle of incidence on phase shifting efficacy of an all-optically addressed liquid crystal delay line at X band** [12764-37]

OPTICAL SIMULATION

- 12764 0Z **Computing the causal impulse responses of passive photonic integrated circuits by extrapolation** [12764-40]
- 12764 10 **Development of radiant heat simulation system in extreme environment** [12764-41]
- 12764 11 **Flexible and scalable automation development tool for large-scale photonic integrated circuit design** [12764-42]

OPTICAL COMPUTATION AND COMMUNICATION

- 12764 14 **Visible light communication in III-nitride quantum-well diode** [12764-46]

OPTICAL MODULATION AND DETECTION

- 12764 15 **Design and electro-optical co-optimization of high-speed travelling wave silicon-organic hybrid modulators** [12764-47]

POSTER SESSION

- 12764 1A **Selective silicon photonic polarizer with phase change material** [12764-7]
- 12764 1B **CMOS-compatible low-loss three-etching silicon O-band edge coupler with elaborate cladding and taper shape designs** [12764-8]
- 12764 1C **High-efficiency silicon nitride grating coupler for perfectly vertical coupling** [12764-9]
- 12764 1D **All optical JK flip-flop based on VCSEL-SAs** [12764-44]
- 12764 1F **The research on linear gain of silicon avalanche photodetectors** [12764-53]

DIGITAL POSTER SESSION

- 12764 1I **Design of graded topological resonator for sensitivity improvement** [12764-2]
- 12764 1J **An introduction of perovskite materials in chiral metasurfaces** [12764-16]
- 12764 1K **Photocurrent modulation in a multilayer molybdenum ditelluride transistor** [12764-54]
