Volume 12765

Proceedings of SPIE 0277-786X, V. 12765

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Optical Design and Testing XIII*, edited by Yongtian Wang, Tina E. Kidger, Rengmao Wu, Proc. of SPIE 12765, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

-- *Symposium Committee*
-- *Conference Committee*

SESSION 1 ADVANCED IMAGING TECHNIQUES

12765 05 **Active milliseconds zooming and tracking optics based on liquid lenses and a high-speed gaze controller** [12765-4]

SESSION 2 NOVEL DISPLAY TECHNIQUES

12765 06 **Eyebox expansion and vision correction for varifocal near-eye-display (Invited Paper)** [12765-7]

12765 07 **High-performance 3D light field display based on distortion suppressed compound lens and pre-correction encoded image (Invited Paper)** [12765-8]

12765 08 **Advances in computer-generated hologram for rendering and acceleration based on the point-polygon hybrid method (Invited Paper)** [12765-9]

12765 09 **Nonlinear ray tracing to calculate the forces of an optical laser trap on a dielectric sphere** [12765-10]

12765 0A **Design of micro-LED pico-projection optical engine based on an image fiber** [12765-12]

12765 0B **Design of microstructure optical film for high uniform mini-LED backlight** [12765-13]

SESSION 3 OPTICAL SYSTEM DESIGNS

12765 0D **Ultra-wide angle metalens design with ray-based and wave-based tools (Invited Paper)** [12765-15]

12765 0E **Optical design of off-axis freeform reflective zoom imaging system with large relative aperture** [12765-16]

12765 0F **Comparative research of mirror systems for extreme ultraviolet lithography illuminator** [12765-17]

12765 0G **Development of a fast aperture, high resolution, wide-angle, optically passive athermalized LWIR lens for driver vision enhancer systems** [12765-18]

SESSION 4 FREEFORM OPTICS

12765 0H **Spherical-freeform lens design for uniform illumination based on differentiable ray tracing with uv polynomials (Invited Paper)** [12765-20]

12765 0I **Freeform optics in applications such as AR-HMD, automotive AR-HUD, and TMA telescope** [12765-21]

12765 0J **Tailoring freeform beam-shaping lenses for edge-emitting lasers** [12765-22]

12765 0K **Large aperture flat-top beam shaping and long-distance transmission based on off-axis reflective freeform surface optical system** [12765-23]

12765 0L **Investigation of spline approximation approach of surface data for synthesis of high-efficient beam shapers** [12765-24]

SESSION 5 OPTICAL DESIGN AND TESTING I

12765 0N **Precise surface form measurements of off-axis aspheric freeform optics** [12765-26]

12765 0O **Influence of flight time on aero-optical imaging quality degradation of the conformal dome** [12765-28]

12765 0P **A method of metasurface collimating pulsed laser diode for lidar emission system** [12765-29]

SESSION 6 OPTICAL DESIGN AND TESTING II

12765 0Q **Color speckle deflectometry for three-dimensional surface transient measurement** [12765-30]

12765 0S **Wavefront reconstruction for double-grating Ronchi lateral shearing interferometry with nonlinear optimization** [12765-32]

12765 0T **Quasi-non-diffracting static light sheets generated by multiple slit interference mask** [12765-33]

12765 0U **Analysis and design of optical system for the defocused light field cameras** [12765-34]

12765 0V **An electrically tunable metasurface for continuous phase modulation at visible wavelength based on indium tin oxide** [12765-35]

12765 0W **Design of encapsulated transmission grism with high diffraction efficiency and low polarization** [12765-76]

POSTER SESSION

12765 0X **Design of multichannel NIR spectrophotometers for in-line process analysis of oil products** [12765-6]

12765 0Z **Cladding-offset fiber structure-based biosensors for diagnosis of gastrointestinal disease** [12765-36]

12765 10 **Optical system design for zoom lens based on Delano diagram** [12765-37]

12765 11 **Research on benchmark ruler measurement method based on cluster analysis** [12765-38]

12765 13 **Program for automated synthesis of two-lens and three-lens objectives** [12765-40]

12765 15 **A motor imagery EEG classification algorithm based on ResCNN-BiGRU** [12765-42]

12765 16 **Single-frame dual-wavelength phase demodulation method based on deep learning** [12765-43]

12765 17 **Design of an intraocular lense with improved peripheral vision** [12765-44]

12765 19 **Correction of color deviation in multi-layer light field displays** [12765-46]

12765 1A **Reducing system tolerance sensitivity by controlling the stability of the chief ray** [12765-47]

12765 1B **Research of the non-cemented wide-spectrum lens design possibilities** [12765-48]

12765 1C **Design of a soft x-ray free-electron lasers arrival time diagnostic device** [12765-49]

12765 1D **A spectacle lens design for myopia control and its optical performance analysis** [12765-50]

12765 1E **Generating off-axis reflective imaging systems consisting of flat phase elements based on deep learning** [12765-51]

12765 1F **Mode multiplexing 1×4 waveguide optical switch based on phase-change materials** [12765-52]

12765 1H **Depth of focus extension of space-borne optical camera through variable curvature mirror** [12765-54]

12765 1I **Investigation of optical distortion self-compensation ability in the MUltiplexed Survey Telescope** [12765-55]

12765 1J **Research and design of Köhler illumination with reduced dimensions for new type of microscopes** [12765-56]

12765 1K **Preliminary research of the light-weighted secondary mirror with passive supports for the MUltiplexed Survey Telescope** [12765-57]

12765 1L **Preliminary investigation on the effect of secondary mirror assembly on the optical performance for the MUltiplexed Survey Telescope** [12765-58]

12765 1N **Incoherent optical cryptosystem based on hybrid wave aberration** [12765-60]

12765 1Q **The MTF calculation model of optical systems under the influence of ghost images** [12765-63]

12765 1R **A design method of anamorphic optical system** [12765-64]

12765 1S **Polarization aberration in catadioptric anamorphic optical system** [12765-65]

12765 1U **Comprehensive stray light analysis and feature rays identification for a panoramic annular lens** [12765-67]

12765 1V **Design of a single-sensor gazing panoramic stereo imaging system with no central blind area** [12765-68]

12765 1W **Application of vector phase retrieval model in high numerical aperture optical systems** [12765-69]

12765 1X **High-power single-mode semiconductor lasers based on supersymmetric structures around 795 nm** [12765-70]

12765 1Y **Research on lateral-shear interferometry based on double checkerboard grating** [12765-72]

12765 1Z **Optical-digital joint optimization enables advanced specifications freeform imaging system design** [12765-73]

12765 20 **Numerical estimation method for misalignment of optical systems using machine learning** [12765-74]

12765 21 **An optical measurement system for high precision alignment of imaging detectors** [12765-75]

12765 24 **Analysis and simulation of spatial phase alignment for fabrication of double-layer grating** [12765-81]

DIGITAL POSTER SESSION

12765 25 **Smooth output from adaptive illumination systems with pixelated LED arrays** [12765-11]
