Volume 12772

Proceedings of SPIE 0277-786X, V. 12772

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Real-time Photonic Measurements, Data Management, and Processing VII*, edited by Ming Li, Kebin Shi, Hossein Asghari, Nuannuan Shi, Proc. of SPIE 12772, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Symposium Committee*
ix *Conference Committee*

REAL-TIME PHOTONIC MEASUREMENTS, DATA MANAGEMENT, AND PROCESSING I

- 12772 03 **Polarization dynamics of ultra-narrow modes generated in random fiber lasers (Invited Paper)** [12772-1]
- 12772 04 **Advancing phase recovery in time-stretch computational cell imaging** [12772-2]
- 12772 05 **A novel Rayleigh lidar signal denoising algorithm for far-field noise suppression and high-accuracy retrieval** [12772-3]
- 12772 06 **Research on lightweight synchronization recognition algorithms for multiple acoustic sources in a photoacoustic sensor system based on Sagnac interference** [12772-4]

REAL-TIME PHOTONIC MEASUREMENTS, DATA MANAGEMENT, AND PROCESSING II

- 12772 08 **A study on the improvement of sensitivity consistency in Sagnac photoacoustic sensing system** [12772-6]
- 12772 09 **Practical issues in repetition-rate control of optical pulse trains and frequency combs by Talbot self-imaging** [12772-7]

REAL-TIME PHOTONIC MEASUREMENTS, DATA MANAGEMENT, AND PROCESSING III

- 12772 0A **Research on electrode-free RF receiver front-end based on lithium niobate photonic chip** [12772-8]

POSTER SESSION

- 12772 0E **Hybrid-integrated optoelectronic oscillator with wideband tunability and low phase noise** [12772-13]
- 12772 0G **An improved signal processing circuit design of heterodyne dual-frequency laser interference displacement measurement system** [12772-15]

12772 0H **Novelty detection technology for Alzheimer's disease based on autoencoder feature extraction and MCD classification** [12772-16]

12772 0J **Reconstruction of high-resolution depth profiling from single-photon data based on PCA** [12772-18]

DIGITAL POSTER SESSION

12772 0L **Real-time deep learning semantic segmentation for 3-D augmented reality** [12772-20]
