Volume 12775

Proceedings of SPIE 0277-786X, V. 12775

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Quantum and Nonlinear Optics X*, edited by Qiongyi He, Dai-Sik Kim, Chuan-Feng Li, Proc. of SPIE 12775, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

ISBN: 9781510667990
ISBN: 9781510668003 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Symposium Committees*
xi *Conference Committee*

QUANTUM AND NONLINEAR OPTICS II

12775 07 **The formation of high-Q polygon modes in weakly perturbed microdisks on thin-film lithium niobate and its applications (Invited Paper)** [12775-5]

QUANTUM AND NONLINEAR OPTICS VI

12775 0M **Nonlinear threshold in cylindrical microresonators with small radius variations in the presence of a disturbing coupler** [12775-19]

12775 0N **Manipulating the harmonic mode-locked regimes inside a fiber cavity by a reinforcement learning algorithm** [12775-20]

QUANTUM AND NONLINEAR OPTICS VIII

12775 0T **Telecom-band photon-pair source based on high-index doped silica glass spiral waveguide** [12775-26]

12775 0U **Nonlinear dynamics of coherently driven cavities with synchronous intracavity phase modulation** [12775-27]

QUANTUM AND NONLINEAR OPTICS IX

12775 0W **Nonlinear pulse dynamic in a weak coupled normal dispersion multicore fiber (Invited Paper)** [12775-30]

12775 0Y **Tunable spontaneous-parametric down-conversion in III-V semiconductor waveguides heterogeneously integrated in the silicon platform** [12775-38]

QUANTUM AND NONLINEAR OPTICS X

12775 10 **Tailored dispersive wave generation in quasi-phase-matched liquid core fibers** [12775-32]

12775 12 **Investigation of multiphoton photocurrent in SiC using phase-modulated femtosecond laser pulses** [12775-35]

12775 13 **Self-similar light beams at the second harmonic generation in a PT-symmetry structure with strong Bragg coupling at both frequencies** [12775-36]

POSTER SESSION

12775 14 **Space-time optical vortices in planar coupled waveguides with quadratic nonlinearity** [12775-39]

12775 17 **A high-throughput and FPGA-based LDPC decoder for continuous-variable quantum key distribution system** [12775-43]

12775 18 **High-speed implementation of privacy amplification for continuous-variable quantum-key distribution with Toeplitz matrix based on FPGA** [12775-44]

12775 19 **Monitoring the source noise of a plug-and-play continuous variable quantum key distribution system** [12775-45]

12775 1A **A new scheme for orthogonal dual-polarization continuous-variable quantum key distribution** [12775-46]

12775 1B **A refractive index sensor based on FWM effect of tellurite photonic crystal fiber** [12775-47]

12775 1C **Modulation noise model for multi-carrier Gaussian modulated continuous-variable quantum key distribution based on OFDM technology** [12775-48]

12775 1D **Dual-comb pulses constituting soliton rain trains in a wavelength multiplexed fiber laser based on single-walled carbon nanotube** [12775-49]

12775 1E **Generating Gaussian error in lattice cryptography with quantum random number generator** [12775-50]

12775 1F **Evolution of inter-pulse non-frequency shift components in multi-pulse pumped supercontinuum generation with normal dispersion** [12775-51]

12775 1G **Atomic clock on the basis of the CPT effect in counter-propagating circularly polarised waves** [12775-52]

12775 1H **Non-Hermitian unidirectional routing of photonic qubits** [12775-53]

12775 1I **Numerical modelling of ultra-narrow generation in a Raman fiber laser with random distributed feedback** [12775-54]

12775 1J **Localized spectral modes generated in the random Raman laser based on multimode fiber** [12775-55]

12775 1K **Multi-topological charges vortex beam generator based on nonlinear bound states in the continuum with improvement of nonlinear conversion efficiency** [12775-56]

12775 1L **5-bit all free space optical quantum random number generator** [12775-57]

12775 1N **Generation of entangled coherent states in cavity QED and its nonclassicality** [12775-59]

12775 1P **A method to enhance the detection capability of optical sensing based on the quantum characteristics of vortex beam** [12775-61]
