

PROCEEDINGS OF SPIE

Optical Fibers and Their Applications 2023

**Waldemar Wójcik
Zbigniew Omiotek
Andrzej Smolarz**
Editors

**11–14 September 2023
Lublin, Poland**

Organized by

Department of Optical Fibers Technology, Maria Curie-Skłodowska University (Poland)
Department of Electronics and Information Technology, Lublin University of Technology (Poland)

Patronage

Polish Space Agency, POLSA (Poland)
Polish Academy of Sciences (Poland)
Photonics Society of Poland (Poland)
Committee of Optoelectronics of the Association of Polish Electrical Engineers (Poland)

Published by
SPIE

Volume 12985

Proceedings of SPIE 0277-786X, V. 12985

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Fibers and Their Applications 2023*, edited by Waldemar Wójcik, Zbigniew Omiotek, Andrzej Smolarz, Proc. of SPIE 12985, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

vii *Introduction*

OPTICAL FIBERS AND THEIR APPLICATIONS 2023

- 12985 02 **Optimal design of linear paths for flexible optical networks** [12985-1]
- 12985 03 **Optical image processing technologies using generalized connectivity W -spectrum** [12985-2]
- 12985 04 **Optical parallel-hierarchical structures of correlation interactions multistage process analysis for organization of neuro-like computing** [12985-3]
- 12985 05 **Self-oscillating parametric optical transducer based on quantum double-barrier heterostructure** [12985-4]
- 12985 06 **Optical control system of the geometric model constructed in 3D space for magnetic stereotaxis** [12985-5]
- 12985 07 **Laboratory layout of a coherent optical spectrum analyzer** [12985-13]
- 12985 08 **Fiber-optic system for control of the orientation of objects in space** [12985-14]
- 12985 09 **Optical method for monitoring the state of dynamic objects in the processing of materials** [12985-9]
- 12985 0A **Using multiple optical cameras for correspondence identification between objects in the fields of view** [12985-11]
- 12985 0B **Optical system for enhancing the precision of geometric parameter estimation for objects utilizing defocused images** [12985-17]
- 12985 0C **Optical system visualization of combined reflectance model based on cubic and quadratic functions** [12985-20]
- 12985 0D **Parallel-hierarchical optical network as a model of natural neural network** [12985-23]
- 12985 0E **Photon technologies to increase reproduction and resistance of varieties in agriculture** [12985-25]
- 12985 0F **Modification of working surfaces details by processing with laser irradiation** [12985-26]
- 12985 0G **Neurorecognition visualization in multitask end-to-end speech** [12985-6]

- 12985 OH **Structural-functional model of a parallel-hierarchical optical network as a systematic tool for artificial intelligence methods** [12985-27]
- 12985 OI **Multispectral method for simulating pelophylax esculentus color protection function using Altshuller's innovation algorithm** [12985-28]
- 12985 OJ **Optical method of investigating eye diseases and system for diagnosing diabetic retinopathy** [12985-24]
- 12985 OK **Optical visualization of blood flow in the elimination of nosebleeds by ligation of the external carotid artery according to angiography** [12985-19]
- 12985 OL **Information Stokes-correlometry method to study polarization-inhomogeneous images of optically anisotropic self-assembled soft matter films** [12985-12]
- 12985 OM **Photonic methods for normalizing the level of tissue microcirculation in the maxillo-facial region** [12985-7]
- 12985 ON **3D polarization-interference metrology of polycrystalline structure of self-assembled polycrystalline soft matter films** [12985-15]
- 12985 OO **3D scanning technologies by optical RealSense cameras for SIREN-based 3D hand representation** [12985-8]
- 12985 OP **Polarization methods and matrix interference systems for diagnosing the polycrystalline structure of soft matter layers** [12985-10]
- 12985 OQ **System of polarization mapping and intellectual analysis of Mueller matrix invariants of biological layers in the assessment of pathologies** [12985-16]
