**Volume 13071**  
Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 13071

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Mechatronic Engineering and Artificial Intelligence (MEAI 2023)*, edited by Yonghe Wei, Fengli Liu, Proc. of SPIE 13071, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

## Part One

---

### ELECTROMECHANICAL PRODUCT DESIGN AND FAULT DIAGNOSIS

---

- 13071 02 **Research on the design of automotive steering gear experimental platforms under the background of green and environmental protection** [13071-113]
- 13071 03 **Study of energy density on mechanical properties of laser additively manufactured AISi10Mg alloy** [13071-6]
- 13071 04 **Application of improved YOLOv7 based on Swin Transformer in defect detection of 3D printed lattice structures** [13071-115]
- 13071 05 **Research on the application of the manufacturing technology of the integrated pressure source cabin** [13071-150]
- 13071 06 **The influence of vibration on hemispherical resonant gyroscope** [13071-127]
- 13071 07 **A defect detection device for OLED panels** [13071-77]
- 13071 08 **Research and application of MQ-7 sensor compensation method** [13071-98]
- 13071 09 **Service life prediction method of relay protection device considering acceleration state and operation characteristics** [13071-85]
- 13071 0A **Research and design of precision grinding and polishing machine tool** [13071-167]
- 13071 0B **Research on the battery replacement technology and device for mining lithium battery vehicles** [13071-145]
- 13071 0C **The effect of nozzle construction factors on hydraulic performance and prediction** [13071-4]
- 13071 0D **Fault diagnosis for the aircraft system** [13071-100]
- 13071 0E **Stability analysis and suggestions for technical transformation of bulb tubular turbine runner in a power plant** [13071-126]
- 13071 0F **Research on self-explosion defect detection of insulator based on improved YOLOv7** [13071-160]

- 13071 0G **Design and simulation of a novel AUV with improved mobility and equipment handling capabilities** [13071-33]
- 13071 0H **Health evaluation method of spaceborne modulation and demodulation equipment based on comprehensive weighting** [13071-65]
- 13071 0I **Experimental research on torque sensor based on Galfenol alloy** [13071-139]
- 13071 0J **Structure design of torque sensor based on inverse magnetostriction effect** [13071-142]
- 13071 0K **Study on the influence of inclination on the characteristics of hydraulic lubrication stern bearing** [13071-17]
- 13071 0L **Low deformation re-manufacturing and repair method based on phase transition temperature** [13071-109]
- 13071 0M **Study on rust removal device for underground contact network in coal mines** [13071-21]
- 13071 0N **Aircraft inspection based on improved Swin Transformer** [13071-74]
- 13071 0O **Research on fabrication method of fabric sensor based on laser induced graphene** [13071-166]
- 13071 0P **Generation and denoising of vibration noise in shock wave testing** [13071-125]
- 13071 0Q **Prediction of remaining useful life of lubricating oil based on optimal BP neural network** [13071-47]
- 13071 0R **Characteristics of small-scale piezoelectric vibration energy harvesting device for rotating structures** [13071-80]
- 13071 0S **Research on defect detection and wall thickness analysis of fully-wrapped carbon fiber reinforced hydrogen storage cylinder for unmanned aerial vehicles by industrial computed tomography** [13071-61]
- 13071 0T **Design of optimization strategy for wheel-turning repair of complete wheelsets of locomotives** [13071-32]
- 13071 0U **Adaptability analysis on the measurement device of UACV special machinery unlocking force** [13071-42]
- 13071 0V **A remaining useful life prediction method based on CNN-LSTM** [13071-90]
- 13071 0W **Research on the electromagnetic characteristics of segmented enhanced electromagnetic transmitter** [13071-108]
- 13071 0X **Fault diagnosis of train control on-board equipment based on fault text** [13071-168]
- 13071 0Y **Research on rapid production change of machine tools based on digital twin** [13071-123]

- 13071 0Z      **Mechanism simulation of valveless micropump** [13071-192]
- 13071 10      **Study on the electromagnetic characteristics of aluminum-copper composite four-track electromagnetic transmitter** [13071-107]
- 13071 11      **Spectral fatigue analysis for legs of wind turbine units** [13071-143]
- 13071 12      **A disinfection vehicle featuring dynamic mask recognition and spraying capability** [13071-172]
- 13071 13      **Research on integrated power quality control device for dual high active station area** [13071-179]
- 13071 14      **Filtering analysis of zero sequence filter based on magnetic flux compensation principle** [13071-75]
- 13071 15      **Design of high-frequency test fixture considering impedance matching** [13071-40]
- 13071 16      **Deployment of optoelectronic devices based on improved NSGA-II** [13071-102]
- 13071 17      **Design of variable stiffness joint of manipulator** [13071-105]
- 13071 18      **Fault diagnosis of condenser rotor based on HVD and fine composite multi-scale dispersion entropy** [13071-136]

---

#### MECHANICAL SYSTEM MONITORING AND INTELLIGENT CONTROL

---

- 13071 19      **Analysis of the icing monitoring terminal's battery operating state at different altitudes** [13071-182]
- 13071 1A      **Research on strain system based on pile leg piercing** [13071-35]
- 13071 1B      **Research on current-carrying frictional discharge phenomena in the sliding contact of carbon brushes and collector rings** [13071-124]
- 13071 1C      **Real-time prediction model of welding temperature based on LSTM** [13071-194]
- 13071 1D      **Test response compression using compression perception theory** [13071-8]
- 13071 1E      **Test and analysis of starting whistle noise of a pure electric vehicle** [13071-165]
- 13071 1F      **UAV cluster obstacle avoidance trajectory planning integrating collaborative control design** [13071-43]
- 13071 1G      **Research on ship navigation optimization considering shipboard equipment disturbance** [13071-122]

- 13071 1H **Oscillation collaborative control method for AC/DC hybrid distribution network under distributed dispatching** [13071-112]
- 13071 1I **Research on braking energy recovery technology of electric vehicle in underground coal mine** [13071-39]
- 13071 1J **633nm iodine steady frequency laser frequency evaluation system research** [13071-149]
- 13071 1K **An intelligent filter with adjustable bandwidth** [13071-93]
- 13071 1L **Research on semi-active suspension variable weight model predictive control under car-following scenario** [13071-34]
- 13071 1M **Risk assessment of aircraft anti-skid braking system based on improved fuzzy FMEA** [13071-101]
- 13071 1N **A discrete space vector model predictive control strategy for permanent magnet synchronous motors** [13071-60]
- 13071 1O **Research on fault features of tooth broken in planetary transmission system based on vibration characteristics** [13071-87]
- 13071 1P **The influence of laser surface texturing on the transient frequency response of gears** [13071-173]
- 13071 1Q **Research on force feedback control of steer-by-wire system** [13071-83]
- 13071 1R **Research on high voltage power supply for electrical pulse disintegration** [13071-157]
- 13071 1S **Simulation and research of double motor anti-backlash technology based on fuzzy control** [13071-49]
- 13071 1T **Research on an accuracy improvement technology of ADC acquisition system based on pruning neural network** [13071-133]
- 13071 1U **Research on the position accuracy of fuselage static pressure ports on civil aircraft** [13071-116]
- 13071 1V **Analysis of permanent magnet synchronous generator grid connection characteristics based on stored energy frequency modulation control** [13071-62]
- 13071 1W **Design of C-scan percussion detection system for composite material based on LabVIEW** [13071-86]
- 13071 1X **Simulation research on motion control system of offshore anti-rolling crane based on fuzzy PID control** [13071-129]
- 13071 1Y **Dynamical system design of an air-ground amphibious individual unmanned aerial vehicle** [13071-71]
- 13071 1Z **Research on seismic test and simulation analysis of 550 kV transformer bushing for high altitude station** [13071-138]

- 13071 20 **The finite element method was used to analyze the sensitivity of piezoresistive pressure sensors in micro-electro-mechanical system** [13071-153]
- 13071 21 **Research on deep-learning-based fault diagnosis and prediction methods for electrical systems** [13071-9]
- 13071 22 **Research on electromagnetic emission technology of internal drive direct feed armature** [13071-55]

## **Part Two**

- 13071 23 **A deep reinforcement learning method for job shop scheduling integrated with automated guided vehicles** [13071-23]
- 13071 24 **A study on the dynamic response of deepwater top tension riser systems and LSTM model prediction** [13071-59]
- 13071 25 **A study on the dual servo valve drive control method for fully automatic hydraulic heavy-duty manipulators** [13071-188]
- 13071 26 **Research on the coupling and superposition mechanism of high-frequency zero sequence harmonics in the substation area based on PSCAD** [13071-11]
- 13071 27 **Design of automatic obstacle avoidance and tracking trolley control system** [13071-64]
- 13071 28 **Research on motion control system of cutting arm of mining equipment based on fuzzy neural PID control** [13071-117]
- 13071 29 **Research on intelligent control of automobile active suspension based on BP neural control model** [13071-131]

---

## **HIGH PERFORMANCE ALGORITHM AND INTELLIGENT DATA ANALYSIS**

- 13071 2A **Copula-function-based wind turbine blade fatigue reliability modeling and assessment with consideration of failure correlation** [13071-56]
- 13071 2B **Differential confocal microimaging with non-uniform reflection suppression** [13071-3]
- 13071 2C **A reconstruction algorithm of engineering drawings of two-dimensional keyway shaft parts** [13071-41]
- 13071 2D **Feature selection algorithm for ant colony clustering optimization for target tracking** [13071-196]
- 13071 2E **Numerical simulation study on clipping effect of water medium in closed cabin** [13071-134]
- 13071 2F **Dijkstra and A\* algorithms in automated vehicle driving** [13071-169]

- 13071 2G **Aerial image object detection method based on improved YOLOv5** [13071-163]
- 13071 2H **Research on target recognition in the end effector of mechanical gripper** [13071-181]
- 13071 2I **Traffic collaboration optimization method for power communication network based on segmentation learning** [13071-76]
- 13071 2J **Improved YOLOv5 for object detection in UAV aerial images** [13071-36]
- 13071 2K **Unsupervised anomaly detection of polluted telemetry data based on a reconstruction model with adaptive weighting** [13071-68]
- 13071 2L **Research on testing and evaluation method of autonomous driving perception algorithm based on data playback** [13071-31]
- 13071 2M **Research on computing power test of car-level chips based on neural network algorithm** [13071-52]
- 13071 2N **Theoretical analysis of a three-dimensional medium heated by a moving volumetric laser heat source under the dual-phase-lag heat transfer model** [13071-170]
- 13071 2O **Polarization characteristics of valley and spin using monolayer MoS<sub>2</sub> structure modulated by strain** [13071-54]
- 13071 2P **An improved PCB defect detection algorithm for YOLOv7-tiny** [13071-46]
- 13071 2Q **DGCR: depth graph convolution recommendation algorithm integrating social and residual** [13071-161]
- 13071 2R **Ship target detection based on CBAM-YOLOv8** [13071-70]
- 13071 2S **Infrared target 3D reconstruction based on TRC-MVSNet** [13071-73]
- 13071 2T **Design of brushless motor control system based on FOC algorithm** [13071-183]
- 13071 2U **Numerical simulation study on stress field distribution of die-cutting machine under no-load condition** [13071-171]
- 13071 2V **Research and training of helmet recognition model based on deep learning** [13071-189]
- 13071 2W **Long and short-term memory neural network multicomponent gas quantification correction algorithm based on sparrow search algorithm** [13071-16]
- 13071 2X **Support vector machine qualitative correction algorithm for multicomponent gases based on whale optimization algorithm** [13071-5]
- 13071 2Y **Webshell combination detection method based on Naïve Bayes and decision tree** [13071-184]
- 13071 2Z **Research on target detection algorithms in complex road conditions** [13071-120]

- 13071 30 **Research on data augmentation with generative adversarial networks in the fault diagnosis of reciprocating compressor bearings** [13071-137]
- 13071 31 **Numerical simulation of water pressure blasting of rock mass based on LS-DYNA** [13071-20]
- 13071 32 **High-level noise load identification based on Chebyshev polynomial piecewise fitting** [13071-128]
- 13071 33 **Prediction of available capacity of power battery based on autoregressive integrated moving average model** [13071-119]
- 13071 34 **Anomaly detection and identification of power consumption data based on LOF and isolation forest** [13071-174]
- 13071 35 **Research on seismic data denoising method based on K-SVD algorithm** [13071-121]
- 13071 36 **Research on improved YOLOv5-based pest recognition** [13071-132]
- 13071 37 **Efficient high-resolution human pose estimation with integrated attention mechanism** [13071-88]
- 13071 38 **An all-in-one lightweight image restoration network based on polarized attention mechanism and efficient feature extraction** [13071-159]

---

#### ARTIFICIAL INTELLIGENCE SCHEDULING AND ROBOT MODELING

---

- 13071 39 **Metaverse drive Z-FFR physical design** [13071-15]
- 13071 3A **High-precision visual monitoring of robot arm position based on deep learning** [13071-175]
- 13071 3B **Surface pitting detection of ball screw based on deep learning** [13071-103]
- 13071 3C **Development of unmanned intelligent support equipment of military powers** [13071-186]
- 13071 3D **Research and design of unicycle robot based on cascade PID control** [13071-91]
- 13071 3E **Improved YOLOv5-based small object detection method for UAVs** [13071-26]
- 13071 3F **Underwater propeller fault diagnosis based on deep learning** [13071-178]
- 13071 3G **Modeling and simulation of hit accuracy of EFP destruction element under disturbance conditions of UAV** [13071-82]
- 13071 3H **Research on automatic positioning of hoisting crane for heavy parts at sea based on BIM and RFID technology** [13071-193]

- 13071 3I **Fuzzy-PID-based trajectory tracking for 3WIS robot** [13071-114]
- 13071 3J **Research on fault diagnosis model of electric vehicle based on learning algorithm** [13071-29]
- 13071 3K **Research on intelligent attendance management system based on face recognition technology** [13071-111]
- 13071 3L **Design and implementation of electric power patrol robot based on 3D GIS** [13071-18]
- 13071 3M **Point cloud-based automatic finite element modeling utilizing UAV** [13071-110]
- 13071 3N **Experimental study on arc discharge of detection robot in UHV line** [13071-180]
- 13071 3O **Modeling and analysis of elastic plane constraint on soft robots** [13071-2]
- 13071 3P **Structural design of a lumbar rehabilitation robot based on rigid-flexible coupling** [13071-7]
- 13071 3Q **Aircraft detection based on improved Vision Transformer** [13071-155]
- 13071 3R **Dynamic simulation analysis of high-voltage circuit breaker switch spring mechanism based on deep learning** [13071-19]
- 13071 3S **High slope deformation prediction based on residual modified ARIMA-PSO-GRNN models** [13071-154]
- 13071 3T **A hybrid model of residual dilated convolutional neural network and bidirectional recurrent neural network for the outlier detection of rail profile** [13071-104]
- 13071 3U **Research on machine-vision-based method for head-tail detection of corn ears** [13071-118]
- 13071 3V **A life prediction method for electronic components based on dual-channel multimodal convolutional networks** [13071-69]
- 13071 3W **Neural implicit surfaces learning for multi-view reconstruction** [13071-44]
- 13071 3X **Research on collaborative perception technology of two-domain unmanned platform cluster** [13071-63]
- 13071 3Y **Multi-objective optimal decision making for autonomous driving based on multi-modal predicted trajectories** [13071-84]
- 13071 3Z **The study of roadside visual algorithm in vehicle-road cooperative based on YOLOX and KPP-DeepSORT** [13071-130]
- 13071 40 **Temperature drift compensation for inclinometer sensors based on Kalman filtering and neural networks** [13071-140]
- 13071 41 **Research on loess tunnel stability analysis based on artificial intelligence** [13071-30]

- 13071 42 **Analysis of effectiveness evaluation of unmanned platform cluster operations** [13071-81]
- 13071 43 **Research on deep-learning-based photovoltaic output estimation and multi-layer collaborative load prediction in distribution networks** [13071-176]
- 13071 44 **Modeling and simulation of six degrees of freedom marine stable platform** [13071-78]
- 13071 45 **Design of a handheld automatic acupuncture device based on Arduino** [13071-147]
- 13071 46 **Autonomous planning method for intelligent UAV swarm flight path based on swarm policy** [13071-94]
- 13071 47 **Study of normally-off AlGaIn/GaN HEMTs with recessed p-GaN gate** [13071-38]
- 13071 48 **Research on smart bracelets based on the expert system and BP neural network** [13071-50]
