TABLE OF CONTENTS

K1: EM APPLICATIONS IN BIOMEDICAL DIAGNOSIS, IMAGING AND SENSING

K1.1: COMPARISON OF DIFFERENT MICROWAVE TISSUE PHANTOMS FOR THE DESIGN OF AN OPTIMAL VALIDATION SYSTEM FOR RF DEVICES 1
Anthony Giordano, Melany Hernandez, Satheesh Venkatakrishnan, Florida International University, United States

K1.2: ELECTROMAGNETIC UNCERTAINTY ANALYSIS OF 3D BIOLOGICAL PHANTOMS 2
Apoorva Pedgaonkar, UNIVERSITY OF UTAH, United States; Gregory Moss, Remcom Inc., United States; Jamesina Simpson, UNIVERSITY OF UTAH, United States

K1.3: ESTIMATING THE SPATIAL AVERAGE OF BREAST TISSUE PERMITTIVITY USING SINGLE- AND MULTIPLE-CHANNEL TRANSMISSION MEASUREMENTS FOR PATIENT-SPECIFIC MICROWAVE HYPERTHERMIA BEAMFORMER DESIGN 3
Tessa A. Haldes, Susan C. Hagness, University of Wisconsin-Madison, United States

K1.4: INTERNAL BODY TEMPERATURE MEASUREMENTS USING A MINIATURIZED HYBRID RADIOMETER 5
Jooeun Lee, Sofia Mvokany, Zoya Popovic, University of Colorado Boulder, United States

K1.5: THE INFLUENCE OF LOW-INTENSITY RADIOFREQUENCY FIELDS ON SUPEROXIDE DISMUTASE ACTIVITY IN CANCER CELLS 6
Hakki Gurhan, Frank Barnes, University of Colorado Boulder, United States

K1.6: COMPARISON OF THE RF FIELDS DISTRIBUTION BETWEEN A HIGH-PERMITTIVITY MATERIAL AND A METASURFACE FOR MAGNETIC RESONANCE IMAGING 7
Sabrina Rotundo, University of Pisa, Italy; Giuseppe Carluccio, New York University, United States; Danilo Brizi, University of Pisa, Italy; Christopher Collins, New York University, United States; Agostino Monorchio, University of Pisa, Italy; Riccardo Lattanzi, New York University, United States

K1.7: LOW-FREQUENCY MAGNETIC FIELD AND CANCER CELLS 9
Marek Bajtoš, University of Zilina, Slovakia; Nhat Dang, Hakki Gurhan, Frank Barnes, University of Colorado Boulder, United States

K1.8: EVALUATING THE MR SAFETY OF PASSIVE IMPLANTS IN SURGICAL AND AFTER HEAL MODELS AT 1.5 T AND 3 T MRI 11
Ananya Nandikanti, Jianfeng Zheng, Ji Chen, University of Houston, United States

K1.9: PROPAGATION OF A THE FIELDS FROM A SINGLE COIL IN A HIGH-PERMITTIVITY HELMET FOR MRI APPLICATIONS 12
Giuseppe Carluccio, Christopher Collins, New York University, United States

K1.10: THE USE OF RF AND MAGNETIC FIELDS FOR COMMUNICATION AND CONTROL BETWEEN AND WITHIN CELLS: "A CELL PHONE SYSTEM FOR CELLS" 14
Frank Barnes, Hakki Gurhan, University of Colorado Boulder, United States

BF1*: TOPICS IN RADIO SCIENCE: IN MEMORY OF W. ROSS STONE

BF1*.1: A TRIBUTE TO THE LEGACY OF ROSS STONE: FROM HERTZ CYLINDRICAL REFLECTOR ANTENNA TO NOVEL REMOTE SENSING ANTENNAS 15
Yahya Rahmat-Samii, University of California at Los Angeles (UCLA), United States

BF1*.2: A SURVEY OF PROGRESS IN THE NUMERICAL EVALUATION OF SINGULAR AND NEAR-SINGULAR INTEGRALS 16
Donald Wilton, University of Houston, United States; Francesca Vipiana, Politecnico di Torino, Italy; William Johnson, Electromagnetics Consultant, United States

BF1*.3: ENHANCEMENT OF TEMPORAL SAMPLING FOR GLOBAL REMOTE SENSING OF WATER VAPOR PROFILES, CLOUDS AND PRECIPITATION: RECENT RESULTS FROM THE TEMPORAL EXPERIMENT FOR STORMS AND TROPICAL SYSTEMS (TEMPEST) MISSIONS 17
Steven C. Reising, Christian D. Kummerow, V. Chandrasekar, Chandrasekar Radhakrishnan, Chia-Pang Kuo, Colorado State University, United States; Shannon T. Brown, Todd C. Gaier, Sharmila Padmanabhan, NASA/Caltech Jet Propulsion Laboratory, United States; Richard Schulte, Colorado State University, United States

BF1*.4: OPTIMIZATION OF FABRY–PEROT CAVITY ANTENNAS HAVING HORIZONTAL OR VERTICAL DIPOLE SOURCES 18
Walter Fuscaldo, Consiglio Nazionale delle Ricerche, Italy; David Jackson, University of Houston, United States; Alessandro Galli, Sapienza University of Rome, Italy

BF1*.5: SOME UNUSUAL METHODOLOGIES AND UNCONVENTIONAL APPLICATIONS IN ELECTROMAGNETICS AND RADIO SCIENCE: IN MEMORY OF W. ROSS STONE 20
Branislav Notaros, Colorado State University, United States

BF1*.6: A PARABOLIC METAMATERIAL LENS FOR MATCHING BETWEEN PARALLEL-PLATE WAVEGUIDES 21
Piergiorgio L. E. Uslenghi, University of Illinois at Chicago, United States

BF1*.7: ATTENUATION OF THE AVERAGE NORTON SURFACE WAVE PROPAGATING ALONG A GENTLY UNDULATING SURFACE 22
Gary Brown, Virginia Tech, United States

BF1*.8: PRINTED FLEXIBLE/WEARABLE ANTENNAS FOR 5G APPLICATIONS: A REVIEW 23
Sembiam Rengarajan, California State University, United States; Taimoor Khan, National Institute of Technology, Silchar, India

BF1*.9: TRENDS AND APPROACHES FOR IMPROVING SELF-INTERFERENCE CANCELLATION OF RADIOS ACROSS A WIDE BANDWIDTH 24
John Volakis, Satheesh Venkatakrishnan, Florida International University, United States

BF1*.10: A PATHWAY TO SERVICE 25
Michael Newkirk, Johns Hopkins University Applied Physics Lab, United States

GH1*: METEORS, ORBITAL DEBRIS AND DUSTY PLASMAS

GH1*.1: USING NUMERICAL SOLUTIONS OF THE FORCED KORTEWEG-DE VRIES EQUATION AND PARTICLE-IN-CELL SIMULATIONS TO STUDY SOLITONS IN SPACE PLASMAS 26
Ashwyn Sam, Nicolas Lee, Sigrid Elschot, Stanford University, United States

GH1*.2: SATELLITE AND SPACE DEBRIS IDENTIFICATION BY MEASUREMENTS OF IONOSPHERIC INTERACTIONS 27
Paul Bernhardt, University of Alaska Fairbanks, United States; Lauchie Scott, DRDC Ottawa Research Centre, Canada; Andrew Howarth, University of Calgary, Canada; George Morales, University of California Los Angeles, United States; Jeff Baumgardner, Boston Universityu, United States

GH1*.3: EXPERIMENTAL INVESTIGATION OF ORBITAL DEBRIS SOLITON GENERATION 29
Bill Amatucci, Erik Tejero, Ami DuBois, Lon Enloe, Dave Blackwell, Chris Crabtree, Guru Ganguli, Naval Research Laboratory, United States; Abhijit Sen, Institute for Plasma Research, India

GH1*.4: ELECTROSTATIC AND ELECTROMAGNETIC ORBITAL DEBRIS GENERATED SOLITONS: THEORY AND ANALYSIS TECHNIQUES 30
Chris Crabtree, Guru Ganguli, Alex Fletcher, Rualdo Soto-chavez, US Naval Research Laboratory, United States; Abhijit Sen, Institute for Plasma Research, India

GH1*.5: SIMULATIONS OF NONLINEAR PLASMA STRUCTURES GENERATED BY ORBITAL DEBRIS AND DUST 31
Alex Fletcher, Chris Crabtree, Gurudas Ganguli, Rualdo Soto-Chavez, Naval Research Laboratory, United States

GH1*.6: EVOLUTION OF SOLITON STRUCTURES FROM INTERACTION WITH RADAR WAVES 32
Michael Kwara, Nicolas Lee, Sigrid Elschot, Stanford University, United States

GH1*.7: METEOR HEAD ECHO DETECTION VIA A CONVOLUTIONAL NEURAL NETWORK TRAINED ON SYNTHETIC RADAR DATA 33
Trevor Hedges, Nicolas Lee, Sigrid Elschot, Stanford University, United States

GH1*.8: METEOR RADAR PHASE INTERFEROMETRY CALIBRATION WITH AIRCRAFT OBSERVATIONS AND ADS-B INTEGRATION 35
John Marino, Nicholas Rainville, James Monaco, Scott Palo, University of Colorado Boulder, United States; Ryan Volz, Massachusetts Institute of Technology, United States

GH1*.9: IONIZATION OF HYPERVELOCITY IMPACT IRON PLASMAS VIA A MONTE CARLO COLLISION MODEL 37
Dennis Dong, Raymond Lau, Nicolas Lee, Sigrid Elschot, Stanford Univesity, United States

GH1*.10: PLASMA SENSOR FOR DETECTING METEOROID IMPACTS ON THE MOON 38
Xiaohan Mei, Raymond Lau, Nancy Diallo, Dennis Dong, Michael Kwara, Nicolas Lee, Sigrid Elschot, Stanford, United States

D1: CRYOGENIC RF CIRCUITS

D1.1: SUPERCONDUCTING INTEGRATED FILTERS FOR KINETIC-INDUCTANCE TRAVELING-WAVE PARAMETRIC AMPLIFIERS 40
Akim Babenko, Peter Day, Pekka Kangaslahti, Jet Propulsion Laboratory, United States

D1.2: TOWARDS ULTRALOW-NOISE CRYOGENIC INP HIGH ELECTRON MOBILITY TRANSISTORS: INVESTIGATION OF PHYSICAL ORIGINS OF MICROWAVE NOISE 41
Bekari Gabritchidze, Kieran Cleary, Austin Minnich, Caltech, United States

D1.3: SUPERCONDUCTING KINETIC INDUCTANCE-BASED ON-CHIP FREQUENCY CONVERSION 42
Grant Giesbrecht, University of Colorado Boulder, United States; Nathan Flowers-Jacobs, Adam Sirois, Michael Vissers, Manuel Castellanos-Beltran, National Institute of Standards and Technology, United States; Taylor Barton, University of Colorado Boulder, United States; Paul Dresselhaus, National Institute of Standards and Technology, United States

D1.4: CHARACTERIZATION OF HIGH-POWER SUPERCONDUCTING MICROWAVE RESONATORS 43
Daniil Frolov, IBM, United States; Alexander Netepenko, Sergey Kotelnikov, Fermilab, United States

D1.5: VHF JOSEPHSON ARBITRARY WAVEFORM SYNTHESIZER 44
Jeremy Thomas, Nathan Flowers-Jacobs, Anna Fox, National Institute of Standards and Technology, United States; Akim Babenko, University of Colorado, United States; Samuel Benz, Paul Dresselhaus, National Institute of Standards and Technology, United States

F1: POINT-TO-POINT PROPAGATION EFFECTS

F1.1: EFFECTS OF MISMATCH BETWEEN DIGITAL ELEVATION MODELS AND NUMERICAL WEATHER PREDICTION TERRAIN HEIGHTS ON PROPAGATION MODELING 45
Abby Anderson, NRLDC, United States

F1.2: GRID OPTIMIZATION OF MIXED ENVIRONMENTS FOR RF PROPAGATION ..... N/A
Rick Navarro, NIWC Pacific - US Navy, United States

F1.3: THE SENSITIVITY OF RF PROPAGATION TO STABLE ATMOSPHERIC SURFACE LAYER PROPERTIES 47
Katherine Mulreany, Qing Wang, Naval Postgraduate School, United States

F1.4: RADAR AND ELECTROMAGNETIC DUCTING IN STABLE ATMOSPHERE OVER WATER (REDSAW) 48
Qing Wang, Katherine Mulreany, Ryan Yamaguchi, Jesus Ruiz-Plancarte, David Ortiz-Suslow, Naval Postgraduate School, United States; Caglar Yardim, The Ohio State University, United States; Victor Wiss, Naval Surface Warfare Center - Dahlgren Division, United States; Ted Rogers, Scripps Institute of Oceanography, United States; Matthew Wilbanks, Naval Surface Warfare Center - Dahlgren Division, United States; David Flagg, Qingfang Jiang, U.S. Naval Research Laboratory, United States

F1.5: INFLUENCE OF EVAPORATION DUCT LATERAL INHOMOGENEITY ON X-BAND PROPAGATION 49
Daniel P. Greenway, Douglas M. Pastore, Alexis E. Vaughan, Erin E. Hackett, Coastal Carolina University, United States

F1.6: PHASE ERROR ANALYSIS FOR SENSING EVAPORATION DUCT HEIGHTS 50
Kessen Barrett, Ted Rogers, Peter Gerstoft, University of California San Diego, United States

F1.7: PHASED ARRAY REFRACTIVITY ESTIMATION IN COASTAL DUCTING ENVIRONMENT 52
Joe Vinci, Caglar Yardim, Elizabeth Shi, The Ohio State University, United States

F1.8: VALIDATION OF ERA5 REANALYSIS REFRACTIVITY CHARACTERIZATIONS 54
Paul Frederickson, Naval Postgraduate School, United States

F1.9: SPEEDY ASSESSMENT OF METEOROLOGICAL EQUIVALENCE FOR RF PROPAGATION 55
Zach Beever, Jonathan Gehman, Johns Hopkins University Applied Physics Laboratory, United States; Jordan McCammon, Elliot Shiben, Naval Surface Warfare Center Dahlgren Division, United States

F1.10: EVALUATION OF COAMPS DRIVEN ELECTROMAGNETIC PROPAGATION MODELING USING FIELD CAMPAIGN MEASUREMENTS 411
Sarah Wessinger, Naval Research Laboratory, United States; Qing Wang, Naval Postgraduate School, United States; Hedley Hansen, Defense Science and Technology Group, Adelaide, Australia, Australia; Tony De Paolo, Peter Rogowski, Scripps Institution of Oceanography, United States; Andrew Kammerer, Naval Research Laboratory, United States

J2: NEW TELESCOPES, TECHNIQUES, AND TECHNOLOGIES & OBSERVATORY REPORTS I

J2.1: NEARFIELD TO FARFIELD METHODS FOR DRONE BEAM MAPPING 56
Will Tyndall, Yale University, United States

J2.2: EM SIMULATION OF THE EFFECTS OF MECHANICAL PERTURBATIONS TO THE HIRAX TELESCOPE 57
Kit Gerodias, McGill University, Canada

J2.3: SAFARI - A DIFFERENTIAL APPROACH TO PROBE THE COSMOLOGICAL SKY-AVERAGED 21-CM SIGNAL 58
Bang Nhan, Richard Bradley, National Radio Astronomy Observatory, United States

J2.4: HOLOGRAPHIC BEAM MAPPING FOR THE CANADIAN HYDROGEN INTENSITY MAPPING EXPERIMENT 59
Alex Reda, Yale University, United States

J2.5: EXPLORING THE CROSSTALK PROPERTIES OF THE CHIME TELESCOPE 60
Pranav Sanghavi, Laura Newburgh, Yale University, United States

B2: ANTENNA, THEORY, AND DESIGN I

B2.1: MILLIMETER WAVE DUAL-BAND ANTENNA ARRAY ON A THIN FLEXIBLE SUBSTRATE FOR 5G APPLICATIONS 61
Saeid Alamdar, Sahar Bagherkhani, Franco De Flaviis, University of California, Irvine, United States; Soheil Saadat, Multi-Fineline Electronix Inc, United States

B2.2: SINGULAR METRIC FOR ANTENNA ARRAY MUTUAL COUPLING: UNVEILING THE ARRAY COUPLING INDEX (ACI) 63
Majid Manteghi, Virginia Tech, United States

B2.3: DEPLOYABLE 18:1 TIGHTLY COUPLED APERTURE WITH INTEGRATED UWB FEED NETWORK 65
Jorge A. Caripidis Troccola, Satheesh B. Venkatakrishnan, John L. Volakis, Florida International University, United States

B2.4: IN-SITU CALIBRATION OF ACTIVE ELECTRONICALLY SCANNED ANTENNA ARRAYS THROUGH SAR IMAGING 66
Duncan Madden, Kamal Sarabandi, University of Michigan, United States

B2.5: A NOVEL SHAPED SYMMETRIC WIDEBAND DIELECTRIC RESONATOR ANTENNA BY BINARY MATERIAL OPTIMIZATION 68
Trupti Bellundagi, Binbin Yang, North Carolina A&T University, United States

B2.6: AN ELECTRONICALLY-RECONFIGURABLE MATCHING AND DECOUPLING NETWORK FOR A TWO-ELEMENT HF ANTENNA ARRAY 70
Arman Afsari, Barry Van Veen, Nader Behdad, University of Wisconsin-Madison, United States

B2.7: GPR SPIRAL ANTENNA TRANSIENT RESPONSE BASED ON TARGET RCS 71
David Rohde, Ryan Adams, University of North Dakota, United States

B2.8: OVERCOMING THE CHU LIMIT USING SWITCHED-MODE, NON-LTI, ELECTRICALLY-SMALL TRANSMITTING ANTENNAS 72
Marisa Liben, Mirhamed Mirmozafari, Daniel Ludois, Nader Behdad, University of Wisconsion-Madison, United States

B2.9: OBSTACLE IMAGING THROUGH ORTHOGONAL CODED PHASED ARRAY ANTENNAS 73
Alan Salari, University of Illinois Chicago, United States; Gianluca Gennarelli, INSTITUTE FOR ELECTROMAGNETIC SENSING OF THE ENVIRONMENT, NATIONAL RESEARCH COUNCIL OF ITALY, Italy; Francesco Soldovieri, Institute for Electromagnetic Sensing of the Environment, National Research Council of Italy, Italy; Danilo Erricolo, University of Illinois Chicago, United States

B2.10: TOWARD LARGE-SCALE, HIGH SENSITIVITY TERAHERTZ FOCAL PLANE ARRAYS 75
Russell Raldiris Torres, Ebrahim Al Seragi, Saeed Zeinolabedinzadeh, Georgios Trichopoulos, Arizona State University, United States

G2: IONOSPHERIC RADIO AND PROPAGATION

G2.1: TEC STRUCTURE DIAGNOSTICS 76
Charles Rino, Charles Carrano, Keith Groves, Boston College, United States; Romina Nikoukir, Johns Hopkins University, United States

G2.2: MAGNETIC ANOMALIES POTENTIALLY ATTRIBUTED TO PERSEID BOLIDE REENTRY 78
Mickey Batson, Laboratory for Telecommunication Sciences, United States; Nicholas Donnangelo, Blaine Talbut, MITRE Corporation, United States

G2.3: SWARM-E GPS OBSERVATIONS OF THE POLAR CAP IONOSPHERE 79
Christopher Watson, Richard Langely, University of New Brunswick, Canada; Andrew Howarth, Andrew Yau, University of Calgary, Canada

G2.4: FORECASTING THE IONOSPHERE WITH INTERPRETABLE TRANSFORMER NETWORKS ..... N/A
Daniel Alford-Lago, Naval Information Warfare Center Pacific, United States; Chris Curtis, San Diego State University, United States; Alex Ihler, University of California Irvine, United States

G2.5: GENERATION OF SUPER LOW FREQUENCY SIGNALS AT THE HAARP FACILITY FOR LONG RANGE PROPAGATION 81
Ryan Eskola, Mark Golkowski, University of Colorado Denver, United States

J2: NEW TELESCOPES, TECHNIQUES, AND TECHNOLOGIES & OBSERVATORY REPORTS II

J2.1: CORRELATION CALIBRATION: A HYBRID CALIBRATION TOOL FOR NEXT-GENERATION RADIO INTERFEROMETERS 82
Robert Pascua, Jonathan Sievers, Adrian Liu, McGill University, Canada

J2.2: RECENT OBSERVATIONS WITH THE MAPPER OF THE IGM SPIN TEMPERATURE 83
Hsin Chiang, McGill University, Canada

J2.3: LUSEE NIGHT GROUND SUPPORT EQUIPMENT.PDF 84
Seth Curtin, Seth Curtin, University of California, Berkeley, United States

J2.4: ALBATROS: PAVING THE WAY TO THE COSMIC DARK AGES 85
Cherie K. Day, McGill University, Canada

E1: ELECTROMAGNETIC ENVIRONMENT AND INTERFERENCE

E1.1: ASSESSING AND MITIGATING AGGREGATE INTERFERENCE WITH REAL-TIME SPECTRAL BROKERING 86
Samuel Hussey, Jonathan Swindell, Glauco Amigo, Adam Goad, Andrew Clegg, Charles Baylis, Robert Marks, Baylor University, United States

E1.2: LINEARIZING NONLINEAR POWER-AMPLIFIERS POST-DISTORTION USING CUBIC SPLINE COEFFICIENTS 87
James Gaudreau, Nicholas Ellis, Patrick Roblin, Joel Johnson, Justin Kuric, Richard Ridgway, Christopher Ball, Ohio State University, United States

E1.3: TOWARDS ENHANCED BANDWIDTH IN TWTS: AN EXPLORATION OF HELIX STRUCTURE OPTIMIZATION 88
Moza Mohamed, Jane Lehr, University of New Mexico, United States

E1.4: SCALING LAWS FOR SOLID-STATE OPENING SWITCH GENERATORS 89
David Smith, Jane Lehr, University of New Mexico, United States

B3*: PROGRESS IN RECONFIGURABLE INTELLIGENT SURFACES (RIS)

B3*.1: HETEROGENEOUS INTEGRATION OF BIASING CIRCUITS FOR MMWAVE 91
RECONFIGURABLE INTELLIGENT SURFACES
Russell Raldiris Torres, Aditya Shekhawat, Bharath Kashyap, Georgios Trichopoulos, Arizona State University, United States

B3*.2: FULL RIS-DOMAIN STANDING WAVES FOR ELEMENTS' BIASING 93
Miguel Saavedra-Melo, Kasra Rouhi, Benjamin Bradshaw, Filippo Capolino, University of California, Irvine, United States

B3*.3: A COMPACT SINGLE-BIT DUAL-POL UNIT CELL DESIGN FOR MMWAVE 94
RECONFIGURABLE INTELLIGENT SURFACES
Aditya Shekhawat, Georgios Trichopoulos, Arizona State University, United States

B3*.4: WIDEBAND, POLARIZATION-AGILE RECONFIGURABLE INTELLIGENT SURFACES 95
Sanghamitro Das, Satish Sharma, San Diego State University, United States

B3*.5: BPSK MODULATION USING PROGRAMMABLE METASURFACES 96
Aditya Shekhawat, Aaron Grace, Georgios Trichopoulos, Arizona State University, United States

H1*: IONOSPHERIC MODIFICATION

H1*.1: EVOLUTION OF ARTIFICIAL IONOSPHERIC IRREGULARITIES: DEPENDENCE ON HAARP 97
BEAM PATTERN
Erin Lay, Ian Cummings, Christopher Jeffery, Los Alamos National Laboratory, United States; Paul Bernhardt, Mike McCarrick, University of Alaska Fairbanks, United States

H1*.2: A STUDY OF BISTATIC COHERENT RADAR IMAGING OF IONOSPHERIC IRREGULARITIES 98
USING SIMULATED DATA
Christopher Jeffery, Ian Cummings, Erin Lay, Los Alamos National Laboratory, United States

H1*.3: CONTROLLED WHISTLER MODE WAVE INJECTION EXPERIMENTS WITH THE HAARP 99
FACILITY
Mark Golkowski, Raahima Khatun-E-Zannat, Ryan Eskola, University of Colorado Denver, United States; Robert Moore, University of Florida, United States

H1*.4: IONOSPHERIC AMPLIFICATION OF WHISTLER MODE WAVES FOR REDUCTION OF 100
RADIATION BELT PARTICLE POPULATIONS
Paul Bernhardt, University of Alaska Fairbanks, United States; Man Hua, Jacob Bortnik, University of California Los Angeles, United States; Carl Siefring, Naval Research Laboratory, United States; Qianli Ma, University of California Los Angeles, United States

D2*: RF FRONT-ENDS AND ARRAYS FOR SIMULTANEOUS TRANSMIT AND RECEIVE OPERATION

D2*.1: IN-BAND FULL-DUPLEX ARRAY ARCHITECTURES AND PERFORMANCE SURVEY 102
Kenneth E. Kolodziej, MIT Lincoln Laboratory, United States; Zoya Popovic, University of Colorado, Boulder, United States

D2*.2: BROADBAND GAN MMICS FOR ANALOG INTERFERENCE SUPPRESSION 104
Paige Danielson, Zoya Popovic, University of Colorado Boulder, United States

D2*.3: MINIATURIZATION OF RF SIC FILTER ON HIGH-K CERAMIC SUBSTRATE FOR STAR APPLICATION 105
Md Rakibur Rahman, Satheesh Bojja-Venkatakrishnan, Markondeyaraj Pulugurtha, John Volakis, Florida International University, United States

D2*.4: 40-44 GHZ MMIC FREQUENCY TUNABLE BUTLER MATRIX 106
Laila Marzall, Zoya Popovic, University of Colorado Boulder, United States

F2: RANDOM AND COMPLEX MEDIA MODELS IN REMOTE SENSING

F2.1: INCOHERENT SCATTERING FROM AN OBJECT ABOVE A ROUGH SURFACE 108
Joseph Gedney, Joel Johnson, Robert Burkholder, The Ohio State University, United States

F2.2: DISCONTINUOUS GALERKIN METHOD FOR RADIATION TRANSFER IN PLANE-PARALLEL SEMI-TRANSPARENT MEDIA WITH CONTINUOUS VARIABLE REFRACTIVE INDEX 110
Md Ershadul Haque, Hang Wang, Abedi Reza, University of Tennessee Space Institute, United States; Mudaliar Saba, Air Force Research Laboratory, Wright-Patterson AFB, United States

F2.3: SNOW DIELECTRIC CONSTANT MEASUREMENT FROM BREWSTER'S ANGLE USING SUAS-BASED BISTATIC RADAR 112
Omid Reyhanigalangashi, Drew Taylor, Jordan Larson, Shiriniwas Kolpuke, Feras Abushakra, Aabhash Bhandari, Siva Prasad Gogineni, The University of Alabama, United States

F2.4: SIGNIFICANT WAVE HEIGHT ESTIMATION USING UAV 114
Elizabeth Shi, Caglar Yardim, Joe Vinci, Ohio State University, United States

F2.5: SPECTRAL OPTICAL THEOREM AND RADIATIVE TRANSPORT EQUATION IN RANDOM MEDIA WITH LARGE SCALE FLUCTUATIONS 116
Saba Mudaliar, Air Force Research Laboratory, United States

J3: NEW TELESCOPES, TECHNIQUES, AND TECHNOLOGIES & OBSERVATORY REPORTS III

J3.1: DRONE-BASED BEAM MAPPING OF THE ARRAY OF LONG BASELINE ANTENNAS FOR TAKING RADIO OBSERVATIONS FROM THE SEVENTY-NINTH PARALLEL (ALBATROS) 117
Lawrence Herman, McGill University, Canada

J3.2: CORRECTING RELATIVE CLOCK DRIFT BETWEEN INDEPENDENTLY-CLOCKED ANTENNAS OF ALBATROS RADIO TELESCOPE USING ORBCOMM SATELLITES 118
Mohan Agrawal, McGill University, Canada

J3.3: WHITE RABBIT: PRECISION TIME AND FREQUENCY DISTRIBUTION FOR PANOSETI AND HIGH-SPEED DATA TRANSPORTATION BETWEEN NIC AND GPU OVER 400G NETWORK 119
Wei Liu, Dan Werthimer, University of California, Berkeley, United States; Mitchell C. Burnett, Brigham Young University, United States; Jonathon Kocz, University of California, Berkeley, United States; Rick Raffanti, techneinstruments, United States

J3.4: DEPLOYMENT OF AN RFSOC-BASED CORRELATOR AT THE DEEP DISH DEVELOPMENT ARRAY 120
Ian Hendricksen, McGill University, Canada

J3.5: PROFILING AND OPTIMIZING THE HIGH PERFORMANCE GRIDDER 122
Preshanth Jagannathan, Sanjay Bhatnagar, Martin Pokorny, NRAO, United States

B4: ANTENNA, THEORY, AND DESIGN II

B4.1: MM-WAVE UWB TIGHTLY COUPLED DIPOLE ARRAY REALIZED USING A HYBRID PCB – 3D PRINTING FABRICATION APPROACH 123
Michail Anastasiadis, FIU, United States; Md Rakibul Islam, Galtronics USA Ltd., United States; Jorge Caripidis Troccola, John Volakis, FIU, United States

B4.2: PLANAR REFLECTION-LESS LENS BASED ON MINIATURIZED-ELEMENT FREQUENCY SELECTIVE SURFACES FOR AUTOMOTIVE RADAR APPLICATIONS 124
Ehsan Hafezi, Kamal Sarabandi, University of Michigan, United States

B4.3: MIMO WIFI IMAGING BASED ON RECONFIGURABLE PASSIVE EM SKINS 126
Joseph Faia, Danilo Erricolo, University of Illinois Chicago, United States; Giacomo Oliveri, ELEDIA Research Center University of Trento, Italy

B4.4: WIDEBAND ANALOG INTERFERENCE CANCELLATION USING TRUE TIME DELAYS, HADAMARD PROJECTIONS, AND A KRONECKER DECOMPOSITION ALGORITHM 128
Devon Ward, Student at Brigham Young University, United States; Karl Warnick, Brigham Young University, United States

B4.5: SUBSTRATE INTEGRATED IMPEDANCE SURFACE AND THEIR APPLICATIONS IN WAVEGUIDE AND ANTENNA TECHNOLOGIES 130
Asim Alkhaibari, Pai-Yen Chen, Danilo Erricolo, University of Illinois Chicago, United States

BK5*: ADVANCES IN WIRELESS POWER TRANSFER AND HARVESTING FOR BIOMEDICAL COMMUNICATION AND APPLICATIONS

BK5*.1: BODY-WORN HUBS IN MEDICAL APPLICATIONS: ENABLING SELF-POWERED WEARABLES FOR CONNECTED AND PERSONALIZED HEALTH MONITORING AND BEYOND 132
Dieff Vital, University of Illinois Chicago, United States

BK5*.2: EXPERIMENTAL PARAMETRIC STUDY OF DUAL-LAYER PLANAR WEARABLE MAGNETOINDUCTIVE WAVEGUIDES 133
Connor Jenkins, Asimina Kiourti, The Ohio State University, United States

BK5*.3: LIQUID METAL NANOPARTICLES-INFUSED WEARABLE CSCMR WPT SYSTEMS 135
Juan Barreto, Abdul-Sattar Kaddour, Florida International University, United States; Hyeon Seok An, Robert F. Shepherd, Cornell University, United States; Constantinos L. Zekios, Stavros V. Georgakopoulos, Florida International University, United States

BK5*.4: NON-UNIFORM METASURFACE FOR IMPROVING THE INDUCTIVE WIRELESS POWER TRANSFER EFFICIENCY 136
Sima Noghanian, CommScope Ruckus Wireless, United States; Abbas Ali Lotfi Neyestanak, Medical Cytometrix Inc, Canada; Maryam Heshmathzadeh, British Columbia Institute of Technology, Canada

BK5*.5: INCORPORATION OF DNG METAMATERIAL FOR ENHANCING EFFICIENCY OF RF WPT 138
Zhanel Kudaibergenova, Mohammad Hashmi, Galymzhan Nauryzbayev, Nazarbayev University, Kazakhstan

BK5*.6: SELF-POWERED WEARABLE DEVICES INTEGRATED WITH VIRTUAL REALITY SIMULATION CLINICS: A NOVEL APPROACH TO HEALTHCARE MODERNIZATION 140
Benjamin Martinez, Adrian Velazquez, Dieff Vital, University of Illinois Chicago, United States

BK5*.7: FULL-BODY CASE STUDY OF WEARABLE MAGNETOINDUCTIVE WAVEGUIDES 141
Connor Jenkins, Asimina Kiourti, The Ohio State University, United States

BK5*.8: TEXTILE RFIDS FOR HEALTHCARE APPLICATIONS 143
Michael Suche, Lauren Linkous, Erdem Topsakal, Virginia Commonwealth University, United States

BK5*.9: TEXTILE-BASED RECONFIGURABLE DUAL-BAND FREQUENCY SELECTIVE SURFACE FOR WMTS AND CBRS 145
Amber Nunnally, Erdem Topsakal, Virginia Commonwealth University, United States

BK5*.10: STUDY OF AN E TEXTILE RECTANGLE TAPERED SLOT VIVALDI ANTENNA FOR ENERGY HARVESTING APPLICATIONS ..... N/A
Varsha Kheradiya, Ganga Prasad Pandey Ganga Prasad Pandey, Pandit deendayal Energy university, India

B6: PROPAGATION, SCATTERING, AND SENSING I

B6.1: A THEORETICAL MODEL FOR FINITE-ELEMENT MAGNETOINDUCTIVE WAVEGUIDES 148
Samuel Coogle, Connor Jenkins, Asimina Kiourti, The Ohio State University, United States

B6.2: CIRCUIT ANALYSIS OF CROSSTALK IN A PARALLEL PLATE WAVEGUIDE CONTAINING AN INTERNAL PERFORATED SHEET 150
Edward Kuester, University of Colorado, United States; Nick Krull, Electronic Expertise Ltd, United States

B6.3: NEAR-FIELD RADIOMETRY WITH SPATIAL FOCUSING 151
Joseph Dunbar, University of Colorado Boulder, United States; Gabriel Santamaria Botello, Colorado School of Mines, United States; Zoya Popovic, University of Colorado Boulder, United States

B6.4: SCATTERING BY AN OCTANT -SPHERE LOCATED INSIDE A TRIHEDRAL REFLECTOR 152
Sahitya Singh, Graduate Center of the City University of New York, United States; Piergiorgio L. E. Uslenghi, University of Illinois at Chicago, United States

B6.5: PULSED NON-COHERENT QPSK LOW PROBABILITY OF INTERCEPT WAVEFORMS FOR COMMERCIAL SOFTWARE-DEFINED RADIOS 153
John Willis, Satheesh Venkatakrishnan, John Volakis, Florida International University, United States

B6.6: CONVOLUTIONAL NEURAL NETWORKS FOR SUBSURFACE ELECTRICAL PROPERTIES ESTIMATION 154
Sahar Bagherkhani, Saeid Alamdar, Franco De Flaviis, University of California, Irvine, United States

B6.7: ADVANCES IN GEOMETRICAL CLASSIFICATION OF SNOWFLAKES USING AI AND IMAGES COLLECTED BY THE MULTI-ANGLE SNOWFLAKE CAMERA 156
Hein Thant, Isaac Jacobson, Branislav Notaros, Colorado State University, United States

B6.8: EXACT SOLUTION FOR A DIPOLE ABOVE TWO-LAYERED SEMI-OBLATE SPHEROIDAL CAVITY 157
Anastasiia Rozhkova, University of Illinois Chicago, United States; Ermanno Citraro, Politecnico di Torino, Italy; Danilo Erricolo, University of Illinois Chicago, United States; Francesco Andriulli, Politecnico di Torino, Italy

B6.9: DOWNSCALING THE GOES ABI DATA IN SUPPORT OF HIGH-RESOLUTION WILDFIRE MAPPING 159
Yifan Yang, Haonan Chen, Colorado State University, United States

B6.10: ON THE POTENTIAL OF PASSIVE METASURFACE SKINS FOR ENHANCED BIOMEDICAL IMAGING 160
Amin Rastgordani, Danilo Erricolo, University of Illinois Chicago, United States; Giacomo Oliveri, University of Trento, Italy

H2*: ACTIVE EXPERIMENTS IN LABORATORY AND SPACE PLASMAS

H2*.1: FAST ION INJECTION IN THE LARGE PLASMA DEVICE TO MODEL EMIC AND FAST WAVE EXCITATION IN THE MAGNETOSPHERE ..... N/A
Stephen Vincena, Shreekrishna Tripathi, UCLA, United States

H2*.2: QUANTIFYING THE EFFECTS OF ELECTRON SHOT NOISE ON A CURRENT BIASED ANTENNA 163
Winry Ember, Marc Pulupa, Stuart D. Bale, University of California, Berkeley, United States

H2*.3: FIRST RESULTS FROM THE LIEFSI CAMPAIGN – SETUP AND CALIBRATION 165
Justin Bowman, West Virginia University, United States; Erik Tejero, U.S Naval Research Laboratory, United States; John Bonnell, University of California, United States; William Amatucci, U.S Naval Research Laboratory, United States; Katherine Goodrich, West Virginia University, United States

H2*.4: FIRST RESULTS FROM THE LIEFSI CAMPAIGN – INTERPRETATIONS AND APPLICATIONS ..... N/A
John Bonnell, Univ. of California, Berkeley, United States; Justin Bowman, Katherine Goodrich, West Virginia University, United States; Erik Tejero, William Amatucci, U.S. Naval Research Laboratory, United States

H2*.5: PLASMA IMPEDANCE TOMOGRAPHY: A NONINVASIVE PLASMA IMAGING DIAGNOSTIC 167
Erik Tejero, George Gatling, Matt Paliwoda, Ami DuBois, Bill Amatucci, Naval Research Laboratory, United States

D3*: HYPERSPECTRAL SENSING FOR SPACE APPLICATIONS

D3*.1: DIGITAL SPECTROMETER ASICS ARE ENABLING HYPERSPECTRAL MICROWAVE SENSING 168
Priscilla Mohammed, Morgan State University, United States; Paul Racette, NASA Goddard Space Flight Center, United States; Gytis Baranauskas, Dalius Baranauskas, Denis Zelenin, Pacific MicroChip Corporation, United States

D3*.2: BROADBAND HYPERSPECTRAL SOUNDERS FOR ATMOSPHERIC REMOTE SENSING 169
Akim Babenko, Omkar Pradhan, Ahmed Mohamed, Shannon Brown, Alan Tanner, Niyati Shah, Pekka Kangaslahti, Javier Bosch-Lluis, Joan Munoz-Martin, Jet Propulsion Laboratory, United States

D3*.3: NEW MICROWAVE REFLECTARRARY TECHNOLOGY TO ENABLE HYPERSPECTRAL MICROWAVE SOUNDING 170
William Blackwell, Cara Kataria, William Moulder, MIT Lincoln Laboratory, United States

D3*.4: PHOTONIC-INTEGRATED MODULATORS AS MILLIMETER AND SUBMILLIMETER-WAVE HYPERSPECTRAL RECEIVERS WITH NO PRE-AMPLIFICATION 171
Gabriel Santamaria-Botello, Colorado School of Mines, United States

D3*.5: RYDBERG ATOMS FOR HYPERSPECTRAL RADIOMETRY IN THE PLANETARY BOUNDARY LAYER 172
Shane Verploegh, Eric Bottomley, Michelle Warter, John Guthrie, Infleqtion, United States

FGH3*: REMOTE SENSING USING GNSS-R AND SOOP SYSTEMS

FGH3*.1: THE NASA CYGNSS MISSION AND ITS TROPICAL CYCLONE MEASUREMENT CAPABILITIES 173
Christopher Ruf, University of Michigan, United States; April Warnock, SRI International, United States; Rajeswari Balasubramaniam, University of Michigan, United States

FGH3*.2: A BLENDED CYGNSS SOIL MOISTURE PRODUCT PARTITIONED WITH ANCILLARY DATA 174
Erik Hodges, University of Southern California, United States; Clara Chew, Muon Space, United States; Eric Small, University of Colorado,, United States; Mohammad Al, The Ohio State University, United States; Jeffrey D. Ouellette, U.S. Naval Research Laboratory, United States; Joel T. Johnson, The Ohio State University, United States; Fangni Lei, University of Connecticut, United States; Mehmet Kurum, University of Georgia, United States; Ali Gurbuz, Volkan Senyurek, Mississippi State University, United States; Xiaolan Xu, Rashmi Shah, Simon Yueh, Akiko Hayashi, Jet Propulsion Laboratory, California Institute of Technology, United States; Paulo T. Setti Jr., Sajad Tabibi, University of Luxembourg, Luxembourg; Emanuele Santi, Simone Pettinato, National Research Council – Institute of Applied Physics (CNR-IFAC), Italy; T. Max Roberts, Ian Colwell, Stephen Lowe, Muon Space, United States; Christopher S. Ruf, University of Michigan, United States; Mahta Moghaddam, University of Southern California, United States

FGH3*.3: GNSS-R WETLAND MONITORING ..... N/A
Luke Redwine, Mehedi Farad, Kurum Mehmet, Ali Gurbuz, Mississippi State University, United States

FGH3*.4: AN APPROACH FOR RESERVOIR WATER LEVEL RETRIEVALS USING CYGNSS LEVEL-1 OBSERVATIONS AND COMPLIMENTARY ANCILLARY DATASETS 176
Nicholas Brendle, The Ohio State University, United States; Steven Chan, George Hajj, California Institute of Technology, United States; Joel Johnson, Mohammad Al-Khaldi, The Ohio State University, United States

FGH3*.5: GNSS SIGNALS OF OPPORTUNITY SYNTHETIC APERTURE RADAR CONCEPT FOR HIGH RESOLUTION IMAGING OF TERRAIN SURFACES 177
Simon Yueh, Rashmi Shah, Tianlin Wang, Xiaolan Xu, California Institute of Technology, United States

FGH3*.6: PASSIVE L-BAND GNSS-R AND ACTIVE C- AND KA-BAND RADAR INLAND WATER WIND SPEEDS 178
Jessica Fayne, University of Michigan, United States; Mohammad Al-Khaldi, The Ohio State University, United States

FGH3*.7: EXPLOITING DENSE COHERENT REFLECTION TRACK AREAS IN THE INDONESIAN SEAS TO INVESTIGATE THE PERFORMANCE OF SPIRE GNSS-R OCEAN ALTIMETRY 179
carolyn Roesler, Jade Morton, University of Boulder Colorado, United States

FGH3*.8: STUDYING CHANGES IN PERMAFROST AREAS USING GNSS REFLECTIONS 180
Jiahua Zhang, Jade Morton, University of Colorado Boulder, United States

FGH3*.9: GNSS REFLECTOMETRY FOR REMOTE SENSING OF ROSS ICE SHELF SURFACE TOPOGRAPHY 181
Sophie Anderson, Yang Wang, Jade Morton, University of Colorado Boulder, United States

FGH3*.10: INITIAL EVALUATION OF PLANETIQ GRAZING GNSS COHERENT REFLECTIONS FOR ALTIMETRY APPLICATIONS 182
Y. X. Xiao, C. K. Shum, Ohio State University, United States; E. R. Kursinski, J. Brandmeyer, X. Feng, PlanetiQ, United States

J3*: RFI MITIGATION AND SPECTRUM MANAGEMENT I

J3*.1: THE RADIO FREQUENCY INTERFERENCE ENVIRONMENT OF THE VERY LARGE ARRAY 183
Frank K. Schinzel, Pedro P.B. Beaklini, Chris D. De Pree, Bang Nhan, Evangelia Tremou, NRAO, United States

J3*.2: NEAR REAL-TIME RADIO FREQUENCY INTERFERENCE MONITORING DATABASE FOR THE VERY LARGE ARRAY 184
Preshanth Jagannathan, Brian Kirk, Alan Erickson, NRAO, United States

J3*.3: RADIO FREQUENCY INTERFERENCE (RFI) GEOLOCATION FOR RADIO INTERFEROMETERS 185
Mark Ruzindana, David DeBoer, University of California Berkeley, United States; Alexander Pollak, Wael Farah, Hat Creek Radio Observatory, United States; Kevin Gifford, Arvind Aradhya, Stefan Tschimben, University of Colorado Boulder, United States; Cole Forrester, Brockton Stover, Aaron Parsons, Josh Dillon, University of California Berkeley, United States

J3*.4: RFI ISSUES FOR THE NEXT GENERATION VERY LARGE ARRAY (NGVLA) 186
Bryan Butler, Urvashi Rao, Rob Selina, Chris De Pree, NRAO, United States

J3*.5: RFI CONSIDERATIONS FOR THE DSA-2000 187
Gregory Hellbourg, California Institute of Technology, United States

BF7*: QUANTUM TECHNOLOGY APPLICATIONS IN ELECTROMAGNETICS AND REMOTE SENSING

BF7*.1: INVESTIGATING QUANTUM ENTANGLEMENT USING CANONICAL QUANTIZATION AND SCATTERING THEORY 189
Jie Zhu, Purdue University, United States; Dong-Yeop Na, Pohang University of Science and Technology, Korea (South); Weng Chew, Purdue University, United States

BF7*.2: TOWARDS AN ANALYTICAL QUANTUM FULL-WAVE SOLUTION OF A TRANSMON QUBIT IN A 3D MICROWAVE CAVITY 191
Soomin Moon, Thomas Roth, Purdue University, United States

BF7*.3: EFFICIENT SOURCES OF ENTANGLED SINGLE-PHOTON PAIRS WITH NONLINEAR PLASMONIC METASURFACES 192
Sky Semone, Christos Argyropoulos, The Pennsylvania State University, United States

BF7*.4: RYDBERG ATOM BASED SENSORS: RADIO-FREQUENCY FIELD DETECTION TO REMOTE SENSING AND OTHER RECEIVING APPLICATIONS 194
Christopher Holloway, Andrew Rotunno, Samuel Berweger, Matthew Simons, Alexandra Artusio-Glimpse, Nikunjkumar Prajapati, Eric Norrgard, Stephen Eckel, NIST, United States; Noah Schlossberger, University of Colorado, United States

BF7*.6: QUANTUM STATISTICAL ASPECTS OF EMISSION AND ABSORPTION IN REMOTE SENSING AND IMAGING 195
Saba Mudaliar, Air Force Research Laboratory, United States

BF7*.7: CALCULATING MULTI-QUBIT EXCHANGE COUPLING RATES FOR TRANSMON QUBITS USING A FIELD-BASED FORMALISM 196
Ghazi Khan, Thomas Roth, Purdue University, United States

BF7*.8: COMPACT CRYOCOOLED RF DIRECTION FINDER ..... N/A
Masoud Radparvar, Hypres, United States

BF7*.9: SUB-WAVELENGTH ANGLE-OF-ARRIVAL MEASUREMENT AT 1.1 GHZ IN A RYDBERG VAPOR USING A THREE-COLOR, ALL NEAR-INFRARED EXCITATION 199
Eric Bottomley, Haoquan Fan, Shane Verploegh, Infleqtion, United States

C1: ADAPTIVE RADAR AND ARRAY SIGNAL PROCESSING TECHNIQUES

C1.1: LOW PROBABILITY OF DETECTION COMMUNICATION VIA POLARIZATION DIVERSITY: AN EXPERIMENTAL STUDY 200
Morriel Kasher, Rutgers University, United States; Fikadu T. Dagefu, Jihun Choi, DEVCOM Army Research Laboratory, United States; Chryssalenia Koumpouzi, Predrag Spasojevic, Rutgers University, United States

C1.2: PREDISTORTION FOR A X-BAND WAVE-SENSING RADAR POWER AMPLIFIER..... N/A
John Mower, University of Washington, United States

C1.3: SIGNAL CLASSIFICATION FOR SPECTRUM SHARING WITH MACHINE LEARNING USING A LOW-COST SDR 203
Akimun Jannat Alvina, University of Colorado Denver, United States; Yao Ma, National Institute of Standards and Technology, United States; Vijay Harid, Mark Golkowski, University of Colorado Denver, United States

C1.4: PROGRESS TOWARDS QUANTUM-ENHANCED MICROWAVE REMOTE SENSING AND COMMUNICATION APPLICATIONS 204
Jérôme Bourassa, Qubic Inc., Canada; Christopher Wilson, Qubic Inc & University of Waterloo, Canada

C1.5: FROM LABORATORY TO PLATFORM: THE IMPACT OF ADAPTIVE SPECTRUM USAGE ON MICROWAVE TEST AND MEASUREMENT 205
Charles Baylis, Austin Egbert, Andrew Clegg, Robert Marks, Baylor University, United States

H3*: PHYSICS OF THE RADIATION BELTS: COUPLING OF DIFFERENT PLASMA POPULATIONS BY MEANS OF PLASMA WAVES

H3*.1: ENERGY COUPLING FROM MAGNETOSONIC WAVES TO HIGH-FREQUENCY ELECTROMAGNETIC ION CYCLOTRON WAVES: STATISTICAL ANALYSIS 206
Kyungguk Min, Chungnam National University, Korea (South); Qianli Ma, University of California, Los Angeles, United States

H3*.2: WHISTLER-MODE WAVES IN THE INNER MAGNETOSPHERE: RECENT PROGRESS ON STATISTICS AND SPATIAL DISTRIBUTIONS 207
David Malaspina, University of Colorado, Boulder, United States; Jean-François Ripoll, Melanie Cosmides, Thomas Farges, Commission for Atomic Energy and Alternative Energies, France

H3*.3: SIMULATION STUDY OF WHISTLER MODE WAVES IN THE MAGNETOSPHERE USING RAY TRACING AND FINITE DIFFERENCE TIME DOMAIN (FDTD) MODELS 208
Raahima Khatun-E-Zannat, Vijay Harid, Mark Golkowski, University of Colorado Denver, United States; Oleksiy Agapitov, University of California, Berkley, United States

H3*.4: LOCAL ACCELERATION OF RELATIVISTIC ELECTRONS TO ULTRA-RELATIVISTIC ENERGY DUE TO FAST MAGNETOSONIC WAVES AND WHISTLER-MODE CHORUS WAVES 209
Livia Alves, National Institute for Space Research (INPE), Brazil; Ligia da Silva, National Institute for Space Research (INPE); State Key Laboratory for Space Weather, Beijing - China, Brazil; Graziela Silva, National Institute for Space Research (INPE), Brazil; Jose Marchezi, University of New Hampshire, United States; Karen Ferreira, National Institute for Space Research (INPE), Brazil; David G. Sibeck, Shrikanth G. Kanekal, NASA Goddard Space Flight Center, United States

H3*.5: DETERMINING WHEN, WHERE, AND WHY RADIATION BELT DROPOUTS DO AND DON'T OCCUR 210
Lauren Blum, Stanislaus Nnadih, LASP, United States; Craig Rodger, University of Otago, New Zealand; Zheng Xiang, Wuhan University, China; Weichao Tu, Xingzhi Lyu, West Virginia University, United States; Domenique Freund, University of Colorado Boulder, United States

G3*: BEACON SATELLITE SCIENCE AND APPLICATIONS: IN MEMORY OF PATRICIA DOHERTY

G3*.1: CONFIRMATION OF A POWER LAW PHASE SCREEN THEORY RELATING TEC RATE OF CHANGE AND SCINTILLATION INDICES AT EQUATORIAL AND HIGH LATITUDES 211
Charles Carrano, Teddy Espejo, Keith Groves, Boston College, United States

G3*.2: OBSERVING MORE EQUATORIAL IRREGULARITY PHYSICS USING GNSS SCINTILLATION PARAMETERS 212
Theodore Beach, Keith Groves, Christopher Bridgwood, Matthew Proctor, Dima Paznukhov, Boston College, United States

G3*.3: IONOSPHERIC GRADIENTS ASSESSMENT FOR GBAS OPERATIONS IN LOW-LATITUDE REGIONS 213
Teddy Surco Espejo, Charles Carrano, Keith Groves, Institute for Scientific Research/Boston College, United States

G3*.4: INSTABILITY VARIABILITY CHARACTERISTICS DERIVED FROM BEACON SATELLITE OBSERVATIONS 214
Keith Groves, John Retterer, Charles Carrano, Christopher Bridgwood, Boston College, United States

G3*.5: A DISTRIBUTED ARRAY OF LOW-COST GNSS-BASED SENSORS FOR MONITORING AND STUDIES OF MID-LATITUDE IONOSPHERIC IRREGULARITIES AND SCINTILLATION 215
Josemaria Gomez Socola, Fabiano Rodrigues, University of Texas at Dallas, United States

G3*.6: SPATIAL IMAGING AND ZONAL DRIFT MOTION TRACKING OF EQUATORIAL PLASMA BUBBLES OVER SOUTH AMERICA USING SPECIALLY DETRENDED GPS TEC DATA 216
Rezy Pradipta, Boston College, United States

J4*: NGVLA ANTENNA DEVELOPMENT

J4*.1: NGVLA 18M ANTENNA DESIGN & PROTOTYPE PROJECT OVERVIEW 217
Willem Esterhuyse, Anthony Beasley, Robert Selina, National Radio Astronomy Observatory, United States

J4*.2: NGVLA ANTENNA TECHNOLOGY AND PROTOTYPE STATUS 218
Lutz Stenvers, mtex antenna technology, Germany

J4*.3: UPDATES ON THE OPTICS DESIGN OF THE NGVLA 18-METER REFLECTOR SYSTEM 219
Robert Lehmensiek, NRAO, United States

J4*.4: ANTENNA ELECTRONICS DESIGN FOR THE NEXT-GENERATION VERY LARGE ARRAY 220
James Jackson, National Radio Astronomy Observatory, United States

J4*.5: NGVLA ANTENNA PROTOTYPE ELECTRONICS AND RADIOMETRIC TESTING 221
Robert Long, National Radio Astronomy Observatory, United States

J4*.6: FRONT END SUBSYSTEM DEVELOPMENT FOR A NEXT GENERATION VERY LARGE ARRAY 222
Wes Grammer, Silver Sturgis, NRAO, United States

A1*: CLUTTER, NOISE, TROPOSCATTER MEASUREMENTS AND MODELS

A1*.1: THE IMPACT OF SEASONAL FOLIAGE CHANGES ON CLUTTER MODELING 223
William Kozma Jr., Adam Hicks, Brian Lain, The Institute for Telecommunication Sciences, United States

A1*.2: PRELIMINARY MID-BAND TROPOSCATTER MEASUREMENT RESULTS USING DIFFERENT HIGH-GAIN RECEIVER ANTENNAS 225
Adam Hicks, Jim McLean, John Ewan, Institute for Telecommunication Sciences, United States

A1*.3: AN IN SITU CHARACTERIZATION OF 1.7 GHZ BUILDING ENTRY LOSS 227
Christopher Anderson, NTIA, United States

A1*.4: SPATIAL STRUCTURE OF THE URBAN RF NOISE FIELD IN BOSTON, MA..... 229
Aaron Meyer, Daniel Breton, Matthew Kamrath, Sergey Vecherin, ERDC-CRREL, United States

A1*.5: AN IMPROVED-ACCURACY DISCRETE SAMPLING CRITERION FOR THE ESTIMATION OF 231
THE LOCAL MEAN VOLTAGE OF A MOBILE RADIO CHANNEL
Robert Johnk, John Lemmon, Roger Dalke, Institute for Telecommunication Sciences (NTIA/ITS), United States

B8: PROPAGATION, SCATTERING, AND SENSING II

B8.1: AN IN-SITU MEASUREMENT SYSTEM USING DOWNCONVERSION 233
Trevor Van Hoosier, Emma Lever, Adam Goad, Samuel Hussey, Jonathan Swindell, Charles Baylis, Baylor University, United States; Albin Gasiewski, Aravind Venkitasubramony, University of Colorado, United States; Robert Marks, Baylor University, United States

B8.2: ACTIVE LOW-NOISE MATCHING WITH SUBHARMONIC PARAMETRIC AMPLIFIER..... 234
Fatemeh Sadr, Majid Manteghi, Virginia polytechnic institute and state university, United States

B8.3: WAVE MANIPULATING RIS FOR ENHANCED TOMOGRAPHIC IMAGING: CONCEPT AND 236
RECENT ADVANCES
Carlo Tortoriello, Danilo Erricolo, University of Illinois Chicago, United States; Giacomo Oliveri, Università degli Studi di Trento, Italy

B8.4: TRANSMISSION THROUGH A PERFORATED THICK METALLIC SCREEN 238
Abdulaziz Haddab, The Public Authority for Applied Education and Training, Kuwait; Edward Kuester, University of Colorado Boulder, United States

B8.5: RF CHARACTERIZATION OF ZIRCONIA RIBBON CERAMIC USING T-RESONATOR METHOD 239
Abu Horaira Hridhon, Aleks Mertvyy, Md. Samiul Islam Sagar, Praveen Sekhar, Tutku Karacolak, Washington State University Vancouver, United States

H4: WAVES AND INTERACTIONS IN PLASMAS

H4.1: WHISTLER-MODE WAVES IN THE MAGNETIC DUCTS 241
Anatoly Streltsov, Salman Nejad, Embry-Riddle Aeronautical University, United States

H4.2: GUIDING OF THE WHISTLER-MODE WAVES BY THE LOCALIZED DEPLETIONS OF THE 242
MAGNETIC FIELD
Salman A. Nejad, Anatoly V. Streltsov, Embry-Riddle Aeronautical University, United States

H4.3: ASSOCIATION OF RELATIVISTIC MICROBURSTS DURATION WITH CHORUS WAVE 243
PROPERTIES
Jiabei He, Lunjin Chen, Zhiyang Xia, The University of Texas at Dallas, United States

H4.4: UNVEILING ZEBRA-LIKE PATTERNS IN TYPE III RADIO BURSTS: MULTI-SPACECRAFT 244
OBSERVATIONS
Vratislav Krupar, UMBC and NASA, United States; Mychajlo Hajos, The Czech Academy of Sciences, Czech Republic

H4.5: DEVELOPMENT OF THE AMBIPOLAR ELECTRIC FIELD IN A COMPRESSED CURRENT 245
SHEET AND THE IMPACT ON MAGNETIC RECONNECTION
Ami DuBois, Chris Crabtree, Gurudas Ganguli, U.S. Naval Research Laboratory, United States

H4.6: PRELIMINARY FINDINGS OF STIMULATED BRILLOUIN SCATTERING WITH SATELLITE 246
TRANSMISSION
Jason Ruszkowski, Edgar Bering, Andrew Renshaw, University of Houston, United States

H4.7: GEOMAGNETICALLY CONJUGATE MEASUREMENTS OF RADIO EMISSIONS OR AURORAL ORIGIN 248
James LaBelle, Stephanie Damish, David McGaw, Terrence Kovacs, John Griffin, Dartmouth College, United States; Anton Kashcheyev, P. T. Jayachandran, University of New Brunswick, Canada

H4.8: REDUCED-ORDER MODELING OF BACKWARD WAVE OSCILLATOR FIELDS FOR HIGH-POWER MICROWAVE APPLICATIONS 249
Indranil Nayak, Fernando Teixeira, The Ohio State University, United States

H4.9: OBSERVATIONAL PROPERTIES OF HARMONIC EMIC WAVES IN THE EARTH MAGNETOSPHERE 251
Shujie Gu, Xu Liu, Lunjin Chen, Wenyao Gu, University of Texas at Dallas, United States

H4.10: ULF QUARTER-WAVES AT HIGH AND MIDDLE LATITUDES ..... N/A
Anatoly Streltsov, Embry-Riddle Aeronautical University, United States; Evgeny Mishin, AFRL, United States

D4: WIDE BANDGAP SEMICONDUCTORS & RADAR APPLICATIONS

D4.1: INVESTIGATING HIGH-GAIN IN GALLIUM NITRIDE PHOTOCONDUCTIVE SWITCHES. 253
Nicolas Gonzalez, Jane Lehr, The University of New Mexico, United States

D4.2: LOW-LOSS D-BAND SIW POWER DIVIDER FOR INTEGRATED SYSTEMS 255
Weifeng Wu, University of Notre Dame, United States; Xiaopeng Wang, Lei Li, James Hwang, Cornell University, United States; Patrick Fay, University of Notre Dame, United States

D4.3: AMPLIFIED THZ DETECTION IN P-DIAMOND TERAFET INDUCED BY FIXED DRAIN CURRENT 257
Muhammad Mahmudul Hasan, Nezih Pala, Florida International University, United States; Michael Shur, Rensselaer Polytechnic Institute, United States

D4.4: MULTI-DIMENSIONAL IMAGE COMPLETION FOR AUTOMATED POWER AMPLIFIER DESIGN 259
Jonathan Swindell, Austin Egbert, Adam Goad, Sam Haug, Charles Baylis, Robert J. Marks II, Baylor, United States; Casey Latham, Matthew Ozalas, Andy Howard, Daren McClearnon, Keysight Technologies, United States

D4.5: SIMULTANEOUS MULTIDIMENSIONAL OPTIMIZATION FOR FAST AMPLIFIER DESIGN 260
Adam Goad, Samuel Haug, Jonathan Swindell, Charles Baylis, Austin Egbert, Baylor University, United States; Casey Latham, Mathew Ozalas, Andy Howard, Daren McClearnon, Keysight Technologies, United States; Robert Marks, Baylor University, United States

D4.6: REAL-TIME CIRCUIT OPTIMIZATION FOR SIMULTANEOUS RADAR AND COMMUNICATIONS: PRE-CHARACTERIZATION AND LIVE MEASUREMENT 261
Samuel Haug, Austin Egbert, Adam Goad, Charles Baylis, Robert Marks, Baylor University, United States; Anthony Martone, DEVCOM Army Research Laboratory, United States

D4.7: UTILIZING DISTRIBUTED CIRCUIT TOPOLOGY TECHNIQUES TO ACHIEVE REDUCED MAXIMUM BRANCH CURRENTS FOR HIGH POWER IMPEDANCE MATCHING RF APPLICATIONS 262
Justin Roessler, Austin Egbert, Trevor Van Hoosier, Charles Baylis, Robert Marks, Baylor University, United States; Dimitrios Peroulis, Purdue University, United States

D4.8: SECOND-ORDER EXCEPTIONAL POINT OF DEGENERACY IN TWO DIRECTLY COUPLED RESONATOR 263
Kasra Rouhi, Alireza Nikzamir, Alexander Figotin, Filippo Capolino, University of California, Irvine, United States

F4*: ROUGH SURFACE SCATTERING AND ELECTROMAGNETICS: IN HONOR OF GARY BROWN

F4*.1: RESEARCH AND SERVICE: CELEBRATING A ROLE MODEL IN THE RADIO SCIENCE COMMUNITY 264
Michael Newkirk, Johns Hopkins University Applied Physics Lab, United States

F4*.2: THE RAYLEIGH HYPOTHESIS IN THE THEORY OF WAVE SCATTERING FROM ROUGH SURFACES 265
Alexander Voronovich, NOAA/PSL, United States

F4*.3: ANALYTICAL MODELING OF ELECTROMAGNETIC FIELDS SCATTERED FROM A TARGET IN THE PRESENCE OF A ROUGH SURFACE 266
Joel Johnson, Joseph Gedney, Robert Burkholder, The Ohio State University, United States

F4*.4: APPRAISAL OF THE RICE-SQUARED MODEL FOR SCATTERING FROM AN OBJECT ABOVE A SEA SURFACE 267
Ra'id Awadallah, Johns Hopkins University/Applied Physics Laboratory, United States

F4*.5: SCATTERING FROM A FOREST WITH AN UNDERLYING ROUGH SURFACE 268
Roger Lang, George Washington University, United States

F4*.6: TWO-SCALE SCATTERING MODEL: DETERMINING THE SCALE SEPARATION VIA DIRECT NUMERICAL SIMULATIONS 269
Jakov Toporkov, US Naval Research Laboratory, United States

F4*.7: ESTIMATION OF THE SPECTRAL DIVISION PARAMETER IN A TWO-SCALE MODEL FOR THE CASE OF GNSS OCEAN REFLECTOMETRY 271
Valery Zavorotny, Colorado University Boulder, United States; Alexander Voronovich, National Oceanic and Atmospheric Administration, United States

F4*.8: GROUP-BASED COMPRESSION OF FMM DATA STRUCTURES FOR NON-OSCILLATORY KERNELS ..... N/A
Robert Adams, John Young, Stephen Gedney, University of Kentucky, United States

F4*.9: ADDITIONAL INSIGHT INTO THE METHOD OF SMOOTHING AS APPLIES TO ROUGH SURFACE SCATTERING 274
Gary Brown, Virginia Tech, United States

J5*: RFI MITIGATION AND SPECTRUM MANAGEMENT II

J5*.1: RADIO FREQUENCY INTERFERENCE MONITORING AND ANALYSIS FOR GROUND-BASED COSMIC MICROWAVE BACKGROUND SURVEYS ..... N/A
Ian Birdwell, Darcy Barron, Stephen Luttrell, University of New Mexico, United States; Simon Matin, University of Nevada, Las Vegas, United States

J5*.2: NEW RESULTS ON MITIGATION OF SATELLITE INTERFERENCE BY COHERENT TIME-DOMAIN CANCELING 276
Steven Ellingson, R. Michael Buehrer, Tom Anders, Xinrui Li, Virginia Tech, United States

J5*.3: DETECTION OF SATELLITE EMISSION AT MILLIMETER-WAVES USING COSMIC MICROWAVE BACKGROUND SURVEY INSTRUMENTS 277
Allen Foster, Princeton University, United States; Aman Chokshi, The University of Melbourne, Australia

J5*.4: GRIDFLAG : A UV PLANE FLAGGING ALGORITHM FOR HIGH FIDELITY INTERFEROMETRIC IMAGING 278
Srikrishna Sekhar, National Radio Astronomy Observatory, United States

J5*.5: OPERATIONAL DATA SHARING (ODS) FRAMEWORK - A COEXISTENCE STRATEGY FOR RADIO OBSERVATORIES IN THE BROADBAND ERA 279
Bang Nhan, Chris De Pree, Mark Whitehead, National Radio Astronomy Observatory, United States; Daniel Dueri, Matt Iverson, SpaceX, United States; Anthony Beasley, National Radio Astronomy Observatory, United States

J5*.6: AN ADVANCED TESTBED FOR PASSIVE/ACTIVE COEXISTENCE RESEARCH: A COMPREHENSIVE FRAMEWORK FOR RFI DETECTION, MITIGATION, AND CALIBRATION 280
Ahmed Manavi Alam, Md Mehedi Farhad, Mississippi State University, United States; Mehmet Kurum, University of Georgia, United States; Ali Gurbuz, Mississippi State University, United States

J5*.7: FACILITATING SPECTRUM SHARING BETWEEN PASSIVE AND ACTIVE USERS AT A PROTOTYPE NATIONAL RADIO DYNAMIC ZONE (NRDZ) 281
Arvind Aradhya, University of Colorado, Boulder, United States; Andrew Clegg, Google, United States; David DeBoer, University of California, Berkeley, United States; Elliot Eichen, University of Colorado, Boulder, United States; Wael Farah, SETI Institute, United States; Cole Forrester, University of California, Berkeley, United States; Kevin Gifford, Sylvia Llosa, Mark Lofquist, Eloise Morris, Nicholas Papadopoulos, Bo Pearce, University of Colorado, Boulder, United States; Alexander Pollak, SETI Institute, United States; Mark Ruzindana, Brockton Stover, University of California, Berkeley, United States; Stefan Tschimben, Georgiana Weihe, University of Colorado, Boulder, United States

J5*.8: DYNAMIC RFI MANAGEMENT IN RADIO ASTRONOMY USING PSEUDONYMETRY 282
Gregory Hellbourg, California Institute of Technology, United States; Neal Patwari, Meles Weldegebriel, Ning Zhang, Washington University in St. Louis, United States

B9*: MULTIFUNCTIONAL ANTENNAS AND ARRAYS FOR SATELLITE AND WIRELESS COMMUNICATIONS

B9*.1: DESIGN, FABRICATION, AND EXPERIMENTAL CHARACTERIZATION OF AN ULTRA-WIDEBAND, ELECTRONICALLY-RECONFIGURABLE TRANSMITARRAY ELEMENT WITH HIGH PEAK AND AVERAGE POWER HANDLING CAPABILITY 284
Jinkai Wu, Halil Topözlü, Zongtang Zhang, Shiva Hajitabarmarznaki, John Booske, Nader Behdad, University of Wisconsin, Madison, United States

B9*.2: A COMPACT MULTI-RESONANT SIW CAVITY-BACKED SLOT ANTENNA WITH UNPRECEDENTED WIDEBAND PERFORMANCE 285
Aditya Varma Muppala, Kamal Sarabandi, University of Michigan, Ann Arbor, United States

B9*.3: WIDEBAND CIRCULARLY POLARIZED ARRAY USING TIGHTLY COUPLED DIPOLE ARRAY THEORY 286
Muhammad Mubasshir Hossain, Stavros Koulouridis, Satheesh Bojja Venkatakrishnan, John L. Volakis, Florida International University, United States

B9*.4: RECONFIGURABLE DIODE-BASED AND LIQUID METAL ANTENNA FOR 5 GHZ WI-FI 287
Jonathan Lundquist, Lauren Linkous, Erdem Topsakal, Virginia Commonwealth University, United States

B9*.5: AN EXTREMELY WIDEBAND 3-D PRINTED COMPACT ANTENNA FOR MIMO APPLICATIONS 289
Drasti Tandel, Satish Sharma, San Diego State University, United States

A2: ADVANCES IN ANTENNA DESIGN

A2.1: CONFORMAL, COMPACT AND LOW-PROFILE ANTENNA FOR MEDICAL BODY AREA NETWORK APPLICATIONS ..... N/A
Mohammad Hashmi, Nazarbayev University, Kazakhstan; Dinesh Rano, Birla Institute of Technology and Science, India

A2.2: DESIGN OF PENTABAND ANTENNA WITH HIGH FREQUENCY RATIO FOR CUBESAT APPLICATIONS ..... N/A
Md Nazim Uddin, Elias A. Alwan, Florida International University, United States

A2.3: A PRACTICAL SUPERLUMINAL POLARIZATION CURRENT ANTENNA: THEORY, DESIGN, AND CONSTRUCTION 296
Andrea Schmidt, John Singleton, Los Alamos National Laboratory, United States

A2.4: EFFICIENT 15 GHZ ANTENNA BASED ON A MINIATURE 5G WIRELESS COMMUNICATION ANTENNA 298
Joselyn Contardi, Abas Sabouni, Wilkes University, United States

E2: HISTORY AND FUTURE OF USNC COMMISSION E

E2.1: TRENDS IN COMMISSION E IN NATIONAL RADIO SCIENCE MEETINGS ..... N/A
Robert Gardner, Consultant, United States; Leigh Gardner, London School of Economics and Political Science, United States

E2.2: CYCLOSTATIONARY CHANNEL POWER MEASUREMENTS FOR CBRS COEXISTENCE ASSESSMENT 300
Daniel Kuester, NIST, United States; Anthony Romaniello, Peter Mathys, NTIA, United States

E2.3: AN ANALYSIS OF LOW-COST SDRS TO MEET CITY-WIDE SPECTRUM UTILIZATION MEASUREMENT REQUIREMENTS 302
AJ Cuddeback, CU Boulder, Institute for Telecommunication Sciences, United States; Scott Palo, CU Boulder, United States; Philip Erickson, MIT Haystack Observatory, United States

E2.4: MODELING 5G INTERFERENCE ON A WEATHER RADIOMETER 304
Ryan Murray, J. Nicholas Laneman, University of Notre Dame, United States

B10*: ANTENNAS FOR PLANETARY EXPLORATION

B10*.1: NASA DRAGONFLY LANDER LOW GAIN ANTENNA DESIGN, FABRICATION, AND TESTING 305
Katherine Wolff, Johns Hopkins University Applied Physics Laboratory, United States

B10*.2: SATELLITE KA-BAND ADDITIVE MANUFACTURED ANTENNA 306
Avinash Sharma, Jeffrey Valenti, Alan Githens, Katherine Wolff, Valerie Lehmann, The Johns Hopkins University Applied Physics Laboratory, United States

B10*.3: HIGH POWER MICROWAVE EFFECTS IN ANTENNAS FOR PLANETARY EXPLORATION 308
Avinash Sharma, The Johns Hopkins University Applied Physics Laboratory, United States

A3: ADVANCES IN ELECTROMAGNETIC MEASUREMENTS: ANTENNAS AND BEYOND

A3.1: DIRECTION-OF-ARRIVAL ESTIMATION USING A UNIFORM LINEAR ARRAY CONSIDERING ANTENNA RADIATION PATTERNS 309
Kai Ren, South Dakota School of Mines and Technology, United States

A3.2: COMPARISON OF ANTENNA PARAMETERS ACQUIRED IN THE REACTIVE NEARFIELD, RADIATING NEARFIELD (FRESNEL), AND FAR-FIELD (FRAUNHOFER) REGIONS 311
William Dykeman, Ryan Green, Junming Diao, Mississippi State University, United States

A3.3: OPTIMIZING ANTENNA ELEMENT DISTRIBUTION FOR ENHANCED GAIN IN SPARSE ARRAY CONFIGURATIONS .....N/A
Michael Ortiz, Elias Alwan, Florida International University, United States

A3.4: DIFFERENT GEOMETRICAL REPRESENTATIONS OF PARTIALLY REFLECTED SURFACES FOR FABRY-PEROT ANTENNA OPTIMIZATION 314
Mashrur Zawad, University of Missouri, Kansas City, United States; Mohamed Z. M. Hamdalla, Missouri Institute for Defense and Energy (MIDE), United States; Ahmed M. Hassan, University of Missouri, Kansas City, United States

A3.5: REVISITING THE WATER PERMITTIVITY: 0-50 GHZ MEASUREMENTS AT TEMPERATURES UP TO 50ºC 316
Rahul Kar, Mustafa Aksoy, University at Albany,State University of New York, United States

A3.6: STATISTICAL ELECTRICAL EFFECT DETECTION 318
Doug Drake, Ahmed Hassan, Alex Pusateri, Stephan Young, University of Missouri - Kansas City, United States

C2: ADVANCES IN SOFTWARE DEFINED AND ADAPTIVE RADIO SYSTEMS

C2.1: BRIDGING THE DIGITAL DIVIDE IN RURAL AMERICA WITH SUPERLUMINAL POLARIZATION CURRENT TECHNOLOGY 319
John Singleton, Andrea Schmidt, Los Alamos National Laboratory, United States

C2.2: MULTI-MODE ARRAY FEED OPERATIONS WITH THE WESTFORD RADIO TELESCOPE 320
Daniel Sheen, Frank Lind, Massachusetts Institute of Technology, United States

C2.3: DIRECT-RF FULL DUPLEX RADIO WITH 22-DB/200-MHZ DIGITAL SELF-INTERFERENCE CANCELLATION 322
Kefayet Ullah, Satheesh Bojja Venkatakrishnan, John L. Volakis, Florida International University, United States

C2.4: DISCRETE-TIME SYNCHRONIZATION FOR NARROW-BAND SIGNALS 324
Michael Baram, Jonathan Chisum, University of Notre Dame, United States

C2.5: NEAR-FIELD MIMO RIS CHANNEL CAPACITY 325
Tamara Abou El Hessen, Danilo Erricolo, Daniela Tuninetti, University of Illinois Chicago, United States

C2.6: DIGITAL TWIN MODELS TO ENABLE DESIGN OPTIMIZATION OF ULTRA-WIDE BAND TRANSCEIVER SYSTEMS 327
Arnaldo Sans, John Willis, John Volakis, Satheesh Venkatakrishnan, Florida International University, United States; Wilfredo Rivas-Torres, Keysight Technologies, Inc., United States

B11: THEORY, MATERIALS, AND DEVICES

B11.1: PURE MAGNETIC DIPOLE RADIATION RESULTING FROM SPHERICAL ELECTRIC CURRENT DENSITY BY USE OF SPHERICAL HARMONICS 328
David Garren, Naval Postgraduate School, United States

B11.2: STATISTICS OF ELECTROMAGNETIC FIELDS EXCITED IN A FINITE LENGTH CYLINDRICAL CAVITY UNDER LONGITUDINAL APERTURE POSITION UNCERTAINTIES 329
Secil E. Dogan, Joel T. Johnson, Robert J. Burkholder, The Ohio State University, United States

B11.3: BIANISOTROPIC MATERIAL CHARACTERIZATION USING A RECTANGULAR-TO-SQUARE WAVEGUIDE 331
Moriel Gindi, Michael Havrilla, Air Force Institute of Technology, United States

B11.4: BATTERY-LESS AND WIRELESS NEUROSENSING SYSTEM FOR MONITORING OF NEURONAL ACTIVITY IN SWINE ..... N/A
Melany Gutierrez-Hernandez, Satheesh Bojja-Venkatakrishnan, Sally Duarte, Jorge Riera Diaz, John L. Volakis, Florida International University, United States

B11.5: LINK BUDGET ANALYSIS OF INTERROGATION OF SURFACE ACOUSTIC WAVE SENSORS IN METALLIC TUBULAR STRUCTURES 334
Richard Pingree, Jagannath Devkota, Leidos c/o NETL, United States; Ruishu Wright, National Energy Technology Laboratory, United States

H5*: HELIOSPHERIC OBSERVATIONS OF WAVES IN PLASMAS

H5*.1: NON-LIGHTNING-GENERATED WHISTLER WAVES IN NEAR-VENUS SPACE 337
Harriet George, David Malaspina, Laboratory for Atmospheric and Space Physics, University of Colorado Boulder, United States; Katy Goodrich, West Virginia University, United States; Yingjuan Ma, University of California Los Angeles, United States; Robin Ramstad, Laboratory for Atmospheric and Space Physics, University of Colorado Boulder, United States; Dylan Conner, West Virginia University, United States; Stuart Bale, Shannon Curry, Space Sciences Laboratory, University of California, Berkele, United States

H5*.2: STATISTICS ON WHISTLER WAVES PROPAGATION DIRECTION FROM PARKER SOLAR PROBE OBSERVATION 338
Kyung-Eun Choi, Oleksiy Agapitov, Space Sciences Laboratory, University of California Berkeley, United States

H5*.3: TURBULENTLY GENERATED KINETIC ALFVÉN WAVE POWER ASSOCIATED WITH SWITCHBACKS IN THE NEAR-SUN SOLAR WIND ..... N/A
Peter Tatum, David Malaspina, Laboratory for Atmospheric and Space Physics, United States

H5*.4: A SERIES OF SMALL-SCALE MAGNETIC FLUX ROPES ORIGINATING FROM THE NARROW LONGITUDINAL AND LATITUDINAL REGION IDENTIFIED IN CO-ROTATING OBSERVATION OF PARKER SOLAR PROBE 340
Kyung-Eun Choi, Space Sciences Laboratory, University of California Berkeley, United States; Dae-Young Lee, Chungbuk National University, Korea (South); Katsuhide Marubashi, National Institute of Information and Communications Technology, Japan; Sung Jun Noh, Los Alamos National Laboratory, United States; Oleksiy Agapitov, Space Sciences Laboratory, University of California Berkeley, United States

H5*.5: PATTERNS AND PROPERTIES OF ION CYCLOTRON WAVES AROUND VENUS 341
Delaney Lee-Bellows, David Malaspina, Harriet George, Peter Tatum, Laboratory for Atmospheric and Space Physics, United States

GH4*: MACHINE LEARNING TECHNIQUES FOR NEAR EARTH SPACE SCIENCE

GH4*.1: SPACE WEATHER MODELING AT THE UNIVERSITY OF COLORADO DEEP LEARNING LABORATORY 342
Enrico Camporeale, A. Hu, G. Lucas, J. Knuth, T. Berger, University of Colorado, United States

GH4*.2: GLOBAL ELECTRON PRECIPITATION DRIVEN BY WHISTLER MODE WAVES USING A COMBINATION OF DEEP LEARNING AND PHYSICS-BASED MODELS 343
Sheng Huang, Wen Li, Qianli Ma, Xiao-Chen Shen, Luisa Capannolo, Boston University, United States; Xiangning Chu, University of Colorado Boulder, United States

GH4*.3: DISTRIBUTION AND EVOLUTION OF CHORUS WAVES MODELED BY A NEURAL NETWORK: THE IMPORTANCE OF IMBALANCED REGRESSION 344
Xiangning Chu, Laboratory for Atmospheric and Space Physics, University of Colorado Boulder, Boulder, Colorado, USA, United States; Jacob Bortnik, Department of Atmospheric and Oceanic Sciences, University of California, Los Angeles, California, USA, United States; Wen Li, Xiao-Chen Shen, Qianli Ma, Center for Space Physics, Boston University, Boston, Massachusetts, USA, United States; Donglai Ma, Department of Atmospheric and Oceanic Sciences, University of California, Los Angeles, California, USA, United States; David Malaspina, Laboratory for Atmospheric and Space Physics, University of Colorado Boulder, Boulder, Colorado, USA, United States; Sheng Huang, Center for Space Physics, Boston University, Boston, Massachusetts, USA, United States

GH4*.4: FORECASTING GLOBAL VTEC DATA FROM VISTA WITH HIGH SPATIAL AND TEMPORAL RESOLUTION USING TRANSFORMER-BASED DEEP LEARNING MODEL 346
Srivani Inturi, Mark Golkowski, University of Colorado Denver, United States

GH4*.5: THE RESPONSE OF IONOSPHERIC CURRENTS TO EXTERNAL DRIVERS INVESTIGATED USING A NEURAL NETWORK-BASED MODEL 347
Xin Cao, Xiangning Chu, University of Colorado Boulder, United States; Jacob Bortnik, James Weygand, Jinxing Li, Homayon Aryan, Donglai Ma, UCLA, United States

GH4*.6: NEURAL NETWORK-BASED CLASSIFICATION OF POLAR CAP AND AURORAL SCINTILLATIONS IN HIGH LATITUDE REGIONS AS A FUNCTION OF GEOMAGNETIC ACTIVITY ..... N/A
Kshitija Deshpande, Embry Riddle Aeronautical University, United States; Ishaan Dey, Nicolas Gachancipa, Chintan Thakrar, ERAU, United States

F5*: MICROWAVE REMOTE SENSING OF THE EARTH

F5*.1: MICROWAVE PHOTONIC ULTRA-WIDEBAND RADIOMETER FOR PLANETARY BOUNDARY LAYER SENSING 349
Mehmet Ogut, Shannon Brown, Sidharth Misra, Eric Kittlaus, Pekka Kangaslahti, JPL, United States; Janusz Murakowski, Phase Sensitive Innovations, United States; Michael Gehl, Sandia National Laboratories, United States

F5*.2: P- AND L-BAND RETRIEVAL OF ROOT-ZONE SOIL MOISTURE AND TEMPERATURE PROFILES AS QUADRATIC FUNCTION 350
Ming Li, Roger Lang, The George Washington University, United States

F5*.3: SOIL MOISTURE DURING 2015 SPRING FLOOD EVENTS FROM THE SMAP RADAR TIME-SERIES RATIO ALGORITHM 352
Dustin Horton, Joel Johnson, Mohammad Al-Khaldi, The Ohio State University, United States; Ismail Baris, German Aerospace Center, Germany; Jeonghwan Park, Rajat Bindlish, NASA Goddard Space Flight Center, United States

F5*.4: IMPROVING A MACHINE LEARNING MODEL FOR SATELLITE PRECIPITATION DOWNSCALING 353
Yongxin Liu, Haonan Chen, Colorado State University, United States

F5*.5: RADAR PARTIAL BEAM BLOCKAGE CORRECTION FOR IMPROVING PRECIPITATION MAPPING 354
Songjian Tan, Haonan Chen, Colorado State University, United States

F5*.6: WINTER EVENT OBSERVATIONS AT WALLOPS FLIGHT FACILITY IN 2022 AND ONGOING ANALYSES OF COLLECTED DATA 355
Hein Thant, V. N. Bringi, Branislav Notaros, Colorado State University, United States

F5*.7: INVESTIGATING THE RELATIONSHIP BETWEEN LIGHTNING AND GNSS SIGNAL DISTURBANCES ..... N/A
Karthik Kolipaka, Ishaan Dey, Pavel Inchin, Christopher Heale, Björn Bergsson, Embry-Riddle Aeronautical University, United States; Steve Cummer, Duke University, United States; Kshitija Deshpande, Embry-Riddle Aeronautical University, United States

F5*.8: SPECTRAL CALIBRATION OF THE ELECTROJET ZEEMAN IMAGING EXPLORER – MICROWAVE ELECTROJET MAGNETOGRAM POLARIMETRIC RADIOMETER SYSTEM 357
Sidharth Misra, Sharmila Padmanabhan, Pekka Kangaslahti, JPL, CalTech, United States; Jeng-Hwa Yee, JHU, APL, United States

J6*: CHIME/FRB OUTRIGGERS I

J6*.1: THE CHIME/FRB OUTRIGGER PROGRAM 358
Adam Lanman, Massachusetts Institute of Technology, United States

J6*.2: CHARACTERIZING THE PERFORMANCE OF THE FIRST CHIME/FRB OUTRIGGER AS A STANDALONE INTERFEROMETER 359
Mattias Lazda, University of Toronto, Canada

J6*.3: CHIME/FRB OUTRIGGERS: REMOVING SYSTEMATIC BASELINE DELAYS USING TRADITIONAL VLBI CONTINUUM SOURCES 360
Mattias Lazda, University of Toronto, Canada

J6*.4: REMOVING CLOCK-DRIFT AND IONOSPHERIC ERRORS FROM THE CHIME-KKO VLBI DELAYS 361
Vishwangi Shah, McGill University, Canada

J6*.5: PYCALC11: A PYTHON INTERFACE TO THE CALC VLBI DELAY MODEL 362
Adam Lanman, Massachusetts Institute of Technology, United States; Marten van Kerkwijk, University of Toronto, Canada

J6*.6: ARCSECOND LOCALIZATIONS WITH THE FIRST CHIME-OUTRIGGERS TELESCOPE 364
Shion Andrew, MIT Kavli Institute for Astrophysics and Space Research, United States

D5*: RECENT ADVANCES IN RECONFIGURABLE INTELLIGENT SURFACES

D5*.1: NETWORK-BASED DESIGN OF RECONFIGURABLE INTELLIGENT SURFACES 365
Malik Almunif, Anthony Grbic, University of Michigan, United States

D5*.2: DIGITALLY-MODULATED OOK RECONFIGURABLE INTELLIGENT SURFACES FOR MASSIVELY-SCALABLE GBPS TRANSMITTERS 366
Himanshu Sharma, Xiangbo Meng, Nicholas Laneman, University of Notre Dame, United States; Ralf Bendlin, AT&T, United States; Bertrand Hochwald, Jonathan Chisum, University of Notre Dame, United States

D5*.3: 1-BIT, WIDEBAND MMWAVE PHASE SHIFTER FOR RECONFIGURABLE INTELLIGENT SURFACES WITH MINIMUM PHASE ERRORS 368
Tatiana Valera, Stavros Koulouridis, Arjuna Madanayake, Satheesh Venkatakrishnan, John Volakis, Florida International University, United States

D5*.4: LIQUID-METAL-BASED RECONFIGURABLE INTELLIGENT SURFACES 370
Wayne Shiroma, Aaron Ohta, Saige Dacuycuy, Glan Allan Manio, Matthew Kouchi, Keith Maki, University of Hawaii at Manoa, United States

D5*.5: LOADING RIMS OF RADIO TELESCOPES WITH RECONFIGURABLE REFLECTARRAYS FOR ADAPTIVE NULL-STEERING 371
Jordan Budhu, Virginia Tech, United States; Sean V. Hum, University of Toronto, Canada; Steven Ellingson, R. Michael Buehrer, Virginia Tech, United States

D5*.6: COMPACT, LOW-DISPERSION, METALO-DIELECTRIC GRADIENT-INDEX LENSES WITH ADDITIVE MANUFACTURING 373
Benjamin Davis, Jonathan Chisum, University of Notre Dame, United States

B12: NUMERICAL METHODS

B12.1: PARTICLE TRAJECTORY ERROR IN FINITE ELEMENT PARTICLE-IN-CELL KINETIC PLASMA SIMULATION 375
Haitham Saleh, Fernando Teixeira, The Ohio State University, United States

B12.2: MACHINE LEARNING ASSISTED OPTIMIZATION METHODS FOR AUTOMATED ANTENNA DESIGN 377
Lauren Linkous, Erdem Topsakal, VCU, United States

B12.3: ADAPTIVE SOLUTION SPACE IN PARTICLE SWARM OPTIMIZATION 379
Sahar Bagherkhani, University of California, Irvine, United States; Yahya Rahmat-Samii, University of California, Los Angeles, United States; Franco De Flaviis, University of California, Irvine, United States

B12.4: PREDICTING IONIC CONDUCTIVITY OF SOLID-STATE BATTERY CATHODES USING MACHINE LEARNING 381
Mai Le, University of Houston, United States; Hieu Le, Texas A&M, United States; Jiefu Chen, Xuqing Wu, Yan Yao, University of Houston, United States

B12.5: ACCURACY AND CONVERGENCE STUDIES OF SURROGATE METHODS FOR UNCERTAINTY QUANTIFICATION IN FEM SCATTERING COMPUTATIONS 383
Branislav Notaros, Stephen Kasdorf, Colorado State University, United States

B12.6: CGFFT ITERATIVE SOLVER OF INTEGRAL EQUATIONS LAUNCHED ON A NEURAL NETWORK PLATFORM 384
Botian Zhang, Yahya Rahmat-Samii, UCLA, United States

H6: HELIOSPHERIC PLASMA PROCESSES

H6.1: WAVE VECTOR OF H+ BAND EMIC WAVES AND CORRESPONDING ELECTRON RESONANCE ENERGY DETERMINATIONS BY 4 MMS SATELLITES 386
Xu Liu, University of Texas at Dallas, United States; Lunjin Chen, The University of Texas at Dallas, United States

H6.2: LOWER-HYBRID WAVES AND NONLINEAR WHISTLER WAVE GENERATION IN SOLAR FLARES 387
A. Rualdo Soto-Chavez, Chris Crabtree, Guru Ganguli, Alex C. Fletcher, US Naval Research Laboratory, United States

H6.3: FIRST DIRECT RADIATION RESISTANCE MEASUREMENT ON A LOOP DIPOLE ANTENNA FROM EXCITATION OF WHISTLER WAVES 388
Seth Dorfman, Space Science Institute, United States; Troy Carter, UCLA, United States; Quinn Marksteiner, Los Alamos National Laboratory, United States; Patrick Pribyl, UCLA, United States; Gian Luca Delzanno, Los Alamos National Laboratory, United States

H6.4: MODULATION OF INTERSTELLAR DUST BY SOLAR ROTATION INSIDE HELIOSPHERE 389
Shivank Chadda, University of Colorado, Boulder, United States

G5: RADAR AND RADIO TECHNIQUES FOR IONOSPHERIC DIAGNOSTICS

G5.1: ECLIPSENB: A RADIO INSTRUMENT NETWORK FOR MONITORING THE IONOSPHERE DURING THE APRIL 8, 2024 TOTAL SOLAR ECLIPSE 390
Chris Watson, Anton Kashcheyev, Thayyil Jayachandran, Richard Chadwick, University of New Brunswick, Canada

G5.2: IMPROVEMENTS TO GNSS-BASED IONOSPHERIC MONITORING USING LOW-ELEVATION SINGLE-FREQUENCY WIDEBAND SIGNALS 391
Madeline Evans, Yang Wang, Brian Breitsch, Jade Morton, University of Colorado Boulder, United States

G5.3: SIMULTANEOUS MEASUREMENTS OF TEMPORAL AND SPATIAL PHASE STRUCTURE FUNCTIONS OF AN HF SKYWAVE SIGNAL AT MID-LATITUDES ..... N/A
Joseph Helmboldt, U.S. Naval Research Laboratory, United States

G5.4: CLIMATOLOGY OF EQUATORIAL F-REGION UHF COHERENT BACKSCATTER RADAR ECHOES AND COMPARISON WITH COLLOCATED VHF RADAR OBSERVATIONS 393
Alexander Massoud, Fabiano Rodrigues, Jonas Sousasantos, The University of Texas at Dallas, United States; Marco Milla, Pontificia Universidad Católica del Perú, Peru; Danny Scipion, Joab Apaza, Karim Kuyeng, Radio Observatorio de Jicamarca, Instituto Geofísico del Perú, Peru; Carlos Padin, Universidad Ana G. Méndez, United States

G5.5: A MODERN VLF RECEIVER FOR USE IN AN ARRAY FOR VLF IMAGING OF THE D-REGION 394
James Cannon, Robert Marshall, Ryan Dick, Bennett Fragomeni, Sebastian Wankmueller, Sophia Orlandella, University of Colorado Boulder, United States

G5.6: AUGMENTING THE OBSERVATIONAL CAPABILITIES OF THE JICAMARCA RADIO OBSERVATORY WITH LWA STATIONS ..... N/A
Fabiano Rodrigues, UT Dallas, United States

J7*: CHIME/FRB OUTRIGGERS II

J7*.1: GREEN BANK CHIME/FRB OUTRIGGERS OVERVIEW AND CURRENT STATUS 396
KHOLOUD KHAIRY, West Virginia University, United States

J7*.2: COMMISSIONING THE CHIME OUTRIGGER TELESCOPE AT GREEN BANK : N2 DIAGNOSTICS ..... N/A
Arvind Balasubramanian, Tata Institute of Fundamental Research, India; Bridget Andersen, McGill University, Canada; Kevin Bandura, West Virginia University, United States; Adam Lanman, Kenzie Nimmo, Massachusetts Institute of Technology, United States

J7*.3: COMMISSIONING STATUS OF THE GREEN BANK CHIME/FRB OUTRIGGER 398
Bridget Andersen, McGill University, Canada

J7*.4: A VLBI CALIBRATION SYSTEM WITH REAL-TIME PULSAR GATING FOR FRB LOCALIZATION USING CHIME/FRB OUTRIGGERS 399
Aaron B. Pearlman, McGill University; Trottier Space Institute at McGill University, Canada

J7*.5: PYFX: SOFTWARE CORRELATOR FOR WIDE-FIELD VLBI WITH CHIME/FRB OUTRIGGERS 401
Shion Andrew, MIT Kavli Institute for Astrophysics and Space Research,, United States

J7*.6: LPDA ARRAYS FOR LOCALISING BRIGHT NEARBY FRBS FROM CHIME SIDELOBES ..... N/A
Nina Gusinskaia, UNIVERSITY OF TORONTO, Canada

B13*: COMPLEX EM AND META STRUCTURES

B13*.1: SPACE-TIME NONLOCAL METASURFACES FOR EVENT-BASED IMAGE PROCESSING 404
Sedigheh Esfahani, Michele Cotrufo, Andrea Alu, City University of New York, United States

B13*.2: SIGNAL COMPRESSION WITH WAVES 406
Dimitrios Sounas, Wayne State University, United States

B13*.3: TERAHERTZ FARADAY ROTATION BASED ON OPTICALLY PUMPED GRAPHENE COUPLED TO SURFACE LATTICE RESONANCES 407
Damia Casas i Casajuana, Juan Sebastian Gomez Diaz, University of California, Davis, United States

B13*.4: ELECTROMAGNETIC WAVE PROPAGATION AND AMPLIFICATION IN ANISOTROPIC MATERIAL MADE OF STACKING LAYERS OF TWO-DIMENSIONAL MATERIAL AND DIELECTRIC 408
Amin Hakimi, Kasra Rouhi, Filippo Capolino, University of California, Irvine, United States

B13*.5: HIGH PERFORMANCE AND SPECTRALLY SELECTIVE IR SENSING BASED ON INTEGRATING MEMS AND METASURFACES 409
Melisa Gulseren, Matthew Benson, Ryan Parker, Arnau Fite Cluet, Zhixing Lin, Juan Sebastian Gomez Diaz, University of California, Davis, United States

B13*.6: SUBWAVELENGTH-STRUCTURED WAVEGUIDES FOR FREE-ELECTRON-PHOTON INTERACTIONS 410
Omer Emre Ates, Benjamin Slayton, William Putnam, University of California, Davis, United States
