

Computational Methods in Low Impact Development Stormwater Control Measures

Low Impact Development Computational
Methods Task Committee

Editors:

**William C. Lucas
Daniel E. Medina
Franco A. Montalto**

**Steve Skripnik
Natalya Sokolovskaya**

ISBN: 978-1-7138-9327-1

Contents

Preface.....	xi
How to Use This Publication.....	xiii
Chapter 1 Fundamentals of Small-Scale Hydrology for Modeling Low Impact Development Stormwater Controls	1
Overview	1
Introduction	1
Overview of Low Impact Development Stormwater Controls	3
Conservation Design Stormwater Controls	4
Green Stormwater Infrastructure Controls	5
Structural Stormwater Controls.....	7
Hydrologic and Hydraulic Processes	8
Infiltration.....	8
Mechanisms Involved	9
Computational Approaches.....	13
Uniform Rate	13
Horton Equation	13
Richards Equation.....	14
Green–Ampt Equation.....	14
Van Genuchten Equation.....	16
Macropore Effects	17
HSPF Method	17
Other Empirical Methods	18
Evapotranspiration	18
Mechanisms Involved.....	19
Interception	19
Depression Storage	19
Surface Evaporation	19
Plant Transpiration	20
Computational Approaches.....	21
Mass Transfer Method.....	21
Energy Budget Method.....	22
Penman Method.....	23
McIlroy–Slatyer Method.....	23
Penman–Montieth Method.....	24
Pan Evaporation Approach.....	24

Thornthwaite Method	24
Blaney–Criddle Method	25
Root Zone Methods.....	25
Runoff Conveyance	26
Subsurface Flow	26
Subsurface Flow Representations	27
Overland Flow Mechanisms Involved	28
Computational Approaches.....	28
Manning’s Equation.....	28
Kinematic Wave Equations.....	30
Muskingum–Cunge Routing.....	32
Dynamic Flow Equations	32
Flow through Media	33
Detention.....	33
Mechanisms Involved.....	33
Computational Approaches.....	34
Linear Reservoirs.....	34
Storage Indication/Modified Puls Method.....	34
Runoff Generation.....	34
Mechanisms Involved	35
Computational Approaches.....	36
Simple Method.....	36
Infiltration-Based Methods	37
Watershed-Based Methods	37
Standard SCS CN Method.....	38
Mishra and Singh SCS Methods	40
Yu SCS Method	43
WinSLAMM Method	45
SCS Method Applications.....	45
Conclusions	46
References	48
Chapter 2 Modeling Approaches.....	57
Overview	57
History and Overview of Hydrologic and Hydraulic Models.....	57
Motivation for Low Impact Development Computations and Modeling	59
Key Interrelated Decisions Regarding Model Construction and Calibration.....	60
Incorporating Low Impact Development Stormwater Control Measures into Hydrologic and Hydraulic Models.....	61
Complicating Factors.....	62
References	63

Chapter 3 Summary of Sample Model Capabilities	65
Overview	65
HydroCAD	66
Overview	66
Summary Information	67
Model Capabilities	67
EPA SWMM.....	69
Overview	69
Summary Information	71
Model Capabilities	71
MIKE+	75
Overview	75
Summary Information	76
Model Capabilities	76
WinSLAMM Version 10.3.4	82
Overview	82
Summary Information	83
Model Capabilities	84
Western Washington Hydrology Model	88
Overview	88
Summary Information	89
Model Capabilities	89
MGSFlood	93
Overview	93
Summary Information	93
Model Capabilities	94
PCSWMM.....	98
Overview	98
Summary Information	100
Low Impact Development Modeling Capabilities.....	100
OpenHydroQual	105
Overview	105
Summary Information	106
References	111
Chapter 4 Conclusions and Next Steps	113
Overview	113
Improving the State of the Art through Monitoring	113
Representing Low Impact Development Stormwater Control	
Measures in Hydraulic Models	115
Modeling Media Flow	115
Outlet Controls on Filtering Systems.....	116
Recommendations	118
References	118

Overview: Case Studies 121

Case Study 1 Problem Statement 123

Case Study 2 Modeling Using MIKE+..... 129

Case Study 3 Modeling Using WinSLAMM..... 177

Case Study 4 Modeling Using PCSWMM 211

Case Study 5 Modeling Using WWHM.....237

Case Study 6 Modeling Using MGS Flood253
