Contents

Preface.....	ix
Committee and Contributors.....	xi
Chapter 1 Introduction.....	1
Premise Plumbing Modeling Task Committee	3
Organization of This Book.....	3
References.....	6
Chapter 2 Modeling Water Demands in Premise Plumbing Systems.....	7
Introduction	7
Estimating Peak Water Demand.....	9
Definition of Peak Demand	9
Hunter’s Curve	9
Alternatives to Hunter’s Curve	10
Task Group Initiative	10
Water Demand Calculator—The Algorithms.....	11
Water Demand Calculator—The Software	13
Simulating Instantaneous Water Demand	15
Diurnal Patterns.....	15
Model Resolution.....	16
Modeling Approaches	16
Some Water Demand Models	17
Forecasting Future Water Demands.....	19
Effect of Weather on Water Demand.....	19
Effect of Lockdown and Quarantine—Case Study from the Pandemic.....	23
Other Factors Affecting Water Demands.....	27
Research Needs.....	29
New Age Dawning.....	29
Peak Estimation	29
Demand Simulation	30
References.....	31
Chapter 3 Hydraulic Modeling in Premise Plumbing Systems.....	37
Introduction	37
Fundamentals of Hydraulics in Premise Plumbing Systems	38
Hydraulic Transients in Premise Plumbing Systems.....	40

Hydraulic Transients: Impacts on Water Distribution Systems.....	42
Challenges with Modern Premise Plumbing Systems.....	46
Pump Technology and Peak Water Demand.....	46
Up-Feed Systems in High-Rise Buildings	47
Fixture	47
Temperature Mixing Valves.....	47
Backflow Prevention Valve	47
Materials.....	48
Installation and Workmanship.....	48
Maintenance.....	49
Education.....	49
Conclusions and Research Needs.....	49
References.....	50
Chapter 4 Water Quality in Premise Plumbing Systems.....	53
Introduction	53
Mixing and Longitudinal Dispersion within a Circular Pipe.....	58
Examples of Premise Plumbing System Water Quality Concerns.....	62
Inorganics	63
Disinfectant Residual.....	64
Kinetic Chlorine Decay and Disinfection By-Product Formation Modeling.....	68
Opportunistic Premise Plumbing Pathogens.....	69
Biofilm.....	72
Disinfection.....	76
Conclusions.....	79
References.....	79
Chapter 5 Hot Water Systems	87
Introduction	87
Hot Water Recirculation System.....	91
Case Study A: California Building Energy Efficiency	92
Case Study B: Simulation of Energy Consumption for Hot Water Using a Stochastic Model.....	94
Case Study C: <i>Legionella</i> Outbreaks in Hot Water Premise Plumbing Systems.....	95
Impact of Codes and Technology on <i>Legionella</i> Risk and Energy Efficiency.....	96
Conclusions.....	97
References.....	98
Chapter 6 Instrumentation for Premise Plumbing Modeling	99
Instrumentation	99
Example Sensor Setup	101

Chapter 7 Premise Plumbing Modeling Applications and Limitations 103

- Introduction 103
- Modeling 105
 - Demand Modeling 105
 - Flow and Pressure Modeling 105
 - Water Quality Modeling 106
 - Transient Models 106
 - Computational Fluid Dynamics Modeling 107
 - Limitations of Hydraulic Modeling 107
- Water Security Applications 108
 - Residential Scale 109
 - Large Venues 111
- General Water Quality Applications 114
 - Water Age Modeling 114
 - General Constituent Modeling 115
 - Temperature 116
 - Lead 118
 - Perspectives on Risk and Decision-Making for Premise Plumbing Systems: An Integrated Model Case Study 123
 - Limitations of Water Quality Modeling 125
- Conclusion and Research Needs 127
- References 128

Chapter 8 The Future of Premise Plumbing Modeling 133

- Introduction 133
- Smart Water Sensors 134
- Premise Plumbing Information Management 137
- Building Information Modeling 137
 - A Platform for Interoperability 138
 - A Display Mechanism 138
 - A Robust Data Management System for Information on Piping Layouts 139
 - Direct Linkages to Models 139
- Digital Twins 139
- Premise Plumbing Stakeholder Engagement 140
- Case Study: Challenges Ahead—Climate Change and Aging Water Infrastructure in Cincinnati 141
- Concluding Remarks 142
- References 142

Appendix A Glossary, Abbreviations, and Definitions 145

- References 151

Appendix B Premise Plumbing System Design and Management..... 153
Pipe Sizing Methods Used in the United States 153
How Is the Fixture Supply (Twig Pipes or Pipe Supplying Only
One Fixture) Designed? 156
How/What Supply Pressure Is Considered in the Design?..... 156
Case Study: Applying Different Plumbing Codes to Design a 45-Unit
Apartment Building 157
Premise Plumbing Design versus Modeling 160
Pipe Sizing Methods versus Hydraulic Modeling..... 161
Implications for Hydraulic Modeling of Premise Plumbing Systems 161
Developing Building Water Management Programs 162
Water Management Program Development..... 163
Water Quality Monitoring for a Management Program 164
References..... 165

**Appendix C Summary Tables for Premise Plumbing
Instrumentation 167**

Appendix D Webinar Series on Premise Plumbing Modeling..... 173

Index..... 179
