

Resilient and Sustainable Buildings

Infrastructure Resilience Publication Volume 7

Editors:

**John W. van de Lindt
Mehrddad Sasani**

**Gordon Warn
Mohsen Zaker Esteghamati**

ISBN: 978-1-7138-9333-2

Printed from e-media with permission by:

Executive Summary.....	xi
Layout of This Book.....	xiii

Chapter 1 A Risk-Informed Decision Framework to Achieve Resilient and Sustainable Buildings That Meet Community Objectives..... 1

John W. van de Lindt, Hussam N. Mahmoud,
Bruce R. Ellingwood

1.1 Introduction	1
1.1.1 The Building Regulatory Process in the United States.....	3
1.1.2 Building Performance Objectives.....	4
1.1.3 Community Performance Objectives and Metrics	4
1.1.4 Community Resilience versus Individual Building Performance—De-aggregation of Community Goals	5
1.2 Methodology/Framework/Approach Used in the Project	6
1.2.1 Project Objectives	6
1.2.2 The Importance of Interdependencies in Resilience Assessment.....	7
1.2.3 Balance between Sustainability and Resilience	8
1.2.4 Life-Cycle Analysis for Sustainability and Resilience	9
1.2.5 Role of Fragility Functions in Performance Assessment	10
1.2.6 Role of Scenario-Based Hazard Analysis.....	11
1.2.7 De-aggregation of Community Goals to the Building Performance Level	12
1.2.8 Building Back Better to Enhance Community Resilience.....	12
1.3 Detailed Methods, Approaches—Hazards, Building Systems	13
1.3.1 Development of Fragility Functions.....	13
1.3.2 Life-Cycle Analysis for Residential Buildings.....	15
1.3.3 Community Resilience Assessment Framework	19
1.3.4 De-aggregation of Community Goals to the Building Performance Level	24
1.4 Application/Example/Case Study.....	25
1.4.1 Life-Cycle Analysis at Individual Building and Community Levels	25
1.4.2 Interdependencies and Resilience at a Community Level	32

1.4.3	De-aggregation of Community Goals to the Building Performance Level	38
1.5	Project Conclusions, Lessons Learned	42
	References	43

Chapter 2 Building Design and Decision-Making for Multihazard Resilience and Sustainability49

Matthew D. Joyner, Yiming Jia, Mehrdad Sasani

2.1	Introduction and Scope	49
2.1.1	General	49
2.1.2	Research Significance	50
2.1.3	Background and Literature Review.....	51
2.2	Design Framework.....	54
2.2.1	Natural Hazard Characterization	56
2.2.2	Modeling of Fragility and Damage to Building Components	58
2.2.3	Building Resilience and Sustainability Assessment	60
2.2.4	Multiobjective Optimization and Decision-Making	61
2.3	Methodology	62
2.3.1	Natural Hazard Characterization	62
2.3.2	Modeling of Building Damage and Identifying Fragility and Probability of Failure	67
2.3.3	Building Resilience and Sustainability	75
2.3.4	Multiobjective Optimization and Decision-Making	76
2.3.5	Decision-Makers' Preference Weights for Building Sustainability and Resilience Criteria	81
2.4	Applications and Examples	85
2.4.1	Resilience-Based Multihazard Performance Evaluation of Buildings Designed to Current Codes.....	85
2.4.2	Joint Probability of Wind and Flood Hazards for Boston.....	92
2.4.3	Nonstationary Coastal Wind and Flood Hazard Analyses for Boston and Miami.....	93
2.4.4	Building Life Span Flood Damage Evaluation for Boston and Miami	96
2.4.5	Future Building Energy Simulations for San Francisco, Boston, and Miami	97
2.4.6	Effect of Envelope Window-to-Wall Ratio on Measured Energy Consumption	98
2.4.7	Optimal Building Designs and Implications for Building Codes	98
2.5	Conclusions	107
	References	112

Chapter 3	A Sequential Decision Framework to Support Tradespace Exploration of Multihazard Resilient and Sustainable Designs	121
	Maximilian E. Ororbia, Jaskanwal P. S. Chhabra, Gordon P. Warn	
3.1	Introduction	121
3.2	Methodology	125
3.2.1	Design as a Sequential Decision Process	125
3.2.2	Bounding Model	126
3.2.3	Interval Dominance	127
3.2.4	Sequencing of Multifidelity Models	128
3.3	Detailed Methodologies	129
3.3.1	Multiobjective Design Optimization of Structural Frame Systems: Deterministic Decision Criteria	129
3.3.2	Multiobjective Design Optimization of Structural–Foundation–Soil Systems: Deterministic Decision Criteria	133
3.3.3	Multiobjective Design Optimization of a Structural Frame System: Probabilistic Decision Criteria	136
3.3.4	Integration of Environmental Impacts and Seismic Damage	141
3.3.5	Optimal Sequencing of Multifidelity Model Evaluation of Design Space	147
3.4	Applications	149
3.4.1	Multiobjective Design Optimization of Structural Frame Systems: Deterministic Decision Criteria	149
3.4.2	Multiobjective Design Optimization of Structural–Foundation–Soil Systems: Deterministic Decision Criteria	154
3.4.3	Multiobjective Design Optimization of a Structural Frame System: Probabilistic Decision Criteria	161
3.4.4	Optimal Sequencing of Multifidelity Model Evaluation of Design Space	166
3.5	Project Conclusions and Findings	170
	References	173
Chapter 4	A Reliability-Based Decision Support System for Resilient and Sustainable Early Design	177
	Mohsen Zaker Esteghamati, Adrian Rodriguez-Marek, Madeleine M. Flint	
4.1	Introduction	177
4.2	Methodology	180
4.2.1	Prerequisite: Problem Definition	180
4.2.2	Framework Objectives and Value	181
4.2.3	Framework Overview	183
4.3	Description of Modules and Developed Tools	184

4.3.1	Decision Framing with SIMPLE-Design	184
4.3.2	Open Performance Data Inventories.....	186
4.3.3	Soil, Foundation, Lateral-Resisting Structural, and Envelope System Generator Module	192
4.3.4	Module 2: Probabilistic Life-Cycle Performance Assessment.....	195
4.3.5	Module 3: Preference-Based Multiobjective Ranking and Optimization	198
4.4	Illustrative Example	201
4.4.1	Building and Site.....	201
4.4.2	Decision-Makers, Framing, and Metrics	202
4.4.3	Application of the M1 Module to Generate Soil, Foundation, Lateral-Resisting Structural, and Envelope Systems	202
4.4.4	Using the M2 Module for Life-cycle Performance Assessment.....	206
4.4.5	Using the M3 Module to Introduce Stakeholder Preferences	212
4.4.6	Decision Support Results and Discussion	216
4.5	Summary and Future Work.....	220
4.5.1	Summary	220
4.5.2	Future Work.....	221
	References	222
	Chapter 5 Conclusions and Recommendations	229
5.1	Major Conclusions.....	229
5.2	Major Remaining Research Gaps in RSB.....	229
	References	231
	Appendix A On Correlation of Different Decision Variables.....	233
	Appendix B Sample Ranking of Generated SFLEs	235
	Index.....	237
