2023 IEEE International Conference on High Performance Computing & Communications, Data Science & Systems, Smart City & Dependability in Sensor, Cloud & Big Data Systems & Application (HPCC/DSS/SmartCity/DependSys)

HPCC-DSS-SmartCity-DependSys 2023

Table of Contents

Message from the HPCC 2023 Chairs ..... **xxvii**
Message from the DSS 2023 Chairs ..... **xxviii**
Message from the SmartCity 2023 Chairs ..... **xxix**
Message from the DependSys 2023 Chairs ..... **xxx**
Message from the DIKW 2023 Chairs ..... **xxxi**

The 25th IEEE International Conferences on High Performance Computing and Communications (HPCC 2023)

SDSSE: A Self-Driven RPC Load Balancing Method in Datacenter 1
Shuhan Chen (Zhejiang university, Quancheng Laboratory, China), Chunming Wu (Quancheng Laboratory, Zhejiang University, China), and Congqi Shen (Zhejiang Lab, China)

A Complete Piping Identification Solution for Piping and Instrumentation Diagrams 9
Shengyong Liu (Shandong Provincial Key Laboratory of Network Based Intelligent Computing, University of Jinan School of Information Science and Engineering, University of Jinan, China), Zhongtao Li (Shandong Provincial Key Laboratory of Network Based Intelligent Computing, University of Jinan School of Information Science and Engineering, University of Jinan, China), Shuai Zhao (Jinan Housing and Urban-Rural Development Bureau, China), Lei Yang (Office of the Shandong Cyberspace Affairs Commission, China), Fu Zhao (Shandong Xiaoya Holding Group Co. Ltd, China), and Chuan Ge (Shandong University, China)

Sustainable Architecture Design Principles for Large Scale Research Infrastructure Projects 16
Yuri Demchenko (University of Amsterdam, The Netherlands)

A Privacy-Preserving Timing Attacks Mitigation in Information-Centric Edge Networks 24
Ningchun Liu (Zhejiang Lab, China; Beijing Jiaotong University, China), Shuai Gao (Beijing Jiaotong University, China), Teng Liang (Peng Cheng Laboratory, China), Xindi Hou (Beijing Jiaotong University, China), Lei Yu (China Telecom Zhejiang Co., Ltd, China), and Hongke Zhang (Beijing Jiaotong University, China)

Timed Synchronization Technology of OFDM System Based on Training Sequence 30
Jiahao Fu (Xi'an University of Posts & Telecommunications, China) and MengMeng Li (Xi'an University of Posts & Telecommunications, China)

JumpCrypt: Based on Precomputing Federated Learning with Homomorphic Encryption 35
Yun Wang (School of Computer Science and Engineering Southeast University Nanjing, China), Chong Wang (State Grid Jiangsu Electric Power Co., LTD Nanjing, China), Chao Xu (School of Computer Science and Engineering Southeast University Nanjing, China), and Jing Wang (School of Computer Science and Engineering Southeast University Nanjing, China)

PBE-Plan: Periodic Backdoor Erasing Plan for Trustworthy Federated Learning 41
Bei Chen (Shanghai Jiao Tong University, China), Gaolei Li (Shanghai Jiao Tong University, China), Mingzhe Chen (University of Miami, USA), Yuchen Liu (NC State University, USA), Xiaoyu Yi (Shanghai Jiao Tong University, China), and Jianhua Li (Shanghai Jiao Tong University, China)

ROMA: A Reconfigurable On-Chip Memory Architecture for Multi-Core Accelerators 49
Shantian Qin (State Key Lab of Processors, Institute of Computing Technology, Chinese Academy of Sciences, Beijing, China; University of Chinese Academy of Sciences, China), Wenming Li (State Key Lab of Processors, Institute of Computing Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Zhihua Fan (State Key Lab of Processors, Institute of Computing Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Zhen Wang (State Key Lab of Processors, Institute of Computing Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Tianyu Liu (State Key Lab of Processors, Institute of Computing Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Haibin Wu (State Key Lab of Processors, Institute of Computing Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Kunming Zhang (State Key Lab of Processors, Institute of Computing Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Xuejun An (State Key Lab of Processors, Institute of Computing Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Xiaochun Ye (State Key Lab of Processors, Institute of Computing Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), and Dongrui Fan (State Key Lab of Processors, Institute of Computing Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China)

Cell Manipulation Attack Against Onion Services 58
Jianjun Lin (Institute of Information Engineering, Chinese Academy of Sciences, China), Yinliang Yue (Zhongguancun Laboratory, China), Yijing Zhang (Institute of Information Engineering, Chinese Academy of Sciences, China), Xiaoyu Liu (Institute of Information Engineering, Chinese Academy of Sciences, China), XiaoDu Yang (Institute of Information Engineering, Chinese Academy of Sciences, China), Weilin Gai (Institute of Software, Chinese Academy of Sciences, China), and Bo Sun (National Computer Network Emergency Response Technical Team/Coordination Center of China (CNCERT/CC), China)

Joint Optimization of UAV Deployment and Task Computation Offloading Decision in UAV-Assisted Edge Computing Network 66
Yichuan Liu (Southeast University, China), Jinbin Tu (Southeast University, China), and Yun Wang (Southeast University, China)

A Novel Method with Transformers for Fine-Grained Encrypted Traffic Classification 74
He Kong (Chinese Academy of Sciences, China), Tong Li (Chinese Academy of Sciences, China), Jingguo Ge (Chinese Academy of Sciences, China), Hui Li (Chinese Academy of Sciences, China), Liqun Yang (Beihang University, China), Zhuang Lu (Chinese Academy of Sciences, China), Zhibin Xu (Chinese Academy of Sciences, China), and ChuanXi Xie (Chinese Academy of Sciences, China)

Thoth: Provisioning Over-Committed Memory Resource with Differentiated QoS in Public Clouds 82
Wenda Tang (China Telecom eSurfing Cloud, China), Jiazhen Zhu (China Telecom eSurfing Cloud, China), Tianxiang Ai (China Telecom eSurfing Cloud, China), Guanghui Li (China Telecom eSurfing Cloud, China), Bin Yu (China Telecom eSurfing Cloud, China), Xin Yang (China Telecom eSurfing Cloud, China), and Wanchun Dou (Nanjing University, China)

NeXtCrowd: Lightweight And Efficient Network Design for Dense Crowd Counting 90
Jun Hu (Hunan University, China; Key Laboratory of Natural Resources Monitoring and Supervision in Southern Hilly Region Ministry of Natural Resources, China) and Hui Han (Hunan University, China)

Designing Incentive Mechanisms for Fair Participation in Federated Learning 98
Han Xu (University of Technology Sydney, Australia), Priyadarsi Nanda (University of Technology Sydney, Australia), and Jie Liang (University of Technology Sydney, Australia)

MODGF: Multi-Objective Optimization Approach for Directed GreyBox Fuzzing 106
Xueying Zuo (Southeast University, China), Yubo Song (Southeast University, China), Mao Run (Southeast University, China), Zhongyuan Qin (Southeast University, China), and Xin Sun (Internet Technology Center State Grid Zhejiang Electric Power Co., Ltd. Research Institute, China)

MALT: Fine-Grained Microservice Profiling for Request Latency Anomaly Localization 114
Dingjie Zhang (Institute of Computing Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Qinghua Wu (Institute of Computing Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China; Purple Mountain Laboratories, China), Yuankang Zhao (Institute of Computing Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China), Zhenyu Li (Institute of Computing Technology, Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China; Purple Mountain Laboratories, China), Peng He (ByteDance, China), Yongsu Zhang (ByteDance, China), Xiongchun Duan (ByteDance, China), Yu Zhang (ByteDance, China), Gen Miao (ByteDance, China), Jiancong Tong (ByteDance, China), and Gaogang Xie (Computer Network Information Center, Chinese Academy Sciences, China; University of Chinese Academy of Sciences, China)

HLMD: Detecting Lateral Movement Using Heterogeneous Graph Model 122
Yiru Gong (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Science, China), Xueying Han (Institute of Information Engineering, Chinese Academy of Sciences, China; University of Chinese Academy of Science, China), Dan Du (Institute of Information Engineering, Chinese Academy of Sciences, China), Xichen Du (Institute of Information Engineering, Chinese Academy of Sciences, China), Bo Jiang (Institute of Information Engineering, Chinese Academy of Sciences, China), Tian Tian (Institute of Information Engineering, Chinese Academy of Sciences, China), and Zhigang Lu (Institute of Information Engineering, Chinese Academy of Sciences, China)

Few-Shot Segmentation Network Robust to Background Interference 131
Enze Ji (Computer Network Information Center, Chinese Academy of Sciences, China), Yunxiao Chen (Dalian University of Technology, China), Anni Chen (University of Wollongong, Australia), and Zhikui Chen (Dalian University of Technology, China)

Towards Optimized Hydrological Forecast Prediction of WRF-Hydro on GPU 138
Hongrui Liu (Beihang University, China), Kelun Lei (Beihang University, China), Hailong Yang (Beihang University, China), Zhongzhi Luan (Beihang University, China), and Depei Qian (Beihang University, China)

Efficient Computing for Reduced Density Matrix on GPUs 146
Wenhao Liang (Computer Network Information Center, Chinese Academy of Sciences; University of Chinese Academy of Sciences, China), Runfeng Jin (Computer Network Information Center, Chinese Academy of Sciences; University of Chinese Academy of Sciences, China), Yingqi Tian (Nanjing University, China), Yingjin Ma (Computer Network Information Center, Chinese Academy of Sciences, China), and Zhong Jin (Computer Network Information Center, Chinese Academy of Sciences, China)

Optimizing 3D Mantle Convection Simulations on Multi-Cores 154
Zhicheng Zhang (National University of Defense Technology, China), Jie Liu (National University of Defense Technology, China), Shengguo Li (National University of Defense Technology, China), Qinglin Wang (National University of Defense Technology, China), Fan Yuan (Xiangtan University, China), Xiaoxiong Zhu (National University of Defense Technology, China), and Jieyuan Zhang (Academy of Military Sciences, China)

Asymmetric Init: Startup Optimization for Microkernel Hypervisor 162
Guanyu Chen (Zhejiang University, China), Guoqing Yang (Zhejiang University, China), Hong Li (Zhejiang University, China), Zhijie Pan (Zhejiang University, China), and Pan Lv (Zhejiang University, China)

On and Off-Chain Consistency Protocol for Multi-Attribute Assets Based on Data Property Rights 169
Xuyang Liu (Shandong University, China), Lanju Kong (Shandong University, China), Yuehan Su (Shandong University, China), and Chenfei Sun (Shandong Normal University, China)

indexPDT: A High Scalable Distributed Classification Approach with Novel Cache Structure for Geo-Location 177
Zhijie Sun (Huawei Technologies Co., Ltd., China), Jing Li (Huawei Technologies Co., Ltd., China), Jun Xie (Huawei Technologies Co., Ltd., China), Binfan Zheng (Huawei Technologies Co., Ltd., China), Li Zeng (Huawei Technologies Co., Ltd., China), and Rongqian Zhao (Huawei Technologies Co., Ltd., China)

AdaptaCC: A Highly Scalable Proactive Congestion Control for Hyper-Speed Networks 185
Jianan Sun (Chinese Academy of Sciences, China), Hongchen Ren (Chinese Academy of Sciences; University of Chinese Academy of Sciences, China), Dixiao Yuan (China University of Mining and Technology, China), Biran Li (China University of Mining and Technology, China), Xu Zhou (Chinese Academy of Sciences, University of Chinese Academy of Sciences, China), Yongmao Ren (Chinese Academy of Sciences, University of Chinese Academy of Sciences, China), Chong Li (Chinese Academy of Sciences, University of Chinese Academy of Sciences, China), and Anmin Xu (Huawei Technologies Co., Ltd, China)

A GCN-Based Model for Recommendation Using Local Differential Privacy Method 194
Cheng Chen (Nanjing University, China), Guoming Zhang (Nanjing University, China), Bowen Liu (Nanjing University, China), and Wanchun Dou (Nanjing University, China)

Path Planning for Ground-air Fusion Nodes in Opportunistic Networks Using Cuckoo Search and Grey Wolf Algorithm for Source Seeking and Obstacle Avoidance 202
Ming Song (Inner Mongolia University, China), Zhuoyuan Li (Inner Mongolia University, China), Gang Xu (Inner Mongolia University, China), Yanhe Fu (Inner Mongolia University, China), Xiaoying Yang (Inner Mongolia University, China), and Ru Yi (Inner Mongolia University, China)

Neuromorphic Text Emotion Recognition: Harnessing Bio-Inspired Computing for Energy-Efficient and Robust Solution 209
Binqiang Wang (Shandong Massive Information Technology Research Institute, China), Yaqian Zhao (Shandong Massive Information Technology Research Institute, China), Gang Dong (Shandong Massive Information Technology Research Institute, China), and Kang Su (Shandong Yunhai Guochuang Cloud Computing Equipment Industry Innovation Co., Ltd., China)

Nys-FL: A Communication Efficient Federated Learning with Nyström Approximated Global Newton Direction 217
Mrinmay Sen (Swinburne University of Technology, Australia), C Krishna Mohan (Indian Institute of Technology Hyderabad, India), and Kai Qin (Swinburne University of Technology, Australia)

Heuristic Scheduling of Streaming Applications for Energy Efficiency on Heterogeneous Multicores 225
Sebastian Litzinger (FernUniversität in Hagen, Germany)

On a Hybrid BiLSTM-GCNN-Based Approach for Attack Detection in SDN 233
Zhulian Chen (Northwest University, China), Aiqin Hou (Northwest University, China), Chase Q. Wu (New Jersey Institute of Technology, USA), Xinji Qu (Northwest University, China), Yukun Wang (Northwest University, China), and Le Ru (Northwest University, China)

Cost-Efficient 6G Space-Air-Ground Integrated Mobile Edge Computing for Smart City: A PPO-Based Offloading Decision and Resource Allocation Algorithm 241
Wenwu Zhu (Beijing Information Science & Technology University, China), Xin Chen (Beijing Information Science & Technology University, China), Libo Jiao (Beijing Information Science & Technology University, China), Geyong Min (University of Exeter, U.K), and Wang Li (Beijing Information Science & Technology University, China)

Physically Based Bidirectional Path Tacing Algorithm on the Tianhe-2 Supercomputer 249
Yijia Wu (University of Chinese Academy of Sciences, China), Congpin Zhang (Henan Normal University, China), Zhengwei Xu (Henan Normal University, China), and Ligang Li (National Space Science Center, Chinese Academy of Sciences, China)

FDRS: Federated Diversified Recommender System Based on Heterogeneous Graph Convolutional Network 257
Nianzhe Li (Nanjing University of Science and Technology, China), Hanwen Liu (Nanjing University of Science and Technology, China), Shunmei Meng (Nanjing University of Science and Technology, China), and Qianmu Li (Nanjing University of Science and Technology, China)

A Deep Graph Convolutional Network Based Web API Classification Approach for Mashup Creation 265
Lianyong Qi (Qufu Normal University, China), Boyuan Yan (Qufu Normal University, China), Jiaqi Zheng (Nanjing University, China), Xiaolong Xu (Nanjing University of Information Science and Technology, China), Wanchun Dou (Nanjing University, China), Xiaokang Zhou (Shiga University, Japan; RIKEN Center for Advanced Intelligence Project, Japan), and Jie Zhang (Nanjing University, China)

LogGPT: Exploring ChatGPT for Log-Based Anomaly Detection 273
Jiaxing Qi (Beihang University, China), Shaohan Huang (Beihang University, China), Shu Yang (Beihang University, China), Zhongzhi Luan (Beihang University, China), Carol Fung (Concordia University, Canada), Hailong Yang (Beihang University, China), Depei Qian (Beihang University, China), Jing Shang (China Mobile Information Technology Center, China), Zhiwen Xiao (China Mobile Information Technology Center, China), and Zhihui Wu (China Mobile Information Technology Center, China)

The Simplex 3-Partite Hypergraph-Based Resource Allocation (S3H-RA) Method for Platooning Communications 281
Chung-Ming Huang (National Cheng Kung University, Taiwan), Dan-Nguyen Lam (National Cheng Kung University, Taiwan), and Duy-Tuan Dao (The University of Danang-University of Science and Technology, Vietnam)

From MATSim to multiMATSim: Rethinking Traffic Modeling Using the 'Unite and Conquer' Approach 288
Sara Moukir (University of Paris Saclay / UVSQ, Eiffage Energie Systèmes, France), Nahid Emad (University of Paris Saclay / UVSQ, France), and Stéphane Baudelocq (Eiffage Energie Systèmes, France)

Data Sharing System Based on Blockchain to Enhance The Visible of Meta Data Information in Privacy Computing 296
Hao Wu (Beijing University of Posts and Telecommunications, China), Sen Wang (Beijing Academy of Blockchain and Edge Computing, China), Genghua Dong (Beijing Academy of Blockchain and Edge Computing, China), Mengmeng Zhou (Beijing Academy of Blockchain and Edge Computing, China), Yu Liu (Beijing University of Posts and Telecommunications, China), and Lin Zhang (Beijing University of Posts and Telecommunications, China)

Reinforcement Learning Based Control Domain Division in LEO Satellite Networks 303
Feilong Tang (East China Normal University, China), Xue Li (East China Normal University, China), Long Chen (Simon Fraser University, Canada), Jiacheng Liu (The Chinese University of Hong Kong, China), Ming Gao (East China Normal University, China), Yanqin Yang (East China Normal University, China), Wenchao Xu (East China Normal University, China), and Heteng Zhang (Suzhou All-Space-Time Information Technology Co., Ltd., China)

DSCAM+: Latency-Guaranteed FPGA-Based Content Addressable Memory for SDN-Enabled Forwarding Plane 311
Shervin Vakili (Institut National de la Necherche Scientifique (INRS), Canada)

SimMSG: Simulating Transportation of MPI Messages in High Performance Computing Systems .. 319
Fang Lin (Beihang University, China), Xueyan Gai (Beihang University, China), and Yi Liu (Beihang University, China)

Optimization of Correlation Coefficient Calculation for Channel Matrix Characterization on FPGA 329
Simona Sibio (Heriot-Watt University, UK), Souheil Ben Smida (Heriot-Watt University, UK), Yuan Ding (Heriot-Watt University, UK), and George Goussetis (Heriot-Watt University, UK)

Improving Global Precipitation in Numerical Weather Prediction Systems Based on Deep Learning Techniques 333
Haixiang Zhao (Qinghai University, China), Guojing Zhang (Qinghai University, China), Ming Du (Qinghai University, China), and Xiaoying Wang (Qinghai University, China)

Multi-Channel Hypergraph Convolution Group Recommendation with Member Information Enhancement 340
Tianhao Chen (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), Qian Gao (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), and Jun Fan (China Telecom Digital Intelligence Techonology, China)

Anti-DDoS Attacks Strategy of SDN Data Plane with Data Augmentation Based on P4 348
Wenxiu Zhang (University of Jinan, China), Shan Jing (University of Jinan, China), and Chuan Zhao (Quan Cheng Laboratory, China)

NOAH: Newton Method of Optimization with Approximated Hessian 355
Mrinmay Sen (Indian Institute of Technology Hyderabad, India) and C Krishna Mohan (Indian Institute of Technology Hyderabad, India)

QVal: a Novel Routing Algorithm for Dragonfly Networks 361
Javier Navaridas (University of the Basque Country (UPV/EHU)) and Jose A. Pascual (University of the Basque Country (UPV/EHU))

BioNet+: A Comprehensive Interaction Model of Finding Therapeutics for Diseases with Graph Deep Learning 369
Jinglun Ma (National University of Defense Technology, China), Yanlong Qiu (National University of Defense Technology, China), Canqun Yang (National University of Defense Technology, China), and Chengkun Wu (National University of Defense Technology, China)

AMPP: An Adaptive Multilayer Perceptron Prefetcher for Irregular Data Prefetching 377
Juan Fang (Beijing University of Technology, China), Jingjing Li (Beijing University of Technology, China), Huijing Yang (Beijing University of Technology, China), Yuening Wang (Beijing University of Technology, China), and Shuying Song (Beijing University of Technology, China)

Social-Enhanced Recommendation Using Graph-Based Contrastive Learning 385
Peng Xue (Qilu University of Technology(Shandong Academy of Sciences), China; Shandong Fundamental Research Center for Computer Science, China), Qian Gao (Qilu University of Technology(Shandong Academy of Sciences), China), and Jun Fan (China Telecom Digital Intelligence Techonology Co, Ltd, China)

A Shared Bottleneck Aware Multi-Path Selection Scheme for NDN 393
Yong Wang (Central South University, China), Wang Yang (Central South University, China), and Jieyu Zhou (Central South University, China)

Correlation Fusion with Instance-Level Auto-Weighted for Multi-View Graph Clustering 400
Xuan Chen (Dalian University of Technology, China), Zhikui Chen (Dalian University of Technology, China), Liang Yao (Anhui Polytechnic University, China), Shubin Ma (Dalian University of Technology, China), Peng Li (Dalian University of Technology, China), and Shuo Yu (Dalian University of Technology, China)

Elevating the Precision of Summarization for Short Text in Social Media Using Preprocessing Techniques 408
Fahd A. Ghanem (PES College of Engineering, (affiliated to University of Mysore), India), M.C. Padma (PES College of Engineering, (affiliated to University of Mysore), India), and Ramez Alkhatib (BMB Nord, Research Center Borstel, Germany)

DHIFS: A Dynamic and Hybrid Index Method with Low Memory Overhead and Efficient File Access 417
Jingjing Jiang (Beijing Institute of Control Engineering, China), Mengfei Yang (China Academy of Space Technology, China), Lei Qiao (Beijing Institute of Control Engineering, China), Tingyu Wang (Xidian University, China), Hongbiao Liu (Beijing Institute of Control Engineering, China), and Jiawei Nian (Xidian University, China)

Fuzzy Reputation-Based Vehicle Platooning Scheme 427
Hai Liu (Guizhou University of Finance and Economics, China), Jinyu Wu (Guizhou University of Finance and Economics, China), Hongye Peng (Guizhou University of Finance and Economics, China), and Fangqiong Li (Guizhou University of Finance and Economics, China)

Implementation Method of non-Bypassable PC Application Firewalls Using Virtualization Technologies 435
Akihiro Shoji (University of Tsukuba, Japan) and Yasushi Shinjo (University of Tsukuba, Japan)

Large–amount Blockchain Transaction Conflict Resolution Technology Based on Dependency Graph for Multi-Property Assets 443
Qiuman Guo (ShanDong University, China), Wenquan Li (ShanDong University, China), Lanju Kong (ShanDong University, China), Qingzhong Li (ShanDong University, China), and Chenfei Sun (Shandong Normal University, China)

Spectral Clustering Based Resource Allocation Strategy for Distributed Large-Scale Network Emulation 451
Jiyan Chen (Beijing University of Posts and Telecommunications, China), Rentao Gu (Beijing University of Posts and Telecommunications, China), and Lin Bai (Beijing University of Posts and Telecommunications, China)

Large Capacity Image Watermarking Model Using SWT and Laplacian Pyramid 459
Baowei Wang (Engineering Research Center of Digital Forensics, China; Nanjing University of Information Science and Technology, China), Fan Yang (Nanjing University of Information Science and Technology, China), Yufeng Wu (Nanjing University of Information Science and Technology, China), Changyu Dai (Nanjing University of Information Science and Technology, China), Wenjue Huang (Nanjing University of Information Science and Technology, China), and Xingyuan Zhao (Nanjing University of Information Science and Technology, China)

A Multi-Objective Optimisation Strategy for Node Performance in Opportunistic Networks Based on Heuristic Algorithm 466
Ming Song (Inner Mongolia University, China), Qi Tang (Inner Mongolia University, China), Gang Xu (Inner Mongolia University, China), Xinyu Hao (Inner Mongolia University, China), Feng Zhang (shanxi University, China), and Ru Yi (Inner Mongolia University, China)

FusionNet: An Effective Network Phishing Website Detection Framework Based on Multi-Modal Fusion 474
Yu Sun (Qilu University of Technology (Shandong Academy of Sciences), China), Guangqi Liu (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Provincial Key Laboratory of Computer Networks, Shandong Fundamental Research Center for Computer Science, China), Xiaohui Han (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Provincial Key Laboratory of Computer Networks, Shandong Fundamental Research Center for Computer Science, China; Quancheng Provincial Laboratory, China), Wenbo Zuo (Qilu University of Technology (Shandong Academy of Sciences), China; Shandong Provincial Key Laboratory of Computer Networks, Shandong Fundamental Research Center for Computer Science, China), and Weihua Liu (Qilu University of Technology (Shandong Academy of Sciences), China)

Deletion-Robust Submodular Maximization Under a Knapsack Constraint 482
Wenhao Sun (University of Science and Technology of China), Kai Han (Soochow University), and Shuang Cui (University of Science and Technology of China)

Container Privilege Escalation and Escape Detection Method Based on Security-First Architecture 490
Mengting Zhou (Institute of Information Engineering, Chinese Academy of Sciences, School of Cyber Security, University of Chinese Academy of Sciences, China), Xiaoqi Jia (Institute of Information Engineering, Chinese Academy of Sciences, School of Cyber Security, University of Chinese Academy of Sciences, China), Hanjian Su (Institute of Information Engineering, Chinese Academy of Sciences, School of Cyber Security, University of Chinese Academy of Sciences, China), Sicong Huang (Institute of Information Engineering, Chinese Academy of Sciences, China), Yuejin Du (Institute of Information Engineering, Chinese Academy of Sciences, Future Security Institute, Qihoo 360 Technology Co Ltd, China), Haichao Du (Institute of Information Engineering, Chinese Academy of Sciences, China), Ruiyi Wang (Institute of Information Engineering, Chinese Academy of Sciences, China), and Jing Tang (Institute of Information Engineering, Chinese Academy of Sciences, China)

Large-Scale Parallelization and Optimization of Lattice QCD on Tianhe New Generation Supercomputer 499
Junlin Chen (Beihang University, China), Chaojing Liu (Beihang University, China), Zhongzhi Luan (Beihang University, China), Ming Gong (Institute of High Energy Physics, Chinese Academy of Sciences, China), Qingfeng Li (National Supercomputer Center in Tianjin, China), and Depei Qian (Beihang University, China)

Automatic Anomaly Detection Using Unlabelled Log Data 507
Yujia Zhu (University of Exeter, UK), Geyong Min (University of Exeter, UK), Yulei Wu (University of Exeter, UK), and Haozhe Wang (University of Exeter, UK)

Prediction of Cloud API Performance Using Uncertainty-Based Fusion of Predictive and Analytical Modeling 515
Jayani Hewavitharana (University of Colombo School of Computing, Sri Lanka), Nadheesh Jihan (WSO2 Lanka (Pvt) Ltd., Sri Lanka), Malith Jayasinghe (WSO2 Lanka (Pvt) Ltd., Sri Lanka), Kasun Gunawardana (University of Colombo School of Computing, Sri Lanka), and Duneesha Fernando (WSO2 Lanka (Pvt) Ltd., Sri Lanka)

An Optimized GPU Kernel for Real-Time Radio Imaging 523
Karthik Reddy (Arizona State University, USA), Judd D. Bowman (Arizona State University, USA), Adam P. Beardsley (Winona State University, USA), Greg B. Taylor (University of New Mexico, New Mexico), Jayce Dowell (University of New Mexico, New Mexico), and Craig Taylor (University of New Mexico, New Mexico)

On Periodic Point-to-Point Bandwidth Scheduling in High-Performance Networks 528
Siming Wang (Northwest University, China), Aiqin Hou (Northwest University, China), Chase Q. Wu (New Jersey Institute of Technology, USA), and Xinji Qu (Northwest University, China)

Personalized Federated Learning for Fast Convergence and Local Adaption: A Double Gradient Descent Method 536
Zhidu Li (Chongqing University of Posts and Telecommunications, China), Songyang He (Chongqing University of Posts and Telecommunications, China), Xu Li (Chongqing University of Posts and Telecommunications, China), and Meiting Xue (Hangzhou Dianzi University, China)

TPMARL-MSS Thought-Perception Multi-Agent Reinforcement Learning Meeting Scheduling System. 542
Jinsong Zhang (Southeast University, China), Xiaoxuan Mao (Southeast University, China), Lu Li (Southeast University, China), and Hanqian Wu (Southeast University, China)

CloudSimSC: A Toolkit for Modeling and Simulation of Serverless Computing Environments 550
Anupama Mampage (The University of Melbourne, Australia) and Rajkumar Buyya (University of Melbourne, Australia)

Advanced Acceleration and Implementation of Convolutional Neural Networks on FPGAs 558
Mikkel Jensen (Aarhus University, Denmark), Jesper Toft Jakobsen (Aarhus University, Denmark), Iman Sharifirad (Aarhus University, Denmark), and Jalil Boudjadar (Aarhus University, Denmark)

Pervasive AI for Secure and Scalable IoT-Edge-Cloud Continuum: A Big Picture 566
Deepak Puthal (Khalifa University, UAE), Saraju P. Mohanty (University of North Texas, USA), Chan Yeob Yeun (Khalifa University, UAE), Ernesto Damiani (Khalifa University, UAE; Università degli Studi di Milano, Italy), and Biswajeet Pradhan (University of Technology Sydney, Australia)

A Novel Fuzzy Identity-Based Encryption with Wireless PUF for IoT Device Authentication 574
Ye Chen (Southeast University, China; Purple Mountain Laboratories, China), Yubo Song (Southeast University, China; Purple Mountain Laboratories, China), Yihan Cai (Southeast University, China; Purple Mountain Laboratories, China), Qiuhong Shan (Southeast University, China; Purple Mountain Laboratories, China), Bo Zhang (State Grid Smart Grid Research Institute, China), and Tao Zhang (State Grid Smart Grid Research Institute, China)

Translets: Toward Explainable Phishing Fraud Detection in Ethereum 582
Xikang Yang (Institute of Information Engineering, Chinese Academy of Sciences; University of Chinese Academy of Sciences, China), Biyu Zhou (Institute of Information Engineering, Chinese Academy of Sciences, China), Xuehai Tang (Institute of Information Engineering, Chinese Academy of Sciences, China), Xiaodan Zhang (Institute of Information Engineering, Chinese Academy of Sciences, China), Jizhong Han (Institute of Information Engineering, Chinese Academy of Sciences, China), and Songlin Hu (Institute of Information Engineering, Chinese Academy of Sciences, China)

Personalized Federated Learning Framework for Person Re-Identification in MEC-Enabled UAV Delivery Services 592
Yi Xu (Anhui University, China), Zhipeng Wang (Anhui University, China), Jonathan Kua (Deakin University, Australia), Haoyu Luo (South China Agricultural University), Ruyi Guo (Anhui University, China), and Xiao Liu (Deakin University, Australia)

A Novel Cache and Consistency Mechanism for IoT Time Series Data 599
Tao Cai (Jiangsu University, China), Zeyu Huang (Jiangsu University, China), Dejiao Niu (Jiangsu University, China), and Yueming Ma (Jiangsu University, China)

Lightweight Website Fingerprinting Defense Method Based on Distribution Distance Padding 607
Tong Lu (Jiangsu University, China), Qiang Zhou (Jiangsu University, China), and Huijuan Zhu (Jiangsu University, China)

KGNIE: A Learning Method for Estimating Node Importance in Knowledge Graphs 615
Yin Chen (Zhejiang Gongshang University), Jianke Yu (University of Technology Sydney), Qing Sima (University of New South Wales), Jinghao Wang (Zhejiang Gongshang University), Yanping Wu (University of Technology Sydney), and Xiaoyang Wang (University of New South Wales)

A Case Study for Exploring the Impact of Optimized K-Means Algorithm on the Energy Efficiency of Multicore Systems 623
Shervin Hajiamini (Vanderbilt University, USA), Jeffrey D. Blanchard (Grinnell College, USA), Davin Lin (Grinnell College, USA), and Behrooz Shirazi (Washington State University, USA)

A Multi-Objective Multi-Agent RL-Based Approach for Task Offloading in IoT-Enabled Classrooms 631
Juli Zhang (Xidian University, China), Shuo Huang (Xidian University, China), Zhenxing Niu (Xidian University, China), Yishuai Lin (Xidian University, China), and Quan Wang (Xidian University, China)

A Fairness-Aware Prefetching Mechanism Based on Reinforcement Learning for Multi-Core Systems 639
Huijing Yang (Beijing University of Technology, China) and Juan Fang (Beijing University of Technology, China)

Efficient Algorithm for Maximizing Betweenness Centrality in Large Networks 647
Lele Zhang (Zhejiang Gongshang University), Yanping Wu (University of Technology Sydney), Jinghao Wang (Zhejiang Gongshang University), Shiyuan Liu (Zhejiang Gongshang University), Chen Chen (Zhejiang Gongshang University), and Xiaoyang Wang (University of New South Wales)

Multi-Level Relational Reasoning and Attention Network for Medical Visual Question Answering 655
Xiteng Jia (Harbin Engineering University, China), Haiwei Pan (Harbin Engineering University, China), Kejia Zhang (Harbin Engineering University, China), Yuechun Feng (Ningxia Institute of Science and Technology, China), Shuning He (Harbin Engineering University, China), and Cheng Gong (Harbin Engineering University, China)

A Hybrid Feature Extraction Framework for Android Malware Detection 663
Zicheng Ma (Sichuan University, China), Kui Zhao (Sichuan University, China), Jin Yang (Sichuan University, China; Tibet University, China), Siyu Li (Sichuan University, China), and Chen Chen (Tibet University, China)

VPFL: A Verifiable Property Federated Learning Framework Against Invisible Attacks in Distributed IoT 671
Yuanxiang Wu (Fuzhou University, China), Hang Cheng (Fuzhou University, China), Lin Guan (Fuzhou University, China), Peihao Liu (Fuzhou University, China), Fei Chen (Fuzhou University, China), and Meiqing Wang (Fuzhou University, China)

Low Latency Implementations of CRYSTALS-Dilithium for Cloud Applications 679
Yanan Chen (Nanjing University of Science and Technology, China), Yiwen Gao (Nanjing University of Science and Technology, China), Yuejun Liu (Nanjing University of Science and Technology, China), and Yongbin Zhou (Nanjing University of Science and Technology; Institute of Information Engineering, Chinese Academy of Sciences; University of Chinese Academy of Sciences)

TCHA: Contrastive Learning via Hybrid Granularities and Adaptive Sampling for Multivariate Time Series 687
Shilei Hao (Beijing Jiaotong University, China), Zhihai Wang (Beijing Jiaotong University, China), and Chixuan Wei (Beijing Jiaotong University, China)

FL-HSDP: Client-Side Defense for Federated Learning via Hessian Optimization and Shuffled Differential Privacy 696
Yuting Li (Guangzhou University, China), Guojun Wang (Guangzhou University, China), Tian Wang (Beijing Normal University & UIC, China), and Weijia Jia (Beijing Normal University & UIC, China)

Target-Specific Optimal Sampling of Time-Varying Signals Using Greedy Approach 704
Sakshi Pandey (South Asian University, India) and Amit Banerjee (South Asian University, India)

Investigating Layer-2 Scalability Solutions for Blockchain Applications 710
Mahen Mondal (South Asian University, India), Mohd Sameen Chishti (Bennett University, India), and Amit Banerjee (South Asian University, India)

Representing the Intangible Cultural Heritage Knowledge Graph with Vector Embedding 718
Mao Han (China Agricultural University, China), Qing Wang (China Agricultural University, China), Hong Chen (Beijing University of Posts and Telecommunications, China), Wei Chen (Beijing University of Posts and Telecommunications, China), Junchang Zhang (China Agricultural University, China), and Guang Wang (China Agricultural University, China)

Efficient Large Models Fine-Tuning on Commodity Servers via Memory-Balanced Pipeline Parallelism 726
Yujie Liu (National University of Defense Technology, China), Zhiquan Lai (National University of Defense Technology, China), Weijie Liu (National University of Defense Technology, China), Wei Wang (National University of Defense Technology, China), and Dongsheng Li (National University of Defense Technology, China)

Communication Analysis for Multidimensional Parallel Training of Large-Scale DNN Models 728
Zhiquan Lai (National University of Defense Technology, China), Yanqi Hao (National University of Defense Technology, China), Shengwei Li (National University of Defense Technology, China), and Dongsheng Li (National University of Defense Technology, China)

Rethinking the Distributed DNN Training Cluster Design from the Cost-Effectiveness View 730
Zhiquan Lai (National University of Defense Technology, China), Yujie Liu (National University of Defense Technology, China), Wei Wang (National University of Defense Technology, China), Yanqi Hao (National University of Defense Technology, China), and Dongsheng Li (National University of Defense Technology, China)

Subgraph Mapping Optimization Methods for Domain Specific Architectures 732
Dong Dong (Beihang University, China) and Hongxu Jiang (Beihang University, China)

SMVAR: A Novel RNN Accelerator Based on Non-Blocking Data Distribution Structure 734
Jinwei Xu (National University of Defense Technology, China), Jingfei Jiang (National University of Defense Technology, China), Shiyao Xu (National University of Defense Technology, China), and Lei Gao (National University of Defense Technology, China)

A Low BER Cooperative-Adaptive-Equalizer for Serial Receiver in HPC Networks 742
Lai Mingche (National University of Defense Technology, China), Lv Fangxu (National University of Defense Technology, China), Zhang Geng (National Unveristy of Defense Technology, China), and Xu Chaolong (National University of Defense Technology, China)

A Multi-User Effective Computation Offloading Mechanism for MEC System: Batched Multi-Armed Bandits Approach 750
Hangfan Li (Guilin University of Electronic Technology; Tsinghua Shenzhen International Graduate School, China), Lin Shi (Guilin University of Electronic Technology, China), Xiaoxiong Zhong (Peng Cheng Laboratory, P.R. China), Yun Ji (Tsinghua Shenzhen International Graduate School, China), Xinghan Wang (Peng Cheng Laboratory, P.R. China), and Sheng Zhang (Tsinghua Shenzhen International Graduate School, China)

A Task-Based Routing Algorithm for Network-on- Chip in Heterogeneous CPU-GPU Architectures.... 758
Juan Fang (Beijing University of Technology, China), Zhichao Wei (Beijing University of Technology, China), Yaqi Liu (Beijing University of Technology, China), and Yumin Hou (Beijing University of Technology, China)

An Adaptive Service Placement Strategy Based on Feature Analysis and Trajectory Prediction in Mobile Edge Computing 764
Juan Fang (Beijing University of Technology, China), Pengfan Lu (Beijing University of Technology, China), and Shuaibing Lu (Beijing University of Technology, China)

Deep Back-Filling: a Split Window Technique for Deep Online Cluster Job Scheduling 772
Lingfei Wang (The University of Melbourne, Australia), Aaron Harwood (The University of Melbourne, Australia), and Maria A. Rodriguez (The University of Melbourne, Australia)

Understanding Node Allocation on Leadership-Class Supercomputers With Graph Analytics 780
Andy Trinh (University of Connecticut), Shivam Sheth (Stevens Institute of Technology), Anil Gaihre (Stevens Institute of Technology), Caiwen Ding (University of Connecticut), Jieyang Chen (University of Alabama at Birmingham), Feiyi Wang (Oak Ridge National Laboratory), David Pugmire (Oak Ridge National Laboratory), Scott Klasky (Oak Ridge National Laboratory), Hang Liu (Rutgers, the State University of New Jersey), and Lipeng Wan (Georgia State University)

Tensor Ring Decomposition Based Collaborative Filtering Recommendation with Differential Privacy 788
Fang Zhou (Hainan University, China), Xuemei Fu (Hainan University, China), and Zhixing Lu (Hainan University, China)

A Comprehensive Analysis of a Hybrid Deep Learning Model for Midterm Electric Load Forecasting 795
Hamdi Barkous (Ecole Polytechnique de Tunisie), Manar Amayri (Concordia University), and Nizar Bouguila (Concordia University)

Alzheimer's Disease Detection Model Based on Multimodal Data Early Fusion of Medical Neuroimaging 801
Shangxiao Wu (Guangxi Normal University), Sheng Qin (Guangxi Normal University), Kaiyang Wang (Nanjing Audit University), Su Yang (Swansea University), and Shiqi Zhang (Guangxi Normal University)

Construction of Index System of International Economic Cooperation Innovation Model in Digital Era - based on TIF Theory and DIKWP Model1 809
Zhan Shanqi (Peking University, China), Fuliang Tang (Hainan University, China), Yongmei Li (Peking University, China), Mei Qiurong (International Economic and Cultural Exchange (Beijing) Center of Chinese and Foreign Think Tanks, China), Lu Zining (Beijing Financial Holdings Group, China), Li Xing-sen (Guangdong University of Technology, China), and Zhang Biyun (Pricewaterhouse Coopers (PWC))

Design of Data-Driven Learning Path Based on Knowledge Graph and Tracing Model 813
Juli Zhang (Xidian University), Ruheng Xia (Xidian University), and Quan Wang (Xidian University)

DIKWP Construction of Public Hospital Performance Evaluation Index System - Based on TIF Model Domain Wealth Theory 821
Wei Hao (Peking University), Kong Qingzhe (Beijing Hospital of Traditional Chinese Medicine, Capital Medical University), Wang Xiaoqun (Peking University), He Haoxuan (Agricultural Bank of China, China), Wu Hang (Northwest University), and Li Xinyang (Peking University)

A Deep Neural Network for Accurate Localization in Wireless Networks 829
Congcong Che (CRRC Qingdao Sifang Rolling Stock Co. LTD), Chen Jing (North China Institute of Computer Systems Engineering), Ruyang Liu (North China Institute of Computer Systems Engineering), Yuanlei Kang (CRRC Qingdao Sifang Rolling Stock Co. LTD), and Chao Ma (CRRC Qingdao Sifang Rolling Stock Co. LTD)

Research on the Integrated Regulation of Meteorology on Medical Health Care for Depression in Pregnant Women 834
Liang Chen (Hainan Provincial meteorological Service Center), Chunyu Zhuang (Haikou Maternal and Child Health Center), Yingtian Mei (Hainan University), and Yucong Duan (Hainan University)

Attention based Convolutional Network for Traffic Flow Velocity Forecasting 842
Anqin Zhang (Shanghai University of Electric Power) and Yong Sun (Shanghai University of Electric Power)

Traffic Speed Prediction based on Multi Spatial-Temporal Graph Fusion Convolution Network 846
Anqin Zhang (Shanghai University of Electric Power) and Zhaoling Gu (University of Electric Power)

The 9th IEEE International Conference on Data Science and Systems (DSS 2023)

Toward Knowledge Engineering Using MatFlow for Inverse Quantum Dye Design 852
Hasan H. Rahman (University of Idaho, USA) and Hasan M Jamil (University of Idaho, USA)

Remotely Controllable Data Self-Destruction for Privacy-Preserving Sensitive Data Services..... 860
Chengxin Zhou (University of Science & Technology Beijing, China), Xianbin Xue (North Navigation Control Technology Co., Ltd, China), Khaled Riad (King Faisal University, Saudi Arabia), Yan Zhu (University of Science & Technology Beijing, China), and William Cheng-Chung Chu (Tunghai University, Taiwan)

An Integrated Framework for Team Formation and Winner Prediction in the FIRST Robotics Competition: Model, Algorithm, and Analysis 868
Federico Galbiati (Worcester Polytechnic Institute, USA), Ranier X. Gran (Worcester Polytechnic Institute, USA), Brendan D. Jacques (Worcester Polytechnic Institute, USA), Sullivan J. Mulhern (Worcester Polytechnic Institute, USA), and Chun-Kit Ngan (Worcester Polytechnic Insitute, USA)

Comprehensive Pipeline Leak Detection Using Induced-Leak Enhanced Scalogram Analysis and Deep Learning 877
Muhammad Farooq Siddique (University of Ulsan, South Korea), Niamat Ullah (University of Ulsan, South Korea), and Jong-Myon Kim (University of Ulsan, PD Techology Co.Ltd., South Korea)

Generalized Dirichlet-Multinomial Regression: Leveraging Arbitrary Features for Topic Modelling 884
Pantea Koochemeshkian (Concordia University, Canada) and Nizar Bouguila (Concordia University, Canada)

Construction of a Load-Testing Environment for Distributed Systems Including Idle Computers 892
Yuya Nagashima (Tottori University, Japan), Masayuki Higashino (Tottori University, Japan), and Takao Kawamura (Tottori University, Japan)

Development of Crop Cultivation Support Application for Farmers Based on Crop Yield Prediction in Drylands 898
Nao Yoneda (Tottori University, Japan), Masayuki Higashino (Tottori University, Japan), Takao Kawamura (Tottori University, Japan), and Mitsuru Tsubo (Tottori University, Japan)

A Hybrid Classification Framework of Centrifugal Pumps Using Wavelet Coherence Visuals and Principal Component Analysis 906
Niamat Ullah (University of Ulsan, South Korea), Muhammad Farooq Siddique (University of Ulsan, South Korea), and Jong-Myon Kim (University of Ulsan, PD Technology Co., South Korea)

Development of a Visualization for Developers of a Distributed System Including Idle Computers 912
Shosuke Tsutsumi (Tottori University, Japan), Masayuki Higashino (Tottori University, Japan), Kenichi Takahashi (Tottori University, Japan), and Takao Kawamura (Tottori University, Japan)

Offline Support of Android Applications for Mobile Sensing 920
Takumi Shigemoto (Tottori University, Japan), Masayuki Higashino (Tottori University, Japan), Takao Kawamura (Tottori University, Japan), and Mitsuru Tsubo (Tottori University, Japan)

Adaptive Priors for Burstiness Analysis in Topic Modeling with Generalized Dirichlet Distributions 926
Shadan Ghadimi (CIISE Concordia University, Canada), Hafsa Ennajari (CIISE Concordia University, Canada), Nizar Bouguila (CIISE Concordia University, Canada), and Manar Amayri (CIISE Concordia University, Canada)

The 21st IEEE International Conference on Smart City (SmartCity 2023)

Two-Stage Trajectory Generation Model for Realistic Human Mobility Simulation 934
Haofeng Gong (Beijing University of Posts and Telecommunications, China), Xinning Zhu (Beijing University of Posts and Telecommunications, China), Zheng Hu (Beijing University of Posts and Telecommunications, China), and Jianzhou Diao (Beijing University of Posts and Telecommunications, China)

From Faces to Traffic Lights: A Multi-Scale Approach for Emotional State Representation 942
Minh Nguyen (Auckland University of Technology, New Zealand) and Wei Qi Yan (Auckland University of Technology, New Zealand)

Monocular ORB-SLAM and Pose Retrieval for Autonomous Driving 950
Youssef Al-Ozaibi (Faculté des Sciences et Ingénierie Sorbonne Université, France), Georges Chahine (Valeo R&D, France), and Oussama El-Hamzaoui (Valeo R&D, France)

Multi-Agent Reinforcement Learning for Smart City Automated Traffic Light Control 956
Hakilo Sabit (Aucland University of Technology, New Zealand)

JUHDM: IoT-Based Honk Detection and Novel Driver Profiling For Smart City 964
Joy Dutta (Khalifa University, UAE), Debojit Chakraborty (Jadavpur University, India), Sarbani Roy (Jadavpur University, India), and Deepak Puthal (Khalifa University, UAE)

Tourist Attractions Prediction with Enhanced Location Knowledge Graph 972
Jing Xu (Kyoto University, Japan), Zhengyang Bai (RIKEN Center for Computational Science, RIKEN, Japan), and Qiang Ma (Kyoto Institute of Technology, Japan)

Integrating Machine Learning and Social Sensing in Smart City Digital Twin for Citizen Feedback 980
Sandra Kumi (University of Saskatchewan, Canada), Richard K. Lomotey (The Pennsylvania State University, USA), and Ralph Deters (University of Saskatchewan, Canada)

ST-ConvLSGRU: A Radar Echo Extrapolation Method Based on LSTM and GRU 988
Hailang Cheng (Nanjing University of Information Science and Technology, China), Mengmeng Cui (Nanjing University of Information Science and Technology, China), and Xiaolong Xu (Nanjing University of Information Science and Technology, China)

RDA-Unet: A Retrieval Model for Radar Composite Reflectivity Factor From Himawari-8 Observations 994
Zhengyong Jin (Nanjing University of Information Science and Technology, China), Huichao Lin (Nanjing University of Information Science and Technology, China), and Xiaolong Xu (Nanjing University of Information Science and Technology, China)

Analysis of Chinese Traditional Opera Based on the Western Music Genre Classification Methods 1001
Yue Li (South China University of Technology, China), Zhengwei Peng (Sun Yat-sen University, China), Ying Liufu (South China University of Technology, China), Guanghao Li (South China University of Technology, China), and Huanyan Zhu (Shenzhen Futu Network Technology Co., Ltd., China)

Design of an Intelligent Voice-Controlled Home System Based on Raspberry Pi 1008
Kaiyi Wu (China Jiliang University, China), Jiaying Li (China Jiliang University, China), Jiabin Yu (China Jiliang University, China), Yuhao Hua (Xidian University, China), Binggang Xiao (China Jiliang University, China), and Wu Wang (Peking University, China)

Design of Smart Home Monitoring System for Elderly Care Based on Raspberry Pi 1014
Haoran Huang (China Jiliang University, China), Jiaying Li (China Jiliang University, China), Jiabin Yu (China Jiliang University, China), Binggang Xiao (China Jiliang University, China), Hongmei Mi (China Jiliang University, China), and Xinke Shen (China Jiliang University, China)

Solar Irradiance Forecasting Utilizing Distributed and Federated Learning 1020
Hao Zhang (China Jiliang University, China) and Ke Yan (China Jiliang University; National University of Singapore)

The 9th IEEE International Conference on Dependability in Sensor, Cloud and Big Data Systems and Applications (DependSys 2023)

Improved Loop Closing with Panoptic Information and Scan Context++ for Accurate Semantic SLAM 1028
Louise Tan (Kumoh National Institute of Technology, Korea) and Heoncheol Lee (Kumoh National Institute of Technology, Korea)

The 2023 International conference on Data, Information, Knowledge and Wisdom, in short (DIKW 2023)

Empowering Personalized Health Data Queries with Knowledge Graph and GPT-Enhanced Voice Assistant 1035
Xin Wang (North Dakota State University, USA), Wordh Ul Hasan (North Dakota State University, USA), Juan Li (North Dakota State University, USA), Rasha Hendawi (North Dakota State University, USA), Yang Du (Valley City State University, USA), Bo Xie (The University of Texas at Austin, USA), and Cui Tao (University of Texas Health Science Center at Houston, USA)

ChatGPT: A Threat to Spam Filtering Systems 1043
Assem Utaliyeva (Pusan National University, Republic of Korea), Millati Pratiwi (Pusan National University, Republic of Korea), HyeGyoung Park (Pusan National University, Republic of Korea), and Yoon-Ho Choi (Pusan National University, Republic of Korea)

Automation of News Content Curation and Storytelling for Local Newsrooms 1051
Kiran Neupane (University of Missouri-Columbia), Hemanth Sai Yeddulapalli (University of Missouri-Columbia), Anirudh Kambhampati (University of Missouri-Columbia), Xiyao Cheng (University of Missouri-Columbia), Roshan Lal Neupane (University of Missouri-Columbia), Ernest L. Kung (Associated Press), Aimee Rinehart (Associated Press), and Prasad Calyam (University of Missouri-Columbia)

Intelligent Maintenance System for Wind Turbine Based on Deep Belief Federated Learning 1059
Hu Xie (Hunan University of Science and Technology, China), Jie Tao (Hunan University of Science and Technology, China), Dalian Yang (Hunan University of Science and Technology, China), Hewen Chen (Hunan University of Science and Technology, China), Zhiying Li (Hunan University of Science and Technology, China), and Shilei Yin (Hunan University of Science and Technology, China)

DIKWP Artificial Consciousness White Box Measurement Standards Framework Design and Practice 1067
FuLiang Tang (Hainan University, China), Yucong Duan (Hainan University, China), Jiali Wei (Hainan Affiliated Hospital of Hainan Medical College, China), Haoyang Che (Hainan University, China), and Yadong Wu (Hainan University, China)

Resource Adjustment Processing on the DIKWP Artificial Consciousness Diagnostic System 1075
Yuxing Wang (Hainan University, China), Yucong Duan (Hainan University, China), Minhui Wang (Hainan Affiliated Hospital of Hainan Medical College, China), Jiali Wei (Hainan Affiliated Hospital of Hainan Medical College, China), Chunyu Zhuang (Haikou Hospital Of The Maternal And Child Health, China), and Yanfei Liu (Tianjin University, China)

Computer Architecture and Chip Design for DIKWP Artificial Consciousness 1083
Kunguang Wu (Hainan University, China), Yucong Duan (Hainan University, China), Liang Chen (Hainan Meteorological Service Center, China), Yingbo Li (Hainan University, China), and Qi Qi (Hainan University, China)

Research on the Application of Blockchain Digital Forensics Architecture Based on the DIKW Graph Model in the Police Forensic Process 1091
Tingwei Liu (Chongqing Police College, China), HeXiang Cheng (Southwest University of Political Science and Law, China), Yanfei Liu (Tianjin University, China), Yucong Duan (Hainan University, China), and Zhenhua Wang (Chongqing Police College, China)

Construction of Anti-Terrorism Intelligence Graph Based on DIKW Framework 1099
Peng Gao (Gansu Police Vocational College, China), Haoran Yuan (Chongqing City Science and Technology College, China), Yanfei Liu (Tianjin University, China), Bowen Mao (Tianjin University, China), Yucong Duan (Hainan University, China), and Zhenhua Wang (Chongqing Police College, China)

An Ontology-Based Method for Heterogeneous Data Governance with MFI and MDR 1106
Zhihong Du (Huazhong Agricultural University, China), Duo Xu (Huazhong Agricultural University, China), Danruo Huang (Huazhong Agricultural University, China), Yuren Hu (Huazhong Agricultural University, China), Keqing He (Wuhan University, China), Chong Wang (Wuhan University, China), Jian Wang (Wuhan University, China), Hong-Yu Zhang (Huazhong Agricultural University, China), Wolfgang Mayer (University of South Australia, Australia), Yucong Duan (Hainan University, China), Ying Wang (Huazhong Agricultural University, China), and Zaiwen Feng (Huazhong Agricultural University, China)

Mitigation of Interference Challenges on Integrated 5GNR and NB-IoT Networks 1114
Lebohang Caswel Tlake (Central University of Technology, South Africa), Elisha Didam Markus (Central University of Technology, South Africa), and Adnan M. Abu-Mahfouz (Council for Scientific and Industrial Research, South Africa)

Professional Capital Generation Process and Value-Added Path of Rural Teachers Based on the DIKWP Model 1120
Lifang Liu (Wuhan University of Technology; Qianhu Academic Silk Road Cultural Exchange Center, China), Xiaojie Wei (Wuhan University of Technology, China), Zike Cao (Wuhan University of Technology, China), Xinya You (Wuhan University of Technology, China), Yucong Duan (Hainan University, China), Ruolin Liu (Qianhu Academic Silk Road Cultural Exchange Center, China), and Xufeng Liu (Huazhong University of Science and Technology, China)

Clinical Application of Remote Fetal Heart Rate Monitoring System for AI Early Warning 1128
Chunyu Zhuang (Haikou Maternal and Child Health Center, China), Xiaojing Chen (Haikou Maternal and Child Health Care Hospital, China), Chunlan Lin (Hainan University, China), Yan Han (Pediatric Intensive Care Unit of Haikou Maternal and Child Health Care Hospital, China), Qingmei Zhang (Haikou Maternal and Child Health Care Hospital, China), and Jiacheng Chen (Hainan General Hospital, China)

The Evolutionary Logic from DIKW to DIKWP and then to Platform Economy DIKICRWPIP 1134
Erxiang Dou (Peking University, China), Ailiu Cheng (Peking University, China), Yucong Duan (Hainan University, China), and Yingtian Mei (Hainan University, China)

A Study of Educational Curriculum Data Utilization Paths Based on the DIKWP Model 1140
Lei Yao (College of Landscape Architecture and Art Design), Lifang Liu (Wuhan University of Technology; Qianhu Academic Silk Road Cultural Exchange Center, China), and Xiaojie Wei (Wuhan University of Technology, China)

Generative Semantic Modeling for Structured Data Source with Large Language Model 1148
Ningpei Ding (Huazhong Agricultural University, China), Wolfgang Mayer (University of South Australia, Australia), Yilin Geng (Huazhong Agricultural University, China), Yucong Duan (Hainan University, China), and Zaiwen Feng (Huazhong Agricultural University; Hubei Hongshan Laboratory; Hubei Three Gorges Laboratory; Hubei Key Laboratory of Agricultural Bioinformatics; Ministry of Agriculture and Rural Affairs, China)

Application of DIKWP Model to Optimize the Allocation of Postgraduate Education Funds 1153
Lifang Liu (Wuhan University of Technology; Qianhu Academic Silk Road Cultural Exchange Center, China), Ruolin Liu (Qianhu Academic Silk Road Cultural Exchange Center, China), and Xufeng Liu (Huazhong University of Science and Technology, China)
