

11th Australasian Congress on Applied Mechanics (ACAM 2024)

Faster, Stronger, Leaner – Advancing
Applied Mechanics for a Resilient and
Sustainable Future

Brisbane, Australia
7 - 9 February 2024

ISBN: 978-1-7138-9492-6

**11th Australasian Congress on Applied Mechanics (ACAM2024). 7-9 February 2024,
Brisbane**

Faster, stronger, leaner – advancing applied mechanics for a resilient and sustainable future.

@Engineers Australia, National Committee of Applied Mechanics

All papers were peer-reviewed.

Index

1. Understanding the Significance of FE Input Parameters on Simulating Fracture Tests of Composites, pp.1-9
2. Micromechanical Modelling of [0m/90n]s Laminates, pp.10-18
3. Additional guidelines of reinforcement in large openings in pressure vessels, pp.19-29
4. Multi-objective evolutionary optimisation of lashing system, pp.30-37
5. Railway Track Buckling Assessment Using Computational Mechanics, pp.38-43
6. High toughness topology optimised lattice structures by porosity constraints, pp.44-58
7. Application of Scaling Subtraction Methods for Characterising Nonlinearity in Disparate Rocks, pp.59-69
8. Remote sensing of reinforced concrete corrosion - multi-sensing with hyperspectral imaging (ACAM 2024), pp.70-80
9. On the elastoplastic behaviour and fracture of graphite and C/C composites: experiments and numerical simulations, pp.81-87
10. A Preliminary Study of Ground Reaction Forces for Summersault Landings: implications for performance and injury risk, pp.88-100
11. A comparison of the wide spectrum dumping and structural behaviour of epoxy and PLA carbon fibre composites, pp.101-112
12. Carbon Fibre Reinforced Bishphenol A Epoxy Composite Structures with Energy Storage Capability, pp.113-121
13. A Two-dimensional Continuum-to-frame Transition Element Based on Substructure Method, pp.122-128
14. Layup Optimisation and Response of Lightweight Composite Tubular Structures under Thermomechanical Loading Conditions using Particle Swarm Optimisation, pp.129-141

15. Development and characterisation of ultra-high temperature ceramics (UHTCs) for extreme operating conditions, pp.142-158
16. Efficient Finite Element Simulation of NCF Composites under Biaxial Loads, pp.159-172
17. Detection of Multiple Cracks in Gears using Transmission Error, pp.173-182
18. Dynamic Interactions of Rail Vehicle-Track-Bridge Due to Track-Bridge Transition Zone Settlement, pp.183-191
19. Lay-up configuration of glass fibre on cyanate ester based shape memory polymer composites, pp.192-200
20. Explainable AI for condition monitoring applications: Potential and challenges, pp.201-214
21. Application of Swirl Generators in The Heat Dump Capacity of Natural Draft Dry Cooling Towers, pp.215-220
22. Acrylonitrile Butadiene Styrene (ABS) membrane for Air Filtration, pp.221-234
23. Evaluation of transmission error for gear diagnostics, pp.235-243
24. Hardness Distribution and Defect Formation in Aluminium Alloys Fabricated via Additive Friction Stir Deposition (AFSD), pp.244-251
25. Estimating railway track geometry using onboard sensors, pp.252-261
26. Time-Domain Nonlinear Ultrasonics for Damage Assessment and Integrity Evaluation of Materials and Structures, pp.262-269
27. Prediction of discrete crack network formation in composite laminates subjected to cyclic thermomechanical loading conditions, pp.270-281
28. Review of Continuum Theories for the Deformation and Failure of Solid-State Electrolytes, pp.282-287
29. TOUGHENING EPOXY POLYMER BY BLOCK COPOLYMER TO MITIGATE MATRIX CRACKING OF CARBON FIBRE COMPOSITES AT CRYOGENIC TEMPERATURES, pp.288-297
30. Thermal Numerical Simulations of the Wire-Arc Additive Manufacturing (WAAM) Process, pp.298-310
31. Effect of fiber sizing levels on the mechanical properties of carbon fiber reinforced thermoset composites, pp.311-329
32. Effect of fiber sizing levels on the mechanical properties of carbon fiber reinforced thermoset composites, pp.330-348
33. Microcracking Resistance of 3D Printed Thermoplastic Composites at Cryogenic Temperatures, pp.349-353
34. On the residual stress measurements for Wire-Arc Additive Manufactured (WAAM-ed) engineering components, pp.354-362
35. Semi-analytical Investigation on the Thermo-Mechanical Buckling and Post-buckling of SMA Laminated Composite Cylindrical Shell with Eccentrically Stiffeners, pp.363-392
36. Enhancing Thermal Stability of Carbon Fiber/Phenolic, pp.393-399
37. Design of heliostats in small scale high quality solar thermal devices, pp.400-406
38. Dynamic Response of Curved and Heterogeneous Granular Metamaterials, pp.407-416

39. Subsea Christmas Trees decommissioning - Neutralising the potential energy of Belleville springs in the valves, pp.417-425
