Volume 12817

Proceedings of SPIE, 1605-7422, V. 12817

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advanced Photonics in Urology 2024*, edited by Hyun Wook Kang, Ronald Sroka, Jian J. Zhang, Proc. of SPIE 12817, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

LASERS AND LIGHT SOURCES FOR THERAPY AND DIAGNOSIS I

- 12817 02 **Biomodulatory effect of a wavelength-dependent laser on prostate cancer in vitro and in vivo** [12817-1]
- 12817 03 **Quartz versus sapphire optical chambers for use in infrared laser sealing of blood vessels** [12817-2]
- 12817 05 **Feasibility of non-ablative photothermal 980nm laser endoluminal treatment for stress urinary incontinence (Best Paper Award)** [12817-4]
- 12817 06 **Evaluations of laser lithotripsy using multiple pulses** [12817-5]

LASERS AND LIGHT SOURCES FOR THERAPY AND DIAGNOSIS II

- 12817 07 **Transient pressure field measurement of Ho:YAG laser in water** [12817-6]
- 12817 08 **Photothermal therapy-mediated with photodynamic therapy to improve prostate cancer treatment** [12817-7]
- 12817 09 **Simultaneous infrared laser sealing and cutting of blood vessels** [12817-8]
- 12817 0A **Efficacy, efficiency, and safety of en-bloc vs. three-lobe enucleation of the prostate: a propensity score-matched analysis** [12817-9]

TISSUE IMAGING FOR DIAGNOSTICS

- 12817 0B **Quantitative evaluation of a new light control algorithm in endoscopy** [12817-10]
- 12817 0D **Metalens design for fiber-optic endoscope** [12817-12]

LASER LITHOTRIPSY

- 12817 0J **Does stone composition impact particle size distribution following laser ablation? (Best Paper Award)** [12817-18]
- 12817 0K **Contribution of cavitation and photothermal effects in laser lithotripsy** [12817-19]

POSTER SESSION

- 12817 0O **Dual-function polymer-based antifog and antibacterial coating for endoscopic applications** [12817-23]
