Volume 12821

Proceedings of SPIE, 1605-7422, V. 12821

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Visualizing and Quantifying Drug Distribution in Tissue VIII*, edited by Kin Foong Chan, Conor L. Evans, Proc. of SPIE 12821, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

PHARMACOKINETIC AND PHARMACODYNAMIC TOMOGRAPHY: IN VIVO AND TRANSLATIONAL RESEARCH

- 12821 02 **Addition of an ECM remodeling drug improves target engagement of immunotherapy in solid pancreatic cancer tumors** [12821-3]
- 12821 03 **Multimodal and multiparametric photoacoustic imaging of chemicals (Invited Paper)** [12821-5]
- 12821 04 **Automated drug detection and dynamic measurement prioritization with medical laser platform (Invited Paper)** [12821-7]

PHARMACOKINETIC AND PHARMACODYNAMIC TOMOGRAPHY IN EX VIVO AND IN VITRO RESEARCH

- 12821 05 **Antibody-target binding quantification in living tumors using macroscopy fluorescence lifetime Forster resonance energy transfer imaging (MFLI FRET)** [12821-12]

ADVANCED METHODS IN PK AND PD IMAGING

- 12821 06 **Evaluate time-course pharmacodynamics in tumor organoid with stress-induced lipofuscin-like autofluorescence (Invited Paper)** [12821-18]
- 12821 07 **Visualization of topical drug delivery with label-free chemical imaging (Invited Paper)** [12821-19]
- 12821 08 **Quantitative tissue biodistribution of fluorescence imaging agents in orthotopic mouse model of head and neck squamous cell carcinoma** [12821-22]

POSTER SESSION

- 12821 09 **Investigating chemotherapy effects on peripheral nerve elasticity** [12821-23]
- 12821 0A **Visualizing functional delivery of gene therapy vectors using whole-body fluorescence cryo-imaging** [12821-26]
