**Volume 12822**

Proceedings of SPIE, 1605-7422, V. 12822

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonic Diagnosis, Monitoring, Prevention, and Treatment of Infections and Inflammatory Diseases 2024*, edited by Tianhong Dai, Jürgen Popp, Mei X. Wu, Proc. of SPIE 12822, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## VIBRATIONAL SPECTROSCOPY BASED DIAGNOSIS

---

12822 02 **Implementation of machine learning study in *Staphylococcus aureus*'s FTIR spectra to antibiotic resistance identification** [12822-1]

---

## FLUORESCENCE BASED DIAGNOSIS

---

12822 03 **Fluorescent imaging cytometer for the detection of inflammation biomarkers using temporally multiplexed illumination** [12822-6]

12822 04 **Plasma fluorochromics for the diagnosis of acute mesenteric ischemia** [12822-8]

---

## FURTHER PHOTONICS-BASED DIAGNOSIS METHODS

---

12822 05 **Quantification of methicillin-resistant *S. aureus* (MRSA) biofilm formation on orthopedic implants using bioluminescence imaging** [12822-11]

12822 06 **Optical coherence tomography-based detection of orthopaedic implant biofilms formed by Methicillin-resistant *S.aureus* (MRSA)** [12822-12]

12822 07 **Challenge-led, values-based interdisciplinary infrastructure for optical probes, devices, and drugs (Invited Paper)** [12822-15]

---

## ANTIMICROBIAL PHOTODYNAMIC THERAPY I

---

12822 08 **Portable red-blue light source for antimicrobial photodynamic therapy of orthopaedic implant biofilms (Invited Paper)** [12822-16]

12822 09 **Improving the photodeactivation efficiency of pathogens using methylene blue with silver nanoparticles and efflux pump inhibitors** [12822-17]

---

## ANTIMICROBIAL PHOTODYNAMIC THERAPY II

---

12822 0A **Exploring photodynamic inactivation to combat antimicrobial resistance** [12822-24]

---

**ULTRAVIOLET C IRRADIATION, COMBINATION THERAPY AND MISCELLANEOUS**

---

- 12822 0B     **The association of light and ultrasound for the disruption of *Staphylococcus aureus* biofilms**  
[12822-34]

---

**POSTER SESSION**

---

- 12822 0C     **Detection and quantification of iodine in biological fluids using photonic-based systems: UV-vis and transmission spectroscopy** [12822-44]
- 12822 0D     **Development of a rabbit osseointegration prosthesis model to investigate biofilm infection and antimicrobial photodynamic therapy** [12822-45]
- 12822 0E     **Measurement and comparison of intracranial compliance in fibromyalgia patients undergoing synergistic photobiomodulation and ultrasound treatment: case comparative study** [12822-46]
- 12822 0F     **Analysis of the spread of bacterial resistance after photodynamic inactivation by minimum inhibitory concentration (MIC)** [12822-50]

---

**DIGITAL POSTER SESSION**

---

- 12822 0G     **Survival traits of *Cronobacter sakazakii* and *Cronobacter maloniticus* exposed to lethal Far-UVC 222nm and blue light 405nm** [12822-29]
