SPIE

Volume 12823

Proceedings of SPIE, 1605-7422, V. 12823

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Methods for Tumor Treatment and Detection: Mechanisms and Techniques in Photodynamic Therapy XXXII*, edited by David H. Kessel, Tayyaba Hasan, Edward V. Maytin, Proc. of SPIE 12823, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ALA-PDT

12823 02 **Preclinical evaluation of a handheld theranostic intraoral device for image-guided PDT treatment of pre-malignant and malignant oral lesions** [12823-5]

DOSIMETRY

12823 03 **Tissue optical properties correction of multispectral singlet oxygen luminescent dosimetry (MSOLD) for Photofrin-mediated photodynamic therapy** [12823-9]

12823 04 **Simulation of the singlet oxygen distribution for Photofrin-mediated photodynamic therapy using patient-specific modeling** [12823-10]

12823 05 **A comparison of multichannel singlet oxygen luminescence dosimetry (MSOLD) and singlet oxygen explicit dosimetry (SOED)** [12823-11]

IMAGE GUIDED DOSIMETRY

12823 07 **Validation of a real-time navigation system for pleural photodynamic therapy with 3D-printed lung phantom and various optical properties** [12823-18]

IMAGING

12823 08 **Assessing reactive oxygen species generation during sonophotodynamic activity using chemical probes** [12823-21]

PRECLINICAL MODELS

12823 09 **Enhanced photodynamic therapy delivery for malignant pleural mesothelioma using 3D-printed models and optical scanning technology** [12823-23]

POSTER SESSION

- 12823 0A **Quantification of protoporphyrin IX in murine pigmented melanoma induced by systemic and topical ALA administration protocols** [12823-17]
- 12823 0B **Evaluation of semisynthetic chlorophyll-a derivatives as photosensitizers in fibroblast cells**
[12823-24]
