**Volume 12824**

Proceedings of SPIE, 1605-7422, V. 12824

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Ophthalmic Technologies XXXIV*, edited by Daniel X. Hammer, Kostadinka Bizheva, Georg Schuele, Proc. of SPIE 12824, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

**NOVEL DEVICES AND METHODOLOGY**

12824 02 **An integrated fixation and stimulus channel for adaptive optics ophthalmoscopy with a large working distance, steering field, dioptric range, and light efficiency** [12824-16]

**LINE AND FULL-FIELD IMAGING**

12824 03 **High-resolution retinal phase gradient imaging using line-scanning laser ophthalmoscopy** [12824-18]

12824 04 **High-contrast and high-speed multimodal imaging platform: the adaptive optics-confocal rolling slit ophthalmoscope (AO-CRSO)** [12824-21]

**FUNCTIONAL METHODS AND OPTORETINOGRAPHY**

12824 05 **Optoretinography reveals comprehensive nanoscopic dynamics of the outer retina in rodents** [12824-27]

12824 06 **Exploring optoretinographic responses of photoreceptor function in disease-affected retinas** [12824-28]

12824 07 **Method for assessing structure and function of cone photoreceptors with multiple outer segment reflections in healthy and diseased eyes** [12824-29]

**ANTERIOR SEGMENT IMAGING AND THERAPIES**

12824 09 **Partial lens refilling to preserve lens accommodation after cataract surgery** [12824-36]

12824 0A **Optical transmission tomography (OTT) in health and disease: uniting micro and macro worlds** [12824-41]

**MACHINE LEARNING AND COMPUTATIONAL METHODS**

12824 0B **Deep learning for automated diagnosis of uveal melanoma** [12824-42]

## COMPACT AND HANDHELD DEVICES

12824 0C **Development of compact mouse retinal imaging system using spectral domain optical coherence tomography (SD-OCT) with a full field stimulation channel for recording fast optoretinograms (ORGs)** [12824-52]

12824 0D **An intelligent and handheld device for early identification of meibomian gland irregularities** [12824-53]

12824 0E **Handheld swept-source OCT angiography for panretinal imaging** [12824-55]

## POSTER SESSION

12824 0F **Characterizing soft contact lens optical zone diameter using a Shack-Hartmann wavefront sensor** [12824-56]

12824 0G **Optimization method for Knox–Thompson paths in phase-based optoretinography** [12824-57]

12824 0H **Adaptive optics two photon microscopy enables in vivo longitudinal visualization of the glaucoma progression with subcellular resolution in the mouse model** [12824-58]

12824 0I **Adaptive vessel tracing and segmentation in OCT enables robust quantification of blood vessel wall-to-lumen ratio in the retina** [12824-61]

12824 0K **Spatial and spectral dependency of trans-palpebral illumination efficiency in widefield fundus photography** [12824-66]

12824 0L **Stray light comparison of different accommodative intra-ocular lenses in pseudophakic eye** [12824-70]

12824 0M **In-vivo real-time imaging of the human cornea and retina with high-speed line-field optical coherence tomography** [12824-72]

12824 0N **Polarization-sensitive investigation of outer retinal OCT bands in the human eye** [12824-76]

12824 0O **Evaluating color efficacy in fundus photography for artificial intelligence classification of retinopathy of prematurity** [12824-79]

12824 0P **Electronically controlled phoropter using low-cost deformable mirrors** [12824-80]

12824 0Q **Wavefront shaping and optical memory effect in ex-vivo cataractous crystalline lenses** [12824-87]

12824 0R **A new automated method for grading retinal tessellation in myopic eyes using fundus images** [12824-88]

12824 0S **A binocular adaptive optics visual simulator with convergence control** [12824-91]

12824 0T **A dual adaptive optics instrument for testing the role of retinal ganglion cells in vision** [12824-96]
