Volume 12825

Proceedings of SPIE, 1605-7422, V. 12825

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Molecular-Guided Surgery: Molecules, Devices, and Applications X*, edited by Sylvain Gioux, Summer L. Gibbs, Brian W. Pogue, Proc. of SPIE 12825, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

IMAGING SYSTEMS AND ADVANCED IMAGING METHODS II

12825 02 **A dual-aperture fluorescence ratio approach to guide margin assessment intraoperatively in head and neck cancer surgery** [12825-15]

PRECLINICAL AND CLINICAL TRANSLATION I

12825 03 **Targeting mucins for fluorescence-guided surgery of pancreatic cancer (Invited Paper)** [12825-21]

12825 04 **Comparing fluorescent contrast agents for fluorescence guided surgery using 3-D cryo-imaging** [12825-24]

PRECLINICAL AND CLINICAL TRANSLATION II

12825 05 **A fatty-acid-based probe for near infrared fluorescence guided surgery of glioblastoma** [12825-30]

PRECLINICAL AND CLINICAL TRANSLATION III

12825 06 **Onward to better surgery - the critical need for improved ex vivo testing and training methods (Invited Paper)** [12825-33]

12825 07 **Ex vivo detection of oral squamous cell carcinoma spread to lymph nodes using paired-agent fluorescence optical tomography: path to clinical translation** [12825-34]

CLINICAL APPLICATIONS

- 12825 08 **Fluorescence guided surgery: lessons to learn from 15 years of clinical perfusion evaluation (Invited Paper)** [12825-39]
- 12825 09 **Quantifying the extravasating distance of fluorescence imaging agent from blood vessels into surrounding tissues** [12825-40]
- 12825 0A **Variation in second-window ICG retention is independent of initial vascular permeability in experimental pancreatic adenocarcinoma tumors** [12825-41]

POSTER SESSION

- 12825 0B **A Monte Carlo study for excitation field in Cherenkov-excited luminescence scanned tomography** [12825-42]
- 12825 0C **Time dependent quantification of paired agent imaging in head and neck squamous cell carcinomas: determining the effects of imaging agent concentrations on binding potential** [12825-44]
- 12825 0D **Deep learning architectures for spatial-frequency 3D fluorescence in oral cancer surgery models** [12825-46]
- 12825 0E **Evaluation of multiple fluorescent agents and intraoperative MRI in a novel pig glioma model for fluorescence guided neurosurgery** [12825-54]
- 12825 0F **Prototype dual-channel fluorescence/transmission optical tomography system for quantification of capillary permeability and porphyrin production** [12825-56]
