**Volume 12827**

Proceedings of SPIE, 1605-7422, V. 12827

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Multiscale Imaging and Spectroscopy V*, edited by Paul J. Campagnola, Darren M. Roblyer, Alex J. Walsh, Proc. of SPIE 12827, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## NEW MULTISCALE TECHNOLOGIES I

---

12827 02 **Using 3D printed optical elements for multifocal image scanning microscopy** [12827-4]

---

## NEW MULTISCALE TECHNOLOGIES II

---

12827 03 **A compact system for multimodal optical tissue analysis via integrated stereo and hyperspectral imaging** [12827-11]

---

## LIGHT AND DATA II

---

12827 04 **Hyperspectral imaging at visible to near-infrared wavelengths with deep learning to rapidly quantify tissue oxygenation, blood, and melanin content** [12827-29]

12827 05 **Development of a multi-scale imaging tool to quantify in vivo metabolic heterogeneity** [12827-31]

---

## POSTER SESSION

---

12827 06 **Fixative induced effects in labeled and unlabeled fluorescence: implications for biomedical imaging studies** [12827-33]

12827 07 **Assessing tissue interrogation volume of an implantable optical sensor using TracePro ray tracing software** [12827-37]

12827 08 **Registration of hyperspectral images and mass spectrometry data for the correlation of tissue optical spectra and molecular profiles** [12827-39]
