Volume 12828

Proceedings of SPIE, 1605-7422, V. 12828

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Neural Imaging and Sensing 2024*, edited by Qingming Luo, Jun Ding, Ling Fu, Proc. of SPIE 12828, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

NEUROTECHNOLOGIES PLENARY

12828 02 **Deep and shallow data science for multi-scale optical neuroscience (Plenary Paper)**
[12828-502]

DIFFUSED OPTICAL IMAGING I

12828 03 **Functional brain activation with dual-slope diffuse optical imaging** [12828-8]

PHOTOACOUSTIC IMAGING

12828 04 **Precise ischemic stroke model inducing method with minimal tissue damage using localized photoacoustic microscopy** [12828-11]

CLINICAL AND TRANSLATIONAL NEUROPHOTONICS

12828 05 **Interstitial photodynamic therapy for malignant gliomas: the Munich experience** [12828-16]

12828 06 **A versatile optode attachment to facilitate rapid hair clearance and better through-hair SNR for wider subject inclusivity with fNIRS** [12828-18]

MICROSCOPY II

12828 07 **Multiorientation mapping of white matter fiber microstructures in whole mouse brains using serial optical coherence tomography** [12828-19]

12828 08 **Injection-permeable cannula for longitudinal in vivo subcortical two-photon microscopy in rodent brains** [12828-23]

BRAIN ACTIVITIES

12828 09 **An implantable optoelectronic probe for monitoring brain tissue oxygenation [12828-24]**

12828 0A **System for simultaneous measurement of fluorescence and hemodynamics (SSMFH) from deep brain regions of freely moving rodents [12828-25]**

DIFFUSED OPTICAL IMAGING II

12828 0B **Evaluating the performance of a large field-of-view wearable diffuse optical tomography system during motion [12828-29]**

POSTER SESSION

12828 0C **Physical activity mitigates dysfunction of the neuro-vascular unit in a mouse model of Alzheimer's disease [12828-37]**
