Volume 12829

Proceedings of SPIE, 1605-7422, V. 12829

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Optogenetics and Optical Manipulation 2024*, edited by Anna W. Roe, Shy Shoham, Proc. of SPIE 12829, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ADVANCES IN INFRARED NEURAL STIMULATION

- 12829 04 **Simultaneous infrared-induced calcium signaling in astrocytes and neurons in mice spinal cord slices** [12829-2]
- 12829 06 **Input-dependent gain modulation of neuronal responses and sensorimotor behavior by mid-infrared stimulation (Invited Paper)** [12829-4]

EMERGING TECHNOLOGIES II

- 12829 0G **Optogenetic control of arterial diameter in three-dimensions in vivo (Invited Paper)** [12829-15]
