SPIE

Volume 12830

Proceedings of SPIE, 1605-7422, V. 12830

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Coherence Tomography and Coherence Domain Optical Methods in Biomedicine XXVIII*, edited by Joseph A. Izatt, James G. Fujimoto, Proc. of SPIE 12830, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

OPHTHALMOLOGY CLINICAL AND PRECLINICAL

- 12830 02 **Novel biomarker for cardiovascular disease by assessing retinal blood vessels with polarization sensitive optical coherence tomography** [12830-8]
- 12830 03 **Blood flow analysis of retinal neovascularisations in a VLDLR mouse model using contrast-enhanced optical coherence tomography** [12830-12]

ADVANCES IN OCT TECHNOLOGY I

- 12830 04 **Green multi-SLED source for high-resolution visible OCT** [12830-20]

POSTER SESSION

- 12830 05 **Robust and automated dispersion compensation for FD-OCT using fractional Fourier transform** [12830-85]
- 12830 06 **Coherence property measurement of MEMS-VCSELs for SS-OCT based on the depth dependence of the noise floor** [12830-86]
- 12830 07 **Optical signal processing in spectral domain OCT using smoothed pseudo Wigner-Ville distribution** [12830-87]
- 12830 08 **Theoretical consideration of maximum numerically correctable defocus of point-scanning and full-field optical coherence tomography** [12830-88]
- 12830 09 **Denoising OCT images using steered mixture of experts with multi-model inference** [12830-91]
- 12830 0A **Real-time correction of nonuniform rotational distortion in endoscopic OCT** [12830-92]
- 12830 0B **An image analysis toolbox for 3D vascular tracing and network topology** [12830-94]
- 12830 0C **Deep learning with late fusion for the identification of early acute radiation dermatitis using in vivo optical coherence tomography (OCT) images of the human head and neck** [12830-97]
- 12830 0D **Whole-eye OCT imaging of refractive errors in genetically modified zebrafish** [12830-101]

- 12830 OE **Fast endoscopic OCTA imaging in mouse rectum using proximal scanning catheter** [12830-103]
- 12830 OF **In vivo imaging of human corneal microstructures using self-interference optical coherence microscopy** [12830-106]
- 12830 OG **Axial super-resolution optical coherence tomography imaging by complex-valued enhanced deep residual network** [12830-120]
- 12830 OH **Mathematical modeling of intracellular and intratissue activities for understanding dynamic optical coherence tomography signals** [12830-121]
- 12830 OI **Diagnosis and assessment of vulvar lichen sclerosus (VLS) using optical coherence tomography angiography** [12830-129]
- 12830 OJ **Super-resolution optical coherence tomography for biomedical applications** [12830-132]
- 12830 OK **Enhancing roll-off performance in SD-OCT with a frequency comb** [12830-135]
- 12830 OL **Contrast-enhanced optical coherence tomography based on spatial frequency analysis applied to the murine cochlea** [12830-136]

CLINICAL APPLICATIONS I

- 12830 OM **Multi-spectral analysis of in vivo optical coherence tomography (OCT) images of colon polyps** [12830-33]

CLINICAL APPLICATIONS II

- 12830 ON **Investigating vascular changes in systemic sclerosis using optical coherence tomography angiography** [12830-35]
- 12830 OO **Hand-held optical coherence tomography endoscope and stitching algorithm for imaging the human cochlea via the round window** [12830-37]
- 12830 OP **Ex-vivo imaging of the human cochlea using 1.7 μ m SS-OCT** [12830-39]

DYNAMIC CONTRAST AND ELASTOGRAPHY I

- 12830 OQ **Enhancement of optical coherence tomography imaging through dynamic light scattering** [12830-53]
- 12830 OR **Quantitative dynamic optical coherence tomography by multi-time-window signal intensity variance** [12830-55]

OPHTHALMOLOGY ANTERIOR EYE

12830 OS **Wide dynamic range digital aberrometry and fast anterior-segment imaging with MHz SS-OCT** [12830-59]

NEUROSCIENCE

12830 OT **Long-term in vivo visualization of cortical blood perfusion after photothrombotic stroke with needle-shaped beam optical coherence tomography angiography** [12830-65]

12830 OU **OCT-based measurement of cerebral blood vessel structure, blood flow velocity, and blood transit time** [12830-66]

DYNAMIC CONTRAST AND ELASTOGRAPHY II

12830 OV **Observing cross-species cross-cancer chemosensitivity signatures with dynamic-contrast OCT** [12830-70]

12830 OW **High-resolution mapping of embryo mechanical properties during development with reverberant OCE** [12830-72]

12830 OX **Dynamic optical coherence tomography strongly enhances contrast in the ex vivo murine cochlea** [12830-73]

12830 OY **In vivo dynamic optical coherence tomography with hardware- and software-based motion correction** [12830-76]

SIGNAL PROCESSING AND MACHINE LEARNING

12830 OZ **Inpainting of detector saturation artifacts in OCT with deep learning** [12830-79]

12830 IO **Blind, all-depth dispersion compensation and blind spectral calibration** [12830-80]
