Volume 12833

Proceedings of SPIE, 1605-7422, V. 12833

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Design and Quality for Biomedical Technologies XVII*, edited by Gracie Vargas, Jeeseong Hwang, T. Joshua Pfefer, Proc. of SPIE 12833, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

DESIGN AND MODELING

12833 02 **Modeling light-tissue interactions in pulse oximetry: effect of device design and skin pigmentation** [12833-4]

DEVELOPING EQUITABLE DEVICES: SKIN PIGMENTATION EFFECTS ON OPTICAL QUALITY

12833 03 **Modification of oximeter ratio to reduce pigmentation bias in pulse oximetry** [12833-11]

12833 04 **Evaluation of pulse oximeter performance under varying skin tones in bench tests and using Monte Carlo simulations** [12833-12]

MULTI-LAYER TURBID MEDIA AND PHANTOMS

12833 05 **Open-source protocol for preparation of turbid phantoms with microsphere suspensions** [12833-18]

POSTER SESSION

12833 06 **Segmental airway phantom for endobronchial optical coherence tomography** [12833-25]

DIGITAL POSTER SESSION

12833 07 **Hydrogel-based standards for single and multiphoton imaging at depth** [12833-6]
