

PROGRESS IN BIOMEDICAL OPTICS AND IMAGING

Vol. 25 No. 24

Biomedical Vibrational Spectroscopy 2024: Advances in Research and Industry

Zhiwei Huang

Editor

27–28 January 2024

San Francisco, California, United States

Sponsored and Published by
SPIE

Volume 12839

Proceedings of SPIE, 1605-7422, V. 12839

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Biomedical Vibrational Spectroscopy 2024: Advances in Research and Industry*, edited by Zhiwei Huang, Proc. of SPIE 12839, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

RAMAN SPECTROSCOPY AND IMAGING IN BIOMEDICAL DIAGNOSIS IV

- 12839 02 **Raman spectroscopic assessment of glycation effect and mechanical damage induced in human cortical bone** [12839-17]
- 12839 03 **Intraoperative tissue identification for gastrointestinal disorder by Raman spectroscopy and machine learning** [12839-18]

RAMAN MICROSCOPY AND IMAGING II

- 12839 04 **A compact, turn-key platform for multiplex stimulated Raman scattering microscopy** [12839-28]

SENSITIVE VIBRATIONAL SPECTROSCOPY AND BIOSENSING I

- 12839 05 **Chiral sensing of glucose by surface-enhanced Raman spectroscopy** [12839-31]

SENSITIVE VIBRATIONAL SPECTROSCOPY AND BIOSENSING II

- 12839 06 **In vivo permeation study of nanoencapsulated cannabidiol through the human skin by confocal Raman spectroscopy (Invited Paper)** [12839-39]
- 12839 07 **Modeling transcutaneous Vis-NIR spectroscopy of metacarpal bone** [12839-35]

POSTER SESSION

- 12839 08 **Human glioma tumor diagnosis using visible resonance Raman spectroscopy and deep learning** [12839-37]
- 12839 09 **Confocal Raman spectroscopy study of hair fiber: oil permeation** [12839-40]
