SPIE

Volume 12851

Proceedings of SPIE, 1605-7422, V. 12851

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Adaptive Optics and Wavefront Control for Biological Systems X*, edited by Thomas G. Bifano, Na Ji, Lei Tian, Proc. of SPIE 12851, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

COMPUTATIONAL ADAPTIVE OPTICS I

12851 02 **Direct access to optical aberration information in fluorescence laser scanning microscopy using detector arrays** [12851-3]

COMPUTATIONAL ADAPTIVE OPTICS II

12851 03 **Coordinate-based neural representations for computational adaptive optics in two-photon microscopy** [12851-9]

12851 04 **Scattering matrix tomography: volumetric deep imaging with digital wavefront corrections (Invited Paper)** [12851-7]

FRONTIERS IN ADAPTIVE OPTICS HARDWARE I

12851 05 **Laser-written tunable liquid crystal aberration correctors** [12851-15]

NOVEL APPLICATIONS I

12851 06 **Multi-photon fluorescence microscopy with adaptive optics** [12851-25]

12851 07 **Binary wavefront manipulation using an epi-detected SHG guidestar** [12851-27]

NOVEL APPLICATIONS II

12851 08 **Imaging through shape sensing fiber** [12851-31]
