Volume 12853

Proceedings of SPIE, 1605-7422, V. 12853

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Speed Biomedical Imaging and Spectroscopy IX*, edited by Kevin K. Tsia, Keisuke Goda, Proc. of SPIE 12853, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

4D IMAGING

12853 02 **6D single-fluorogen orientation-localization microscopy for elucidating the architecture of beta-sheet assemblies and biomolecular condensates (Invited Paper)** [12853-2]

COMPUTATIONAL

12853 03 **Towards high-speed computational scattered light imaging by introducing compressed sensing for optimized illumination** [12853-8]

FLUORESCENCE/MULTIPHOTON I

12853 04 **On-chip hyperspectral detectors for fluorescence lifetime imaging** [12853-10]

NOVEL TECHNIQUES

12853 05 **Enabling single photon imaging at kHz frame rates using digital holography** [12853-22]

FLOW CYTOMETRY

12853 06 **High-power VECSEL with intracavity UV generation for flow cytometry applications** [12853-26]

AI/AUTOMATION

12853 08 **Automated single-molecule imaging for drug discovery (Invited Paper)** [12853-34]

12853 09 **Necessary or extravagant? Investigating the worth of artificial intelligence in image-activated sorting of *Saccharomyces cerevisiae*** [12853-37]

12853 0A **Fast and accurate discrimination high-speed Raman imaging combined with multi-armed bandit algorithm in reinforcement learning** [12853-38]

POSTER SESSION

- 12853 0B **Increasing efficiency, throughput and purity of Drop-seq through detection and sorting of correctly configured droplets [12853-41]**
- 12853 0C **Intestinal anastomosis automation through diffuse reflectance spectroscopy: towards real time guidance during robotic surgery [12853-42]**
- 12853 0D **Optimization of a real-time LED based spectral imaging system [12853-43]**
- 12853 0E **Nanotechnology-based analytics 4.0: an approach for real-time spectroscopic monitoring and rapid detection of SARS CoV-2 [12853-44]**
