Proceedings of SPIE, 1605-7422, V. 12856

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Biomedical Applications of Light Scattering XIV*, edited by Adam Wax, Vadim Backman, Proc. of SPIE 12856, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

CLINICAL

- 12856 02 **Opto-physiological monitoring sensor to enable accurate physiological monitoring in real time and at any time** [12856-3]
- 12856 03 **Endoscopic light scattering spectroscopy for in vivo detection of pre-cancer in bile duct (Invited Paper)** [12856-5]

SPECKLE AND FLOW

- 12856 04 **Multi-exposure speckle imaging through an optical fiber bundle** [12856-18]

SUNDAY POSTER SESSION

- 12856 05 **The use of speckle decorrelation OCT to detect nanobubbles in cell pellet aggregates** [12856-22]
- 12856 06 **Time-resolved light transport in structurally anisotropic media** [12856-28]
- 12856 08 **A comparative study of analytical tissue reflectance models using simulated and experimental data** [12856-30]

TUESDAY POSTER SESSION

- 12856 09 **Tumour polyp detection using random lasing** [12856-24]
