

PROCEEDINGS OF SPIE

Gallium Nitride Materials and Devices XIX

**Hiroshi Fujioka
Hadis Morkoç
Ulrich T. Schwarz**
Editors

**29 January – 1 February 2024
San Francisco, California, United States**

Sponsored and Published by
SPIE

Volume 12886

Proceedings of SPIE 0277-786X, V. 12886

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Gallium Nitride Materials and Devices XIX*, edited by Hiroshi Fujioka, Hadis Morkoç, Ulrich T. Schwarz, Proc. of SPIE 12886, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

GROWTH I

12886 02 **Challenges and prospects of ammonothermal GaN crystal growth and substrate fabrication (Invited Paper)** [12886-2]

CHARACTERIZATION I

12886 03 **Surface passivation of GaN micropillar structures through KOH wet etch** [12886-14]

CHARACTERIZATION III

12886 04 **Defects in nitride semiconductors as seen by positrons (Invited Paper)** [12886-18]

12886 05 **Longitudinal optical (LO) and LO-like phonon resonant mid-infrared radiation emission and absorption by surface micro-structures on III-nitrides (Invited Paper)** [12886-20]

12886 06 **InGaN-based Micro-LEDs: enhancing efficiency and speed for next-generation visible light communication applications (Invited Paper)** [12886-49]

NEW DEVICES

12886 07 **InGaN photovoltaic cells for applications in laser power beaming** [12886-24]

12886 08 **Demonstration of ultraviolet III-nitride laser diode with an asymmetric waveguide structure** [12886-26]

LASE DIODES III

12886 09 **Development of highly efficient blue and green edge-emitting laser diodes (Invited Paper)** [12886-40]

12886 0A **The crucial role of InAlN for blue and green LDs and SLEDs with low power consumption (Invited Paper)** [12886-41]

LED II

12886 0B **Crack-free growth of UVC LEDs on 6-inch sapphire substrates using face-to-face high-temperature annealed AlN by production scale MOCVD (Invited Paper)** [12886-52]

LED III

12886 0C **Influence of V-pits on the electro-optical properties of high-periodicity InGaN MQWs** [12886-56]

LED IV

12886 0D **Carrier localization induced size-immunity behavior of green InGaN/GaN micro-light-emitting diodes** [12886-60]

12886 0E **Optical and electrical noise in RGB LEDs in the mHz to kHz frequency band** [12886-61]

POSTER SESSION

12886 0F **ArF excimer laser activation of Mg-doped GaN small area mesa device** [12886-63]
