SPIE

Volume 12900

Proceedings of SPIE 0277-786X, V. 12900

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Emerging Digital Micromirror Device Based Systems and Applications XVI*, edited by John Ehmke, Benjamin L. Lee, Proc. of SPIE 12900, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

BIOMEDICAL IMAGING USING A DMD OR OTHER SLM I: JOINT SESSION WITH CONFERENCES 12846 AND 12900

- 12900 02 **Diffraction-gated real-time ultrahigh-speed mapping photography using a digital micromirror device** [12900-2]
- 12900 03 **System for optical characterization of an object's zone of interest for ophthalmology** [12900-3]

ADVANCED MANUFACTURING USING A DMD OR OTHER SLM II: JOINT SESSION WITH CONFERENCES 12898 AND 12900

- 12900 04 **Polymeric graded-index lenses via digital light processing vat photopolymerization additive manufacturing** [12900-5]
- 12900 05 **Illumination design for high-contrast, high-power UV DLP projector** [12900-7]
- 12900 06 **3D additive lithography for electronics towards highly integrated freeform structural electronics (Best Paper Award)** [12900-8]

METROLOGY

- 12900 07 **Optimal focal stack capturing strategy in large depth-of-field microscopic structured-light 3D imaging system** [12900-11]

DISPLAY SOLUTIONS

- 12900 08 **A personal retrospective on the development of the DLP and related spinoffs (Invited Paper)** [12900-14]
- 12900 09 **The HEP DMD: a new DLP pixel optimized for performance** [12900-15]
- 12900 0A **Diffraction-based glasses for visually impaired people (Best Student Paper Award)** [12900-16]

NOVEL AND ADVANCED APPLICATIONS

- 12900 0B **DMD-based additive manufacturing: spatiotemporal properties and motion-assisted image projection methods (Invited Paper)** [12900-18]
- 12900 0C **Two-dimensional solid-state diffractive beam steering by digital micromirror devices** [12900-22]

TI MEMS PLM

- 12900 0D **Optimizing a micro electro mechanical system (MEMS) based phase-only light modulator (PLM) for improved system performance** [12900-23]
- 12900 0E **Exploring the loading sequence of the phase light modulator to suppress the zero-order diffraction beam** [12900-24]
- 12900 0F **Digital phase conjugation by Texas Instruments PLM for near-to-eye display** [12900-26]

DIGITAL POSTER SESSION

- 12900 0G **Colorful field sequence laser display and pixel alignment method based on single-chip phase light modulator device** [12900-25]
- 12900 0H **Laser light illumination modulation and HDR implementation method based on PLM device** [12900-28]
