**Volume 12901**

Proceedings of SPIE 0277-786X, V. 12901

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Complex Light and Optical Forces XVIII*, edited by David L. Andrews, Enrique J. Galvez, Halina Rubinsztein-Dunlop, Proc. of SPIE 12901, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## OPTICAL AND ACOUSTIC MANIPULATION

---

12901 02 **Thunder and lightning: a revolution in wave-matter interactions (Keynote Paper)** [12901-1]

12901 03 **Optical trapping and binding of mixed refractive index particles** [12901-3]

---

## TRAPPING

---

12901 04 **An exploration of periodic array of isosceles triangle motifs optimized for large lateral optical forces** [12901-7]

---

## SKYRMIONS

---

12901 05 **A topological approach for characterising optical skyrmions (Invited Paper)** [12901-8]

12901 06 **Visible skyrmion praseodymium laser in red and orange** [12901-10]

---

## COMMUNICATIONS

---

12901 07 **Advanced 4f-based free-space optical system** [12901-23]

12901 08 **OAM modes classification and demultiplexing via Fourier optical neural network** [12901-22]

12901 09 **3D laser-nanoprinted meta-optics: a breakthrough photonic platform for wavefront shaping and molecular sensing (Invited Paper, 3D Printing Best Paper Award in OPTO)** [12901-21]

---

## OAM GENERATION

---

12901 0A **Optical vortex generations from cylindrically structured crystals (Invited Paper)** [12901-26]

12901 0B **Azo-functionalized copolymer holograms for efficient generation of vector beams** [12901-27]

#### LIGHT-MATTER INTERACTIONS

---

12901 0C     **Structured light interacts with layered semiconductor materials (Invited Paper)** [12901-30]

12901 0D     **Spatially-dependent dark states in cold atomic vapours** [12901-32]

#### CHIRALITY

---

12901 0E     **How to twist, turn, and kick ions using structured light (Invited Paper)** [12901-36]

12901 0F     **Chiral-stress-energy-momentum tensor for covariant description of spin and torque densities of light** [12901-39]

#### COMPLEX LIGHT

---

12901 0G     **Long-distance structured laser beams created by optical aberrations** [12901-45]

#### LIGHT SHAPING

---

12901 0H     **Analysis of polarization diffractive patterned polarizers and retarders** [12901-47]

12901 0I     **Comprehensive Fourier-based description of complex optical vortex fields** [12901-50]
