Volume 12913

Proceedings of SPIE 0277-786X, V. 12913

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Architectures for Displays and Sensing in Augmented, Virtual, and Mixed Reality (AR, VR, MR) V*, edited by Naamah Argaman, Hong Hua, Daniel K. Nikolov, Proc. of SPIE 12913, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

DIFRACTIVE COMBINER TECHNOLOGIES

- 12913 02 **Maxwellian view system with LBS light engine and metasurface waveguide for AR waveguide display** [12913-1]
- 12913 03 **Novel reflective SLM in real holographic 3D HUD displays and their impact on quality** [12913-2]
- 12913 04 **Achromatic diffractive liquid-crystal optics for VR displays** [12913-6]
- 12913 05 **PixNIL high index nanocomposite materials with improved processability for large volume manufacturing** [12913-131]

MULTIPLEXED AND SWITCHABLE DISPLAYS

- 12913 06 **Dual-sided mixed reality near-eye display using dihedral corner reflector array** [12913-7]
- 12913 07 **FOV expansion by polychromatic light source for holographic near-to-eye display** [12913-8]
- 12913 08 **Holographic see-through display system with 3D/2D switchable modes based on liquid-crystalline lens array and one-shot learning model** [12913-9]
- 12913 09 **Breaking the efficiency limit of pancake optics in virtual reality** [12913-11]
- 12913 0A **Full-color, wide FoV single waveguide AR displays leveraging polarization multiplexing reflective polarization holograms** [12913-10]

VISUAL SYSTEM CENTRIC DISPLAYS

- 12913 0B **Video see-through super multi-view near eye display using waveguide-type light source and ferroelectric liquid crystal on silicon** [12913-13]
- 12913 0C **Foveated holographic near-eye display with geometric phase lens and camera feedback** [12913-14]
- 12913 0D **Wearable and see-through visual simulator based on liquid crystals** [12913-15]
- 12913 0E **Prescription in AR/VR: a holistic design approach** [12913-70]

COMBINER DESIGN AND SIMULATION TECHNIQUES

- 12913 0F **Analyzing exit pupil expansion induced interference in diffractive AR waveguide combiners** [12913-16]
- 12913 0G **Improved AR waveguide hologram model for accurate exit pupil expander simulation using the RCWA method** [12913-17]
- 12913 0H **Geometric waveguide optimization for ghost reduction in near-eye light field display** [12913-19]

VERGENCE ACCOMMODATION AND PERCEPTION IMPROVEMENTS

- 12913 0I **AutoColor: learned light power control for multi-color holograms** [12913-20]
- 12913 0J **Breaking the near-vision barrier with focus tunable lenses: addressing vergence-accommodation conflict in AR, VR, and MR systems** [12913-22]

EYE, HAND, AND WORLD TRACKING

- 12913 0K **A hybrid high speed eye tracking sensor by fusion of video oculoigraphy and laser feedback interferometry** [12913-25]
- 12913 0L **Using autofocus data for 3D hand interaction** [12913-28]
- 12913 0M **Global 3D mapping with enhanced camera pose estimation using auxiliary projector** [12913-29]

NEXT GEN MICRO DISPLAYS I

- 12913 0N **10,000 dpi 0.18in low-power OLED microdisplay utilizing a new flexible architecture in 28nm CMOS technology** [12913-30]
- 12913 0O **The next generation of DLP Pico technology for augmented reality (AR) displays** [12913-31]
- 12913 0P **Compact RGB module with blue, green LDs and red SLED and collinearly aligned collimated output beams** [12913-32]

NEXT GEN MICRO DISPLAYS II

- 12913 0Q **Laser power saving for AR see-through displays** [12913-34]
- 12913 0R **Small and scalable laser source for AR glasses by hybrid integration of silicon nitride PIC technology** [12913-36]
- 12913 0S **Red, green, and blue edge-emitting devices for beam scanning light engine architectures: from single emitters to arrays** [12913-37]

FABRICATION AND PROCESS FOR XR TECHNOLOGY

- 12913 0T **End-to-end process control for AR waveguides** [12913-38]
- 12913 0U **Fabricating a complete set of Bayfol HX vHOE's with applications in see through displays using free space recording techniques** [12913-41]
- 12913 0V **Durability evaluation of repeated imprint using working stamp: influence of productivity for diffractive optical elements** [12913-43]
- 12913 0W **Nanoimprint lithography compatible high refractive index optical materials for photonic applications** [12913-52]

IMAGE QUALITY AND PERCEPTION

- 12913 0X **Sequence ray trace for efficient and robust stray light analysis** [12913-53]
- 12913 0Y **Image quality and brightness tradeoffs in augmented reality waveguide displays** [12913-54]
- 12913 0Z **Safety assessment of virtual reality eye tracking modules** [12913-55]
- 12913 10 **Are you still watching? Assessing internal and external attention in AR using wearable brain sensing glasses** [12913-130]

METROLOGY AND MEASUREMENT TOOLS I

- 12913 11 **Improving AR metrology: cost and risk cuts via optical referencing innovation** [12913-44]
- 12913 12 **Light measurement and quality control at different production stages of a virtual reality headset** [12913-45]

METROLOGY AND MEASUREMENT TOOLS II

- 12913 13 **Helmet-mounted display binocular alignment measurement tool** [12913-47]
- 12913 14 **Simulation-based computation of the glare spread function in camera systems** [12913-48]
- 12913 15 **Rapid thickness and profile measurement of bonded multi-layer structures** [12913-127]

OPTICAL DESIGN CHALLENGE

- 12913 16 **Breaking the efficiency limit of pancake optics in virtual reality** [12913-702]

POSTER SESSION

- 12913 17 **2D imaging light spectrometry measurement for the evaluation of AR/VR display devices**
[12913-56]
- 12913 18 **Plastic polarizing beam splitter combiner and anamorphic intermediate image optical system for AR glasses** [12913-57]
- 12913 19 **Exit pupil expander with non-hexagonal 2D grating** [12913-59]
- 12913 1A **Straightforward method for sidewall roughness measurements by AFM on ion beam etched slanted diffraction gratings and their topography development** [12913-60]
- 12913 1B **Illumination uniformity control of EPE using PVG on AR waveguide design** [12913-61]
- 12913 1C **Computational hologram optimization for large holographic displays using eye pupil position**
[12913-62]
- 12913 1D **Exploring the boundaries of large-area nanoimprinting for mass production of AR waveguides**
[12913-63]
- 12913 1E **High-refractive-index polymers with high transparency** [12913-64]
- 12913 1F **Optimizing metalens designs for wide-angle applications** [12913-65]
- 12913 1G **An integrated virtual system for monitoring operations on the railway** [12913-72]
- 12913 1H **Underground mine emergency evacuation planning: AR implementation and case study**
[12913-74]
- 12913 1I **Two-dimensional multi-domain field-of-view expansion by MEMS SLM for near to eye display**
[12913-75]

- 12913 1J **Human-centric image quality assessment for head-mounted display (HMD) devices** [12913-81]
- 12913 1K **Study on the releasing process of tilted grating structure for AR glasses using nanoimprint**
[12913-129]
